 - a. The general implementation plan shall follow the procedures for approval of planning items before the planning commission and zoning cases before the zoning commission and the council which are not in conflict with this section.
 - b. At least 14 days prior to review and determination by the commissions, all abutting property owners shall be notified by regular mail of the traditional neighborhood development and given an opportunity to submit written comments. Notice shall also be published in the parish's official journal at least ten days prior to the review.
 - c. Following required public notice, the commissions shall hold a public hearing on the proposed traditional neighborhood development. Following the hearing, the commissions shall review traditional neighborhood development request and general implementation plan and any comments submitted by any adjoining property owners and shall make a recommendation to the council to approve, approve with conditions, or deny the general implementation plan. In its recommendation to the council, the commissions shall include the reasons for such recommendation.
- (2) *Approval of a general implementation plan.*
 - a. After receiving the recommendation of the commissions, the council shall review the application, including the general implementation plan, the record of the commissions' proceedings and the recommendation, and shall approve, approve with conditions, or deny the application in accordance with the standards and purposes set forth in sections 130-1487, 130-1488, and 130-1490. An approval with conditions shall not be considered final (and the rezoning is not final until such time) until the applicant submits a written acceptance of the conditions and all necessary revisions to the general implementation plan to the council.
 - b. If approved by the council, the general implementation plan and all other information and material formally submitted with the application shall be adopted as an amendment to this development code and shall become the standards of development for the traditional neighborhood development. All future development shall conform to the standards adopted for the traditional neighborhood development regardless of changes in ownership.

- c. Upon approval of the general implementation plan, the property shall be designated "TND-2 Planned" on the official zoning map.

(Code 1998, app. C, § 5.3510A; Ord. No. 07-1548, § 5.3510A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1497. Specific implementation plan and final plat.

(a) *Submittal.* Within 36 months of the council's approval of the general implementation plan, and except as permitted under general implementation plan approval, the applicant shall submit a specific implementation plan to the director of planning and development prior to commencing construction on property designated "TND-2 Planned." The applicant may request an extension of up to 12 additional months from the council if the specific implementation plan has not been approved. If the applicant fails to submit a specific implementation plan within the time allowed, then the general implementation plan (not the "TND-2 Concept" designation) shall be invalid. If the traditional neighborhood development is to be developed in phases, the applicant must submit a specific implementation plan for the first phase within 36 months of the council's approval of the general implementation plan, and within consecutive 12-month periods thereafter for each subsequent phase. If the applicant fails to submit a specific implementation plan, then the general implementation plan incorporating all phases not already approved as a specific implementation plan shall be invalid. The specific implementation plan shall contain all information required in the specific implementation plan checklist.

(b) *Certification.* The following design professionals shall certify direct involvement in the preparation of the specific implementation plan. A final plat shall be certified by:

- (1) An architect or civil engineer; and
- (2) A landscape architect.

(c) *Final plat.*

- (1) A final plat shall be submitted with the specific implementation plan, drawn in ink to a scale of one inch equals 100 feet in one or more sheets whose dimensions are 24 inches by 36 inches, and contain the information required by chapter 125.
- (2) The title of the final plat shall read "Final Plat of [Name of traditional neighborhood development], [Section, Township, and Range"].
- (3) Where the traditional neighborhood development is of unusual size or shape, the commission may permit a variation in the scale or size of the final plat.

(d) *Landscape plan.* A landscape plan is required for all traditional neighborhood development specific implementation plans.

(e) *Substantial compliance of specific implementation plan.* The specific implementation plan shall be in substantial compliance with the general implementation plan. It is not intended that the traditional neighborhood development so approved shall be inflexibly applied, but rather,

the traditional neighborhood development shall be in conformance with the general implementation plan subject to modification due to changed economic, social, market or demographic conditions. The burden shall be upon the applicant to show the planning commission good cause for major change (as defined below) between the general implementation plan and the specific implementation plan as submitted for final approval. If the specific implementation plan, as submitted, contains substantial variations from the general implementation plan, or major changes as defined in section 130-1460, the planning commission may, after a meeting with the applicant, within five days of such meeting, advise the applicant in writing why said variations are not in the public interest, and deny the proposed variations. Nothing contained herein shall prohibit an applicant from requesting a change to an approved traditional neighborhood development as set forth in section 130-1460.

(f) *Procedure for approval.* The specific implementation plan and final plat shall follow the procedure for planning items going to the planning commission with a public hearing. Procedure for approval of a specific implementation plan and final plat for a traditional neighborhood development shall be processed in the following manner:

- (1) The department of engineering shall review and approve the construction plans for any public improvements shown on the specific implementation plan prior to any construction. Improvements may be completed or bonded for final approval in the same manner as required under chapter 125.
- (2) The planning commission shall issue a notice of public hearing by posting the affected site in a conspicuous place at least ten days prior to the hearing date. A record of information and materials presented at the public hearing shall be kept and maintained by the commission as part of the applicant's permanent record.
- (3) Following required public notice, the planning commission shall hold a public hearing on the proposed specific implementation plan and final plat. Following the hearing, the planning commission shall review the specific implementation plan and final plat request and any comments submitted by any adjoining property owners and shall approve, approve with conditions, or deny the request.
- (4) Upon such approval and subsequent amendment of the specific implementation plan, construction may proceed for public and/or approved private thoroughfares, utility installations, common open space, recreational facilities, governmental structures, and similar uses provided that a preliminary subdivision plat has also been approved for the development in accordance with this Unified Development Code.
- (5) Any other proposed modifications, including yard variances and/or setback waivers, affecting the traditional neighborhood development's legal description shall require a review and approval of the traditional neighborhood development specific implemen-

tation plan and/or the final plat by the commission's staff. The burden shall be upon the applicant to demonstrate to the planning commission justification for any variation from the approved specific implementation plan.

- (6) Upon approval of a specific implementation plan and the final plat, the property shall be redesignated from "TND-2 Planned" to "TND-2" on the official zoning map. Once land is designated "TND-2" on the official zoning map, the provisions of these regulations are mandatory.

(Code 1998, app. C, § 5.3511A; Ord. No. 07-1548, § 5.3511A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1498. Consolidated general implementation plan and specific implementation plan.

The applicant may file a general implementation plan, specific implementation plan and final plat simultaneously with the specific implementation plan conforming in all respects to the requirements of the general implementation plan.

(Code 1998, app. C, § 5.3512A; Ord. No. 07-1548, § 5.3512A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1499. Additional regulations for phased developments.

A traditional neighborhood development may be developed in phases or stages in accordance with the following requirements:

- (1) *Boundaries.* The boundaries of all proposed traditional neighborhood development phases shall be shown on the general implementation plan.
- (2) *Data.* All data required for the project, as a whole, shall be given for each phase shown on the general implementation plan.
- (3) *Improvements.* The phasing plan shall be consistent with the traffic circulation, drainage, common open space, and utilities plans for the entire traditional neighborhood development. Traditional neighborhood developments that are to be developed in phases or stages shall be required to provide public improvements, common open space, and other amenities attributed to such phase at the same time as or before the construction of principal buildings and structures associated with individual phases. The nature, type, and amount of public improvements, common open space, and other project amenities provided during an individual phase of the project shall be commensurate with and proportionate to the overall development of the phase.

(Code 1998, app. C, § 5.3513A; Ord. No. 07-1548, § 5.3513A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1500. Changes to an approved specific implementation plan.

(a) *Types of changes.* There are three types of changes: Major use change, major site change, and minor change. A major use change and a major site change are collectively referred to herein as a "major change." Any measurement used to establish a "percentage of change" shall utilize the original specific implementation plan as the baseline.

(b) *Major use change.* A major use change ("major use change") is one that will have significant impacts on the approved uses within the traditional neighborhood development, or on the site surrounding the traditional neighborhood development. Major use changes include, but are not limited to:

- (1) An increase in the development site area of more than five percent;
- (2) An increase in density of any permitted land use, including the number of housing units, by more than five percent;
- (3) In residential areas, a change in the mix of single-dwelling and multi-dwelling structures by more than five percent;
- (4) An increase in the amount of land in nonresidential uses by more than five percent;
- (5) Involve any land use not specified on the approved general implementation plan or the list of permitted uses;
- (6) Substantial and material reduction in the amenities proffered by the applicant; and/or
- (7) Material changes in the permitted land use authorized in the traditional neighborhood development which in the opinion of the zoning officer will have a material adverse change with the traditional neighborhood development or on the site surrounding the traditional neighborhood development.

(c) *Major site change.* A major site change ("major site change") is a major change (other than a major use change) that will have significant impact on the site and layout of the development in the traditional neighborhood development which is not a major use change, or on the site surrounding the traditional neighborhood development. Major site changes include, but are not limited to:

- (1) Changes that vary the individual lot area requirement as submitted in the general implementation plan by more than ten percent;
- (2) Changes in nonresidential floor areas by more than five percent of the total floor area within a component of the traditional neighborhood development;
- (3) Deleting or changing the purpose of flood hazard servitudes or easements;
- (4) Changes to the thoroughfare network which result in a significant adverse change in the amount or location of thoroughfares and shared driveways, common parking areas, circulation patterns, and access to the traditional neighborhood development;

- (5) Changes in the allocation of prescribed land uses such that it would result in an increase in the number of vehicle trips generated in excess of ten percent;
- (6) Changes which are material in the typical sections of thoroughfare design;
- (7) Changes in the designation of thoroughfares between private and public; and/or
- (8) Material changes in the approved overall layout of the site plan and/or matters related to onsite and/or offsite infrastructure requirements authorized in the traditional neighborhood development which in the opinion of the zoning officer will have a material adverse change with the traditional neighborhood development or on the site surrounding the traditional neighborhood development.

(d) *Minor change.* A minor change ("minor change") is a change that will not alter the basic design and character of the traditional neighborhood development, nor any specified conditions imposed as part of the original approval. Minor changes include, but are not limited to:

- (1) Changes in location of the neighborhood center area, a mixed residential area, a neighborhood edge area, a civic area, green area, common open space or other designated areas, if the director of planning and development determines that:
 - a. The basic layout of the TND district remains the same; and
 - b. The TND district functions as well as before the revision;
- (2) Changes in size of a neighborhood center area, a mixed residential area, a neighborhood edge area, a civic area, green area, common open space or other designated areas, if the size is increased or decreased by not more than ten percent, and the director of planning and development determines that:
 - a. The basic layout of the TND district remains the same; and
 - b. The district functions as well as before the revision;
- (3) Changes in the general location of a major civic use, if the director of planning and development determines that:
 - a. The revised location is appropriate; and
 - b. The thoroughfare network, the infrastructure, and the overall land use mix are not adversely affected.

The director of planning and development may not approve a revision that includes the addition of a major civic use within 500 feet of an area that is part of a final plat in a mixed residential area or neighborhood edge area;

- (4) Changes in the location of a commercial use in a mixed residential area, if the director of planning and development determines that the revised location is appropriate;

- (5) Change in the layout of a thoroughfare network, if the director of planning and development determines that:
 - a. The basic layout remains the same; and
 - b. The revised layout functions as well as the previous layout;
- (6) Change in the location or size of a private open space, if the overall amount of private open space acreage does not decrease by more than ten percent, and the director of planning and development determines that the quality and functionality of the revised private open space is the same or better. The director of planning and development may not approve a revision that includes the deletion of a private open space within 500 feet of an area that is part of a final plat in a mixed residential area or neighborhood edge area;
- (7) Change in the location or size of a public open space, if the overall amount of public open space acreage does not decrease by more than ten percent, and the director of planning and development determines that the quality and functionality of the revised public open space is the same or better. The director of planning and development may not approve a revision that includes the deletion of a public open space within 500 feet of an area that is part of a final plat in a mixed residential area or neighborhood edge area;
- (8) Change in the location or description of a major private open space improvement, if the director of planning and development determines that the revised improvement is as beneficial to the residents as the previous improvement;
- (9) Change in a construction phasing plan for major private open space improvements if the change extends a deadline by not more than 24 months;
- (10) Change in the location or type of a drainage or water quality control, if the director of planning and development determines that:
 - a. The basic layout of the TND district remains the same; and
 - b. The revised location or type of control functions as well as the previous location or type of control;
- (11) Change in the location of a 100-year floodplain, if the director of planning and development determines that the revision more accurately describes the location of the floodplain;
- (12) Change in the locations of major utility facilities and easements, if the director of planning and development determines that the revised locations are more appropriate or functional;

- (13) Change in a preliminary architectural standard, if the director of planning and development determines that the revised standard is consistent with the architectural character of the TND district;
 - (14) Reduction of the size of any building;
 - (15) Movement of buildings and/or signs by no more than ten feet, but in no event in required buffers and/or setbacks;
 - (16) Landscaping approved in the specific implementation plan that is replaced by similar landscaping to an equal or greater extent;
 - (17) Changes in nonresidential floor plans, of up to five percent of the total floor area, which do not alter the character of the use or increase the amount of required parking;
 - (18) Internal rearrangement of a parking lot that does not affect the number of parking spaces or alter access locations or design;
 - (19) Changes required or requested by the parish and other state or federal authorities in order to conform to other laws or regulations;
 - (20) On balance, compared to the approved traditional neighborhood development, the change will equally or better meet the purposes and approval criteria set forth in sections 130-1487, 130-1488, and 130-1490, in the opinion of the director of planning and development; and/or
 - (21) Any adverse impacts caused by the change are mitigated to the satisfaction of the director of planning and development.
- (e) *Permitted uses.* Any changes to the permitted uses within the TND district must be approved by the council.
- (f) *Review procedures.* Requests for changes to an approved traditional neighborhood development are processed as follows:
- (1) *Major use changes.*
 - a. *Application for major use changes.* The owner of record of the property shall file an application with the director of planning and development, upon a form prescribed therefore, which shall contain the reason for the classification of the change as a major use change, as described in subsection (b) of this section, and the resulting impacts from the major use change on the development.
 - b. *Public hearing.* Upon receipt and verification of the completion of the application by the director of planning and development, the director of planning and development shall forward the application to the commissions. The commissions shall issue a notice of public hearing by posting the affected site in a conspicuous

place at least ten days prior to the hearing date. A record of information and materials presented at the public hearing shall be kept and maintained by the commissions as part of the applicant's permanent record.

- c. *Findings and recommendations.* The commissions shall make their findings on the major use change based on the information set forth in the application and the approval criteria set forth in this section, and submit recommendations to the council within 15 days from the hearing date. The commissions shall forward a copy of their findings and recommendations to the applicant.
- d. *Adoption of major use change.* The council shall adopt or reject the proposed major use change within 15 days from receipt of the recommendations from the commissions. The council shall submit reasons for its decision to the applicant.

(2) *Major site changes.*

- a. *Application for major site changes.* The owner of record of the property shall file an application with the director of planning and development, upon a form prescribed therefore, which shall contain the reason for the classification of the change as a major site change, as described in subsection (c) of this section, and the resulting impacts from the major site change on the development.
- b. *Public hearing.* Upon receipt and verification of the completion of the application by the director of planning and development, the director of planning and development shall forward the application to the planning commission. The planning commission shall issue a notice of public hearing by posting the affected site in a conspicuous place at least ten days prior to the hearing date. A record of information and materials presented at the public hearing shall be kept and maintained by the planning commission as part of the applicant's permanent record.
- c. *Findings and recommendations.* The planning commission shall make its findings on the major site change based on the information set forth in the application and the approval criteria set forth in subsection (c) of this section. The planning commission shall forward a copy of its findings and recommendations to the applicant.
- d. *Appeal.* The applicant may appeal the decision by the planning commission pursuant to section 130-1506.

(3) *Minor changes.*

- a. *Application.* The owner of record of the property shall file an application with the director of planning and development, upon a form prescribed therefore, which

shall contain the reason for the classification of the change as a minor change, as described in subsection (d) of this section, and the resulting immaterial impacts from the change on the development, if any.

- b. *Findings and recommendations.* Upon receipt and verification of the completion of the application by the director of planning and development, the director of planning and development shall make its findings based on the information set forth in the application and the approval criteria set forth in subsection (d) of this section, and notify the applicant of its decision. If the director of planning and development determines the change to be a minor change, the director of planning and development's decision shall be final and no appeal shall be available.

- (4) *Appeal of classification as major use change or major site change.* If the director of planning and development determines the change to be a major use change or a major site change, the applicant may appeal the decision by the director of planning and development pursuant to section 130-1506.

(g) *Subdivision of land.* If the TND district involves the subdivision of land as defined in chapter 125, the applicant shall submit all required land division documents in accordance with the requirements of chapter 125. If there is a conflict between the design standards of chapter 125 and the design guidelines of these regulations, the provisions of these regulations shall apply. It being understood that the size and configuration of lots within a TND district may otherwise be disallowed under chapter 125, but encouraged and permitted within a TND district.

(Code 1998, app. C, § 5.3514A; Ord. No. 07-1548, § 5.3514A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1501. Maintaining a specific implementation plan.

(a) *Ownership and maintenance of public space.* Provision shall be made for the ownership and maintenance of public thoroughfares, squares, parks, open space, and other public spaces in a TND district by dedication to the parish and/or associations.

(b) *Construction.* Construction may take place only within such portions of a traditional neighborhood development for which a current specific implementation plan is in effect.

(c) *Development agreement.* All "TND" zoning granted on the basis of specific implementation plan approval shall be subject to a parish/applicant agreement prior to or contemporaneous with final plat approval. Prior to final approval, the applicant shall be required to enter into a parish/applicant agreement with the parish. This agreement is designed and intended to reflect the agreement of the parish and the applicant as to the phasing of construction to ensure the timely and adequate provisions of public works facilities and public type improvements. This parish/applicant agreement is also intended to ensure balanced intensity of development

to avoid overloading existing public facilities during the construction phase. This parish/applicant agreement will be individually negotiated for each project, but should address the following issues:

- (1) Any agreement on cost sharing for the installation or oversizing of major utility systems, lines or facilities.
 - (2) Any agreement on cost sharing for the installation of interior or perimeter roadways or thoroughfare network.
 - (3) Any agreement as to a mandatory construction or dedication schedule for common open space area or improvements, school sites, landscaping or greenbelt development or other comparable items to be dedicated or constructed for each acre of property within the traditional neighborhood development released for construction by specific implementation plan approval. This requirement is intended to allow the parish to ensure that pre-planned public type facilities, improvements or amenities are installed concurrently with other development on the basis of a negotiated formula.
 - (4) Any agreement as to the establishment of a maximum residential density or commercial intensity of use during the construction process. This requirement is intended to allow the parish to establish a maximum development intensity that cannot be exceeded while each phase of the project is being completed. Under this provision, the parish may establish a maximum overall density for each phase of the project to be applicable only during the construction phase of the traditional neighborhood development. This restriction would require concurrent development of lower density or intensity of use activities with higher density or intensity of use activities.
 - (5) Any agreement by the applicant or association to maintain all common open space at no cost to the parish.
- (d) *Development schedule.* The development schedule shall contain the following information:
- (1) The order of construction of the proposed stages delineated in the specific implementation plan.
 - (2) The proposed date for the beginning of construction of each stage.
 - (3) The proposed date for the completion of construction of each stage.
 - (4) The proposed schedule for the construction and improvement of common area within each stage including any accessory buildings.
- (e) *Enforcement of the development schedule.* The construction and provision of all common open spaces and public facilities and infrastructure which are shown on the specific implementation plan must proceed at no slower a rate than the construction of dwelling units or other structures of a commercial nature. The planning commission may, at any time, compare the

actual development accomplished with the approved development schedule. If the planning commission finds that the rate of construction of dwelling units or other commercial structures is substantially greater than the rate at which common open spaces and public facilities and infrastructure have been constructed and provided, then either or both of the following actions may be taken:

- (1) The planning commission shall cease to approve any additional specific implementation plans for subsequent phases; and/or
- (2) The building official shall discontinue issuance of building permits.

In any instance where the above actions are taken, the planning commission shall gain assurance that the relationship between the construction of dwellings or other structures of a commercial nature and the provision of common open spaces and public facilities and infrastructure are brought into adequate balance prior to the continuance of construction.

(f) *Permits.* No building permit for a structure other than a temporary contractor's office or temporary storage building shall be issued for a lot or parcel within an approved traditional neighborhood development prior to a determination by the fire marshal or designee that adequate fire protection and access for construction needs exists. No occupancy permit for a structure other than a temporary contractor's office or other approved temporary building shall be issued for a structure on a lot or parcel within an approved traditional neighborhood development prior to final inspection and approval of all required improvements which will serve such lot or parcel to the satisfaction of the director of the department of public works and the building official.

(Code 1998, app. C, § 5.3515A; Ord. No. 07-1548, § 5.3515A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1502. Expiration and lapse of specific implementation plans.

Specific implementation plan approval shall expire three years from the date of planning commission approval of a specific implementation plan. The applicant may request an extension from the planning commission for not more than one year if the project is not complete after three years. Nothing herein shall be construed to limit the time limitations for phased developments as set forth in section 130-1497(a).

(Code 1998, app. C, § 5.3516A; Ord. No. 07-1548, § 5.3516A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1503. The approved final development plan.

Development restrictions and/or conditions, as required by the commissions and/or the council, shall be recorded by the applicant with the clerk of court of the parish within 15 days of the date of the final approval of the general implementation plan and/or the specific implementation plan by the commissions or council, as the case may be. Certified copies of

these documents shall also be filed with the office of the commissions. The applicant shall record development restrictions and other required documents, which pertain to a subdivision within the approved specific implementation plan, with the clerk of court of the parish within 15 days of the signing of the final plat, as provided in this section.

(Code 1998, app. C, § 5.3517A; Ord. No. 07-1548, § 5.3517A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1504. Filing and distribution of specific implementation plan final plat.

The applicant shall have a total of ten blackline prints of the approved final plat to be disbursed as required by the commission's staff.

(Code 1998, app. C, § 5.3518A; Ord. No. 07-1548, § 5.3518A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1505. Violations.

Any violation of the general implementation plan and/or specific implementation plan or any other phase or plan adopted as part of the amendment to this Land Development Code shall constitute a violation of this Land Development Code. Any person or legal entity violating any provision of these regulations, or who shall violate or fail to comply with any order made hereunder; or who shall continue to work upon any structure after having received written notice from the director of planning and development to cease work, shall be guilty of a misdemeanor and punishable by a fine not to exceed \$500.00 per violation. Each day such violation shall be permitted to exist shall constitute a separate offense. Notice of violation shall be sufficient if directed to such owner, the agent of the owner, or the contractor and/or left at his known place of residence or place of business.

(Code 1998, app. C, § 5.3519A; Ord. No. 07-1548, § 5.3519A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1506. Appeal.

An applicant may appeal the findings and recommendations of the commissions or director of planning and development, as applicable, by filing an objection in writing to the council within five days of receipt of the commissions' or director of planning and development's recommendations. The council shall grant or deny the appeal, and the council's decision shall be final. If the council grants the appeal, the council shall submit a notice to the commissions or director of planning and development stating reasons for its grant of the appeal.

(Code 1998, app. C, § 5.3520A; Ord. No. 07-1548, § 5.3520A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1507. Rezoning of property designated "TND-2 Planned."

The director of planning and development shall request that the council initiate the rezoning of property designated "TND-2 Planned," only as to that portion of the property which has not been developed, if:

- (1) Upon final review, an application for approval of a specific implementation plan for a portion of the property has been denied;
- (2) A specific implementation plan was not timely submitted in accordance with the provisions of section 130-1497; or
- (3) An approved specific implementation plan expires or lapses, pursuant to the provisions of section 130-1502.

(Code 1998, app. C, § 5.3521A; Ord. No. 07-1548, § 5.3521A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1508. Relation to zoning districts.

An approved traditional neighborhood development shall be considered to be a separate zoning district in which the development plan, as approved, establishes the restrictions and regulations according to which development shall occur, and may depart from the normal procedures, standards, and other requirements of the other sections of the zoning ordinance and subdivision regulations to the extent provided herein. Upon approval of the general implementation plan, the official zoning map will be changed to indicate the area as "TND-2 Planned," or if final approval granted then as "TND-2." Every approval of a traditional neighborhood development shall be considered an amendment to the zoning ordinance.

(Code 1998, app. C, § 5.3522A; Ord. No. 07-1548, § 5.3522A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Sec. 130-1509. Comprehensive rezoning and subsequent designation procedure.

(a) Any property designated as traditional neighborhood development as part of the comprehensive rezoning process shall be designated as "TND-2 Concept," until said property has undergone the application procedure and approval process as outlined in section 130-1494, except that in such cases, the commission decision relative to the general implementation plan will be considered the final determination, subject to appeal to the parish council in accordance with section 130-1466.

(b) Other than through the comprehensive rezoning process set forth in subsection (a) of this section, a parcel of property may only be designated as TND-2 Concept when, within one year following the effective date of an ordinance establishing the comprehensive rezoning of a specific area under the Unified Development Code, the process of amending or changing the

designation of the property to TND-2 Concept has been initiated in accordance with section 130-54. The review of any amendment or change shall be conducted in accordance with section 130-54.

Table 1: Street Design Guidelines in a TND District
(Each subject to Modification by the Commissions)

	<i>Collector or Avenue</i>	<i>Sub-Collector or Drive</i>	<i>Local Street or Road</i>	<i>Alley</i>
Average daily trips	750 or more	250-750	Less than 250	Not applicable
Right-of-way	76-88 feet	58-72 feet	35-50 feet	15-30 feet
Auto travel lanes	Two or three 12-foot lanes	Two 10-foot lanes	Two 10-foot lanes, or one 14-foot (queuing) lane	Two 8-foot lanes for two-way traffic, or one 12-foot lane for yield traffic
Bicycle lanes	Two 6-foot lanes combined with parking lanes	4-foot lanes with no parking, or 6-foot lanes combined with parking lanes	None	None
Parking	Both sides, 8 feet	None, one, or both sides, 8 feet	None or one both side, 8 feet	None (access to individual drives and garages outside right-of-way)
Curb and gutter	Required	Required	Not required	Not required
Planting strips	Minimum 6 feet	Minimum 6 feet	Minimum 3 feet	None
Sidewalks	Both sides, 5 feet minimum	Both sides, 3-5 feet	Both sides, 3-5 feet	None

(Code 1998, app. C, § 5.3523A; Ord. No. 07-1548, § 5.3523A, 5-3-2007; Ord. No. 10-2186, 1-7-2010)

Secs. 130-1510—130-1536. Reserved.

