LAND USE CONSIDERATIONS

SURROUNDING LAND USE AND ZONING:

<u>Direction</u>	<u>Surrounding Use</u>	<u>Surrounding Zone</u>
North	Residential/Undeveloped	A-2 Suburban District and A-4 Single-Family Residential District
South	Residential	A-2 Suburban District and A-3 Suburban District
East	Residential/Undeveloped	A-3 Suburban District
West	Residential	A-4 Single-Family Residential District

EXISTING LAND USE:

Existing development: No	Multi occupancy development: No
---------------------------------	--

COMPREHENSIVE PLAN:

Planned Districts - Coordinated development on several parcels, usually at a higher density – but not in all cases - than other parcels in the proximity, planned in an integrated fashion as single units including residential, commercial and possibly other (institutional, recreational, *e.g.*) uses, as well as the supporting infrastructure and public services they will require (*See “Small Area Plans,” below*). Generally, such developments improve environmental qualities, preserve natural environments, provide for open space and recreational uses, and for residential as well as commercial uses, and are equipped with central utility systems and efficient and effective internal and external transportation access in multiple modes.

Single Family Residential – Conservation - These planned districts would include clustered single-family residential uses, at a density – within the overall tract – which is similar to that of adjoining residential uses, and conservation areas, following a Small Area Plan, and providing for balance, compatibility and integration of uses and all supporting infrastructure. Such individual Planned Residential – Conservation developments should aim to achieve contiguity among adjoining conservation areas in adjacent developments.

Conservation - Areas designated for uses of land, water, flora and fauna that appear naturally. Such uses may include such activities as extraction or production for commerce; human enjoyment, hunting, fishing, or other recreation within natural landscapes; or preservation of natural systems. The concept of “conservation” includes a private landowner’s understanding of responsibility to wisely manage that resource so that it remains in good condition for future generations (often simple referred to as “good stewardship”); this concept may also include the conservation of energy through efficient transportation options as well as through climate responsive building design, as well as the conservation of historic, scenic, or otherwise serviceable buildings and landscapes. Means to achieve conservation are myriad and include both private and public sector initiatives – such means will be considered in subsequent phases of the New Directions 2025 planning process.

SUBDIVISION INFORMATION:

The petitioner is requesting a Major Amendment to the La Chenier Planned Unit Development to reconfigure lot sizes and greenspace allocations. The site is located on the north side Bay Ridge Drive and east of Leeds Street, Slidell. The 2025 Future Land Use Plan designates the site to be developed as a Planned District with single-family development and conservation areas. The applicant is proposing to develop the site with single-family residential uses as well as to allocate 58.554 58.98 acres to remain as greenspace and a conservation area for the preservation of the natural landscape.

DENSITY AND LOT SIZES

Phase 1 of the La Chenier PUD consists of 40 duplex lots and has been developed with 80 condominiums with an average lot size of 100 ft. x 120 ft. Phase 2 of the La Chenier PUD currently consists of 81 duplex lots approved to be developed with a total of 162 condominium units that averaged 50 ft. x 120 ft.

The applicant is currently proposing to reconfigure the 81 duplex lots within Phase 2 into single-family residential lots that average 100 ft. x 120 ft. The proposed amendment will create a reduction of the number of dwellings permitted in the La Chenier PUD, Phase 2 by 81 lots and enable single-family dwellings to be the only permitted residential use. The amendment will also allow for a variety of residential uses within the same development site.

GREENSPACE

The original La Chenier Planned Unit Development consisted of 109.98 acres, ~~58.554~~ 58.98 acres of which was dedicated to greenspace, park area, and natural trails. In 2007, 11.40 acres of the La Chenier greenspace was developed to be included with the neighboring Phase 5-A of The Bluffs subdivision. Subsequently, the applicant is now proposing to formally add 14.22 acres of greenspace into the La Chenier PUD that was previously dedicated as a Conservation Easement.

Additionally, the applicant is proposing to remove the 10 ft. greenspace buffer that was previously approved along the northern boundary of Phase 2 which totals 1.43 acres. The reason for this request is to add this portion of greenspace into the lots along the north which will create deeper lot sizes. Staff has determined that this request will cause access issues to the .80-acre greenspace area that is left in this area. While the common areas and green spaces are dedicated to be maintained by the La Chenier Homeowners Association, the eradication of the 10 ft. buffer will remove any formal access to this area to be maintained.

If the current request for a Major Amendment is accomplished, the total acreage for the La Chenier PUD will be 93.3 acres which will require 23.33 acres of greenspace. The current PUD plan provides ~~58.554~~ 58.98 acres of greenspace and park area which is more than two-times what is required.

In addition, the applicant has submitted a revised PUD Plan that shows the elimination of part of Royston Drive which will remove formal access along this roadway between Phase 1 and Phase 2. This elimination has provided a total of .426 acres of additional greenspace.

STAFF COMMENTS

The 2025 Future Land Use Plan designates the petitioned site to be used for conservation purposes. As such, the requested PUD should ensure that the green space provided is useable, protected, and adheres to the primary purpose of the PUD ordinance.
