##### LAND USE CONSIDERATIONS

##### SURROUNDING LAND USE AND ZONING:

<u>Direction</u>	<u>Surrounding Use</u>	<u>Surrounding Zone</u>
North	Residential and Undeveloped	A-1 Suburban District A-1A Suburban District
South	Residential and Undeveloped	A-1 Suburban District
East	Undeveloped	A-1 Suburban District
West	Undeveloped	A-1 Suburban District

##### EXISTING LAND USE:

**Existing development:** No

**Multi occupancy development:** No

##### COMPREHENSIVE PLAN:

**Planned Districts** - Coordinated development on several parcels, usually at a higher density – but not in all cases – than other parcels in the proximity, planned in an integrated fashion as single units including residential, commercial and possibly other (institutional, recreational, *e.g.*) uses, as well as the supporting infrastructure and public services they will require (*See “Small Area Plans,” below*). Generally, such developments improve environmental qualities, preserve natural environments, provide for open space and recreational uses, and for residential as well as commercial uses, and are equipped with central utility systems and efficient and effective internal and external transportation access in multiple modes.

**Single Family Residential** – Conservation - These planned districts would include clustered single-family residential uses, at a density – within the overall tract – which is similar to that of adjoining residential uses, and conservation areas, following a Small Area Plan, and providing for balance, compatibility and integration of uses and all supporting infrastructure. Such individual Planned Residential – Conservation developments should aim to achieve contiguity among adjoining conservation areas in adjacent developments.

**Conservation** - Areas designated for uses of land, water, flora and fauna that appear naturally. Such uses may include such activities as extraction or production for commerce; human enjoyment, hunting, fishing, or other recreation within natural landscapes; or preservation of natural systems. The concept of “conservation” includes a private landowner’s understanding of responsibility to wisely manage that resource so that it remains in good condition for future generations (often simple referred to as “good stewardship”); this concept may also include the conservation of energy through efficient transportation options as well as through climate responsive building design, as well as the conservation of historic, scenic, or otherwise serviceable buildings and landscapes. Means to achieve conservation are myriad and include both private and public sector initiatives – such means will be considered in subsequent phases of the New Directions 2025 planning process.

##### STAFF COMMENTS:

The petitioner is requesting to change the zoning classification from A-1 Suburban District to A-1 Suburban District and MHO Manufactured Housing Overlay. The site is located on the east side of Press Sharp Road, north of LA Highway 40, Bush. The 2025 Future Land Use Plan designates the site to be developed as planned district that could be mixture of both commercial and residential buildings as well as a conservation area to protect the natural environment.

The subject property is surrounded by stick-built homes and undeveloped land. There is one 7.99-acre parcel of land located to the North and West of the site with MHO Manufactured Home Overlay.