DIVISION 47. SWM-1 SOLID WASTE MANAGEMENT DISTRICT

Sec. 130-1537. Purpose.

The purpose of this district is to provide for the location of uses including and generally compatible with the collection of solid waste material for transport to processing facilities.
(Code 1998, app. C, § 5.3601; Ord. No. 07-1548, § 5.3601, 5-3-2007)

Sec. 130-1538. Permitted uses.

(a) Use by right, subject to any minimum standards as listed in article VII of these regulations:

- (1) Nonprocessing transfer station.
- (2) Yard waste and compost collection facility.
- (3) Sorted recyclables collection facility.
- (4) White goods collection facility.
- (5) Radio and television studios and broadcasting stations.
- (6) Auto body shops. (Minimum standards apply.)
- (7) Outdoor storage yards and lots and contractor's storage yards in conjunction with an affiliated office provided that this provision shall not permit wrecking yards or yards used in whole or in part for a scrap or salvage operation. Minimum standards for contractor's yards apply.
- (8) Welding shops.
- (9) Office warehouse.
- (10) Portable storage containers use for storage.
- (11) Outdoor display pre-assembled building, pool and playground equipment.
- (12) Book binderies.
- (13) Cellophane products manufacturing.
- (14) Cleaning and dyeing works.
- (15) Electrical parts, assembly and manufacturing.
- (16) Fiber products and manufacturing.
- (17) Furniture manufacturing.
- (18) Garment manufacturing.
- (19) Foundry casting and extruding mills of lightweight nonferrous metal.
- (20) Millwork and wood product manufacturing.
- (21) Sheet metal products.
- (22) Television and radio broadcasting transmitters.
- (23) Tool manufacturing.
- (24) Toy manufacturing.
- (25) Well drilling services.

- (26) Public utility facilities.
- (27) Glass products manufacturing.
- (28) Paint manufacturing and treatment.
- (29) Shop fabricating and repair.
- (30) Structural fabrication (steel and concrete).
- (31) Tire retreading, recapping or rebuilding.
- (32) General, multi-use office buildings of 40,000 square feet of gross floor area or less.

(b) In keeping with the stated purpose of creating the solid waste management district, after the adoption of the ordinance from which this division is derived, the following public utility facilities, utility and/or uses that were not previously issued a permit or in operation shall be a permitted use only in the Solid Waste Management District (SWM-1 or SWM-2):

- (1) Nonprocessing transfer station;
- (2) Yard waste and compost collection facility;
- (3) Sorted recyclables collection facility; and
- (4) White goods collection facility.

(Code 1998, app. C, § 5.3602; Ord. No. 07-1548, § 5.3602, 5-3-2007)

Sec. 130-1539. Administrative permits.

The purpose of an administrative permit is to provide for a staff review of certain uses. The following uses are prohibited unless application for the use has been processed by the department of planning and development and the use is in conformance with the minimum standards for that use as outlined in section 130-2112:

- (1) Mobile food trucks when meeting the minimum standards for specific uses outlined in section 130-2112(22).

(Ord. No. 17-3659, exh. A(5.3603A), 1-5-2017)

Sec. 130-1540. Prohibited uses.

The processing of any waste materials except for the limited processing permitted by nonprocessing transfer stations is expressly prohibited.

(Code 1998, app. C, § 5.3603; Ord. No. 07-1548, § 5.3603, 5-3-2007)

Sec. 130-1541. Site and structure provisions.

(a) *Maximum building size.* The maximum building size in the SWM-1 district shall be 40,000 square feet.

(b) *Minimum lot area.* No new lot shall be created that is less than 20,000 square feet in area.

(c) *Minimum area regulations.* Applicable except where more specific standards are required as per article VII of these regulations, minimum standards for specific uses.

- (1) *Minimum lot width.* For each zoning lot provided with central water and sewerage facilities, the minimum lot width shall not be less than 100 feet.
- (2) *Street planting areas.* All areas along the street or road which a property abuts shall comply with the standards of section 130-1873, street planting areas.
- (3) *Side and rear planting areas.* All areas located along the side and rear interior property lines shall comply with section 130-1874, side and rear buffer planting area requirements.
- (4) *Transitional yard.* Where SWM-1 district adjoins a residential district, transitional yards shall be provided in accordance with subsections (c)(1) and (2) of this section or the following regulations whichever is more restrictive:
 - a. Where lots in SWM-1 district front on a street and at least 80 percent of the frontage directly across the street between two consecutive intersecting streets is in a residential district, the setback regulations for the residential district shall apply to the said lots in the commercial district.
 - b. In SWM-1 district, where a side lot line coincides with a side or rear lot line of property in an adjacent residential district, a yard shall be provided along such side lot line. Such yard shall be equal in dimension to the minimum side yard which would be required under these regulations for a residential use on the adjacent property in the residential district.
 - c. In SWM-1 district, where a rear lot line coincides with a rear or side lot line of property in an adjacent residential district, a yard shall be provided along such rear lot line. Such yard shall be equal in dimensions to the minimum rear yard which would be required under these regulations for a residential use on the adjacent property in the residential district.
 - d. In SWM-1 district, where the extension of a front or side lot line coincides with the front line of an adjacent lot located in a residential district, a yard equal in depth to the minimum setback required by these regulations on such adjacent lot in the residential district shall be provided along such front or side lot line for a distance of at least 25 feet, including the width of any intervening alley from such lot in the residential district.
 - e. Where a building is taller than 25 feet in height, one additional foot of setback shall be required in each yard. Each facade is measured separately and the additional depth is required perpendicular to that facade.

- f. The following specific permitted uses will require a 200-foot setback from the property line to any active portion of the operation, the outer 100 feet of which will be a no cut buffer:
1. Nonprocessing transfer station.
 2. Yard waste and compost collection facility.
 3. Sorted recyclables collection facility.
 4. White goods collection facility.

(d) *Maximum lot coverage.* The lot coverage of all principal and accessory buildings on a zoning lot shall not exceed 50 percent of the total area of the lot. However, parking and landscape requirements for the intended use must be met in all instances. Therefore, maximum lot coverage may in some cases be less.

(e) *Height regulations.* No building or dwelling for residential or business purposes shall exceed 45 feet in height above the natural grade of the property at the location of the structure or base flood elevation as established in chapter 115, article II of this Land Development Code, whichever is higher.

(f) *Design criteria.*

- (1) *Landscaping.* All landscaping shall be in compliance with the provisions of article VI, division 2 of these regulations.
- (2) *Signage.* All signage shall be in compliance with article VI, division 3 of these regulations.
- (3) *Lighting.* All site lighting shall be in compliance with article VI, division 4 of these regulations.
- (4) *Parking/loading.* All parking and loading will be in compliance with article VI, division 8 of these regulations.

(Code 1998, app. C, § 5.3604; Ord. No. 07-1548, § 5.3604, 5-3-2007)

Secs. 130-1542—130-1568. Reserved.

DIVISION 48. SWM-2 SOLID WASTE MANAGEMENT DISTRICT

Sec. 130-1569. Purpose.

The purpose of this district is to provide for the location of uses including and generally compatible with the transport, processing, treatment, of solid waste materials.

(Code 1998, app. C, § 5.3701; Ord. No. 07-1548, § 5.3701, 5-3-2007)

Sec. 130-1570. Permitted uses.

(a) Use by right, subject to any minimum standards as listed in article VII of these regulations:

- (1) All uses permitted in the SWM-1 district.
- (2) Septage treatment facility.
- (3) White goods processing facility.
- (4) Waste tire collection and processing facility.
- (5) Construction and debris landfill.
- (6) Separation facility (recycling facility).

(b) In keeping with the stated purpose of creating the solid waste management district, after the adoption of this ordinance from which this division is derived, the following uses shall be a permitted use only in the Solid Waste Management District-2 (SWM-2): White goods processing facility, waste tire collection and processing facility, construction and debris landfill and separation facility (recycling facility). A septage (sludge) treatment facility use, heretofore considered to be a permitted public utility facilities and/or utility use in the I-2 Industrial District, may continue to be located as such use in the I-2 Industrial District.

(Code 1998, app. C, § 5.3702; Ord. No. 07-1548, § 5.3702, 5-3-2007)

Sec. 130-1571. Administrative permits.

The purpose of an administrative permit is to provide for a staff review of certain uses. The following uses are prohibited unless application for the use has been processed by the department of planning and development and the use is in conformance with the minimum standards for that use as outlined in section 130-2112:

- (1) Mobile food trucks when meeting the minimum standards for specific uses outlined in section 130-2112(22).

(Ord. No. 17-3659, exh. A(5.3703A), 1-5-2017)

Sec. 130-1572. Prohibited uses.

The processing of any waste materials except in accordance with permitted uses identified in section 130-1538 is expressly prohibited.

(Code 1998, app. C, § 5.3703; Ord. No. 07-1548, § 5.3703, 5-3-2007)

Sec. 130-1573. Site and structure provisions.

(a) *Maximum building size.* The maximum building size in the SWM-2 district shall be 40,000 square feet.

(b) *Minimum lot area.* No new lot shall be created that is less than 20,000 square feet in area.

(c) *Minimum area regulations applicable except where more specific standards are required as per article VII of these regulations, minimum standards for specific uses.*

- (1) *Minimum lot width.* For each zoning lot provided with central water and sewerage facilities, the minimum lot width shall not be less than 100 feet.
- (2) *Street planting areas.* All areas along the street or road which a property abuts shall comply with the standards of section 130-1873, street planting areas.
- (3) *Side and rear planting areas.* All areas located along the side and rear interior property lines shall comply with section 130-1874, side and rear buffer planting area requirements.
- (4) *Transitional yard.* Where the SWM-2 district adjoins a residential district, transitional yards shall be provided in accordance with subsections (c)(1) and (2) of this section or the following regulations whichever is more restrictive:
 - a. Where lots in the SWM-2 district front on a street and at least 80 percent of the frontage directly across the street between two consecutive intersecting streets is in a residential district, the setback regulations for the residential district shall apply to the said lots in the commercial district.
 - b. In the SWM-2 district, where a side lot line coincides with a side or rear lot line of property in an adjacent residential district, a yard shall be provided along such side lot line. Such yard shall be equal in dimension to the minimum side yard which would be required under these regulations for a residential use on the adjacent property in the residential district.
 - c. In the SWM-2 district, where a rear lot line coincides with a rear or side lot line of property in an adjacent residential district, a yard shall be provided along such rear lot line. Such yard shall be equal in dimensions to the minimum rear yard which would be required under these regulations for a residential use on the adjacent property in the residential district.
 - d. In the SWM-2 district, where the extension of a front or side lot line coincides with the front line of an adjacent lot located in a residential district, a yard equal in depth to the minimum setback required by these regulations on such adjacent lot in the residential district shall be provided along such front or side lot line for a distance of at least 25 feet, including the width of any intervening alley from such lot in the residential district.
 - e. Where a building is taller than 25 feet in height, one additional foot of setback shall be required in each yard. Each facade is measured separately and the additional depth is required perpendicular to that facade.

- f. The following specific permitted uses will require a 200 foot setback from the property line to any active portion of the operation, the outer 100 feet of which will be a no cut buffer:
1. Nonprocessing transfer station.
 2. Yard waste and compost collection facility.
 3. Sorted recyclables collection facility.
 4. White goods collection facility.
 5. Septage treatment facility.
 6. White goods processing facility.
 7. Waste tire collection and processing facility.
 8. Construction and debris landfill.

(d) *Maximum lot coverage.* The lot coverage of all principal and accessory buildings on a zoning lot shall not exceed 50 percent of the total area of the lot. However, parking and landscape requirements for the intended use must be met in all instances. Therefore, maximum lot coverage may in some cases be less.

(e) *Height regulations.* No building or dwelling for residential or business purposes shall exceed 45 feet in height above the natural grade of the property at the location of the structure or base flood elevation as established in chapter 115, article II of this Land Development Code, whichever is higher.

(f) *Design criteria.*

- (1) *Landscaping.* All landscaping shall be in compliance with the provisions of article VI, division 2 of these regulations.
- (2) *Signage.* All signage shall be in compliance with article VI, division 3 of these regulations.
- (3) *Lighting.* All site lighting shall be in compliance with article VI, division 4 of these regulations.
- (4) *Parking/loading.* All parking and loading will be in compliance with article VI, division 8 of these regulations.

(Code 1998, app. C, § 5.3704; Ord. No. 07-1548, § 5.3704, 5-3-2007)

Secs. 130-1574—130-1586. Reserved.

DIVISION 49. AML ADVANCED MANUFACTURING AND LOGISTICS DISTRICT

Sec. 130-1587. Purpose.

The purpose of the AML Advanced Manufacturing and Logistics District is to provide for the location of very large scale facilities for the research and development, manufacturing and transportation/logistics industries. Such facilities should be located in close proximity to major transportation routes, with the ideal location allowing for multimodal opportunities.
(Ord. No. 14-3117, exh. A(5.3801), 4-3-2014)

Sec. 130-1588. Permitted uses.

Use by right subject to any minimum standards as listed in section 130-2112:

- (1) Aeronautics and aerospace research, development and manufacturing.
 - (2) Automotive research, development and manufacturing.
 - (3) Computer, electrical and electronics research, development and manufacturing.
 - (4) Data centers and data warehousing.
 - (5) Distribution and warehousing facilities.
 - (6) Durable goods manufacturing.
 - (7) Food products processing and manufacturing.
 - (8) Furniture manufacturing.
 - (9) Garment manufacturing.
 - (10) Glass, plastic and paint research, development and manufacturing.
 - (11) Hydraulics and robotics research, development and manufacturing.
 - (12) Pharmaceutical and medical research, development and manufacturing.
 - (13) Software development and programming.
 - (14) Scientific research and development services.
 - (15) General offices and services which provide support to any of the permitted uses provided for in this section.
- (Ord. No. 14-3117, exh. A(5.3802), 4-3-2014)

Sec. 130-1589. Administrative permits.

The purpose of an administrative permit is to provide for a staff review of certain uses. The following uses are prohibited unless application for the use has been processed by the department of planning and development and the use is in conformance with the minimum standards for that use as outlined in section 130-2112:

- (1) Public utility surface structures.
- (2) Electrical substations.
- (3) Telephone relay facilities.
- (4) Utility substations.
- (5) Wastewater treatment facilities.
- (6) Utility distribution systems.
- (7) Potable water pumping stations.
- (8) Mobile food trucks when meeting the minimum standards for specific uses outlined in section 130-2112(22).

(Ord. No. 14-3117, exh. A(5.3803), 4-3-2014; Ord. No. 17-3659, exh. A(5.3803), 1-5-2017)

Sec. 130-1590. Site and structure provisions.

(a) *Maximum building size.* The maximum building size in the AML district shall be 1,000,000 square feet.

(b) *Minimum lot area.* No new lot shall be created that is less than 20,000 square feet in area.

(c) *Minimum area regulations.*

(1) *Minimum lot width.* For each zoning lot provided with central water and sewerage facilities, the minimum lots width shall not be less than 80 feet.

(2) *Street planting areas.* All areas along the streets or roads which a property abuts shall comply with the standards of section 130-1873.

(3) *Side and rear planting areas.* All areas located along the side and rear interior property lines shall comply with section 130-1874.

(4) *Transitional yard.* Where an AML district adjoins a residential district, transitional yards shall be provided in accordance with subsections (c)(1) and (2) of this section or the following regulations, whichever is more restrictive:

- a. Where lots in an AML district front on a street and at least 80 percent of the frontage directly across the street between two consecutive intersecting streets is in a residential district, the setback regulations for the residential district shall apply to the said lots in the commercial district.

- b. In an AML district, where a side lot line coincides with a side or rear lot line of property in an adjacent residential district, a yard shall be provided along such side lot line. Such yard shall be equal in dimension to the minimum side yard which would be required under this division for a residential use on the adjacent property in the residential district.
- c. In an AML district, where a rear lot line coincides with a rear or side lot line of property in an adjacent residential district, a yard shall be provided along such rear lot line. Such yard shall be equal in dimensions to the minimum rear yard which would be required under this division for a residential use on the adjacent property in the residential district.
- d. In an AML district, where the extension of a front or side lot line coincides with the front line of an adjacent lot located in a residential district, a yard equal in depth to the minimum setback required by this division on such adjacent lot in the residential district shall be provided along such front or side lot line for a distance of at least 25 feet, including the width of any intervening alley from such lot in the residential district.
- e. Where a building is taller than 25 feet in height, one additional foot of setback shall be required in each yard. Each facade is measured separately and the additional depth is required perpendicular to that facade.

(d) *Maximum lot coverage.* The lot coverage of all principal and accessory buildings on a zoning lot shall not exceed 50 percent of the total area of the lot. However, parking and landscape requirements for the intended use must be met in all instances. Therefore, maximum lot coverage may in some cases be less.

(e) *Height regulations.* No building or dwelling for residential or business purposes shall exceed 100 feet in height above the natural grade of the property at the location of the structure or base flood elevation as established in chapter 115, article II of this Land Development Code, whichever is higher.

(f) *Design criteria.*

- (1) *Landscaping.* Landscaping shall be in compliance with article VI, division 2 of these regulations.
- (2) *Signage.* All signage shall be in compliance with article VI, division 3 of these regulations.
- (3) *Lighting.* All site lighting shall be in compliance with article VI, division 4 of these regulations.
- (4) *Parking/loading.* All parking and loading will be in compliance with article VI, division 8 of these regulations.

(Ord. No. 14-3117, exh. A(5.3804), 4-3-2014)

Secs. 130-1591—130-1602. Reserved.

ARTICLE V. OVERLAYS

DIVISION 1. GENERALLY

Secs. 130-1603—130-1632. Reserved.

DIVISION 2. PUD PLANNED UNIT DEVELOPMENT OVERLAY

Sec. 130-1633. Purpose.

(a) The purpose of the planned unit development overlay (PUD) is to encourage flexibility in the development of land, creative design, more orderly development and to promote and preserve the scenic features of the site. The following criteria represent the objectives of the PUD:

- (1) Environmentally sensitive design that is of a higher quality than would be possible under the regulations otherwise applicable to the property.
- (2) Diversification and variation in the relationship of residential uses, open space and the setbacks and height of structures in developments intended as cohesive, unified projects.
- (3) Functional and beneficial uses of open space areas.
- (4) Preservation of natural features of a development site.
- (5) Creation of a safe and desirable living environment for residential areas characterized by a unified building and site development program.
- (6) Rational and economically sound development in relation to public services.
- (7) Efficient and effective traffic circulation, both within and adjacent to the development site.
- (8) Creation of a variety of housing compatible with surrounding neighborhoods to provide a greater choice of types of environment and living units.

(b) The planned unit development overlay shall not be used in the E Estate districts.
(Code 1998, app. C, § 6.0101; Ord. No. 07-1548, § 6.0101, 5-3-2007)

Sec. 130-1634. General standards and criteria.

In order for the zoning commission and parish council to make competent and definitive decisions concerning a planned unit development's proper makeup, the following general standards and criteria shall be applicable:

- (1) *Physical characteristics of the site.* The site shall be ten or more acres in size and suitable for development in the manner proposed without hazard to persons or property adjacent to the site, in conformance with the standards and parameters established in this section.
 - (2) *Relation to major transit routes.* PUDs shall be properly located with respect to interstate, major highways and major arterial streets so as not to create major shifts of traffic generation to intermediate collectors and/or minor streets.
 - (3) *Mixed use PUD.* PUDs may incorporate nonresidential uses subject to the following criteria:
 - a. If the underlying zoning classification is residential in nature, the nonresidential uses are limited to those permitted in the NC-1, NC-2, NC-3, NC-4, NC-5, MD-1, and ED-1 districts.
 - b. If the underlying zoning classification is any other classification, the underlying classification controls the permitted land uses.
- (Code 1998, app. C, § 6.0102; Ord. No. 07-1548, § 6.0102, 5-3-2007)

Sec. 130-1635. Plan approval.

(a) *Conceptual plan.* Prior to submitting a PUD rezoning petition, an informal pre-application conference with designated staff from the parish department of planning and development shall be required. The purpose of this conference shall be to discuss PUD parameters and to bring the overall petition as nearly as possible into conformity with parish regulations. Following the PUD pre-application conference, a conceptual plan shall be submitted with the rezoning application. This plan shall provide the following information:

- (1) The title of the project and the names of the project planner and developer.
- (2) A legal description of the property including township, section and range.
- (3) Plat indicating scale, date, north arrow, and general vicinity map indicating existing land uses within 500 feet of all boundaries of the proposed PUD shall be designated. This plat shall include all existing physical features such as existing streets, buildings, watercourses, easements, soil conditions, vegetative cover and topography.

- (4) Net density shall be set based upon the underlying zoning classification utilizing one of the following options:
- a. The number of lots/units may be established in accordance with the maximum net density of the underlying zoning classification as applied to the following formula:
$$\text{Total Area} \times 0.75 = \text{_____} \times \text{maximum net density} = \text{_____} \text{ lots (units).}$$
 - b. The number of lots/units may be established by a yield plan consisting of conventional street layouts including but not limited to basic topography, soil conditions, drainage, vegetative cover, locations of wetlands, and 100-year floodplains. Said yield plan shall be based upon the standards of the underlying zoning district and comply with all applicable development standards.
 - c. Pending the comprehensive rezoning review of unincorporated St. Tammany Parish, the zoning commission shall have the authority to establish appropriate density levels for all properties zoned R Rural and SA Suburban Agricultural at the time of the PUD request. Once the area in which the subject property is located has undergone a comprehensive rezoning review the standards of the newly adopted zoning classification shall govern, in accordance with article IV of this chapter.
- (5) Site information including the following criteria shall be provided:
- a. Boundaries of the property involved;
 - b. Average size and maximum number of lots;
 - c. Parcels or sites to be developed or occupied by buildings;
 - d. The general location and maximum amount of area to be developed for parking;
 - e. The general location of areas to be devoted to open space, including those areas to be dedicated or conveyed for parks, playgrounds or school sites;
 - f. Public buildings and other common use areas;
 - g. The approximate location of ingress, egress and access streets;
 - h. The approximate location of pedestrian and vehicular ways;
 - i. The extent of landscaping and planting;
 - j. Location and/or source of water and sewer facilities; and
 - k. Front, side and rear yard setback lines.
- (6) Tabulation of the maximum square footage of each use.
- (7) The proposed maximum height of any building or structure.

- (8) Maximum total land area, minimum public and private open space, streets, off-street parking and loading areas. Breakdown by percent of total land area devoted to each use, such as:
- a. Residential uses.
 - b. Commercial/institutional uses limited to those permitted in the NC-1, NC-2, NC-3, NC-4, NC-5, MD-1, and ED-1 districts or any uses permitted in the underlying zoning district.
 - c. Open space (as defined in section 130-5).
 1. A minimum of 25 percent of open space is required for all PUDs.
 2. In no case shall required open space along the existing road frontage be less than one-fourth acre in area and less than 100 feet in width.
 3. In no case shall required open space along other boundary lines (without road frontage) be less than one-fourth acre in area and less than 50 feet in width.
 4. No more than 50 percent of the required open space shall be satisfied using limited use land. The term "limited use land" shall mean land which is inundated by water for a period of greater than four months within each calendar year. Two acres of limited use land are required to satisfy one acre of required open space.
 5. Active recreation shall include such comparable uses as playgrounds, ball fields, swimming pools, tennis courts, etc.
 6. Passive recreational uses shall include comparable uses such as picnic areas, permeable nature trails, undisturbed habitat, etc.
 - d. Access parking and loading areas.
 - e. Location of the existing and proposed easements to the extent they are reasonably ascertainable with the understanding that the future easements may be needed based on more complete engineering studies.
- (9) Restrictive covenants, including the assurance of maintenance of common areas and the continued protection of the PUD. The department of planning and development must review and approve the restrictive covenants prior to recordation thereof with the clerk of court.
- (10) Circulation element indicating the proposed principal movement of vehicles, goods and pedestrians.
- (11) Environmental assessment data form (signed and dated).
- (12) Initial wetland delineation as determined by a qualified wetlands consultant.
- (13) Flood zone demarcation lines (indicate FIRM map and panel number).

(14) Documents indicating ultimate disposal of surface drainage.

(15) The zoning commission or the parish council may require additional material such as plans, maps, aerial photographs, studies and reports which may be needed in order to make the necessary findings and determinations that the applicable parish standards and guidelines have been achieved.

(b) *Formal review.* The planning staff shall hold a formal review of the PUD submission two weeks prior to the public hearing by the zoning commission and note areas of concern to the applicant in writing within one week of the review. The purpose of this review is to provide constructive feedback to the developer on compliance with the PUD requirements.

(c) *Public hearing.* The zoning commission shall hold the formal public hearing on the zoning overlay request and forward a recommendation to approve or deny the PUD to the parish council after the required public hearing. The zoning commission reserves the right to add stipulations and conditions to its approval and shall determine if the applicant has met all or part of the PUD parameters including:

- (1) The tract for the proposed PUD is suitable in terms of its relationships to the parish comprehensive plan and that the areas surrounding the proposed PUD can continue to be developed in coordination and substantial compatibility with the PUD proposed.
- (2) That the desirable modifications of general zoning regulations as applied to the particular case, justify such modifications of regulations and at least an equivalent degree the regulations modified, based on the design and amenities incorporated in the site development plan.
- (3) That increased open space over conventional development is provided for the occupants of the proposed PUD and the general public, and desirable natural features indigenous to the site in accordance with the open space parameters as follows:
 - a. Open spaces shall be required within the PUD and should be devoted to active and/or passive recreational purposes.
 - b. Protects all floodplains and wetlands in accordance with parish regulation pertaining to fill.
 - c. Preserves and maintain to the extent possible mature woodlands and buffers.
 - d. Protects rural roadside character and improves public safety by minimizing development fronting and accessing directly onto the public road.
 - e. Provides for pedestrian circulation between properties and features of the site and continuity of open spaces where possible.
- (4) Internal planned unit development parameters:
 - a. The density of the proposal shall not exceed the density permitted in accordance with the requirements of article IV of this chapter.

