#### GENERAL INFORMATION

##### ACCESS ROAD INFORMATION

**Type:** Parish

**Road Surface:** 1 Lane Asphalt

**Condition:** Good

##### LAND USE CONSIDERATIONS

##### SURROUNDING LAND USE AND ZONING:

<u>Direction</u>	<u>Surrounding Use</u>	<u>Surrounding Zone</u>
North	Residential and Undeveloped	A-1A Suburban District, A-4 Single-Family Residential District, and MHO Manufactured Home Overlay
South	Residential and Undeveloped	A-1A Suburban District
East	Residential and Undeveloped	A-1A Suburban District
West	Residential	A-1A Suburban District

##### EXISTING LAND USE:

**Existing development:** No

**Multi occupancy development:** No

##### COMPREHENSIVE PLAN:

**Residential** - Areas that provide for dwelling units. Such areas may vary in site design, structure design, and in the density of units per acre. Certain areas such as “village or town residential” may include mixed uses and would have the highest number of units per acre, while “Rural residential” would have the lowest number of units per acre, and may include agricultural or open space uses as well. In between these two types of residential areas would be varying levels of single-family detached dwellings, multi-family attached residential, and planned subdivisions for manufactured homes.

**Conservation** - Areas designated for uses of land, water, flora and fauna that appear naturally. Such uses may include such activities as extraction or production for commerce; human enjoyment, hunting, fishing, or other recreation within natural landscapes; or preservation of natural systems. The concept of “conservation” includes a private landowner’s understanding of responsibility to wisely manage that resource so that it remains in good condition for future generations (often simple referred to as “good stewardship”); this concept may also include the conservation of energy through efficient transportation options as well as through climate responsive building design, as well as the conservation of historic, scenic, or otherwise serviceable buildings and landscapes. Means to achieve conservation are myriad and include both private and public sector initiatives – such means will be considered in subsequent phases of the New Directions 2025 planning process.

##### STAFF COMMENTS:

The petitioner is requesting to change the zoning classification from PUD Planned Unit Development Overlay to A-1 Suburban District and RO Rural Overlay. The site is located on the east side of Bremerman Road, south of Louisiana Highway 190, Lacombe. The 2025 Future Land Use Plan designates the site to be set aside for conservation areas as well as developed with residential uses that vary in site design and density.

The petitioned property was the subject of a previous zoning change from SA Suburban Agriculture District to C-2 Highway Commercial District and PUD Planned Unit Development District (Case No. ZC95-05-036). While the site was rezoned to accommodate a planned nature retreat, the design was never realized and the property is presently undeveloped. The current request is to rezone the property to accommodate potential residential and agricultural uses. Staff is not opposed to this request as it congruent with the site’s comprehensive plan designations and is appropriate for the area.
