ADMINISTRATIVE COMMENT
CAPITAL IMPROVEMENTS OTHER - JULY 2014

Funding Source:

366-00 Drainage Impact Fees

Mandatory Drainage Impact Fees

In recent years, much development has occurred in the La 1077 and La1085 vicinity. As a result, most of the natural drainage patterns have been disrupted causing issues with commercial and residential properties. The purpose of the study is to investigate the existing drainage patterns, identify problems and the causes. Once this has been established, the consultant will make recommendations to the Parish on projects to relieve the drainage issues for the present and future. The tasks will include: 1. A topographic survey of the drainage basin, including cross sections on the creeks and existing drainage structures. 2. Developing and running a model of existing conditions and then conditions with improvements in place. 3. Developing Construction Plans, Specifications and Cost Estimates for the improvements.