- b. Every dwelling unit or other use within the PUD shall have direct access to a public or private street via pedestrian ways, courts or other access related easements. It should not be construed that access for permitted uses must front on a dedicated street.
 - c. If lots and/or parcels are created within the boundaries of the PUD, no minimum size or yards shall be required, except as approved as part of the individual PUD proposal.
- (5) Central sewerage and water systems shall be provided to all uses within this overlay. Septic tanks and individual water wells are prohibited in PUD developments.
- (d) *Binding nature of approval for PUD.* All terms, conditions, safeguards, and stipulations made at the time of approval for PUD shall be binding upon the applicant or any successors in interest. Deviations from approved plans or failure to comply with any requirements, conditions, or safeguards shall constitute a violation of these zoning regulations.
- (1) Tentative-preliminary-final development plans. Plans for development of land approved for PUD shall be processed in accordance with the procedures established by chapter 125 if required. The PUD approval may be substituted for the tentative plat approval required by chapter 125.
 - (2) Final development plan. After approval of the conceptual development plan by the parish council, the applicant shall submit a final plan to the department of planning and development indicating all terms, conditions, safeguards and stipulations required by the zoning commission and the parish council.
 - (3) Review and approval of a PUD overlay is a multi-step process, requiring zoning commission and planning commission approval (except in those cases where minor subdivision approval is authorized, or an exemption applies). Approval of a PUD overlay does not change the underlying zoning classification of the property until approval of the preliminary plat. PUD overlay approvals that have been granted approval by the parish council, after consideration by the zoning commission, shall remain in effect for a period of not more than two years from the date of approval by the parish council, unless a portion or phase of the proposed development has been granted preliminary plat approval by the planning commission in accordance with chapter 125.
 - (4) If no portion or phase of the original PUD, which has been granted zoning approval by the parish council, is granted preliminary approval within two years of the date of the parish council's original approval of the PUD, the owner/developer shall be required to submit an application for a new PUD overlay review and approval by the zoning commission and parish council, and pay all applicable fees.

(Code 1998, app. C, § 6.0103; Ord. No. 07-1548, § 6.0103, 5-3-2007; Ord. No. 14-3241, § 6.0103, 11-6-2014)

Sec. 130-1636. Amendment to the planned unit development.

Amendments to the PUD shall be classified as either major or minor in character.

- (1) *Major amendments.* Major amendments to the PUD shall require the developer to submit revised plans to the department of planning and development. Upon review of the proposed amendments to the PUD by the staff, a public hearing shall be established for the review of the major changes by the zoning commission.
 - a. The zoning commission shall have the authority to review and approve all major changes to the PUD. Public advertisement shall be required at least 15 days prior to the meeting date and shall run in the official journal of the parish at least twice during that time period.
 - b. Furthermore, the developer shall pay the processing fees according to chapter 2, article XVII, for the proposed major PUD changes.
 - c. Major changes to the PUD plan include changes to:
 1. The use of the land;
 2. The location of significant buildings and structures;
 3. A cumulative reduction in, the total of the originally approved overall acreage of open space by more than five percent and/or below the minimum of 25 percent of required open space;
 4. A cumulative increase in the density of a development by more than five percent of the total of the originally approved overall acreage; and/or
 5. A setback adjustment for an entire phase and/or section of a subdivision of ten lots or more. All other request of setback adjustment affecting less than ten lots will have to be appealed to the board of adjustments.
- (2) *Minor amendments.* Minor amendments to the PUD shall be construed as all other changes not considered major amendments. Minor amendments change shall be submitted for review and approval of the director of the department of planning and development.

(Code 1998, app. C, § 6.0104; Ord. No. 07-1548, § 6.0104, 5-3-2007; Ord. No. 14-3241, § 6.0104, 11-6-2014)

Secs. 130-1637—130-1655. Reserved.

DIVISION 3. MHO MANUFACTURED HOUSING OVERLAY

Sec. 130-1656. Purpose.

The purpose of the Manufactured Housing Overlay (MHO) is to provide for areas where manufactured homes may be placed on individual lots as permitted uses. It is intended to provide various areas and settings for a quality living environment for manufactured home residents.

(Code 1998, app. C, § 6.0201; Ord. No. 07-1548, § 6.0201, 5-3-2007; Ord. No. 10-2185, 1-7-2010)

Sec. 130-1657. General standards and criteria.

Any manufactured home proposed to be located within a MHO Manufactured Home Overlay shall be permitted by-right, provided that:

- (1) The manufactured home must meet the minimum standards as a HUD manufactured home unit in accordance with the Manufactured Home Construction and Safety Standards (HUD Code) for location within the parish;
- (2) The manufactured home must display a red certification label on the exterior of each transportable section;
- (3) The manufactured home is attached to and installed on a permanent foundation and the provisions of R.S. 9:1149.4 are complied with and the structure must meet the minimum standards as established in the most recent building codes adopted by the parish government;
- (4) The minimum floor area of the manufactured home is not less than 720 square feet;
- (5) The wheels, tongue and traveling lights must be removed within 15 days after the manufactured home is placed upon the lot;
- (6) Appropriate skirting is affixed to the manufactured home; and
- (7) The proposal must comply with all other development standards of the underlying zoning district.

(Code 1998, app. C, § 6.0202; Ord. No. 07-1548, § 6.0202, 5-3-2007; Ord. No. 10-2185, 1-7-2010)

Sec. 130-1658. Permit application.

Any request for a manufactured home within a MHO Manufactured Home Overlay shall be processed in accordance with the same building permit process as any other home with the exception that the request will be reviewed for compliance with the standards and criteria of this section by the department of planning and development.

(Code 1998, app. C, § 6.0203; Ord. No. 07-1548, § 6.0203, 5-3-2007; Ord. No. 10-2185, 1-7-2010)

Sec. 130-1659. Establishment of Manufactured Home Overlay (MHO).

A Manufactured Home Overlay (MHO) may be established by the parish council after review and approval of area in question in accordance with the procedures for established to consider zoning changes as outlined in these regulations.

(Code 1998, app. C, § 6.0204; Ord. No. 07-1548, § 6.0204, 5-3-2007; Ord. No. 10-2185, 1-7-2010)

Secs. 130-1660—130-1686. Reserved.

DIVISION 4. SAO SLIDELL AIRPORT OVERLAY

Sec. 130-1687. Purpose.

(a) To provide protection from the hazard created by structures or trees that in effect reduce the size of the area available for the landing, takeoff, and maneuvering of aircraft; and in the interest of the public health, public safety, and general welfare to prevent airport hazards to the extent legally possible, and by the exercise of its police power as the governing authority of the parish, the parish council hereby designates this section as the Slidell Airport Overlay.

(b) It is further declared that both the prevention of the creation or establishment of airport hazards and the elimination, removal, alteration, mitigation, or marking and lighting of existing airport hazards are public purposes for which political subdivisions may raise and expend public funds and acquire land or interest in land.

(Code 1998, app. C, § 6.0301; Ord. No. 07-1548, § 6.0301, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1688. Definitions.

For the purposes of this section only, the words, terms and phrases used in this section, shall have the following meanings ascribed to them, except where the context clearly indicates a different meaning:

Airport (Slidell) means the Slidell Municipal Airport generally located north of Interstate 12 at the northern end of Airport Road, Slidell, Louisiana.

Airport elevation means the highest point of an airport's usable landing area measured in feet from mean sea level.

Airport hazard means any structure or object of natural growth located on or in the vicinity of a public airport, or any use of land near such airport, which obstructs the airspace required for the flight of aircraft in landing or takeoff at such airport or is otherwise hazardous to such landing or takeoff of aircraft.

Airport manager (Slidell) means that person appointed by the mayor of Slidell to manage the day to day operation of the Slidell Airport.

Approach, transitional, horizontal, and conical zones means those zones which apply to the area under the approach, transitional, and conical surfaces defined in FAR part 77.

Federal Aviation Administration (FAA) means that agency of the United States Department of Transportation with authority to regulate and oversee all aspects of civil aviation in the United States.

Height, for the purpose of determining the height limits in all zones set forth in this division and shown on the zoning map, the datum shall be mean sea level elevation unless otherwise specified.

Local governing authority means that authority with jurisdiction over building permits, zoning and other similar regulatory functions for the property in question.

Nonconformance use means any pre-existing structure, object, of natural growth, or use of land which is inconsistent with the provisions of this division or an amendment thereto.

Nonprecision instrument runway means a runway having an existing instrument approach procedure utilizing air navigation facilities with only horizontal guidance, or area type navigation equipment, for which a straight-in nonprecision instrument approach procedure has been or planned, and for which no precision approach facilities are planned or indicated on an FAA planning document or military service's military airport planning document.

Person means an individual, firm, partnership, company, association, joint stock association, or governmental entity. The term "person" includes a trustee, receiver, assignee, or similar representative of any of them.

Primary surface means a surface longitudinally centered on a runway. When the runway has a specially prepared hard surface, the primary surface extends 200 feet beyond each end of that runway; but when the runway has no specially prepared hard surface, or planned hard surface, the primary surface ends at each end of that runway. The width of the primary surface of a runway will be that width prescribed in part 77 of the Federal Aviation Regulations (FAR), for the most precise approach existing or planned for either end of that runway. The elevation of any point on the primary surface is the same as the elevation of the nearest point on the runway centerline.

Runway means a defined area on an airport prepared for landing and takeoff of aircraft along its length.

Structure means an object constructed or installed by man, including, but without limitation to, buildings, towers, smokestacks, earth information, and overhead transmission lines.

Tree means any object of natural growth.

Utility runway means a runway that is constructed for and intended to be used by propeller driven aircraft of 12,500 pounds maximum gross weight and less.

Visual runway means a runway intended solely for the operation of aircraft using visual approach procedures with no straight-in instrument approach procedure and no instrument designation indicated on an FAA approved airport layout plan, a military service's approved military airport layout plan, or by any planning document submitted to the FAA by competent authority.

(Code 1998, app. C, § 6.0302; Ord. No. 07-1548, § 6.0302, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1689. District location.

The Slidell Airport Overlay is established as follows: All property within 14,200 feet from the edge of the runway area designated on the Slidell Airport Hazard Zoning Map consisting of one sheet prepared by Hamilton, Meyer, and Associates, and dated June 23, 1980.

(Code 1998, app. C, § 6.0303; Ord. No. 07-1548, § 6.0303, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1690. Application of overlay (district) regulations.

All projects located within the Slidell Airport Overlay which exceed 150 feet in height from grade shall be reviewed by the airport manager for compliance with the provisions of this overlay district.

(Code 1998, app. C, § 6.0304; Ord. No. 07-1548, § 6.0304, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1691. Airport zones.

(a) In order to carry out the provisions of this division, there are hereby created and established certain zones which include all of the land lying within the approach zones, transitional zones, horizontal zones, and conical zones as they apply to a particular airport.

(b) Such zones are shown on Slidell Airport Hazard Zoning Map consisting of one sheet prepared by Hamilton, Meyer, and Associates, and dated June 23, 1980 which is attached to Ordinance No. 91-1543, adopted December 19, 1991, and made a part hereof by reference. An area located in more than one of the following zones is considered to be only in the zone with the more restrictive height limitation. The various zones are hereby established and defined as follows:

- (1) *Horizontal zone.* The horizontal zone is hereby established by swinging arcs of 10,000 feet radii from the center of each end of the primary surface of each runway, and connecting the adjacent arcs of drawing lines tangent to those arcs. The horizontal zone does not include the approach and transitional zones.
- (2) *Conical zone.* The conical zone is hereby established as the area that commences at the periphery of the horizontal zone and extends outward therefrom a horizontal distance of 4,000 feet. The conical zone does not include the precision instrument approach zones and the transitional zones.

- (3) *Precision instrument runway approach zone.* The inner edge of this approach zone coincides with the width of the primary surface and is 1,000 feet wide. The approach zone expands outward uniformly to a width of 16,000 feet at a horizontal distance of 50,000 feet from the primary surface. Its centerline being the continuation of the centerline of the runway.
- (4) *Runway larger than utility with a visibility minimum as greater than three-fourths mile nonprecision instrument approach zone.* The inner edge of this approach zone coincides with the width of the primary surface and is 1,000 feet wide. The approach zone expands outward uniformly to a width of 3,500 feet at a horizontal distance of 10,000 feet from the primary surface. Its centerline is the continuation of the centerline of the runway.

(Code 1998, app. C, § 6.0305; Ord. No. 07-1548, § 6.0305, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1692. Airport zone height limitations.

Except as otherwise provided in this division, no structure or tree shall be erected, altered, allowed to grow, or be maintained in any zone created by this division to a height in excess of the applicable height limit herein established for such zone. Such applicable height limitations are hereby established for each of the zones in question as follows:

- (1) *Transitional zones.* Slopes upward and outward seven feet horizontally for each foot vertically beginning at the sides of the same elevation as the primary surface and the approach zones, and extending to a height of 150 feet above the airport elevation which is 27 feet above mean sea level. In addition to the foregoing, there are established height limits sloping upward and outward seven feet horizontally for each foot vertically beginning at the sides of and at the same elevation as the approach zones and extending to where they intersect the conical surface. Where the precision instrument runway approach zone projects beyond the conical zone, height limits sloping upward and outward seven feet horizontally for each foot vertically shall be maintained beginning at the sides of and at the same elevation as precision instrument runway approach surface, and extending to a horizontal distance of 5,000 feet measured at 90-degree angles to the extended runway centerline.
- (2) *Horizontal zone.* 150 feet above the airport elevation or a height of 178 feet above mean sea level.
- (3) *Conical zone.* Slopes upward and outward 20 feet horizontally for each foot vertically beginning at the periphery of the horizontal zone and at 150 feet above the airport elevation and extending to a height of 350 feet above the airport elevation.
- (4) *Precision instrument runway approach zone.* Slopes upward 50 feet vertically beginning at the end of and at the same elevation as the primary surface and extending to a

horizontal distance of 10,000 feet along the extended runway centerline; thence slope upward 40 feet horizontally for each foot vertically to an additional horizontal distance of 40,000 feet along the extended runway centerline.

- (5) *Runway larger than utility with a visibility minimum greater than three-fourths mile nonprecision instrument approach zone.* Slopes upward 34 feet horizontally for each foot vertically beginning at the end of and at the same elevation as the primary surface and extending to a horizontal distance of 10,000 feet along the extended runway centerline.
- (6) *Height limitations.* Nothing in this division shall be construed as prohibiting the growth, construction, or maintenance of any tree or structure to a height up to 50 feet above the surface of the land. Where an area is covered by more than one height limitation, the more restrictive limitation shall prevail.

(Code 1998, app. C, § 6.0306; Ord. No. 07-1548, § 6.0306, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1693. Use restrictions.

Notwithstanding any other provisions of this division, no use may be made of land or water within any zone established by this division in such a manner as to create electrical interference with navigational signals or radio communication between the airport and aircraft, make it difficult for pilots to distinguish between airport lights and others, result in glare in the eyes of pilots using the airport, impair visibility in the vicinity of the airport or otherwise in any way create a hazard or endanger the landing, takeoff, or maneuvering of aircraft intending to use the airport.

(Code 1998, app. C, § 6.0307; Ord. No. 80-29, 8-21-1980; Ord. No. 91-1543, 12-19-1991; Ord. No. 07-1548, § 6.0307, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1694. Nonconforming uses.

(a) *Regulations not retroactive.* The regulations prescribed by this division shall not be construed to require the removal, lowering, or other changes or alterations of any structure or tree not conforming to the regulations as of the effective date of the ordinance from which this division is derived, or otherwise interfere with the continuance of a nonconforming use. Nothing contained herein shall require any change in the construction, alteration, or intended use of any structure, the construction or alteration of which was begun prior to the effective date of the ordinance from which this division is derived, and is diligently prosecuted.

(b) *Marking and lighting.* Notwithstanding the preceding provisions of this section, the owner of any existing nonconforming structure or tree is hereby required to permit the installation, operation, and maintenance thereon of such markers and lights as shall be deemed necessary by the airport manager to indicate to the operators of aircraft in the vicinity of the airport, the presence of such airport hazards. Such markers and lights shall be installed, operated, and maintained at the expense of the local governing authority.

(Code 1998, app. C, § 6.0308; Ord. No. 07-1548, § 6.0308, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1695. Permits.

(a) *Future uses.* No material change shall be made in the use of land and no structure or tree shall be erected, altered, planted, or otherwise established in any zone hereby created unless a permit therefore shall have been applied for and granted.

- (1) However, a permit for a tree or structure of less than 75 feet of vertical height above the ground shall not be required in the horizontal distance of 4,200 feet from each end of the runway except when such tree or structure, because of terrain, land contour, or topographic features, would extend above the height limit prescribed for the respective zone.
- (2) Each application for a permit shall indicate the purpose for which the permit is desired with sufficient particulars to determine whether the resulting use, structure, or tree would conform to the regulations herein prescribed. If such determination is in the affirmative, the permit shall be granted.

(b) *Existing uses.* No permit shall be granted that would allow the establishment or creation of an airport hazard or permit a conforming use, structure, or tree to become a greater hazard to air navigation than it was on the effective date of the ordinance from which this division is derived or any amendments thereto or than it is when the application for a permit is made. Except as indicated, all applications for such a permit shall be granted.

(c) *Nonconforming uses abandoned or destroyed.* Whenever the airport manager determines that a nonconforming tree or structure, upon approval of parish building inspector, has been abandoned or more than 80 percent torn down, physically deteriorated, or decayed, no permit shall be granted that would allow such structure or tree to exceed the applicable height limit or otherwise deviate from the zoning regulations.

(d) *Variances.* Any person desiring to erect or increase the height of any structure, or permit the growth of any tree, or use his property not in accordance with the regulations prescribed in this division, may apply to the airport manager for a variance from such regulations. Such variances shall be allowed where it is duly found that a literal application or enforcement of the regulations would result in practical difficulty or unnecessary hardship and relief granted would not be contrary to the public interest, but will do substantial justice and be in accordance with the spirit of this division, and as permissible by all applicable FAA regulations.

(e) *Hazard marking and lighting.* Any permit or variance granted may, if such action is deemed advisable to effectuate the purpose of this division and be reasonable in the circumstances, be so conditioned as to require the owner of the structure or tree in question to permit the local governing authority at its own expense, to install, operate, and maintain thereon such markers and lights as may be necessary to indicate to pilots the presence of an airport hazard. (Code 1998, app. C, § 6.0309; Ord. No. 07-1548, § 6.0309, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1696. Enforcement.

(a) It shall be the duty of the director of the parish department of planning and development to identify the potential conflict between any proposed structure and these regulations and refer them to the airport manager for review.

(b) It shall be the duty of the airport manager to administer and cause to enforce the regulations prescribed herein through the various enforcement agencies of the local governing authority. Applications for permits and variances shall be made to the airport manager upon a form furnished by him. Applications required by this division to be submitted to the airport manager shall be promptly considered and granted or denied by him.

(Code 1998, app. C, § 6.0310; Ord. No. 07-1548, § 6.0310, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Sec. 130-1697. Appeals.

(a) Any person aggrieved or any taxpayer affected by any decision of the airport manager made in his administration of this division, may appeal to board of adjustment of the local governing authority.

(b) All appeals under this section must be taken within a reasonable time as provided by the rules of the board of adjustment, by filing with the staff of the board of adjustment a notice of appeal specifying the grounds thereof. The staff of the board of adjustment shall forthwith transmit to the board of adjustment all the papers constituting the record upon which the action appealed from was taken.

(c) An appeal shall stay all proceedings in furtherance of the action appealed from unless the airport manager certifies to the board of adjustment, after the notice of appeal has been filed with it, that by reason of the facts stated in the certificate a stay would, in his opinion, cause imminent peril to life or property. In such case, proceedings shall not be stayed except by order of the board of adjustment on notice to the airport manager and on due cause shown.

(d) The board of adjustment shall fix a reasonable time for hearing appeals, give public notice and due notice to the parties in interest, and decide the same within a reasonable time. Upon the hearing, any party may appear in person or by agent or by attorney.

(e) The board of adjustment may, in conformity with the provision of this division, reverse or affirm, in whole or in part, or modify the order, requirement, decision, or determination appealed from and may make such order, requirement, decision, or determination, as may be appropriate under the circumstances.

(Code 1998, app. C, § 6.0311; Ord. No. 07-1548, § 6.0311, 5-3-2007; Ord. No. 11-2505, 5-5-2011)

Secs. 130-1698—130-1717. Reserved.

DIVISION 5. MIO MUNICIPAL INTERFACE OVERLAY DISTRICT

Sec. 130-1718. Purpose.

The purpose of this division is to provide the planning department of the City of Mandeville a courtesy right to review and comment with respect to certain specified matters regarding properties which are located near, but outside the city limits of Mandeville.

(Code 1998, app. C, § 6.0402; Ord. No. 07-1548, § 6.0402, 5-3-2007)

Sec. 130-1719. Applicability.

This division shall only be applicable to the properties outside of the city limits of Mandeville, with frontage along on the following portions of the following highways or roads:

- (1) North approach, from Florida Street North to Louisiana Highway 22.
- (2) U.S. Highway 190 East Service Road from U.S. Highway 190 North to Marquette Street.
- (3) U.S. Highway 190 West Service Road from Louisiana Highway 22 North to 7th Street.
- (4) La. 22 from Ridgewood Drive East to U.S. Highway 190.
- (5) U.S. Highway 190 from Louisiana Highway 22 East to Bayou Castine.
- (6) West Causeway approach from Louisiana Highway 22 East to North Causeway approach.
- (7) Highway 59 from U.S. Highway 190 North to Dupard Street.

(Code 1998, app. C, § 6.0403; Ord. No. 07-1548, § 6.0403, 5-3-2007)

Sec. 130-1720. Submittals to municipality.

(a) *Signs, lighting, and landscape variances.* Within five business days after application is made to the parish for a variance from sign, lighting or landscape regulations requiring a hearing before the board of zoning adjustments, the applicant shall transmit, to the department of planning of the City of Mandeville (with a copy of the transmittal letter being directed to the parish department of planning and development), a complete copy of the documents filed with the board of zoning adjustments.

(b) *New or altered building construction not requiring a variance.* In the event an application is made to the parish for the construction of a new building or the alteration of an existing building on properties with frontage along highways or roads described in section 130-1719 which do not require a variance from the board of zoning adjustments from the signs, lighting or landscaping regulations, the applicant shall within two business days transmit, to the

department of planning of the City of Mandeville (with a copy of the transmittal letter being directed to the parish department of planning and development), a complete copy of the documents filed with the parish department of permits.

(Code 1998, app. C, § 6.0404; Ord. No. 07-1548, § 6.0404, 5-3-2007)

Sec. 130-1721. Comments of municipality.

If the department of planning of the City of Mandeville so desires, it may transmit written comments to the director of the department of planning and development or the director of the department of permits of the parish with respect to such submittals; provided that, a copy of such written comments shall be simultaneously transmitted to the applicant. The comments of the department of planning of the City of Mandeville may be considered by the department of planning and development, the board of zoning adjustments and other agencies of the parish, but shall not be binding on the department of planning and development, the board of zoning adjustments or other agencies of the parish. At no time shall any action of the parish, such as the granting of a permit or variance, be delayed to await comments from the department of planning of the City of Mandeville.

(Code 1998, app. C, § 6.0405; Ord. No. 07-1548, § 6.0405, 5-3-2007)

Sec. 130-1722. Zoning regulations applicable.

Although the department of planning of the City of Mandeville is provided a right of review and comment as provided in section 130-1721, the zoning and other regulations of the City of Mandeville shall not be applicable to the properties which are the subject of this division, and the applicant shall only be required to meet the zoning and other regulations of the parish with respect to such properties.

(Code 1998, app. C, § 6.0406; Ord. No. 07-1548, § 6.0406, 5-3-2007)

Sec. 130-1723. Special street planting area rules for U.S. Highway 190 between Louisiana Highway 22 and Bayou Castine.

(a) Applicability; definitions.

- (1) *Applicability.* This section is applicable to that portion of the MIO district, outside of the city limits of Mandeville, located along U.S. Highway 190 from Louisiana Highway 22 (the centerline of the North Causeway Approach Overpass over Louisiana Highway 22/U.S. Highway 190) to Bayou Castine (currently the eastern city limits of the City of Mandeville).

- (2) *Definitions for this section.* The following definitions are applicable to this section :

Present Highway 190 right-of-way line means the right-of-way line of U.S. Highway 190 from Louisiana Highway 22 to Bayou Castine prior to acquisition of right-of-way by DOTD for the U.S. Highway 190 widening project. Subsequent Highway 190

right-of-way line: The right-of-way line of U.S. Highway 190 from Louisiana Highway 22 to Bayou Castine after the acquisition of right-of-way by DOTD for the U.S. Highway 190 widening project.

U.S. Highway 190 widening project means the highway widening project, by the Louisiana Department of Transportation and Development (DOTD) along U.S. Highway 190 from Louisiana Highway 22 (the centerline of the North Causeway Approach Overpass over Louisiana Highway 22/U.S. Highway 190) to Bayou Castine (currently the eastern city limits of the City of Mandeville). As of the date of the adoption of this section, this project currently is described as DOTD State Project No. 700-30-0270, but this definition includes not only that project number, but any other project number that may be used for the widening along U.S. Highway 190 from Louisiana Highway 22 to Bayou Castine.

(b) *Effect, purpose of U.S. Highway 190 widening project.*

- (1) *Effect of U.S. Highway 190 widening project.* This section is necessitated because the U.S. Highway 190 widening project will affect many properties with frontage along U.S. Highway 190 which already have buildings and improvements constructed thereon and which, in many instances, are limited in depth. Since under the provisions of section, street planting areas are measured 25 feet back (20 feet back in the case of lots with two street frontages) from the street property line, the U.S. Highway 190 widening project, without the provisions of this section, would cause the street planting areas to extend from the subsequent U.S. Highway 190 right-of-way line into the property a distance of 25 feet (20 feet in the case of lots with two street frontages), thereby resulting in significant problems and/or diminishment of property values for the properties which will be subject to the U.S. Highway 190 widening project.
- (2) *Purpose of this section.* The purpose of this section is to minimize the effect of the U.S. Highway 190 widening project on property owners with frontage along this highway and to minimize the land acquisition costs to DOTD for the U.S. Highway 190 widening project, while seeking to maintain as much as possible of the intended landscaping effect of the street planting areas as provided for in section 130-1873.

(c) *Street planting area prior to land acquisition for the U.S. Highway 190 widening project.* Prior to land acquisition for the U.S. Highway 190 widening project, the street planting areas along U.S. Highway 190 shall be 25 feet wide or deep (20 feet for properties having more than one street frontage) measured from the present U.S. Highway 190 right-of-way line and shall be subject to the other provisions of section 130-1873.

(d) *Street planting area after land acquisition for the U.S. Highway 190 widening project.* After the land acquisition for the U.S. Highway 190 widening project, the width (depth) of the street planting area after such acquisition shall be reduced by one foot (or fraction thereof) for

each foot (or fraction thereof) that the right-of-way for U.S. Highway 190 is widened by such acquisition. The following are examples of the application of this rule at points along the right-of-way line of U.S. Highway 190 after such acquisition:

<i>Extended Width of Right-of-Way</i>	<i>Street Planting Width or Depth After Land Acquisition</i>
Zero (No widening)	25 feet (20 feet for properties with more than one frontage)
Right-of-way widened 5 feet	20 feet (15 feet for properties with more than one frontage)
Right-of-way widened 10 feet	15 feet (10 feet for properties with more than one frontage)
Right-of-way widened 15 feet	10 feet (5 feet for properties with more than one frontage)
Right-of-way widened 20 feet	5 feet (no front planting area for properties with more than one frontage)
Right-of-way widened 25 feet	No front planting area
Right-of-way widened 30 feet	No front planting area

(e) *Planting requirements in street planting areas after U.S. Highway 190 widening project.* After land acquisitions for the U.S. Highway 190 widening project, the planting requirements in street planting areas as set forth in section 130-1873(f) shall be as follows:

- (1) *Street planting area widths of 15 or more feet.* If the street planting area width (depth) is 15 or more feet after the land acquisition for the U.S. Highway 190 widening project, the planting requirements set forth in section 130-1873(f) shall be satisfied within such 15 or more feet.
- (2) *Street planting area widths of less than 15 feet.* If the street planting area width (depth) is less than 15 feet after the land acquisition for the U.S. Highway 190 widening project:
 - a. The applicant shall submit a landscape and tree preservation plan to the department of planning and development which achieves as much of the planting required in section 130-1873(f) as is reasonably feasible.
 - b. The department of planning and development shall review such plan and make such additional requirements as it deems appropriate. The department of planning and development's decision shall be final except that it is subject to appeal to the board of zoning adjustments.

(f) *Utilities in street planting areas.* If, after the acquisition of land for the U.S. Highway 190 widening project, a utility easement or servitude is located within the street planting area and is adjacent to and runs along a street or road, the width of the street planting area shall not be increased beyond the width required in subsection (e) of this section.

(g) *Required information.*

- (1) In order to receive the benefits of this section, the applicant shall submit to the department of planning and development:
 - a. A copy of the acquisition (judgment of expropriation or voluntary sale or grant of right-of-way) by DOTD for the U.S. Highway 190 widening project.
 - b. A copy of the right-of-way map of DOTD showing the property acquired for the U.S. Highway 190 widening project.
 - c. A copy of a survey by a licensed surveyor showing the right-of-way line before and after the acquisition for the U.S. Highway 190 widening project.
- (2) The department of planning and development may waive submission of one or more of these items required to be submitted, provided that the submitted item or items are sufficient to determine the right-of-way line before and after the acquisition for the U.S. Highway 190 widening project.

(h) *Special street planting area rules take precedence.* The provisions of this section shall take precedence over other provisions of article VI, division 2 of these regulations relating to street planting areas so that if there is any conflict, the provisions of this section shall prevail.

(i) *Intergovernmental agreement.* It is understood that the parish may enter into an intergovernmental agreement with the DOTD to use part of the extended right-of-way resulting from the U.S. Highway 190 widening project for the purposes of landscaping in order to mitigate the effects of the reduction in width of the street planting areas due to such widening.

(Code 1998, app. C, § 6.0407; Ord. No. 07-1548, § 6.0407, 5-3-2007)

Secs. 130-1724—130-1754. Reserved.

DIVISION 6. PLANNED CORRIDOR DISTRICT

Sec. 130-1755. Purpose.

The purpose of this district is to provide for the preservation of the certain existing special standards for all development, excepting single-family residential, along the Louisiana Highway 21 Corridor and the Tammany Trace. The permitted uses are determined by the underlying zoning classification upon which the overlay rests. Minimum standards such as signs and lighting, landscaping, parking, height and setbacks shall be as set forth in the other provisions of these regulations, except that the special design standards set forth in this division shall be applicable if they are more restrictive than said minimum standards.

(Code 1998, app. C, § 6.0501; Ord. No. 07-1548, § 6.0501, 5-3-2007; Ord. No. 11-2427, 1-6-2011)

Sec. 130-1756. History.

The Highway 21 Planned Corridor (1989) and the Tammany Trace Overlay Districts were created for the protection of the scenic benefits of that corridor. With a revision to the general development regulations in 2002, a desire was expressed by the residents of these areas to maintain the high development standards in these corridors. A determination was made to consolidate these standards into the planned corridor district standards found in this section. (Code 1998, app. C, § 6.0502; Ord. No. 07-1548, § 6.0502, 5-3-2007; Ord. No. 11-2427, 1-6-2011)

Sec. 130-1757. Applicability.

These sections apply to all lots with frontage along Highway 21 between the Tchefuncte River and Highway 1077; and lots with frontage along the Tammany Trace. (Code 1998, app. C, § 6.0503; Ord. No. 07-1548, § 6.0503, 5-3-2007; Ord. No. 11-2427, 1-6-2011)

Sec. 130-1758. General standards.

The zoning commission shall have the authority to grant the plan review permit with the recommendations of the department of planning and development. The plan review permit will be processed in accordance to section 130-1759, development review procedures.

- (1) The zoning commission may attach such conditions on the plan review permit as are necessary to ensure the continuous conformance to all applicable standards and the integrity of the district.
- (2) The zoning commission may approve additional standards as may be recommended by the department of planning and development imposed in the public interest for signage, landscaping, parking, setbacks and fascia appearance standards in the overlay district.
- (3) Failure to observe the conditions of the commission imposed pursuant to the issuance of the plan review permit shall be deemed to be grounds for violation and subject to the revocation of the plan review permit.

(Code 1998, app. C, § 6.0504; Ord. No. 07-1548, § 6.0504, 5-3-2007; Ord. No. 11-2427, 1-6-2011)

Sec. 130-1759. Development review procedures.

(a) *General review procedures.* Requests for development or redevelopment in the designated planned corridors shall be submitted to the parish department of planning and development. The requirement of a plan review shall be determined by the department of planning and development in accordance with subsection (c) of this section, compliance with the established overlay district. The applicant shall submit fully detailed plans in accordance with subsection (e) of this section, site plan submittal. When the subject property is located in the Louisiana Highway 21 Corridor, or along Tammany Trace, the site plan submittal shall be required to undergo plan review with a public hearing before the zoning commission site plan review in accordance with these procedures. The final disposition of which shall be determined by the

zoning commission of the parish. Variations in the planned corridor regulations may be granted by the parish zoning commission through the plan review process provided the following criteria are met:

- (1) The granting of the variation is not inconsistent with the general provisions and intent of the planned corridor.
- (2) Harmony and compatibility with adjacent land uses are not adversely affected.
- (3) Special conditions and circumstances exists peculiar to land, structures or buildings which are not applicable to other land structures or buildings in the same district and which a site related hardship can be demonstrated.

(b) *Determination.* After a decision is rendered by the zoning commission, the permit decision shall not become effective for ten days of the decision, during which time an appeal can be made in written form to the parish council through the department of planning and development. The procedure for appeals to the parish council is contained within this Code.

(c) *Compliance with the established overlay.*

- (1) *Existing development; conditions for compliance.* Development and structures existing prior to adoption of the planned corridor shall comply with the planned corridor district regulations and undergo plan review before the zoning commission in accordance to subsection (a) of this section, general review procedures, when any of the following conditions are met:
 - a. *Change of permitted use or occupancy.* Structures utilized by a single business which are not a part of a development with multiple land uses such as a shopping center, and which structures were in existence prior to the adoption of the planned corridor, shall comply with the planned corridor district regulations upon change of permitted use or a change of occupancy that would require an increase in the number of parking and loading spaces needed to service the structure.
 - b. *Vacancy.* Any single use development that is vacant for a six-month period, or a multi-use site where 51 percent or more of the development is vacant for the same six-month period, shall comply with the planned corridor district regulations.
 - c. *Additions.* Any additions to the development or structures, including construction of parking lots, that adds 50 percent or more to the size of the original development shall comply to the planned corridor district regulations.
 - d. *Signs.* Signs existing at the time of the planned corridor designation shall comply with the planned corridor district regulations when there is a change in sign structure, support, or area. The replacement of the face or panels of all nonconforming signs shall be approved by the director of planning and development or

designee without need for a public hearing so long as the area of the sign face is not increased, illumination is not added and/or the degree of nonconformance (i.e., height, setbacks) is not increased.

- (2) *New development.* New development shall comply fully with the district regulations of the planned corridor. Plan review with public hearings is required before the zoning commission in accordance to subsection (a) of this section, general review procedures.

(d) *Plan review procedures.*

- (1) *Pre-application conference.* Prior to the submission of an application for plan review in a planned corridor, a pre-application conference with a designated representative of the department of planning and development is required. The purpose of the pre-application conference is to thoroughly discuss the proposal and to bring the petition in conformity with the planned corridor district regulations.
- (2) *Application.* An application for plan review in a planned corridor shall be filed with the department of planning and development and shall contain the following information:
- a. *Interest and ownership.* The petitioner's and the property owner's name, address, phone number, and signatures.
 - b. *Zoning classification.*
 - c. *Legal description.*
 - d. *Fees.* Fees for site plan review shall be as required by chapter 2, article XVII of the Parish Code of Ordinances, parish fees and service charges.
 - e. *Site plan.* A site plan shall be submitted in accordance to subsection (e) of this section, site plan submittal.
 - f. *Additional information.* The zoning commission may require additional material such as plans, maps, studies and reports which may be needed in order to make the necessary findings and determinations that the applicable parish standards and guidelines have been achieved.

(e) *Site plan submittal.*

- (1) *Procedure.* Prior to issuance of a building permit, a site plan for the proposal shall be submitted to the department of planning and development as specified in subsection (a) of this section, general review procedures, for review and determination.
- (2) *Site plan requirements.* Drawing submissions shall be required to be 24 inches by 36 inches or smaller. If the applicant fails to submit such drawings, additional fees may be required. The following minimum information shall be submitted to the department of planning and development in the form of a site plan:
- a. The title of the project and the names of the project planner and developer.

- b. Plat indicating scale, date, north arrow, and general vicinity map indicating existing land uses within 500 feet of all boundaries of the proposed development shall be included.
- c. All existing physical features such as existing streets, buildings, watercourses, easements, parking spaces, service bays and loading areas, sidewalks, and signs.
- d. Boundaries of the property involved.
- e. Parking layout indicating the number of required and proposed parking spaces, the location of ingress, egress and access streets, and the location of pedestrian and vehicular ways; circulation element indicating the movement of pedestrians, goods and vehicles.
- f. A landscape plan of the site showing the type, size and number of plants; location of existing trees to be preserved; the location and dimensions of proposed planting beds, barrier curbs, site triangles, fences, buffers and screening; elevations of all fences and type of materials to be used; and total square footage of landscaping.
- g. Tabulation of the maximum square footage of each use.
- h. The proposed height and setback of any building or structure.
- i. Fascia treatment of the buildings or structures including elevations, and type of materials.
- j. The location, dimensions, area, type of materials and elevations of all signs and support structures.
- k. Location of trash disposal system and details of screening, including type, height and elevation of dumpster and fence.
- l. Lighting plan of the site showing location, number, type, height and materials of fixtures.
- m. Illustrative approved drainage plan by the department of engineering.
- n. If the proposed development is to be constructed in phases, indicate proposed development scheduling in detail including:
 - 1. The approximate date when construction of each phase of the project can be expected to begin.
 - 2. The order in which the phases of the project will be built.
 - 3. The infrastructure and on-site improvements that will be included in each phase delineated for the development, including but not limited to service areas, access drives, parking, landscaping, buildings and other structures.

4. If no phasing schedule is provided at the time of application, the project shall be completed as a single unit, or has to go through another site plan review when any changes are proposed.

(Code 1998, app. C, § 6.0505; Ord. No. 07-1548, § 6.0505, 5-3-2007; Ord. No. 11-2427, 1-6-2011)

Sec. 130-1760. Special design standards.

The minimum standards for the Highway 21 Planned Corridor Overlay will be the same as the standards for all commercial development unless otherwise stated below:

(1) *Site and structure provisions.*

- a. Minimum lot area.
- b. Minimum area regulations.
- c. Height regulations.
- d. Off-street parking and loading requirements. The parking area shall be located no less than 50 feet from the property line nor shall it encroach on the required street planting area.
- e. Landscaping regulations. Landscape regulations shall be the same as for other commercial properties, except that the following additional standards shall apply:

1. *Planting requirements.*

(i) *Street planting area requirements.*

- A. The street planting area shall be a minimum of 25 feet in depth. For lots greater than 150 feet in depth, the street planting area shall include one additional foot for every ten feet in depth.
- B. The street planting area shall contain a minimum of one class A tree per every 300 square feet of the street planting area and one class B tree per every 200 square feet of the street planting area.
- C. Planting beds near signage and structures are recommended.
- D. Grass or groundcover are recommended for areas without trees.

(ii) *Buffer planting area requirements.* A nonresidential property abutting a residential district shall have a minimum side yard and rear yard requirement of 30 feet.

(iii) *Parking area requirements.*

- A. The parking area shall be screened from view when the parking area is oriented to the side and/or the front of the structure to reduce visibility of the parking area from the highway using one of the following methods:
 - i. Seventy percent sight obscuring screen of living material.

- ii. One hundred percent sight obscuring screen six feet in height of nonliving material.
 - iii. Earth berm with a minimum height of three feet.
 - B. Planting areas shall be a minimum of ten percent of the paved parking area.
 - 2. *Protection of landscape areas.* The placement of barrier curbs or wheel stops to protect landscape areas from vehicular damage shall be required.
 - f. Sign regulations. Sign regulations shall be the same as for other commercial properties, except that the following additional standards shall apply:
 - 1. Area and height provisions for ground signs:
 - (i) Single occupancy:
 - A. Area allowed: 25 square feet.
 - B. Height allowed: six feet.
 - (ii) Multiple occupancy:
 - A. Area allowed: 50 square feet.
 - B. Height allowed: eight feet.
 - 2. No internal illumination.
 - 3. White light only, no colored lighting.
 - 4. Spectrum colors only, no iridescent colors permitted.
 - 5. Personal identification signs with any dimensions exceeding 24 inches shall require an administrative permit. Such signs shall not exceed four square feet.
 - g. Lighting requirements.
 - h. Utility requirements.
 - i. Setback requirements. For lots with frontage along Highway 21 only, the following setback requirements shall be applied:
 - 1. Principal buildings: 100 feet from the property line.
 - 2. Accessory structures: 100 feet from the property line.
- (Code 1998, app. C, § 6.0506; Ord. No. 07-1548, § 6.0506, 5-3-2007; Ord. No. 11-2427, 1-6-2011)

Sec. 130-1761. Special design standards for the Tammany Trace Overlay.

The minimum standards for the Tammany Trace Overlay will be the same as the standards for all commercial development unless otherwise stated below:

- (1) *Site and structure provisions.*
 - a. Minimum lot area.

- b. Minimum area regulations.
- c. Height regulations. No portion of a building for business purposes located 25 feet from the Tammany Trace shall exceed 35 feet in height above the natural grade of the property at the location of the structure or base flood elevation as established in chapter 115, article II of this Land Development Code, whichever is higher. Where a building is taller than 35 feet in height, one additional foot of setback shall be required for each one foot in building height over 35 feet.
- d. Off-street parking and loading requirements.
- e. Landscaping regulations. Landscape regulations shall be the same as for other commercial properties, except that the following additional standards shall apply:
 - 1. *Planting requirements.*
 - (i) *Planting area requirements along the Tammany Trace.*
 - A. The planting area abutting the Tammany Trace shall be a minimum of 25 feet in depth. If the site has not been previously cleared, all trees and underbrush shall be preserved wherever they may be located, within the 25-foot planting area.
 - B. Only trees that are unsound, hazardous, diseased or infested with insects as determined by a licensed arborist, located within the buffer planting area, can be removed.
 - C. Trees and shrubs required. In the case where the site has previously been cleared or the trees that are unsound, hazardous, diseased or infested with insects have to be removed, the required minimum number of trees shall be provided in the planting area or areas as set under article VI, division 2 of these regulations.
 - D. As required under article VI, division 2 of these regulations, the location, dimensions, depth and description of any retention/detention ponds or retention/detention areas on, or to be placed on the site, shall be shown on the site plan. However, the required retention/detention pond shall be located outside the required 25-foot planting area.
 - E. A path or trail can be provided through the required planting area to access the Tammany Trace. The width of the cleared area for the construction of the path shall not exceed ten feet and the width of the pavement shall not exceed five feet.
- f. Facade. Facades of the buildings having frontage on the Tammany Trace shall maintain the same standard of design as the front facade. The finish of the facades shall be limited to cement plaster (stucco), brick or wood.

(Code 1998, app. C, § 6.0507; Ord. No. 07-1548, § 6.0507, 5-3-2007; Ord. No. 11-2427, 1-6-2011)

Secs. 130-1762—130-1785. Reserved.

DIVISION 7. RO RURAL OVERLAY

Sec. 130-1786. Purpose.

The RO Rural Overlay is established to permit agriculture uses, to encourage the maintenance of the rural countryside, to preserve forests and other undeveloped lands away from areas of population growth, and to allow residents to retain their traditional ways of life. The preferred land use in the district is agricultural, either active in the form of crops or passive in the form of forest management or pasture lands. Permitted uses would include single-family residences and certain accessory structures and uses for the conduct of agriculture support and related business.

(Code 1998, app. C, § 6.0601; Ord. No. 07-1548, § 6.0601, 5-3-2007)

Sec. 130-1787. Permitted uses.

Only the following permitted uses shall be allowed in the RO Rural Overlay and no structure or land shall be devoted to any use other than a use permitted hereunder with the exception of uses lawfully established prior to the effective date of the ordinance from which this section is derived:

- (1) *Agriculture uses.*
 - a. Farming and any other agricultural.
 - b. Agricultural buildings.
 - c. Limited commercial and industrial uses supporting the agricultural production limited to buildings no larger than 5,000 square feet.
 - d. Wholesale/retail greenhouses and nurseries.
 - e. Roadside farm stands.
 - f. Dirt hauling equipment storage, including operable, licensed bobtail dump trucks, tractor trailers, and excavation equipment when stored on a operable, licensed transport vehicle, where the area utilized for storage is not more than ten percent of the property.
- (2) *Residential uses.* When located on property that is zoned for nonresidential uses:
 - a. Single-family dwelling units.
 - b. Private garages and accessory structures.
 - c. One garage apartment or guest house under 1,000 square feet of habitable floor space.

d. Accessory single or multifamily farm tenant dwellings on un-subdivided farm land when residents are employed on the property and when gross density does not exceed one family per acre.

e. Private landing strips or heliports.

(Code 1998, app. C, § 6.0602; Ord. No. 07-1548, § 6.0602, 5-3-2007)

Sec. 130-1788. Administrative permits.

The following uses are permitted through the administrative permit process in addition to those already permitted in the underlying zoning. The purpose of an administrative permit is to provide for a staff review and approval of certain uses as set forth below:

- (1) Religious uses including churches, temples, synagogues, camps, convents and monasteries.
- (2) One garage apartment or guest house under 1,000 square feet of habitable floor space on lots of less than 40,000 square feet.
- (3) Seasonal seafood peddlers using temporary structures. State inland waters shrimping seasons shall be considered as the seasons during which the regulations shall apply and inspectors may periodically check for conformance; including temperature of seafood storage and waste disposal.
- (4) Seasonal produce stands other than seafood peddlers and Christmas tree sales, provided that the use is temporary and valid for a period not greater than six months. Concurrent permits for a single site may not extend this six-month limit. For occupancy of a site on a permanent basis a conditional use permit is required. Signs are allowed provided they are professionally rendered and approved by the department of planning and development.
- (5) Fireworks sales using temporary structures during periods established by ordinance of the parish council except where prohibited by ordinance. Signs are allowed provided all are professionally rendered and approved by the department of planning and development.
- (6) Snowball stands between April 1 and September 30.
- (7) Nonprofit/family cemeteries.
- (8) Bed and breakfast.
- (9) Excavations for the purpose of creating a decorative or farm pond of not to exceed one acre in area and when located on a parcel of at least five acres in area.

- (10) Similar and compatible uses. Other administrative uses which are similar and compatible with the administrative uses of the rural district as determined by the director of planning and development acting in the capacity of zoning administrator.
(Code 1998, app. C, § 6.0603; Ord. No. 07-1548, § 6.0603, 5-3-2007)

Sec. 130-1789. Site and structure provisions.

When property is located with a residentially zoned district, the site and structure provisions of the underlying zoning district apply. This section shall apply to residential uses when located in a nonresidential zoning district.

- (1) *Minimum lot area.* The minimum lot area for any use other than agricultural uses shall be one acre in size.
- (2) *Minimum area regulations.*
 - a. *Minimum lot size.* The density shall be established as one dwelling unit per acre unless it is within an established subdivision of record, commonly referred to as older paper subdivision, established prior to the enactment of chapter 125.
 - b. *Minimum lot width.* The width of each zoning lot shall not be less than 100 feet.
 - c. *Front yard.* Residential structures shall be set back a minimum of 40 feet from the right-of-way of adjoining major or minor arterial and 30 feet from the right-of-way of any public road. Agricultural uses require no front yard.
 - d. *Side yard.* Side yards shall be not less than 30 feet from the right-of-way of any public road and 15 feet in all other instances. This setback shall apply to structures only.
 - e. *Rear yard.* All structures shall have a rear yard of not less than 30 feet; however, agricultural uses require no rear yard.
- (3) *Maximum lot coverage.* The lot coverage of all principle and accessory buildings on a zoning lot shall not exceed 25 percent of the total area of the lot.
- (4) *Height regulations.*
 - a. No building or dwelling for residential or business purposes shall exceed 35 feet in height above the base flood elevation as set forth in chapter 115 of this Land Development Code.
 - b. Uses incidental to farming, such as silos, windmills, etc., and any other nonhabitable structure (e.g., radio, television tower) may exceed this height limitation, provided, however, that there be one-foot setback for every one foot over 45 feet from existing dwellings and/or residences or property lines.

- (5) *Off-street parking and loading requirements.* Off-street parking and loading shall be provided as put forth in article VI of these regulations.

(Code 1998, app. C, § 6.0604; Ord. No. 00-0181, 8-24-2000; Ord. No. 07-1548, § 6.0604, 5-3-2007)

Secs. 130-1790—130-1811. Reserved.

DIVISION 8. ABITA AIRPORT OVERLAY

Sec. 130-1812. Purpose.

(a) To provide protection from the hazard created by structures or trees that in effect reduce the size of the area available for the landing, takeoff, and maneuvering of aircraft; and in the interest of the public health, public safety, and general welfare to prevent airport hazards to the extent legally possible, and by the exercise of its police power as the governing authority of the parish, the parish council hereby designates this section as the Abita Airport Overlay.

(b) It is further declared that both the prevention of the creation or establishment of airport hazards and the elimination, removal, alteration, mitigation, or marking and lighting of existing airport hazards are public purposes for which political subdivisions may raise and expend public funds and acquire land or interest in land.

(Code 1998, app. C, § 6.0701; Ord. No. 07-1548, § 6.0701, 5-3-2007)

Sec. 130-1813. Definitions.

For the purposes of this section only, the words, terms and phrases used in this section, shall have the following meanings ascribed to them, except where the context clearly indicates a different meaning:

Airport (Abita) means the St. Tammany Regional Airport generally located south of Louisiana Highway 36 approximately three miles southeast of Abita Springs, Louisiana.

Airport elevation means the highest point of an airport's usable landing area measured in feet from mean sea level.

Airport hazard means any structure or object of natural growth located on or in the vicinity of a public airport, or any use of land near such airport, which obstructs the airspace required for the flight of aircraft in landing or takeoff at such airport or is otherwise hazardous to such landing or takeoff of aircraft.

Airport manager (Abita) means that person appointed by the parish president to manage the day to day operation of the St. Tammany Regional Airport.

Approach, transitional, horizontal, and conical zones. These zones apply to the area under the approach, transitional, and conical surfaces defined in FAR Part 77.

Federal Aviation Administration (FAA) means that agency of the United States Department of Transportation with authority to regulate and oversee all aspects of civil aviation in the United States.

Height, for the purpose of determining the height limits in all zones set forth in this division and shown on the zoning map, the datum shall be mean sea level elevation unless otherwise specified.

Local governing authority means the authority with jurisdiction over building permits, zoning and other similar regulatory functions for the property in question.

Nonconformance use means any pre-existing structure, object, of natural growth, or use of land which is inconsistent with the provisions of this division or an amendment thereto.

Nonprecision instrument runway means a runway having an existing instrument approach procedure utilizing air navigation facilities with only horizontal guidance, or area type navigation equipment, for which a straight-in nonprecision instrument approach procedure has been or planned, and for which no precision approach facilities are planned or indicated on an FAA planning document or military service's military airport planning document.

Person means an individual, firm, partnership, company, association, joint stock association, or governmental entity. It includes a trustee, receiver, assignee, or similar representative of any of them.

Primary surface means a surface longitudinally centered on a runway. When the runway has a specially prepared hard surface, the primary surface extends 200 feet beyond each end of that runway; but when the runway has no specially prepared hard surface, or planned hard surface, the primary surface ends at each end of that runway. The width of the primary surface of a runway will be that width prescribed in Part 77 of the Federal Aviation Regulations, (FAR) for the most precise approach existing or planned for either end of that runway. The elevation of any point on the primary surface is the same as the elevation of the nearest point on the runway centerline.

Runway means a defined area on an airport prepared for landing and takeoff of aircraft along its length.

Structure means an object constructed or installed by man, including, but without limitation to, buildings, towers, smokestacks, earth information, and overhead transmission lines.

Tree means any object of natural growth.

Utility runway means a runway that is constructed for and intended to be used by propeller driven aircraft of 12,500 pounds maximum gross weight and less.

Visual runway means a runway intended solely for the operation of aircraft using visual approach procedures with no straight-in instrument approach procedure and no instrument

designation indicated on an FAA approved airport layout plan, a military service's approved military airport layout plan, or by any planning document submitted to the FAA by competent authority.

(Code 1998, app. C, § 6.0702; Ord. No. 07-1548, § 6.0702, 5-3-2007)

Sec. 130-1814. District location.

The Abita Airport Overlay is established as follows:

- (1) All property within 14,200 feet from the edge of the runway area designated on the St. Tammany Regional Airport.
- (2) Airport Layout Plan Update. Airport Airspace Plan consisting of one sheet (being three of eight) prepared by Buchart Horn, Inc., and dated June 4, 2008.

(Code 1998, app. C, § 6.0703; Ord. No. 07-1548, § 6.0703, 5-3-2007)

Sec. 130-1815. Application of overlay (district) regulations.

All projects located within the Abita Airport Overlay which exceed 150 feet in height from grade shall be reviewed by the airport manager for compliance with the provisions of this overlay district.

(Code 1998, app. C, § 6.0704; Ord. No. 07-1548, § 6.0704, 5-3-2007)

Sec. 130-1816. Airport zones.

(a) *Created and established.* In order to carry out the provisions of this division, there are hereby created and established certain zones which include all of the land lying within the approach zones, transitional zones, horizontal zones, and conical zones as they apply to a particular airport.

(b) *St. Tammany Regional Airport; airport layout plan update.* The Airport Airspace Plan consisting of one sheet (being three of eight) prepared by Buchart Horn, Inc., and dated June 4, 2008, is made apart hereof by reference. An area located in more than one of the following zones is considered to be only in the zone with the more restrictive height limitation. The various zones are hereby established and defined as follows:

- (1) *Horizontal zone.* The horizontal zone is hereby established by swinging arcs of 10,000 feet radii from the center of each end of the primary surface of each runway, and connecting the adjacent arcs of drawing lines tangent to those arcs. The horizontal zone does not include the approach and transitional zones.
- (2) *Conical zone.* The conical zone is hereby established as the area that commences at the periphery of the horizontal zone and extends outward therefrom a horizontal distance of 4,000 feet. The conical zone does not include the precision instrument approach zones and the transitional zones.

- (3) *Precision instrument runway approach zone.* The inner edge of this approach zone coincides with the width of the primary surface and is 1,000 feet wide. The approach zone expands outward uniformly to a width of 16,000 feet at a horizontal distance of 50,000 feet from the primary surface. Its centerline being the continuation of the centerline of the runway.
- (4) *Runway larger than utility with a visibility minimum as greater than three-fourths mile nonprecision instrument approach zone.* The inner edge of this approach zone coincides with the width of the primary surface and is 1,000 feet wide. The approach zone expands outward uniformly to a width of 3,500 feet at a horizontal distance of 10,000 feet from the primary surface. Its centerline is the continuation of the centerline of the runway.

(Code 1998, app. C, § 6.0705; Ord. No. 07-1548, § 6.0705, 5-3-2007)

Sec. 130-1817. Airport zone height limitations.

Except as otherwise provided in this division, no structure or tree shall be erected, altered, allowed to grow, or be maintained in any zone created by this division to a height in excess of the applicable height limit herein established for such zone. Such applicable height limitations are hereby established for each of the zones in question as follows:

- (1) *Transitional zones.* Slopes upward and outward seven feet horizontally for each foot vertically beginning at the sides of the same elevation as the primary surface and the approach zones, and extending to a height of 150 feet above the airport elevation which is 27 feet above mean sea level. In addition to the foregoing, there are established height limits sloping upward and outward seven feet horizontally for each foot vertically beginning at the sides of and at the same elevation as the approach zones and extending to where they intersect the conical surface. Where the precision instrument runway approach zone projects beyond the conical zone, height limits sloping upward and outward seven feet horizontally for each foot vertically shall be maintained beginning at the sides of and at the same elevation as precision instrument runway approach surface, and extending to a horizontal distance of 5,000 feet measured at 90-degree angles to the extended runway centerline.
- (2) *Horizontal zone.* One hundred and fifty feet above the airport elevation or a height of 178 feet above mean sea level.
- (3) *Conical zone.* Slopes upward and outward 20 feet horizontally for each foot vertically beginning at the periphery of the horizontal zone and at 150 feet above the airport elevation and extending to a height of 350 feet above the airport elevation.
- (4) *Precision instrument runway approach zone.* Slopes upward 50 feet vertically beginning at the end of and at the same elevation as the primary surface and extending to a

horizontal distance of 10,000 feet along the extended runway centerline; thence slope upward 40 feet horizontally for each foot vertically to an additional horizontal distance of 40,000 feet along the extended runway centerline.

- (5) *Runway larger than utility with a visibility minimum greater than three-fourths mile nonprecision instrument approach zone.* Slopes upward 34 feet horizontally for each foot vertically beginning at the end of and at the same elevation as the primary surface and extending to a horizontal distance of 10,000 feet along the extended runway centerline.
- (6) *Height limitations.* Nothing in this division shall be construed as prohibiting the growth, construction, or maintenance of any tree or structure to a height up to 50 feet above the surface of the land. Where an area is covered by more than one height limitation, the more restrictive limitation shall prevail.

(Code 1998, app. C, § 6.0706; Ord. No. 07-1548, § 6.0706, 5-3-2007)

Sec. 130-1818. Use restrictions.

Notwithstanding any other provisions of this division, no use may be made of land or water within any zone established by this division in such a manner as to create electrical interference with navigational signals or radio communication between the airport and aircraft, make it difficult for pilots to distinguish between airport lights and others, result in glare in the eyes of pilots using the airport, impair visibility in the vicinity of the airport or otherwise in any way create a hazard or endanger the landing, takeoff, or maneuvering of aircraft intending to use the airport.

(Code 1998, app. C, § 6.0707; Ord. No. 80-29, 8-21-1980; Ord. No. 91-1543, 12-19-1991; Ord. No. 07-1548, § 6.0707, 5-3-2007)

Sec. 130-1819. Nonconforming uses.

(a) *Regulations retroactive.* The regulations prescribed by this division shall not be construed to require the removal, lowering, or other changes or alterations of any structure or tree not conforming to the regulations as of the effective date of the ordinance from which this division is derived, or otherwise interfere with the continuance of a nonconforming use. Nothing contained herein shall require any change in the construction, alteration, or intended use of any structure, the construction or alteration of which was begun prior to the effective date of the ordinance from which this division is derived, and is diligently prosecuted.

(b) *Marking and lighting.* Notwithstanding the preceding provisions of this section, the owner of any existing nonconforming structure or tree is hereby required to permit the installation, operation, and maintenance thereon of such markers and lights as shall be deemed necessary by the airport manager to indicate to the operators of aircraft in the vicinity of the airport, the presence of such airport hazards. Such markers and lights shall be installed, operated, and maintained at the expense of the local governing authority.

(Code 1998, app. C, § 6.0708; Ord. No. 07-1548, § 6.0708, 5-3-2007)

Sec. 130-1820. Permits.

(a) *Future uses.* No material change shall be made in the use of land and no structure or tree shall be erected, altered, planted, or otherwise established in any zone hereby created unless a permit therefor shall have been applied for and granted.

- (1) However, a permit for a tree or structure of less than 75 feet of vertical height above the ground shall not be required in the horizontal distance of 4,200 feet from each end of the runway except when such tree or structure, because of terrain, land contour, or topographic features, would extend above the height limit prescribed for the respective zone.
- (2) Each application for a permit shall indicate the purpose for which the permit is desired with sufficient particulars to determine whether the resulting use, structure, or tree would conform to the regulations herein prescribed. If such determination is in the affirmative, the permit shall be granted.

(b) *Existing uses.* No permit shall be granted that would allow the establishment or creation of an airport hazard or permit a conforming use, structure, or tree to become a greater hazard to air navigation than it was on the effective date of the ordinance from which this division is derived or any amendments thereto or than it is when the application for a permit is made. Except as indicated, all applications for such a permit shall be granted.

(c) *Nonconforming uses abandoned or destroyed.* Whenever the airport manager determines that a nonconforming tree or structure, upon approval of the parish building inspector, has been abandoned or more than 80 percent torn down, physically deteriorated, or decayed, no permit shall be granted that would allow such structure or tree to exceed the applicable height limit or otherwise deviate from the zoning regulations.

(d) *Variances.* Any person desiring to erect or increase the height of any structure, or permit the growth of any tree, or use his property not in accordance with the regulations prescribed in this division, may apply to the airport manager for a variance from such regulations. Such variances shall be allowed where it is duly found that a literal application or enforcement of the regulations would result in practical difficulty or unnecessary hardship and relief granted would not be contrary to the public interest, but will do substantial justice and be in accordance with the spirit of this division, and as permissible by all applicable FAA regulations.

(e) *Hazard marking and lighting.* Any permit or variance granted may, if such action is deemed advisable to effectuate the purpose of this division and be reasonable in the circumstances, be so conditioned as to require the owner of the structure or tree in question to permit the local governing authority at its own expense, to install, operate, and maintain thereon such markers and lights as may be necessary to indicate to pilots the presence of an airport hazard. (Code 1998, app. C, § 6.0709; Ord. No. 07-1548, § 6.0709, 5-3-2007)

Sec. 130-1821. Enforcement.

(a) It shall be the duty of the director of the parish department of planning and development to identify the potential conflict between any proposed structure and these regulations and refer them to the airport manager for review.

(b) It shall be the duty of the airport manager to administer and cause to enforce the regulations prescribed herein through the various enforcement agencies of the local governing authority. Applications for permits and variances shall be made to the airport manager upon a form furnished by him. Applications required by this division to be submitted to the airport manager shall be promptly considered and granted or denied by him.

(Code 1998, app. C, § 6.0710; Ord. No. 07-1548, § 6.0710, 5-3-2007)

Sec. 130-1822. Appeals.

(a) Any person aggrieved or any taxpayer affected by any decision of the airport manager made in his administration of this division, may appeal to the board of adjustment of the local governing authority.

(b) All appeals hereunder must be taken within a reasonable time as provided by the rules of the board of adjustment, by filing with the staff of the board of adjustment a notice of appeal specifying the grounds thereof. The staff of the board of adjustment shall forthwith transmit to the board of adjustment all the papers constituting the record upon which the action appealed from was taken.

(c) An appeal shall stay all proceedings in furtherance of the action appealed from unless the airport manager certifies to the board of adjustment, after the notice of appeal has been filed with it, that by reason of the facts stated in the certificate a stay would, in his opinion, cause imminent peril to life or property. In such case, proceedings shall not be stayed except by order of the board of adjustment on notice to the airport manager and on due cause shown.

(d) The board of adjustment shall fix a reasonable time for hearing appeals, give public notice and due notice to the parties in interest, and decide the same within a reasonable time. Upon the hearing, any party may appear in person or by agent or by attorney.

(e) The board of adjustment may, in conformity with the provisions of this division, reverse or affirm, in whole or in part, or modify the order, requirement, decision, or determination appealed from and may make such order, requirement, decision, or determination, as may be appropriate under the circumstances.

(Code 1998, app. C, § 6.0711; Ord. No. 07-1548, § 6.0711, 5-3-2007)

Secs. 130-1823—130-1830. Reserved.

DIVISION 9. REGIONAL BUSINESS CENTER OVERLAY (RBC OVERLAY)

Sec. 130-1831. Purpose.

The purpose of the regional business center overlay is to provide for coordinated flexible design standards for planned commercial or office developments that meet the definition of a regional business center by establishing design zones in which certain design standards may be revised to provide for a high-quality design without regard for the location of internal property lines and other limiting factors. The permitted uses are determined by the underlying zoning classification upon which the overlay rests. Minimum standards for design elements such as signs and lighting, landscaping, parking, height and setbacks shall be as set forth in the other provisions of this chapter, except that the special design standards and flexibility set forth in this division shall be applicable.

(Ord. No. 12-2863, exh. A(6.0801), 12-6-2012)

Sec. 130-1832. Applicability.

The RBC overlay may be applied to any property meeting the definition of a regional commercial/office center and approved as such in accordance with the provisions of this division.

(Ord. No. 12-2863, exh. A(6.0802), 12-6-2012)

Sec. 130-1833. General standards and criteria.

In order for the zoning commission and parish council to make competent and definitive decisions concerning a regional business center, the following general standards and criteria shall be applicable:

- (1) The proposal must be a planned commercial or office development designed with a distinct identifying name/image bearing all of the following characteristics:
 - a. The property shall be located with at least 1,250 feet of frontage on the Interstate Highway System, inclusive of interstate frontage roads and on/off ramps.
 - b. Property shall be at least 100 acres in size and the underlying zoning bear the HC-3, PBC-1 or PBC-2 zoning classifications or a combination thereof. For properties exceeding 100 acres, the remainder of the overlay acreage may bear a zoning classification other than those stated above.
- (2) Approval of an RBC overlay does not change the underlying zoning classification of the property. All regulations and standards still apply to the property unless specific authority to deviate from that standard is granted as part of the approval.

(Ord. No. 12-2863, exh. A(6.0803), 12-6-2012; Ord. No. 15-3429, § 6.0803, 10-3-2015)

Sec. 130-1834. Plan approval.

(a) Prior to submitting an RBC overlay rezoning petition, an informal pre-application conference with the planning officer or his designee shall be required. The purpose of this conference shall be to discuss RBC overlay parameters and to bring the overall petitions into conformity with parish regulations.

(b) Following the RBC overlay pre-application conference, a conceptual plan shall be submitted with the rezoning application. This plan shall provide the following information:

- (1) The title of the project and the names of the project planner and developer.
- (2) A legal description of the property including township, section and range.
- (3) Plat indicating scale, date, north arrow, and general vicinity map indicating existing land uses within 500 feet of all boundaries of the proposed RBC shall be designated. This plat shall include all existing physical features such as existing streets, buildings, water courses, easements, soil conditions, vegetative cover and topography.
- (4) Site information including the following criteria shall be provided:
 - a. Boundaries of the proposed RBC.
 - b. Parcels or sites to be developed or occupied by buildings.
 - c. Design zones as requested by the applicant.
 - d. Public buildings and other common use areas.
 - e. The approximate location of ingress, egress and access streets.
 - f. The approximate location of pedestrian and vehicular ways.
- (5) Architectural and design guidelines to be imposed as part of the RBC overlay, including, but not limited to, the following:
 - a. Building site guidelines.
 - b. Building design guidelines.
 - c. Landscaping guidelines.
 - d. Parking guidelines.
 - e. Signage guidelines.
 - f. Lighting guidelines.
 - g. Driveway guidelines.
 - h. Miscellaneous guidelines:
 1. Loading, storage, and refuse areas.
 2. Utilities.
 3. Walls, fences and screening.

4. Other equipment and site furniture.

- (6) The zoning commission or the parish council may require additional material such as plans, maps, aerial photographs, studies and reports which may be needed in order to make the necessary findings and determinations that the applicable parish standards and guidelines have been achieved.

(c) The planning staff shall hold a formal staff review of the RBC overlay submission two weeks prior to the public hearing by the zoning commission and note areas of concern to the applicant in writing within one week of the review. The purpose of this review is to provide constructive feedback to the developer on compliance with the RBC overlay requirements.

(d) the zoning commission shall hold the formal public hearing on the zoning overlay request and forward a recommendation to approve or deny the RBC overlay to the parish council. The zoning commission shall reserve the right to add stipulations and conditions to its approval and shall determine if the applicant has met all or part of the RBC overlay parameters, including:

- (1) The tract for the proposed RBC overlay is suitable in terms of its relationships to the parish comprehensive plan and that the areas surrounding the proposed RBC overlay can continue to be developed in coordination and substantial compatibility with the RBC overlay proposed.
- (2) That the desirable modifications of general zoning regulations as applied to the particular case, justify such modifications of regulations and meets the original intent of the said regulation based on the design and amenities incorporated in the site development plan.
- (3) Design zones should not cross public roads, major private roads or other physical features which create a clear design edge or boundary.
- (4) Establishment of design zones. As part of the RBC overlay approval, the zoning commission will establish design zones, being designated areas in which some discretion is granted to the planning staff to allow for deviation from the strict standards of article VI of these regulations.
 - a. Within a specific design zone driveways may parallel to and over property lines so as to service each contiguous parcel. The landscape buffers will be placed on each side of said driveway as opposed to abutting the common property line or provide planting buffers elsewhere within the project so long as the overall quantity of landscaping area and material is not diminished.
 - b. Within a specific design zone parking lots may be located over property lines where cross parking servitudes allow for parking on each contiguous parcel, provided parking requirements as per code are met (in global).

- c. Within each specific design zone, the intensity of parking lot lighting may exceed maximum candle power at property line if abutting parking spaces/lot on contiguous parking where reciprocal cross parking servitudes exist between the parcels.
- d. Monument signage located on any lot within a specific design zone will not be considered to be off-premises signage and shall be limited only to the level which it would have been if located on the same lot as the main use.
- e. Zero lot lines may be allowed and/or lot coverage requirements may be waived for interior lot lines and/or interior parcels.
- f. Within a specific design zone, some deviation may be allowed in the location of plant material so long as the overall quantity of landscaping area and material is not diminished.
- g. Flexibility will be allowed for tree replacement and/or removal through tree bank and/or mitigation process.
- h. When approved by the department of engineering, the drainage requirements of an RBC overlay may be met on a multiple-parcel basis.

(e) Binding nature of approval for RBC overlay. All terms, conditions, safeguards, and stipulations made at the time of approval for RBC overlay shall be binding upon the applicant or any successors in interest. Deviations from approved plans or failure to comply with any requirements, conditions, or safeguards shall constitute a violation of this chapter.

(f) Amendments to the RBC overlay. Any request to deviate from the standards of the underlying zoning district or from the specific design flexibility allowed by the RBC overlay shall be considered an amendment to the RBC overlay and require a hearing before the zoning commission and parish council as outlined in this section.

(Ord. No. 12-2863, exh. A(6.0804), 12-6-2012)

Secs. 130-1835—130-1847. Reserved.

ARTICLE VI. SUPPLEMENTAL DISTRICT REGULATIONS

DIVISION 1. GENERALLY

Secs. 130-1848—130-1867. Reserved.

DIVISION 2. LANDSCAPE AND TREE PRESERVATION REGULATIONS

Sec. 130-1868. Purpose.

The purpose of these landscape and tree preservation requirements is to promote the health, safety, and general welfare of the public; to facilitate the creation of a convenient, attractive and

harmonious community; to conserve natural resources including adequate air and water; to conserve properties and their values; to preserve the character of an area by preserving and enhancing the scenic quality of the area; and to encourage the appropriate use of the land. More specifically these landscape requirements are intended to minimize the harmful impact of noise, dust and other debris, motor vehicle headlight glare or other artificial light intrusion, and other objectionable activities or impacts conducted on or created by an adjoining or nearby use or street. Additionally, these landscape requirements are intended to require the landscaping of certain parking lots in order to reduce the harmful effects of wind and air turbulence, heat and noise; to preserve underground water reservoirs and to permit the return of precipitation to the ground water strata; to act as a natural drainage system and ameliorate stormwater drainage problems; to reduce the level of carbon dioxide and return pure oxygen to the atmosphere; to prevent storm erosion; to provide shade; and to enhance the blighted appearance of parking lots.

(Code 1998, app. C, § 7.0101; Ord. No. 07-1548, § 7.0101, 5-3-2007)

Sec. 130-1869. Applicability; permits; variances; appeals.

(a) *Applicability.* The provisions of this section shall apply to all commercial, industrial, multifamily of three units or more, religious, educational and institutional uses. This section is not applicable to land clearing permits which are governed by the provisions of article VII, division 2 of these regulations.

(b) *Landscape permit.* A landscape permit shall be obtained from the department of planning and development when site plan approval is required by these regulations and/or when an application is made for a building permit and/or when any change is sought to existing landscaping to which these landscape and tree preservation regulations are applicable.

(c) *Variances by board of zoning adjustments.* If the application for a landscape permit shows that all requirements of this section are complied with, the director of planning and development shall issue a permit without the necessity of any public hearing before the zoning commission or any other public body. If the application for the permit is denied because of the requirements of this section, the applicant may, subject to the provisions of section 130-1869(d), seek a variance from the board of zoning adjustments pursuant to the provisions of article II of these regulations. Appeals from the board of zoning adjustments shall be made to the district court for the parish as provided in article II of these regulations.

(d) *Criteria for variances and waivers.* Pursuant to section 130-1869(d), the board of zoning adjustments may grant variances from the regulations in this section. Such variances and waivers may be granted in accordance with the applicable sections of these regulations, to diminish the requirements of this section when one or more of the following exists: unusual elevations or shape of the lot, unusual landscaping and/or tree preservation problems, unusual effect of the requirements of the landscape and tree preservation requirements, problems with servitudes, and when more than 30 percent of the lot is required for the aggregate of street

planting areas, buffer areas, parking lot landscaping areas, building facade planting areas and any other required landscape areas. Furthermore, the board of zoning adjustments may grant variances from the provisions of this division due to any hardships or other matters that are a proper basis for a variance.

(Code 1998, app. C, § 7.0102; Ord. No. 07-1548, § 7.0102, 5-3-2007)

Sec. 130-1870. Procedures for obtaining landscape permits.

(a) *Application for landscape permit.* The application for a landscape permit shall contain the following basic information and shall be subject to the following:

- (1) *Interest and ownership.* The applicant's and the property owner's name, address, phone number, and signatures, together with an affidavit by the owners of the property certifying that they are the owners.
- (2) *Zoning classification.* The present zoning classification of the property and all surrounding property within 500 feet.
- (3) *Legal description.* A full written legal description of the property.
- (4) *Fees.* Fees for site plan review and landscape plan review shall be as required by chapter 2, article XVII of the Parish Code of Ordinances.
- (5) *Site plan.* A site plan shall be submitted, in accordance with subsection (b) of this section, site plan.
- (6) *Landscape and tree preservation plan.* A landscape and tree preservation plan shall be submitted, in accordance with subsection (d) of this section, landscape and tree preservation plan requirements.
- (7) *Additional requirements.* The department of planning and development may require additional material such as plans, maps, studies and reports which may be needed in order to make the necessary findings and determinations that the applicable parish standards have been achieved.

(b) *Necessity of permit, verification of compliance, appropriate method of security.*

- (1) *Prohibited installation or change in landscaping.* Except in instances where public safety necessitates immediate action, installation and/or change in landscaping and/or tree removal is prohibited unless a landscape permit is obtained.
- (2) *Verification of compliance.* Upon completion of construction and prior to the issuance of an occupancy permit, the owner shall submit a letter signed by a landscape architect or licensed landscape contractor verifying that all required landscaping was installed. Upon receipt of such letter, the department of planning and development shall make its final inspection, and, if satisfied, grant its final approval. No certificate of occupancy

shall be issued until such final approval is granted; provided that, if an appropriate method of security is issued pursuant to subsection (b)(3) of this section, then a certificate of occupancy may be granted before completion of the landscaping.

- (3) *Performance security.* It is recognized that vegetation used in landscaping and screening should be planted at certain times of the year to ensure the best chance of survival. In order to ensure compliance with this section and to reduce the potential expense of replacing landscaping or screening materials which were installed in an untimely or improper fashion, in lieu of requiring the completion and installation of these improvements prior to the issuance of a certificate of occupancy, the planning and development director may enter into an agreement with the owner/developer whereby the owner/developer shall agree to complete all required landscaping and screening. Once said agreement is completed and the security required is provided, the certificate of occupancy may be approved.
- a. The owner/developer shall provide an appropriate method of security, as determined by the department of finance, equal to the cost of purchasing, installing and completing the landscaping and screening materials required in this division as determined by a landscape contractor. The duration of the appropriate method of security shall be until such time as the landscape improvements are accepted by the parish. In any event, the owner/developer shall complete the landscaping requirements of this division within six months of the issuance of a certificate of occupancy. Said security shall be issued by a bank authorized to do business in the state with one or more offices located in the parish.
 - b. Upon failure to complete the required improvements in a timely manner as spelled out in said security, then the surety or bank shall pay to the parish said funds as is necessary to complete all or any portion of the required landscaping improvements.
 - c. The director of planning and development shall administer said security, and the director of planning and development shall have the power and authority to extend said security and to call said security.

(c) *Site plan.*

- (1) *Procedure.* In connection with the application for a building permit, or any other application requiring a site plan review, a site plan for the project shall be submitted to the department of planning and development for review and approval.
- (2) *Site plan requirements.* Unless otherwise approved by the department of planning and development, drawing submissions shall be required to be both in a 24-inch by 36-inch

format and in an 11-inch by 17-inch format. Two copies of each format shall be submitted. The following minimum information shall be submitted to the department of planning and development in the form of a site plan:

- a. The title of the project and the names of the project planner, developer, and owner, and scale, date, north arrow, and general vicinity map indicating existing land uses abutting all boundaries of the proposed development.
- b. All existing physical features such as existing streets, buildings, structures, water-courses, easements, servitudes parking spaces, service bays and loading areas, sidewalks, and signs.
- c. Boundaries and zoning of the property involved and zoning of adjacent properties.
- d. Parking layout indicating the number of required and proposed parking spaces, the location of ingress, egress and access streets, and the location of pedestrian and vehicular ways and a circulation element indicating the movement of pedestrians, goods and vehicles.
- e. Tabulation of the maximum square footage of each use.
- f. The proposed height, footprint and setback of any building or structure.
- g. The location, dimensions, area, type of materials and elevations of all signs and support structures.
- h. Location of trash disposal system and details of screening, including type and height of dumpster and fence.
- i. Lighting standards and fixtures for the site showing location, number, and height.
- j. If the proposed development is to be constructed in phases, indicate proposed development scheduling in detail including:
 1. The approximate date when construction of each phase of the project can be expected to begin;
 2. The order in which the phases of the project will be built; and
 3. The infrastructure and on-site improvements that are proposed to be included in each phase delineated for the development, including but not limited to service areas, access drives, parking, landscaping, buildings and other structures.
- k. Exact text from section 130-1879, maintenance and replacement.

(d) *Landscape and tree preservation plan.*

- (1) *Procedure.* In connection with the application for a building permit, developmental land clearing permit or any other application requiring a landscape permit, a landscape and tree preservation plan, for the project, shall be submitted to the department of planning and development for review and approval.

- (2) *Requirements, landscape and tree preservation plan.* The landscape and tree preservation plan shall be prepared under the supervision and control of, and signed by a landscape architect, licensed in any state in the United States, or a landscape contractor, licensed by the state. The following minimum information shall be submitted to the department of planning and development on the landscape and tree preservation plan in addition to the site plan requirements previously set forth:
- a. The area, expressed in acres and square footage, of:
 1. The entire property;
 2. The aggregate area of the street planting area, any required buffers, the building facade planting area, and interior landscaped areas such as parking; and
 3. The area expressed in square footage of any street planting area that varies in depth under the provisions of section 130-1873(b).
 - b. Existing and proposed landscaping, including landscaping and screening that is required by this division, the location and dimension of planting areas, street planting areas, parking areas, building facade areas, side and rear buffer areas and the size, height and materials used for walls and fences.
 - c. The number, location and size in caliper of all existing trees which are six inches DBH, or greater, and which are located within street planting areas, within any required side or rear buffers and within the street right-of-way between the street property lines and the surface of the street, indicating which of these trees the applicant seeks to preserve and which of these trees the applicant seeks to remove, and showing the color of the flagging as required in section 130-1872.
 - d. All live oak trees six inches DBH, or greater, wherever located on the property or within the street right-of-way between the street property line and the surface of the street, showing the color of the flagging as required in section 130-1872.
 - e. Location of all trees and landscape material to be placed within the street planting areas and within any required side or rear buffers and within all other landscaped areas, indicating the species of such trees and the species of such landscape material. A mere general reference to class A or class B trees or to other landscape material will not suffice.
 - f. Location, height and description of any fountains or other landscape architectural features placed or to be placed on the property.
 - g. Location, dimensions, depth and description of any retention/detention ponds or retention/detention areas on, or to be placed on, the property together with a description of what planting will be made and/or what measures will be taken to make the retention/detention pond or retention/detention area into an aesthetic amenity for the property, as is required by section 130-1878.

(Code 1998, app. C, § 7.0103; Ord. No. 07-1548, § 7.0103, 5-3-2007)

Sec. 130-1871. General standards for required landscaping.**(a) *Plant condition and installation.***

- (1) *Condition of plants.* All plant materials shall be alive and in a healthy condition when planted.
- (2) *Installation of plants.* All plant material shall be installed in a fashion that ensures the availability of sufficient soil and water to sustain healthy growth.

(b) *Definition of trees and shrubs, native species.*

- (1) *Class A and B trees and shrubs.* The definitions of class A and class B trees and shrubs are contained in section 130-1882.
- (2) *Native species.* Species of trees and shrubs referred to as native species are set forth in section 130-1880. Native species is a defined term as used in this division, and only those species listed in section 130-1880 shall be deemed to be native species for purposes of the landscape and tree preservation regulations of this division and no species omitted from section 130-1880 shall be deemed to be a native species for purposes of the landscape and tree preservation regulations of this division.

(c) *Minimum caliper and height of trees and shrubs.*

- (1) *Class A trees.* All class A trees, at the time of planting, shall have a minimum caliper of at least 2½ inches, measured six inches above the root ball, and a minimum height of ten to 12 feet, as per the National Nursery Association Standards.
- (2) *Class B trees.* All class B trees and all trees, other than class A trees, at the time of planting, shall have a minimum caliper of at least 1½ inches, measured six inches above the root ball and a minimum height of eight feet to ten feet as per the National Nursery Association Standards.
- (3) *Shrubs.* All shrubs, at the time of planting, shall have a minimum height of two feet.

(d) *Landscaping design.*

- (1) *Professional design.* A professionally acceptable composition, spacing and mix of vegetation is required.
- (2) *Native species.* At least 60 percent, of the aggregate in number, of all required trees and shrubs (the sum of all trees and shrubs required in street planting areas, buffer planting areas, parking areas, building facade planting areas and any other areas where trees and shrubs are required in this division) shall be a native species of trees and shrubs as identified in section 130-1880. None of the required ground cover need be a native species.
- (3) *Substitution of class A trees for required class B trees.* With the approval of the department of planning and development, the applicant may substitute a class A tree

for a required class B tree, except that class A trees shall not be permitted within servitudes with overhead power lines as referred to in section 130-1873(f)(2). Among the considerations to be made by the department of planning and development in granting such approval is the size of the planting area.

- (4) *Substitution of class A and class B trees for shrubs.* With the approval of the department of planning and development, the applicant may substitute class A or class B trees for shrubs in the building facade planting area; provided that:

- a. The trees are sufficiently distant from a building or structure; and
- b. There is a sufficient planting area for a tree.

(Code 1998, app. C, § 7.0104; Ord. No. 07-1548, § 7.0104, 5-3-2007)

Sec. 130-1872. Tree preservation.

- (a) *Identifying and locating existing trees; proposed driveways.*

- (1) *Staking of street planting areas and buffers.* On or before the time the landscape and tree preservation plan is submitted to the department of planning and development, the applicant shall monument, by stakes placed in the ground, the street planting area and any required buffer planting area so that immediately after the application is submitted and before any work is done, the department of planning and development can inspect the areas that will become the street planting areas and buffers. The following shall be complied with in respect to such monuments or stakes:

- a. *Type of stakes.* The stakes used shall be wood or metal placed in the ground, and such stakes shall be of sufficient strength and durability and placed deeply enough in the ground to remain until the completion of construction. Any removed, broken, substantially bent or damaged stakes shall be replaced so that all stakes shall remain in place during construction.
- b. *Location of stakes.* Such stakes shall be located at least every 50 feet:
 1. Along the street frontage of the street planting area and along the rear line of the street planting area; and
 2. Along the side and rear property line where side or rear buffers are required and along the interior lines of such buffers.
- c. *Height and flagging of stakes.* Such stakes shall extend upward from the ground at least three feet and shall be flagged yellow in color or some other flagging approved in advance by the department of planning and development.
- d. *Clearing lines.* If the lines of the street planting areas and buffers are too thick to walk or sight down, they shall be cleared sufficient for walking and sighting.

(2) *Flagging of existing trees.*

- a. *Live oaks.* All live oaks, wherever they may be situated on the property or the adjacent street right-of-way, which are over six inches DBH shall be flagged with blue colored flagging or some other flagging approved in advance by the department of planning and development.
- b. *Trees over six inches DBH.* All trees over six inches DBH located within the street planting area or within any required buffers shall be flagged with green colored flagging or some other flagging approved in advance by the department of planning and development.
- c. *Trees applicant proposes to remove.* All trees set forth in subsections (a)(2)a and b of this section, which the applicant seeks to remove, shall be flagged with orange colored flagging or some other flagging approved in advance by the department of planning and development.

(3) *Driveway cuts.* All areas of ingress or egress, through street planting areas and buffers, shall be clearly defined with stakes marked "driveway."

(4) *Retention/detention ponds.* All areas to be included within a retention/detention pond shall be clearly defined with stakes marked "R/D Pond."

(b) *Preservation of trees; inspections.*

- (1) *Preservation of live oak trees.* All live oak trees over six inches DBH shall be preserved wherever they may be located on the property and even if they are located between the property line and the roadway surface.
- (2) *Trees to be preserved in the street planting area and required buffers.* In the street planting areas and required buffer planting areas, all trees over six inches DBH shall be preserved except for the following (none of these exceptions apply to live oaks):
 - a. Trees within any permitted driveway within a street planting area or buffer planting area.
 - b. Trees that must be removed for utilities or drainage within a street planting area or buffer planting area.
 - c. Trees that are unsound, hazardous, diseased or infested with insects as determined by a licensed arborist within a street planting area or buffer planting area.
 - d. Trees that will be too close to a paved area or areas to have a reasonable probability of surviving, as determined by the department of planning and development within a street planting area or buffer planting area.
 - e. Trees, within a buffer planting area, required to be removed for a retention/detention pond as provided for in sections 130-1874(d)(1) and 130-1878.

- f. Trees, within a street planting area, required to be removed for a retention/detention pond as provided for in sections 130-1873(e)(1) and 130-1878; provided that the aggregate of the trees removed for driveways and retention/detention ponds shall not exceed 50 percent of the trees in excess of six inches DBH.
 - (3) *Initial inspection.* After the application for the landscape permit is made and before the issuance of a landscape permit, the department of planning and development shall make its initial physical inspection of the street planting areas and buffers to determine whether they are properly monumented, staked and flagged and to reach a determination as to whether the applicant is preserving the trees that are required to be preserved under this division.
 - (4) *Subsequent inspections.* The department of planning and development shall make such subsequent inspections as may be necessary, but not less frequently than monthly, to ensure that the trees are preserved which are required to be preserved and to determine whether the landscape plan is being complied with.
 - (5) *Reports on inspections.* Upon each inspection, the department of planning and development shall file a report in the case file as to what was observed during the inspection and whether this division is being complied with, and, to the extent feasible, the department of planning and development shall document its inspections with photographs which shall show the date the photograph is taken and the name of the person taking the photograph.
- (c) *Removal of live oak trees.*
- (1) *Application submittal.* A live oak tree shall be permitted to be removed if the live oak tree denies or precludes reasonable use of a parcel of property. In order to determine if a live oak tree shall be removed from a parcel of property, the following documents shall be provided to the director of parish development or his subordinate:
 - a. A complete land clearing permit application form.
 - b. A survey or scale drawing of the parcel of the property accurately depicting the location of the live oak tree including the minimum protective radius required by these regulations around the tree and its impact on the buildable area of that parcel of property.
 - c. A letter describing any special circumstances affecting the development of that parcel of property, including without limitation, any unusual topography and fill requirements.
 - (2) *Application approval.* An application for tree removal and replacement shall be granted by the director of parish development when he determines that one of the following conditions exist:
 - a. The live oak tree is determined to be "hazardous" by the parish landscaping inspector or by an International Society of Arboriculture certified arborist.

- b. The live oak tree is located in an area where a structure or improvement will be placed, or where a structure or improvement currently exists, and, if not removed, will deny reasonable use of the property or cause serious damage to an existing building. For new construction, if the development can be reasonably reconfigured to provide reasonable use, then such reconfiguration shall be made.
 - c. The live oak tree creates unsafe vision on a public street or right-of-way and cannot be trimmed to correct the unsafe vision.
 - d. The protected tree is required to be removed for an approved infrastructure improvement or structure.
 - e. The live oak tree prevents access to a proposed structure or access to a necessary part of a building site, and a redesign of the development plan is not feasible.
 - f. The live oak tree is located in an area where fill will be placed on a parcel pursuant to a development order and/or a grade-fill excavation permit has been issued and the applicant has demonstrated it is not reasonably practicable to utilize arboricultural techniques to preserve a protected tree.
- (3) *Conditions of application.* Conditions shall be imposed upon any approved application to remove a live oak tree six inches in caliper or greater, such as requiring the planting of additional live oak trees on the site or payment to the tree bank program.
- (4) *Replacement trees.* Removal of any six inches in caliper or greater live oak tree shall be replaced with an equal number of inches of live oaks at a minimum of 2.5-inch live oaks.
- (5) *Grade of trees.* The department of planning and development shall inspect any protected tree requested for removal and grade it based on its existing condition. The grade will determine the number of mitigation inches required. The mitigation will be based on the average quality of the tree, as described below:
- a. *Grade A.* Healthy: 100 percent replacement.
 - b. *Grade B.* Poor form: 75 percent replacement.
 - c. *Grade C.* Ailing/diseased: 50 percent replacement.
 - d. *Grade D.* Topped/dead: zero percent replacement.
- (6) *Appeal.* The property owner or the owner's authorized representative may appeal the denial of the land clearing application to remove an oak tree to the board of adjustment. The board may grant a variance to remove live oak trees pursuant to the criteria as established in this subsection (c). The board may also require the applicant to provide compensation for the removal of said live oak trees, which may include:
- a. Replacing the removed trees with either the same number, or more.
 - b. Establishing the caliper of trees to be replanted.

- c. Planting a divergence of Class A trees, including live oaks, to replace the trees; and as an alternative to replacing trees on site.
- d. Payment to the tree bank program.

(d) *Tree and root protection standards.*

- (1) *Protective barriers; type required.* Prior to grading, construction or other land disturbing activity, protective barriers shall be installed in accordance with the provisions of this subsection (d). Barriers shall include, but not be limited to, temporary fencing. This fencing shall be constructed from any highly visible material substantial enough to protect the roots, trunk and crown of the trees, such as silt fencing, orange safety fencing and wire fencing.
- (2) *Location of barriers.* For all trees, except live oaks, which are provided for in subsection (d)(4) of this section, barriers shall be installed, prior to commencement of clearing and dirt work, at least one foot outward, from trees to be preserved within a street planting area or buffer, for each inch of trunk diameter with a minimum distance of two feet required from the edge of the trunk; provided that, the barriers shall be limited to the perimeter of the street planting area or required buffer and the perimeter of the permitted driveways through the street planting area and permitted driveways through required buffers.
- (3) *Activity within barriers.*
 - a. No significant soil disturbance or compaction, stock piling of soil or other construction materials, vehicular traffic, storage of heavy equipment are allowed within the area for which a barrier is required.
 - b. The tracks of any tracked equipment used within the area for which a barrier is required shall be constructed or buffered by rubber or similar material to minimize root disturbance, and any other tracks are prohibited to be used within such areas.
 - c. No more than one inch of fill shall be allowed around the tree root zone of a tree that is to be preserved.
 - d. No ropes, signs, wires, unprotected electrical installation or other device or material, shall be secured or fastened around or through a tree or shrub.
 - e. Barriers shall not be removed until landscaping operations are undertaken within the area required to be protected by a barrier or until utility or drainage installation is required within the area required to be protected by a barrier. Barriers that have been removed shall be reinstalled unless the project is so advanced that there is no risk to the roots, trunk and crown of the tree.

- (4) *Live oak protection.* For live oaks required to be protected by this division:
- a. A barrier shall be constructed along the drip line of the tree.
 - b. No activity of any kind is permitted within such barrier except as may be approved by the department of planning and development.

(e) *Credit for existing trees.*

(1) *Exchange rate.*

- a. All trees greater than 2.5 inches DBH that are located in the street planting and buffer areas and preserved as required in this section, or any trees preserved in the parking area, shall be credited towards the satisfaction of the minimum landscape planting requirements at the following exchange rate:

<i>DBH Caliper of Preserved Tree</i>	<i>Credits Toward Required Trees</i>
2.5"—4"	1 tree
5"—8"	2 trees
9"—14"	3 trees

- b. One credit for each six-inch caliper of preserved trees.

Example:

- 1. Six inches to 12 inches = 2 credits.
- 2. Thirteen inches to 18 inches = 3 credits.
- 3. Sixty inches = 10 credits.

(2) *Location of trees to obtain credit.* These credits shall only be given if the trees preserved or its canopy are located within 15 feet of the specific area (street/buffer planting areas and parking area). For example: The trees preserved in the street planting area shall be given credit for the street planting requirements only. Credit for trees preserved in the parking area shall apply only to the parking requirements, etc.

(f) *Replacement of preserved trees that die.* If any preserved tree that has been credited dies, and, at the time of such death, there are not then a sufficient number of trees of the required caliper (2.5 inches) and height (ten to 12 feet for Class A trees and eight feet to ten feet for Class B trees) in the street planting area, buffer areas or other required landscaped areas (the requirements of each such area to be computed separately) to meet the requirements of this division, the dead tree shall be removed and replaced by the owner with a tree of the same class equal to the number of trees for which a credit was originally given, but not to exceed the number of trees required in the street planting area, buffer areas or other required landscaped areas (the requirement of each such area to be computed separately). It shall be the responsibility of the owner to replace said tree within six months of the death of the preserved tree.

(g) *Tree bank program.*

- (1) *Purpose.* The purpose of the tree bank program is to maintain the overall canopy balance within the parish by assessing fees for affected canopy in order to fund mitigation projects within the parish.
- (2) *Mitigation.* Mitigation is not permitted outright, but shall be used as a last resort. If on-site mitigation is not feasible, where site conditions preclude compliance with this division, the property owner or owner's authorized representative shall pay into the parish's tree bank program as determined by the department of planning and development or the board of adjustment, whichever is applicable.
- (3) *Site assessment and fee.* The department of planning and development shall conduct an assessment of the affected trees and calculate fees due according to a formula that will be based on industry standards. The formula is provided in chapter 2, article XVII.
- (4) *Fee collection.* The parish shall establish an escrow account, as deemed necessary by the director of finance. All fees collected under the tree bank program are to be immediately deposited into the escrow account.
- (5) *Fee expenditure.* The funds collected under the tree bank program are to be utilized for the purpose of landscaping green spaces on public land such as public rights-of-way, boulevards, parks, etc. Tree bank projects that provide additional benefits such as water quality, stormwater runoff and erosion control will get preference. The director of planning and development or an authorized designee must review and approve project scopes for eligibility in accordance with the standards of this section before tree bank program funds can be utilized.

(Code 1998, app. C, § 7.0105; Ord. No. 07-1548, § 7.0105, 5-3-2007; Ord. No. 12-2720, 5-3-2012; Ord. No. 14-3238, 11-6-2014)

Sec. 130-1873. Street planting areas.

(a) *Definition; width.*

- (1) A street planting area is the area along the street or road along which a property abuts which is designated for the preservation of trees and for landscaping. If a property abuts only one street or road, the street planting area shall be as follows:

STREET PLANTING AREA WIDTH, ONE STREET FRONTAGE

<i>Average Depth of Property</i>	<i>Street Planting Area Width</i>
Less than 300 feet	25 feet
300—399 feet	30 feet
400 feet and greater	35 feet

- (2) If a property abuts two or more streets or roads, the street planting area shall be as follows on all streets upon which the property abuts:

STREET PLANTING AREA WIDTH, MULTIPLE STREET FRONTAGES

<i>Average Depth of Property</i>	<i>Street Planting Area Width</i>
Less than 300 feet	20 feet
300—399 feet	25 feet
400 feet and greater	30 feet

(b) *Flexibility of depth of street planting areas.* The required depth of the street planting area may be adjusted so the depth of the street planting area may be reduced to a minimum of ten feet, up to a maximum of 20 percent of the length of the street planting area, provided that a depth greater than the required depth is added to other areas of the street planting area to maintain the overall required street planting area.

(c) *Driveways through street planting areas.* For street frontage of less than 200 linear feet, no more than two one-way driveways, a minimum of 12 feet in width and a maximum of 15 feet in width, or one two-way driveway, a minimum of 24 feet in width and a maximum of 35 feet in width, shall be permitted through the street planting area. For street frontage of 200 linear feet but less than 600 linear feet, one additional two-way driveway or two additional one-way driveways, of the minimum and maximum width specified, are permitted. Similarly, one additional two-way driveway or two additional one-way driveways, of the minimum and maximum width specified, are permitted for each additional 400 linear feet of frontage beginning with and in excess of 600 linear feet.

(d) *Utilities in street planting areas.*

- (1) *Utilities along streets.* If a utility easement or servitude is located within the street planting area and is adjacent to and runs along a street or road, the width of the street planting area shall not be increased beyond the width required in subsection (a) of this section, except that the width of the street planting area shall be increased as necessary so that ten feet of the street planting area shall be unencumbered by a utility easement or servitude, which shall be accomplished as follows:

<i>Street Planting Area Width</i>	<i>Servitude Width</i>	<i>Increase in Street Planting Area Width</i>
25 feet	Greater than 15 feet	One foot for each foot of servitude width in excess of 15 feet
20 feet	Greater than 10 feet	One foot for each foot of servitude width in excess of 10 feet

- (2) *Utilities crossing street planting areas.* Utility easements or servitudes crossing street planting areas are permitted and do not require that the width of street planting areas be increased.

- (e) *Allowed and prohibited things in street planting area.*
- (1) *Allowed in street planting area.* Trees, shrubs, landscaping, fountains and any other landscape architectural feature, specifically approved by the department of planning and development, are allowed. Subject to the other rules and limitations provided for in this division and other provisions of these regulations, sidewalks, driveways, signs, utility easements and servitudes, retention/detention ponds, drainage ways and facilities, and decorative fences are allowed in street planting areas. Decorative fences are wrought iron, picket and any other similar fence approved by the department of planning and development; provided that:
- a. Such fences must be able to be seen through (not more than one-third opaque); and
 - b. Picket fences cannot be greater than 36 inches high and posts for picket fences cannot be more than 44 inches in height.
- (2) *Prohibited in street planting area.* Everything, not specifically allowed in subsection (e)(1) of this section, is prohibited in street planting areas.
- (f) *Planting requirements in street planting area.*
- (1) *Plants required in street planting area.*
- a. *Trees and shrubs required.* Subject to the reduction and credit for existing trees as set forth in section 130-1872, the following minimum number of trees and shrubs shall be planted in the street planting area or areas (if the property abuts more than one street); each street planting area to be computed separately if there is more than one street planting area:

<i>Width of Street Planting Area</i>	<i>Class A Trees Required</i>	<i>Class B Trees Required</i>	<i>Shrubs Required</i>
25 feet	1 per 30 linear feet (or fraction thereof) of street or road front-age	1 per 30 linear feet (or fraction thereof) of street or road front-age	1 per 10 linear feet (or fraction thereof) of street or road front-age
30 feet	1 per 25 linear feet (or fraction thereof) of street or road front-age	1 per 25 linear feet (or fraction thereof) of street or road front-age	1 per 10 linear feet (or fraction thereof) of street or road front-age
35 feet	1 per 20 linear feet (or fraction thereof) of street or road front-age	1 per 20 linear feet (or fraction thereof) of street or road front-age	1 per 10 linear feet (or fraction thereof) of street or road front-age

- b. *Ground cover required.* Living vegetative ground cover material covering the entire surface of the street planting area other than driveways, sidewalks, retention/detention ponds, drainage ways and facilities, fountains, signs and other areas which are not plantable due to landscape architectural features approved by the department of planning and development.
- (2) *Location of required trees and shrubs within street planting area.* All required trees and shrubs shall be located within the street planting area as follows:

Category	Placement/Location
No servitude or easement within street planting area	Locate class A and B trees and shrubs anywhere within street planting area
Overhead line servitude or easement, along street or road, within street planting area	Locate class A trees outside of servitude or easement; locate class B trees within servitude or easement; locate shrubs anywhere within street planting area
Underground line servitude or easement, along street or road, within street planting area	Locate class A and B trees outside servitude or easement; locate shrubs within servitude or easement
Crossing servitude or easement, overhead or underground, within street planting area	Locate all class A trees outside servitude or easement; if overhead, locate some class B trees within servitude or easement; if underground, locate some shrubs within servitude or easement

(Code 1998, app. C, § 7.0106; Ord. No. 07-1548, § 7.0106, 5-3-2007)

Sec. 130-1874. Side and rear buffer planting area requirements.

- (a) *Definition.* A buffer planting area is defined as an area of land located along the side and rear property lines, common to adjacent properties, designated for the preservation of trees and landscaping. Buffer planting areas terminate at, and do not include any area within, street planting areas. Buffer planting areas shall be designed to provide a horizontal distance and landscaped open space between properties.
- (b) *Buffer planting area width.* Buffer planting area width shall be a minimum of ten feet, except that buffer planting area width for an industrial use abutting a nonindustrial use shall be a minimum of 25 feet.
- (c) *Driveways through side buffer planting areas.* In order to provide off-street ingress and egress among adjacent properties, no more than two one-way driveways, a minimum of 12 feet in width and a maximum of 15 feet in width, or one two-way driveway, a minimum of 24 feet in width and a maximum of 35 feet in width, shall be permitted through the side buffer planting area.

(d) *Allowed and prohibited things in buffer planting areas.*

- (1) *Allowed in buffer planting areas.* Trees, shrubs, landscaping, fountains and any other landscape architectural feature, specifically approved by the department of planning and development, are allowed in buffer planting areas. Eaves and other building overhangs, not in excess of 2.5 feet, are also allowed. Subject to the other rules provided for in this division and other provisions of these regulations, sidewalks, driveways, utility and drainage easements and servitudes, retention/detention ponds, drainage ways or facilities, and fences as provided for in subsection (f) of this section, are allowed in buffer planting areas.
- (2) *Prohibited in buffer planting areas.* Everything not specifically allowed in subsection (d)(1) of this section is prohibited in buffer planting areas.

(e) *Planting requirements in buffer planting areas.*

- (1) *Trees required if unencumbered by utility servitude.* Subject to the reduction and credit for existing trees as set forth in section 130-1872, the following minimum number of trees shall be planted in the buffer planting areas which are not encumbered by a servitude or easement:

Category	Number
Class A trees	One for each 30 linear feet of the buffer planting area
Class B trees	One for each 30 linear feet of the buffer planting area

- (2) *Trees required if encumbered by overhead utility servitude.* Subject to the reduction and credit for existing trees as set forth in section 130-1872, the following minimum number of trees shall be planted in the buffer planting areas which are encumbered by overhead utility servitude or easement:

Category	Number
Class B trees	Two for each 30 linear feet of the buffer planting area

- (3) *Shrubs required if encumbered by an underground utility servitude.* If the buffer planting area is encumbered by an underground utility servitude or easement, the shrubs are required as follows:

Category	Number
Shrubs	One for each 10 linear feet of the buffer planting area

- (4) *Ground cover required.* Living vegetative ground cover material covering the entire surface of the buffer planting area other than driveways, sidewalks, retention/detention ponds, drainage ways and facilities, fountains, signs and other areas which are not plantable due to landscape architectural features approved by the department of planning and development.

- (f) *Fences in buffer planting areas.*
- (1) *Fences required.* One hundred percent opaque wood or masonry fences, a minimum of eight feet high, shall be required, along the side and rear property lines at the perimeter of the buffer planting areas, as follows:

<i>Use of Property</i>	<i>Zoning of Adjacent Property</i>
Commercial, industrial, or institutional uses	Any residential zoning including zoning districts A-1 through A-8 and any residential within a planned unit development or traditional neighborhood development
All multifamily uses except duplexes	Single-family residential zoning, being zoning districts A-1 through A-4 and any single-family within a planned unit development or traditional neighborhood development

- (2) *Fences allowed.* In addition to the fences required in subsection (d)(1) of this section, fences are allowed along the side and rear property lines at the perimeter of the buffer planting areas. Such allowed fences shall be not greater than eight feet in height, and they may be constructed of wood, masonry, wrought iron, wire link, or such other material as may be approved by the department of planning and development.

(Code 1998, app. C, § 7.0107; Ord. No. 07-1548, § 7.0107, 5-3-2007)

Sec. 130-1875. Building facade planting area.

(a) *Definition.* The building facade planting area occurs when the exterior walls of the building, which contain the primary entrances to the building, faces vehicular access areas, and the building facade planting area is the area between such exterior walls and such vehicular access areas.

(b) *Area, location, width, length.* The building facade area shall be the full length of the building exterior walls facing the vehicular access areas. This area shall be no less than four feet in width.

(c) *Allowed in building facade planting areas.* Concrete sidewalks, not to exceed four feet in width. Trees, shrubs, landscaping, fountains and any other landscape architectural feature, specifically approved by the department of planning and development. Entrances, drainage ways, underground utilities, eaves and other building overhangs are allowed in building facade planting areas. Everything not specifically allowed in this subsection (c) is prohibited in building facade planting areas.

(Code 1998, app. C, § 7.0108; Ord. No. 07-1548, § 7.0108, 5-3-2007)

Sec. 130-1876. Parking landscaping requirements.

- (a) *Screening for parking area.*
- (1) *Where screening is required.* Whenever parking or vehicular use areas are located adjacent to a street planting area, shrubs shall be planted in the street planting area to screen the parking area from view from the street or road.

- (2) *Location of shrubs within street planting area.* Shrubs shall be located within the street planting area in a row (straight or curvilinear) or clusters to achieve screening. Shrubs shall be planted 2½ feet apart or closer, except that if shrubs are planted in clusters, the clusters shall be four feet apart or closer.
 - (3) *Height of shrubs.* No shrub shall be planted unless it will reach three feet in height within two years after planting, and, thereafter, shrubs shall be maintained at three feet in height or higher.
 - (4) *Credit.* The shrubs required for screening of the parking area shall be credited against the shrubs required in section 130-1873(f) for the street planting area so that if the shrubs required for screening satisfy the number of shrubs required in section 130-1873(f), no additional shrubs are required under section 130-1873(f).
- (b) *General interior parking landscape requirements.*
- (1) *When required.* Interior parking landscape shall be provided in the interior of vehicular use areas greater than eight parking spaces or larger than 3,000 square feet.
 - (2) *Curbing.* The interior parking landscaped areas shall be curbed with permanently anchored material at least six inches in height. Curb material may be concrete, natural stone, railroad ties or landscape timbers.
 - (3) *Connection with street or buffer planting areas.* A required interior parking landscaped area may be connected with a required street or buffer planting area so long as the interior parking landscaped area is in addition to the area of the required street planting or buffer areas.
- (c) *Specific interior parking landscape requirements.*
- (1) *Landscape islands within rows.* No more than 12 parking spaces shall be permitted in a continuous row without being interrupted or terminated by a landscaped island or median of not less than six feet in width (exclusive of curbs) and not less than the length of the parking space.
 - (2) *Landscape islands at end of rows.* Every parking row shall terminate in a landscaped island of not less than nine feet in width (including the curbs) and not less than the length of the parking space; provided that, a landscape island shall not be required at the end of a parking row where the end of the parking row abuts a street planting area or buffer planting area.
 - (3) *Medians between rows.* Every fourth row of parking shall be separated by a median strip for landscaping of not less than nine feet in width (inclusive of curbs).
 - (4) *Required plants.* The landscaped islands shall contain a minimum of one class A tree. One class A tree for every 30 linear feet shall be planted in the required median between rows. The surface of the landscaped islands and medians shall be planted in a living vegetative ground cover.

(5) *Additional planting where no landscape islands or medians are required.* If no landscape islands or medians are required in this subsection (c), one class B tree is required for every four parking spaces. These class B trees may be planted in any landscaped area. (Code 1998, app. C, § 7.0109; Ord. No. 07-1548, § 7.0109, 5-3-2007)

Sec. 130-1877. Trash and garbage screening requirements.

All storage areas containing three or more refuse, garbage, or rubbish containers or one or more dumpsters, shall be screened on all sides with a minimum seven-foot-high opaque fence of wood or masonry.

(Code 1998, app. C, § 7.0110; Ord. No. 07-1548, § 7.0110, 5-3-2007)

Sec. 130-1878. Retention/detention planting area requirements.

(a) *Definition.* The term "retention/detention pond," as used in this division, means any retention or detention pond or basin for water retention, detention, storage or for runoff control.

(b) *Landscape design requirements.* The retention/detention pond shall be designed as a visual amenity to the area in which it is situated, and the design shall meet the following requirements:

- (1) *Strip around retention/detention pond.* A strip of land, a minimum of five feet in width, shall surround the retention/detention pond on the front, rear and all sides, which strip shall be at grade level and shall not be excavated or made a part of the slope of the retention/detention pond. This strip of land shall contain the required landscaping for the area in which the retention/detention pond is located. For instance, if the retention/detention pond is located in a street planting area, the trees and shrubs required in such area shall be planted on such strip.
- (2) *Preserved trees in street planting area.* Within a street planting area, trees over six inches DBH can only be removed for a retention/detention pond as provided for in section 130-1872(a)(4).
- (3) *Slopes.* If the banks of the retention/detention pond are sloped, the slope shall be at such a ratio so that vegetation will grow thereon so that it can be maintained. Vegetation is required on such slopes.
- (4) *Fences.* Any fences around the retention/detention pond shall be an ornamental fence as defined in section 130-1873(e)(3); except the fences required along the side and rear property lines at the perimeter of the buffer planting areas shall meet the requirements of section 130-1874(f)(1).

(c) *Plan requirements.* The plan for the retention/detention pond shall be shown on the landscape and tree preservation plan or on a separate plan. This plan shall be submitted to the department of planning and development for its review and approval in connection with the issuance of the landscape permit.

(Code 1998, app. C, § 7.0111; Ord. No. 07-1548, § 7.0111, 5-3-2007)

Sec. 130-1879. Maintenance and replacement.

(a) *Maintenance.* The owner or his agent shall be responsible for the maintenance and repair of all landscaping materials and barriers as may be required by the provisions of this section.

- (1) Planting beds shall be mulched to prevent weed growth and maintain soil moisture.
- (2) Plant materials shall be pruned as required to maintain good health and character.
- (3) Turf areas shall be mowed periodically.
- (4) All roadways, curbs and sidewalks shall be edged when necessary in order to prevent encroachment from the adjacent grassed areas.
- (5) The owner of the property shall be responsible for the provision of adequate water, fertilizer and nutrients to the required plant materials.

(b) *Replacement.* Subject to the provisions of section 130-1872(f), replacement of preserved trees that die, trees and plants that die must be replaced within six months of the death of the tree or plant with trees or plants that meet the requirements of this division. Barriers and curbs that are damaged or destroyed beyond repair shall be replaced within six months after the damage or destruction.

(Code 1998, app. C, § 7.0112; Ord. No. 07-1548, § 7.0112, 5-3-2007)

Sec. 130-1880. Native trees and shrubs.

(a) *Required native trees and shrubs.* Section 130-1871(d)(2) provides:

- (1) At least 60 percent, of the aggregate in number, of all required trees and shrubs (the sum of all trees and shrubs required in street planting areas, buffer planting areas, parking areas, building facade planting areas and any other areas where trees and shrubs are required in this division) shall be a native species of trees and shrubs as identified in this section. None of the required ground cover need be a native species.
- (2) The provisions of subsections (b) through (d) of this section set forth trees and shrubs that are considered native species of trees and shrubs for the purpose of section 130-1871(d)(2), above quoted.

(b) *Class A native trees.* Class A trees are defined in section 130-1882. The following are class A native tree species:

<i>Common Name</i>	<i>Scientific Name</i>
American Beech	Fagus Grandifolia
American Elm	Ulmus americana
American Sycamore	Platanus Occidentalis
Ash Species	Fraxinus Spp.
Black Cherry	Prunus serotina
Blackjack Oak	Quercus Marilandica
Bald Cypress	Taxodium Distichum
Blackgum	Nyssa Sylvatica
Cherrybark Oak	Quercus Falcata (var.) Pagodaefolia
Hackberry	Celtis Laevigata
Laurel Oak	Quercus Laurifolia
Loblolly Pine	Pinus Taeda
Longleaf Pine	Pinus Palustris
Nuttall Oak	Quercus nuttallii
Overcup Oak	Quercus lyrata
Pecan	Carya Illinoensis
Pond Cypress	Taxodium Ascendens
Red Maple	Acer rubum L. Var.rubum
Red Oak	Quercus falcata
Slash Pine	Pinus Elliottii
Shumard Oak	Quercus slummardii
Southern Magnolia	Magnolia Grandiflora
Southern Live Oak	Quercus Virginiana
Southern Sugar Maple	Acer barbatum
Spruce Pine	Pinus Glabra
Swamp Red Maple	Acer Rubrum Drummond II
Swamp Chestnut Oak	Quercus Michauxii
Sweetbay Magnolia	Magnolia Virginiana
Sweetgum	Liquidambar Styraciflua
Tulip Poplar	Liriodendron Tulipifera
White Oak	Quercus Alba
Willow Oak	Quercus phellos
Winged Elm	Ulmus Alata

(c) *Class B native trees.* Class B trees are defined in section 130-1882. The following are class B native tree species:

<i>Common Name</i>	<i>Scientific Name</i>
American Plum	Prunus americana
American Snowbell	Styras americana
Big Leaf Snowbell	Styrax grandifolius

<i>Common Name</i>	<i>Scientific Name</i>
Big Leaf Wax Myrtle	Myrica heterophylla
Black Willow	Salix nigra
Bottlebrush Buckeye	Aesculus parviflorum
Cassine or Dahoon Holly	Ilex cassine
Cherry Laurel	Prunus caroliniana
Deciduous Holly	Ilex decidua
Dogwood	Cornus florida
Fosters Holly, Greenleaf Holly, Savannah Holly, etc.	Ilex "attenuata" cultivars
Greenhaw	Crataegus viridis
Greybeard	Chionanthus virginicus
Groundsel Bush	Baccharis halimifolia
Hop Hornbeam	Ostrya virginiana
Ironwood or Blue Beech	Carpinus caroliniana
Mayhaw	Crataegus opaca
Mexican Plum	Prunus mexicana
Parsley Hawthorn	Crataegus marshallii
Persimmon	Diospyros virginiana
Possumhaw Viburnum	Viburnum nudum
Red Bay	Persea borbonia
Red Buckeye	Aesculus pavia
Redbud	Cercis canadensis
Red Mulberry	Morus rubra
River Birch	Betula nigra
Silver Bell	Halesia diptera
Southern Catalpa	Catalpa bignonioides
Southern Crabapple	Malus angustifolia
Shining Sumac	Rhus glabra
Smooth Sumac	Rhus copallina
Titi	Cyrilla racemiflora
Tree Huckleberry	Vaccinium arboreum
Walter's Viburnum	Viburnum oboratum
Wax Myrtle	Myrica cerifera
Weeping Yaupon	Ilex vomitoria "pendula"
Yaupon	Ilex vomitoria

(d) *Native shrubs.* The following are native shrub species:

Arrowwood	Viburnum dentatum
Azalea	Azalea indica
Blueberry/Huckleberry	Vaccinium species

Camellia	Camellia susanqua
Clethra	Clethra alnifolia
Dahoon Holly	Ilex myrtifolia
Fetterbush	Lyonia spp.
French Mulberry	Callicarpa americana
Gallberry	Ilex glabra
Honeybells	Agarista populifolia (dwarf available)
Oakleaf Hydrangea	Hydrangea quercifolia
Palmetto	Sabal minor
Southern Cane	Arundinaria gigantea
Starbush	Illicium floradanum
Sweet Shrub	Calycanthus floridus
Virginia Willow	Itea virginica
Wild Azalea	Rhododendron serrulatum
Wild Azalea	Rhododendron canescens
Wild Azalea	Rhododendron austrinum
Winterberry	Ilex verticillata
Yellow Anise	Illicium parviflorum
Dwarf Yaupon	Ilex vomitoria nona

(Code 1998, app. C, § 7.0113; Ord. No. 07-1548, § 7.0113, 5-3-2007)

Sec. 130-1881. Regulation of legally nonconforming landscaping.

- (a) *Definition.* The term "legally nonconforming landscaping" means:
- (1) Any landscaping located within the parish which does not conform with the provisions of this division at the time this division becomes effective; or
 - (2) Any landscaping not yet constructed, but which has been granted a permit or approval, at the time this division becomes effective.
- (b) *Loss of legally nonconforming status.* Legally nonconforming landscaping shall immediately lose its legally nonconforming designation if:
- (1) The buildings on the premises on which the landscaping is situated are:
 - a. Damaged 50 percent or more of its replacement value by reason of fire, flood, explosion, riot, casualty, or act of God; or
 - b. Repaired, renovated or replaced to the extent of 50 percent or more of its replacement value.
 - (2) The footprint of buildings on the premises on which the landscaping is situated is altered, or the cubicle content of the buildings is increased.

(c) *Compliance after loss of legally nonconforming status.*

- (1) On the happening of the event set forth in subsection (b)(1) of this section, the landscaping shall be brought into compliance with this division, and a new landscape permit shall be secured therefor within six months of such event.
- (2) On the happening of the event set forth in subsection (b)(2) of this section that does not constitute an event under subsection (b)(1) of this section, the landscaping shall be brought into compliance with this division to the extent reasonably possible as determined by the department of planning and development, and in connection therewith, the applicant or owner shall submit to the department of planning and development a landscape and tree preservation plan as required by section 130-1870(d) and obtain a landscape permit for the landscaping as approved by the department of planning and development.

(Code 1998, app. C, § 7.0114; Ord. No. 07-1548, § 7.0114, 5-3-2007)

Sec. 130-1882. Definitions for landscape and tree preservation regulations.

The following definitions relate to the landscape and tree preservation regulations contained in this division. These definitions are intended to also be set forth in section 10 simultaneously with the adoption of the ordinance from which this division is derived or at a later date.

Buffer planting area. See the definition in section 130-1874(a).

Building facade planting area. See the definition in section 130-1875(a).

Calculation of the average depth of the property. The depth of the property is calculated from the primary frontage of the property.

DBH means diameter breast high.

Decorative fences. See the definition in section 130-1873(e)(1).

Drip line means the outer edge of the foliage of a tree extending in all directions parallel to the ground.

Ground cover, decorative, means any mulch material (vegetative or mineral) that is used to cover the surface of the ground to prevent erosion or retain moisture.

Ground cover, vegetative, means plant material which reaches a maximum height of not more than 12 inches at maturity, including turf.

Interior landscape area means any landscaped area within the interior of a development site and beyond the required periphery landscape area that is planted with trees, shrubs and ground covering material to provide for infiltration of runoff, shade of parking areas or aesthetic enhancement of the site.

Landscaping material means material such as, but not limited to, living trees, shrubs, vines, turf, ground cover, landscape water features, and nonliving, durable materials commonly used in landscaping including, but not limited to, rocks, pebbles, sands, decorative walls, brick pavers, and earthen mounds, but excluding paving for vehicular use.

Mulch means any material that is used to cover the ground surface to prevent erosion, retain moisture and protect plant material.

Plant material means any plant including trees, vines, shrubs, ground covers and annuals or vegetation of any size, species or description.

Retention/detention pond. See the definition in section 130-1878(a).

Shrub means a relatively low-growing bushy plant, usually with woody stems. For the purposes of this definition, ground cover, trees and annuals are not considered shrubs.

Street planting area. See the definition in section 130-1873(a).

Tree, class A, means any self-supporting woody plant of a species which normally grows to an overall height of a minimum of 50 feet, usually with one main stem or trunk although some species may have multiple trunks, and with many branches. A list of class A native trees can be found in section 130-1880(b).

Tree, class B, means any self-supporting woody plant of a species which normally grows to an overall height of a minimum of 25 feet, with one or more main stems or trunks and many branches. A list of species considered to be class B native trees can be found in section 130-1880(c).

Tree root zone means that area that extends outward from the trunk to the drip line of the tree.

Vehicular access area means driveways, accessways, parking areas and other areas which vehicles use.

(Code 1998, app. C, § 7.0115; Ord. No. 07-1548, § 7.0115, 5-3-2007)

Secs. 130-1883—130-1907. Reserved.

DIVISION 3. SIGN REGULATIONS

Sec. 130-1908. Statement of need and purpose.

The purpose of this section is to facilitate the location and choice of signs to ensure better communication between people and their environment and to avoid visual clutter that is potentially harmful to traffic and pedestrian safety, property values, business opportunities, and community appearance. With these purposes in mind, it is the intent of this section to authorize the use of signs which are compatible to the unique environment of the parish,

appropriate to the activity that displays them, creative and expressive of the identity of both individual activities and the community as a whole, and legible in the environment in which they are seen.
(Code 1998, app. C, § 7.0201; Ord. No. 07-1548, § 7.0201, 5-3-2007)

Sec. 130-1909. Applicability; permits; variances; waivers; appeals and identification.

- (a) *Applicability.*
- (1) *General applicability; billboards excluded.* This division is applicable to all signs except billboards and off-premises outdoor advertising signs which are regulated by section 130-2112. No billboard or off-premises outdoor advertising sign shall be allowed except to the extent to which they are allowed and regulated by section 130-2112.
 - (2) *Applicability according to land uses.* The sign regulations in this division are categorized so that certain of these regulations are applicable to certain land uses and other of these regulations are made applicable to other land uses. The following is a table of the land uses and the regulations, by section number, applicable to these land uses:

Regulation Uses	Section Numbers
Commercial, industrial and institutional	130-1909
Uses and all uses except residential uses	130-1910—130-1918
Single-family and two-family residential	130-1919
Multifamily residential and condominiums	130-1920
Residential subdivision and center median entrance signs	130-1921
 - (3) *Prohibited signs.* Prohibited signs as set forth in section 130-1922 are applicable to all uses.
 - (4) *Regulation of legally nonconforming signs.* The regulation of legally nonconforming signs as set forth in section 130-1923 are applicable to all uses.
 - (5) *Definitions.* Definitions are set forth in section 130-1924.
- (b) *Requirement of sign permit.* A permit is required from the department of planning and development for every new sign and every modification, alteration or repair of a sign except:
- (1) Miscellaneous signs for nonresidential uses as provided for in section 130-1915;
 - (2) Temporary signs without permits as provided for in section 130-1917;
 - (3) Signs for single-family and two-family residential uses as provided for in section 130-1919; and
 - (4) The signs allowed for multiple-family and condominium uses as provided in section 130-1920(1).

(c) *Variances by board of zoning adjustments.* If the application for a new sign or for a modification or alteration of an existing sign shows that all requirements of this division are complied with, the director of planning and development shall issue a permit without the necessity of any public hearing before the zoning commission or any other public body. If the application for the permit is denied, the applicant may, subject to the provisions of this section, seek a variance from the board of zoning adjustments pursuant to the provisions of article II of these regulations. Appeals from the board of adjustments shall be made to the district court for the parish as provided in article II of these regulations.

(d) *Criteria for variances and waivers.* Pursuant to subsection (c) of this section, the board of zoning adjustments may grant variances from the sign regulations in this division. Such variances and waivers may be granted to diminish sign regulation requirements when one or more of the following exists: unusual elevations or shape of the lot, unusual landscaping and/or tree preservation problems, unusual architectural design of the building or structures, unusual effect of the requirements of the signs to be placed on the lot or building, problems with servitudes, and any other problem or matter which affects signage that the board of zoning adjustments determines to be in the public interest to consider; provided that variances and waivers shall not be based solely on cost or economic consideration. Furthermore, the board of zoning adjustments may grant variances from the provisions of this division due to any hardships or other matters that are a proper basis for a variance.

(e) *Permit procedure.* Application for sign permits shall be submitted on forms prepared by the department of planning and development. These forms shall require plans, scaled drawings, specifications, dimensions and height, parcel identification, sign location and such other data with respect to the sign as the department of planning and development shall deem appropriate for the administration and enforcement of this division.

(Code 1998, app. C, § 7.0202; Ord. No. 07-1548, § 7.0202, 5-3-2007)

Sec. 130-1910. Standards applicable to nonresidential uses.

The following standards are applicable to all signs erected or displayed for commercial, industrial and institutional uses and for all other uses except residential uses. Standards specific to such activities along the Interstate 10 service road are found in section 130-1911(e).

- (1) *Internal illumination.* Internal illumination is allowed creating a negative contrast, i.e., light lettering against a dark, opaque background.
- (2) *External illumination.* Externally illuminated signs may be illuminated in white light only, not to exceed 3,000 lumens per side per sign or otherwise unreasonably intrude on a residence and such illumination shall not constitute a traffic hazard.
- (3) *Colors.* Only spectrum colors are allowed. No iridescent colors or reflective lettering is allowed.

- (4) *Plywood and particle board.* Signs (other than temporary signs) may not be constructed of rough or unfinished plywood or particle board.
 - (5) *Neon.* Neon will only be allowed if it is considered as an integral part of the sign being regulated. Anything within the boundary of the outline of the neon will be considered a part of the sign face.
 - (6) *Changeable message sign limitation.* Movie theater signs are allowed changeable message signs without limitation. All other changeable message signs shall be incorporated into a sign face, but the changeable component must occupy less than one-half the total area of the sign face.
 - a. If changeable copy is used, it shall be located adjacent to or integrated into the sign face.
 - b. Lettering of changeable message signs shall be of a single style and shall be of uniform color and size.
 - c. Internal illumination, if any, shall be a negative contrast.
- (Code 1998, app. C, § 7.0203; Ord. No. 07-1548, § 7.0203, 5-3-2007; Ord. No. 10-2306, 8-5-2010)

Sec. 130-1911. Monument signs applicable to designated uses.

(a) *Definition of ground signs.* Ground signs are specifically defined in section 130-1924, but they consist of monument signs and pole signs. Monument signs are allowed as provided for in this division, but pole signs are prohibited.

(b) *Number of monument signs.* One monument sign shall be allowed for each 1,000 feet of street frontage or fraction thereof in excess of the 1,000 foot increments. A property with more than one street frontage shall be allowed one monument sign for each 1,000 feet of street frontage or fraction thereof in excess of the 1,000 foot increments.

(c) *Location of monument signs.* A monument sign, or monument signs if more than one is allowed, may be located at any place from the street property line, including the street planting area, back to the building facade as long as it is set back from the street property line at least five feet. If there is no building facade behind the sign, then the sign may be located up to 50 feet back from the property line. Monument signs shall not be located within a sight clearance triangle as defined below:

- (1) A sight clearance triangle shall be the triangle at the corner of two intersecting street rights-of-way, two sides of which shall be located along the street lines and shall run a distance of 15 feet from the intersecting corner of the street rights-of-way, and the third side of the triangle shall be a straight line linking the ends of the street lines of the triangle.

- (2) A sight clearance triangle, as described in subsection (c)(1) of this section, between the street rights-of-way and a railroad right-of-way, a street right-of-way and a pedestrian or bicycle right-of-way, and a driveway and a street right-of-way.

(d) *Monument signs for designated uses.*

- (1) *Where allowed.* Monument signs are allowed to be erected and displayed for commercial, industrial and institutional uses and for multifamily and residential condominiums as provided for and subject to the limitations of section 130-1920(2), and for all other uses except other residential uses. Standards specific to such activities along the Interstate 10 service road are found in subsection (e) of this section.
- (2) *Area.* The total sign area for each allowed monument sign constructed shall not exceed the following limits:

<i>Building Type</i>	<i>Square Footage per Side</i>
Single occupancy	32 sq. ft.
Multiple occupancy	70 sq. ft.

- (3) *Height of monument signs.* The height of monument signs shall not be greater than nine feet.

(e) *Standards for properties with frontage along the Interstate 10 Highway system.* The following standards shall be applied to properties with frontage along the Interstate 10 Highway system.

- (1) *Publicly owned events centers.* Publicly owned events centers, when created under the authority of the state in accordance with Title 33, Chapter 11 of the Louisiana Revised Statutes are permitted a single sign as follows:
 - a. If the property is located within one mile of an Interstate 10 interchange, the sign may be located on property within 5,000 feet of said interchange when property is owned/leased by the relevant events district.
 - b. Maximum height allowed shall not exceed 35 feet from grade.
 - c. Maximum signage area allowed shall not exceed 1,000 square feet, with no single sign exceeding 425 square feet in area.
 - d. Video display shall be allowed, but shall not exceed 300 square feet in area. This area shall not be calculated as signage area limited by subsection (e)(1)c of this section.
 - e. Interior illumination shall comply with the standards established in section 130-1910(1).

- (2) *Commercial, industrial and institutional uses.* Commercial, industrial and institutional uses with frontage along the Interstate 10 service road are permitted a single sign, located on premises, as follows:

- a. Maximum height allowed shall not exceed 35 feet from grade.
- b. Maximum signage area allowed shall not exceed 250 square feet per side.
- c. Interior illumination shall comply with the standards established in section 130-1910(1).

(Code 1998, app. C, § 7.0204; Ord. No. 07-1548, § 7.0204, 5-3-2007; Ord. No. 10-2306, 8-5-2010)

Sec. 130-1912. Wall signs for nonresidential uses.

In addition to the monument signs allowed under section 130-1911, the following wall signs shall be allowed for each occupant of a single or multi-occupancy premises, for commercial, industrial and institutional uses and all other uses except residential, as follows:

- (1) *Signs, location.* One wall sign per occupant to be sized at a ratio of one square foot of sign area per linear foot of the facade of the store front. For store fronts of less than 32 linear feet, the allowable size sign shall be 32 square feet. All wall signs shall maintain a minimum distance of one foot from the lease line of the occupant's portion of the facade and the linear footage shall be measured along the wall of the facade on which the sign will be located. Each store may have multiple fronts based upon the definition of "store front" in section 130-1924.
- (2) *Corner buildings.* On store frontages located at the corner of a building, which face two different street frontages, or if a business occupies an entire separate structure within a center, additional wall signs, the area of which shall be calculated as per subsection (1) of this section, shall be allowed, provided that a minimum distance of 30 feet, measured along the store front, is maintained between the extremities of any two signs and each sign is mounted on a separate wall facing in a separate direction. However, under no circumstances shall a wall sign be allowed on a wall which is finished in a manner inferior to the quality of the facade where the main entrance is located or on a wall where the placement of the sign will call attention to building equipment or the unfinished side of a false building facade.

(Code 1998, app. C, § 7.0205; Ord. No. 07-1548, § 7.0205, 5-3-2007)

Sec. 130-1913. Awning, marquee or canopy signs applicable to nonresidential uses.

In lieu of a wall sign as provided for in section 130-1912, an occupant, for a commercial, industrial and institutional use and for any other use other than residential, is allowed either an awning, marquee or canopy sign, and all of the provisions of section 130-1912 relating to size, distance from lease line, signs on or extending from inferior quality walls, or signs calling

attention to building equipment or the unfinished side of a false building facade must be adhered to. If the occupant uses an awning, marquee or canopy sign, a wall sign is not allowed. (Code 1998, app. C, § 7.0206; Ord. No. 07-1548, § 7.0206, 5-3-2007)

Sec. 130-1914. Other occupant signs for nonresidential uses.

In addition to the monument signs and wall signs and awning, marquee or canopy signs allowed in sections 130-1911, 130-1912 and 130-1913, the following signs are allowed to occupants with commercial, industrial or institutional uses or any other use other than residential:

- (1) *Rear doors.* One rear identification wall sign must be displayed on or at a rear door of each separate business entity for purposes of emergency access and deliveries only. Such sign shall be limited in size to the minimum size required by the state fire marshal. Any door not utilized as a primary entrance-way for patrons during normal business hours or not opening directly onto the patron area of any premises shall be considered a rear door. No door located on any store frontage on which there exists a door utilized as a primary entrance-way for patrons during normal business hours or which opens directly onto the patron area of any premises shall be considered a rear door.
- (2) *Identification and address signs.* An occupant shall be allowed one nonilluminated identification and address sign not to exceed eight square feet in area identifying the occupant, and such additional sign shall be located on or within ten feet of the primary public entrance of the occupant.

(Code 1998, app. C, § 7.0207; Ord. No. 07-1548, § 7.0207, 5-3-2007)

Sec. 130-1915. Miscellaneous signs for nonresidential uses.

Subject to all provisions and requirements of this division, the following signs may be erected and displayed, for commercial, industrial and institutional uses and any other use other than residential, without the necessity of a sign permit:

- (1) *Public directional signs.* Public directional signs are allowed.
- (2) *Official notices.* Official notices duly issued by any court, public agency or officer are allowed.
- (3) *Flags and insignia of any government.* Flags and insignia of any government, except when displayed in connection with a commercial promotion, are allowed.
- (4) *Integral decorative or architectural features of buildings.* Integral decorative or architectural features of buildings, other than neon lights, letters, trademarks, logos, or any feature containing moving parts or moving or flashing lights, are allowed.
- (5) *Indoor signs.* Indoor neon signs, not greater than six square feet in area are allowed at or near windows, provided that, they do not, in the aggregate, exceed 40 square feet of the

windows in any one side of a building and provided that they do not, in the aggregate, cover more than 25 percent of the area of any windows in which such signs are displayed. Other indoor signs, not visible from any street right-of-way, are also allowed.

- (6) *Private directional signs.* Private directional signs, not exceeding four square feet in sign area per sign, are allowed.
- (7) *Fuel service station pump signs, oil rack signs, and pricing signs.* Fuel service station pump signs, oil rack signs, and pricing signs are allowed pursuant to the following:
 - a. *Fuel service station pump signs.* Fuel service station pump signs may be displayed on fuel pumps to provide required information to the public regarding the available fuel, such as "gallons," "price," "octane rating" and "type of fuel." If a trade name of the business or supplier is incorporated into the name or designation of the different types of fuels available, said trade name and any associated symbols therewith may be displayed on the pumps provided that such signs are flat signs that do not exceed three square feet per sign face and an aggregate area of six square feet of sign face per pump.
 - b. *Oil rack signs.* If a fuel service establishment markets engine oil on the pump island, any identification signs on the merchandise itself visible to the public shall be allowed. Additional signs on the oil rack may be allowed provided that each such sign shall not exceed three square feet per sign face with an aggregate area of six square feet of sign face per rack.
 - c. *Tire rack signs.* If a fuel service station, tire store, auto repair shop or any other business which markets tire displays the tires on racks visible to the public, additional signage on the tire rack identifying the tires displayed on that rack may be allowed, provided that such additional signage shall not exceed three square feet per sign face with an aggregate area of six square feet of sign face per rack.
 - d. *Pricing signs.* A sign advertising the price of motor fuel, other than pump signs, shall be allowed provided that such sign shall be included and made part of the allowable sign area as set forth in section 130-1911.
- (8) *Menu boards.* Menu boards for drive-through facilities providing food for off-premises consumption, which do not exceed 48 square feet in sign area and which are located so as not to be visible from the street right-of-way from which primary access to the premises is obtained, are allowed. Menu boards and similar data for drive-in parking spaces for drive-in restaurants shall not exceed nine square feet.
- (9) *Vehicle and trailer signs.*
 - a. Vehicle and trailer signs may be displayed on any vehicle or trailer operated in the daily conduct of any business enterprise so long as such signs:
 - 1. Are not parked in front of or in line with any greenbelt or planting areas when on the premises of the business entity operating or advertising on such vehicle or trailer.

2. Are on a vehicle or trailer which is operable and not parked primarily for the purpose of signage.
- b. Vehicle and trailer signs shall not be used as off-premises signs and shall not be displayed or parked on sites other than the premises of the business entity operating such vehicle other than when the vehicle is being used in connection with the business operations of the entity operating said vehicle or trailer. Such vehicles and trailers may also be parked at the residence of its operator, so long as such vehicle is operated by a resident of the residential property as conveyance to work on a daily or near daily basis. Billboards may not be erected or displayed on any vehicle or trailer.
- (10) *Licensed roadside vendor sign.* One roadside vendor sign for licensed road vendors will be allowed on signs facing each side not to exceed 16 square feet per side.
- (11) *Handicapped parking and access signs.* Handicapped parking and access signs are allowed and are regulated in accordance with state or federal law.
(Code 1998, app. C, § 7.0208; Ord. No. 07-1548, § 7.0208, 5-3-2007)

Sec. 130-1916. Pylon signs applicable to regional commercial/office centers.

- (a) *Where permitted.* Pylon signs shall only be permitted in planned developments meeting the definition of a regional commercial/office center.
- (b) *Number of pylon signs.* One pylon sign shall be allowed for each 1,250 feet of frontage along an interstate highway. Frontage roads constructed as part of the development along the interstate highway will be considered interstate frontage regardless of ownership status. On/off ramps that are part of the interstate highway system may be used to calculate this frontage.
- (c) *Location of pylon signs.*
 - (1) A pylon sign must be located within 100 feet of the highway or frontage road right-of-way.
 - (2) If a pylon sign is located on the development side of an internal public road it must be set back at least 15 feet from the right-of-way of said public road.
 - (3) If a pylon sign is located between an internal road and an interstate highway right-of-way, the sign must be at least five feet from the internal road right-of-way, and may be placed immediately adjacent to the interstate highway right-of-way, if there is no objection to such placement from the state department of transportation and development.
 - (4) A pylon sign may not be located within a triangular area formed by the street or driveway right-of-way lines and a line connecting them at points 50 feet from the intersection of said rights-of-way.

- (5) No pylon sign may be located within 1,000 feet of another pylon sign.
 - (d) *Standards for pylon signs.*
 - (1) *Area.* The total sign face area (multiple tenant signs) for each allowed pylon sign shall not exceed 400 square feet per side.
 - (2) *Height of pylon signs.* The height of monument signs shall not be greater than 45 feet from grade.
 - (3) The total structure face shall not exceed 1,500 square feet, inclusive of the total sign face.
 - (4) A logo or graphic identified with the development may be placed on each side of the structure not to exceed 100 square feet in area per side.
 - (5) Unless otherwise noted in this section, all pylon signs must comply with section 130-1910, standards applicable to nonresidential uses.
- (Code 1998, app. C, § 7.0208.01; Ord. No. 07-1548, § 7.0208.01, 5-3-2007; Ord. No. 11-2523, 5-5-2011)

Sec. 130-1917. Temporary signs without permits.

The following temporary signs are allowed, without the necessity of a permit, for commercial, industrial and institutional uses and for uses allowed in the RC Recreational/Conservation District:

- (1) *Business award signs.* Chamber of commerce, business of the month, banners for the month of the award are allowed.
- (2) *Temporary window signs.* Temporary window signs displayed on the inside of windows and intended for the purpose of disseminating information about special sales or promotional campaigns are allowed pursuant to the following:
 - a. *Materials.* Shall be constructed of such materials as to indicate the temporary nature of the sign;
 - b. *Area covered.* Shall not, in the aggregate, cover more than 0.25 percent of the area of any windows in which such signs are displayed;
- (3) *Temporary real estate signs.* Temporary real estate signs are allowed pursuant to the following:
 - a. *Number and size.* Signs shall be limited to the owner of or to one real estate sign per listing broker on any premises offered for sale, rent or lease. Such sign shall be nonilluminated. A double-faced real estate sign is allowed, provided that such sign shall not exceed 16 square feet in area per sign face and an aggregate sign face area of 32 square feet for single-family residences and multiple-family residences, or 32 square feet in area per sign face and an aggregate sign face area of 64 square feet

in area for commercial and institutional properties. If freestanding, any such sign, whether single- or double-faced, shall not exceed seven feet in height. Property with two or more premises street frontages shall be allowed to display one additional sign conforming with all of the requirements of this subsection on a second frontage.

- b. *Condominiums.* For purposes of the regulation under this code of real estate signs only, each separately designated unit of a condominium development created by virtue of written instruments duly recorded in the office of the parish clerk of court shall be considered a separate premises and real estate signs relating to any such unit shall be regulated depending upon the use of the unit in question, in accordance with the applicable provisions of this division.
- c. *Construction, placement.* Temporary real estate signs may be attached to stakes or rods which are placed in the ground, they may be constructed of plywood or they may be constructed and placed in any other way that meets the requirements of this division.

(Code 1998, app. C, § 7.0209; Ord. No. 07-1548, § 7.0209, 5-3-2007)

Sec. 130-1918. Temporary signs requiring permits for nonresidential uses.

The following temporary signs are allowed, provided that a permit is obtained, for commercial, industrial and institutional uses and any other use other than residential:

- (1) *Public service signs.* Public service signs including street banner signs are allowed only in connection with the promotion or identification of special events of a civic, philanthropic, charitable or religious purpose.
 - a. *General application.* Any person, firm, corporation or organization in charge of any festival, spectacle, play, show, or other event of such a general civic and public nature and who is in charge of placing, erecting, constructing and maintaining any public service banner, flag, emblem, bunting or freestanding public service sign upon or over any public street, or other public place in the parish shall first secure a temporary permit subject to the approval of the department of planning and development and the conditions provided herein prior to the placement of the sign.
 - b. *Application for permit.* Applications for such a permit shall state the name of the person, firm, corporation or organization sponsoring the event; the location where such device or devices are to be installed and the contemplated dates during which such devices shall remain upon or over any street or other public place in the parish. Such application shall have attached to it a chart or drawing showing that the device would not interfere with traffic or the safety of persons using such public places.

- c. *Duration.* Such signs or banners may be displayed for a period not to exceed 14 consecutive calendar days upon issuance of a temporary permit by the department of planning and development. The sign area of such signs or banners shall not exceed 32 square feet.
- (2) *Flags, streamers, banners and pennants.* Flags, streamers, banners, pinwheels, spinners or pennants may be displayed in connection with grand openings or special events no more than twice a year for any one business entity or applicant. Such signs may be displayed for a period not to exceed 14 consecutive calendar days upon the issuance of a temporary permit by the department of planning and development. Applications for such a temporary permit must state the name of the person, firm, corporation or organization sponsoring the event, the locations where such devices are to be installed and the contemplated dates during which such devices shall remain on display. Banners shall not exceed 32 square feet and shall be limited to one banner per premises.
- (3) *Political, public issue and religious signs.*
- a. *Applicability; political signs.* Political signs are allowed on billboards and on off-premises outdoor advertising signs as provided for in section 130-2112(24) and the provisions of this subsection do not apply to billboards and off-premises outdoor advertising signs.
 - b. *General provisions, political signs.* Any person desiring to distribute or display political signs in connection with an organized campaign in support of or opposition to any candidacy, political slate or ticket, or ballot proposal shall first make application to the department of planning and development for the issuance of a temporary sign permit. Such application shall include the name, address and telephone number of the applicant. The applicant for the permit shall provide the department of planning and development with specimen copies of all signs to be distributed or displayed under the permit.
 - c. *Fee, political signs.* The applicant shall include, with his application for a political sign, a fee in accordance with the following:
 - 1. National offices. \$500.00.
 - 2. United States House of Representatives, United States Senate, and President.
 - 3. Major office. \$500.00.
 - (i) Offices elected statewide.
 - (ii) Public service commissioner, Supreme Court Justice and BESE.
 - (iii) Any office with an election district containing a population in excess of 250,000.
 - 4. District office. \$250.00.

5. Office of a member of the state legislature.
 6. Offices elected parish wide.
 7. Offices elected in more than one parish (unless the population exceeds 250,000).
 8. Offices elected in a district with a population in excess of 35,000 but less than 250,000.
 9. Any other office. \$100.00. The term "any other office" means offices not considered a major district, i.e., offices elected in a district having a population of 35,000 or less and not elected parish wide.
- d. *Distribution, erection and display of political signs.* Said permit for a political sign shall authorize the distribution, erection and display of an unlimited number of signs of the type or types submitted as specimens by the applicant and shall allow for the placement of one sign to be erected per premises/street frontage.
 - e. *Time period of permit for political signs.* Any such permit for a political sign shall be issued for a period of time not to exceed 90 consecutive calendar days; provided, however, that in the event that signs are distributed, erected or displayed under any such permit in connection with any candidacy or ballot proposal which involves more than one election, the permit shall be automatically extended to the tenth day following the date of the general election to which the sign pertains.
 - f. *Political signs prohibited on public rights-of-way.* No political sign shall be erected or displayed in any public right-of-way.
 - g. *Size, political signs.* No political sign shall exceed 32 square feet in sign face area. No political sign can be stacked one on top of the other in billboard fashion.
 - h. *Type, political signs.* Political signs may be attached to rods or stakes placed in the ground or they may be made out of plywood or they may be made in any other way that meets the requirements of this division.
 - i. *Removal of political signs.* The applicant shall remove all political signs erected or displayed under any permit issued to him under the provisions of this section no later than ten calendar days following the last election to which the sign pertains. Upon the failure to timely remove such signs the parish may thereafter remove and dispose of any remaining signs.
- (4) *Religious and public issue signs.* One religious or public issue sign, not to exceed four square feet in sign area, shall be permitted, on any premises, without the necessity of a permit; provided that:
- a. They shall not be placed in a public right-of-way;
 - b. They shall not be in place for more than three months;

- c. They meet the requirements of subsection (3)h of this section; and
 - d. Nothing in this subsection shall affect the rights of religious institutions to erect signs in connection with their buildings or structures as permitted in other provisions of this division.
- (5) *Construction signs.* Nonilluminated construction signs may be allowed on the premises being developed or improved subject to the following conditions and requirements:
- a. *Building permit required.* A building permit for the project must have been obtained prior to the issuance of the sign permit.
 - b. *Residential district.* In residentially zoned districts such signs shall not exceed four square feet in area and shall be limited to the denoting of the architect, engineer, contractor, subcontractor, owner and/or financing agency providing labor, materials, services or financial capital for the proposed construction. Such sign may be displayed only during construction and for a period of not more than ten days after completion of actual construction identified by the first issuance of a certificate.
 - c. *Nonresidential or combined use districts.* In any nonresidential or combined use district, one such sign shall be allowed not to exceed 32 square feet in area and all other signs shall not exceed four square feet in area. All such signs shall be limited to the name of the project and the denoting of the architect, engineer, contractor, subcontractor, owner and/or financing agency providing labor, materials, services or financial capital for the proposed construction. Such signs may be displayed only during actual construction and for a period of not more than ten days after completion of the construction as identified by the first issuance of a certificate of occupancy for the project or development in question or upon expiration of the building permit for the project or development, whichever is first to occur.
 - d. *Set back requirements.* The location of such signs shall be on the property to which the sign is applicable. Without limiting the other provisions of this section, such signs shall not be placed on trees or in street rights-of-way.
- (6) *Proposed project signs.* One nonilluminated temporary sign announcing a proposed land development may be erected on the premises proposed for the project provided that such sign does not exceed 50 square feet in area, is set back at least ten feet from any property line, and is removed within one year from the date the sign permit for its erection was issued or upon the issuance of the sign permit for a construction sign or the lapse of 60 days from the issuance of a building permit for the project whichever is first to occur. The parish may remove the sign, at their discretion, if it is not removed after the permit expires, and the sign permit application shall give the parish the right to remove the sign.

(7) *Temporary signs preceding permanent sign approval.*

- a. *Size; duration.* One temporary attached identification sign not exceeding 32 square feet may be allowed for a period of not more than 30 days for an occupant who has no other on-premises signs to identify the occupant's business subsequent to the filing of a complete application for sign approval and approval of the department of planning and development.
- b. *Extension of time.* An additional 60 days' extension may be requested in writing from the department of planning and development by the sign applicant.

(8) *Seasonal banners.* Temporary seasonal banners such as, but not limited to, those attached to light standards within a parking area may be allowed on multi-occupant premises upon review of and approval by the planning and development department. Prior to issuance of a temporary permit for the display of such banners, the following requirements shall be met:

- a. No seasonal banner shall exceed eight square feet in area.
- b. The total number, location and method of attachment display shall be approved by the planning and development department.
- c. No advertising message shall be conveyed on the banners, however, nonadvertising seasonal greetings are allowed.
- d. The identifying name of the multi-occupant premises may be included on the banner but such name shall not exceed 50 percent of the banner area.

(Code 1998, app. C, § 7.0210; Ord. No. 07-1548, § 7.0210, 5-3-2007)

Sec. 130-1919. Signs for single-family and two-family residential uses.

The following nonilluminated signs, using only spectrum colors, are allowed to be erected and displayed, without a permit, for single-family residential and two-family residential uses:

- (1) *Resident identification signs.* Resident identification signs not exceeding three square feet in sign area are allowed.
- (2) *Home occupation signs.* Home occupation signs, not exceeding two square feet in sign area which are nonilluminated and which are mounted flat against and parallel to the plane of the wall of the building to which the sign is attached, are allowed in zoning districts where home occupations are allowed.
- (3) *Official notices.* Official notices duly issued by any court, public agency or officer are allowed.
- (4) *Flags and insignia.* Flags and insignia are allowed except when displayed in connection with a commercial promotion.
- (5) *Public directional.* Public directional signs are allowed.

- (6) *Temporary real estate signs.* Temporary real estate signs are allowed pursuant to the following:
- a. *Number and size.* Signs shall be limited to the owner of or to one real estate sign per listing broker on any premises offered for sale, rent or lease. Such sign shall be nonilluminated. A double-faced real estate sign is allowed, provided that such sign shall not exceed eight square feet in area per sign face and an aggregate sign face area of 16 square feet. If freestanding, any such sign, whether single- or double-faced, shall not exceed six feet in height. Property with two or more premises street frontages shall be allowed to display one additional sign conforming with all of the requirements of this subsection on a second frontage. Boxes for real estate pamphlets for single-family residential uses are also allowed; provided that, they shall not exceed a size necessary for 8½-inch by 14-inch pamphlets.
 - b. *Condominiums.* For purposes of the regulations under this subsection of real estate signs only, each separately designated unit of a condominium development created by virtue of written instruments duly recorded in the office of the parish clerk of court shall be considered a separate premises and real estate signs relating to any such unit shall be regulated depending upon the use of the unit in question, in accordance with the applicable provisions of this division.
 - c. *Construction, placement.* Temporary real estate signs may be attached to stakes or rods which are placed in the ground, they may be constructed of plywood or they may be constructed and placed in other way that meets the requirements of this division.
- (7) *Temporary yard or garage sale signs.* Temporary yard, real estate directional, open house or garage sale signs shall be limited to one nonilluminated sign displayed on the residential premises at which the sale is conducted; provided that, such erection and display shall be limited to three days in any 60-day period. Such sign shall not exceed six square feet in sign area. Two additional garage sale signs, a maximum of six square feet may be placed off-premises on private property with permission of the property owner.
- (8) *Vehicle and trailer signs.* Vehicle and trailer signs are allowed for single-family and two-family uses to the extent they are allowed in section 130-1915(9).
- (9) *Alarm signs.* Signs for burglar alarms are allowed; provided that they do not exceed an area of three square feet.
- (10) *Beware of dog signs.* Beware of dog signs are allowed without a permit; provided that, they do not exceed an area of three square feet.
- (11) *Residential entrance archways.* Signs constructed across the primary driveways of a residential property greater than ten acres in area, not to exceed 60 square feet in area.
- (Code 1998, app. C, § 7.0211; Ord. No. 07-1548, § 7.0211, 5-3-2007)

Sec. 130-1920. Signs for multiple-family, residential and condominium uses.

The following signs are allowed to be erected and displayed, for multiple-family, residential and condominiums:

- (1) *Multiple-family and condominiums.* Multiple-family and residential condominiums are allowed, without a permit, all of the signs which are allowed to single-family and two-family residential uses in section 130-1919.
- (2) *Multiple-family only.* Additionally, multiple-family residential projects, including residential condominiums, shall be entitled, after having obtained a permit, to monument signs which are allowed for single occupancy buildings as set forth in section 130-1911; E2 and E3, and located as set forth in section 130-1911(c).

(Code 1998, app. C, § 7.0212; Ord. No. 07-1548, § 7.0212, 5-3-2007)

Sec. 130-1921. Subdivision, center median entrance signs and community bulletin board signs.

(a) Residential subdivision entrance signs not greater than 48 square feet in sign area per side may be located on each side of the entrance to approved residential subdivisions (one-sided only) or within the center median (two-sided signs permitted) at the entrance to the approved subdivision.

(b) Residential subdivision entrance signs not greater than 80 square feet in sign area per side may be located on each side of the entrance (one-sided signs only), or within the center median (two-sided signs permitted) at the entrance, only to those approved residential subdivisions fronting on U.S. Highway 190 beginning at its intersection with the East Causeway approach, north, to its intersection with North Causeway Boulevard, or within the center median at the entrance to said approved subdivision.

(c) For commercial or mixed-use subdivisions, a monument sign shall be permitted on each side of, or in the center median at the entrance to a commercial, industrial or institutional subdivision. In the case of signs permitted on either side of an entrance, said signs shall be one-sided. In the case of center median signs, said signs shall be two-sided. In no case may any sign face exceed 85 square feet of signage per side.

(d) The structure of such signs must be of masonry construction and shall not exceed 140 square feet of surface area per side nor eight feet in height. Columns will be permitted not to exceed 12 feet in height or three feet in width and/or depth. Development icons may be permitted on said masonry structure, but shall not contain any letters or numbers.

(e) Community bulletin board signs shall not be greater than 40 square feet in sign area, limited to one side dedicated for display; limited in height to eight feet above the grade level of the nearest road; limited to one per entrance to said approved subdivision; may contain optional external illumination; shall not contain commercial advertising; cannot be located

within 100 feet of a subdivision monument sign; and must be located in the interior of the subdivision in an area not to create a traffic obstruction as determined by the parish engineering department.

(Code 1998, app. C, § 7.0213; Ord. No. 07-1548, § 7.0213, 5-3-2007; Ord. No. 10-2346, 10-7-2010; Ord. No. 12-2698, 4-5-2012)

Sec. 130-1922. Prohibited signs applicable to all uses.

The following types of signs are prohibited:

- (1) Abandoned signs.
- (2) Audible signs.
- (3) Beacons.
- (4) Bench signs.
- (5) Billboards and off-premises outdoor advertising signs except as allowed in section 130-2112(24).
- (6) Flashing signs.
- (7) Inflatable signs except for use in conjunction with grand openings and special events limited to two times per year for a maximum of two days each time.
- (8) Lasers.
- (9) Moving message or changing image sign except public service signs or as permitted in section 130-1911(e)(1).
- (10) Parapet signs.
- (11) Portable signs.
- (12) Projected signs.
- (13) Revolving or rotating signs.
- (14) Roof signs.
- (15) Search lights except as allowed in division 4 of this article.
- (16) Signs attached to trees, shrubs or any living vegetative matter.
- (17) Signs, other than public directional signs, public service signs, public information signs, subdivision signs or official notices which encroach into a public right-of-way.
- (18) Signs resembling traffic control devices or emergency devices.
- (19) Signs which restrict or impair visibility at the intersection of the right-of-way lines of two streets, or of a street and a railroad right-of-way, or of a street and a pedestrian or bicycle right-of-way, or of a driveway and street right-of-way.

- (20) Snipe signs other than temporary real estate signs as allowed in section 130-1917(3)c and political signs as allowed in section 130-1918(3)h.
- (21) Murals that serve to advertise or promote a business, service, product, activity, cause or event.
- (22) String of lights except to the extent allowed in section 130-1955(f).
- (23) Pole signs.
- (24) Signs attached to or made part of a fence.
- (25) Any sign not specifically defined and allowed by the provisions of this division.
(Code 1998, app. C, § 7.0214; Ord. No. 07-1548, § 7.0214, 5-3-2007; Ord. No. 10-2306, 8-5-2010)

Sec. 130-1923. Regulation of legally nonconforming signs.

- (a) *Definition.* The term "legally nonconforming sign" means:
 - (1) Any sign located within the parish which does not conform with the provisions of this division at the time the ordinance from which this division is derived becomes effective; or
 - (2) Any sign not yet constructed, but which has been granted a permit, at the time the ordinance from which this division is derived becomes effective.
- (b) *Loss of legally nonconforming status.* A legally nonconforming sign shall immediately lose its legally nonconforming designation if:
 - (1) The sign is altered in any way, which tends to make the sign less in compliance with the requirements of this division than it was before the alteration;
 - (2) The sign structure is relocated;
 - (3) The sign is abandoned for a period of 180 days or more;
 - (4) The sign is replaced with a sign face which differs in sign message (except for copy on a sign allowed as a changeable message sign);
 - (5) The building on the premises, on which the sign is situated, is no longer allowed under the provisions of article III of these regulations; or
 - (6) It is completely replaced, or if it is repaired or improved by any means to an extent of more than 30 percent of its replacement cost as determined by at least two independent bids from sign vendors at the time of repair or improvement.
- (c) *Compliance after loss of legally nonconforming status.* On the happening of any one of the events in section 130-1920(2), the sign shall be immediately brought into compliance with this division and a new permit secured thereof, or the sign shall be removed. In any event, the

following signs, which are not in compliance with this section upon the date of adoption of the ordinance from which this division is derived must be brought into compliance or removed as follows:

- (1) Signs on any public right-of-way which are not in compliance shall be removed and brought into compliance within 30 days after adoption of the ordinance from which this division is derived, except that entrance signs within a center median shall not be subject to this provision.
- (2) Moving signs or devices designed to attract attention, all or any part of which move by means of fluttering, spinning, etc., which are set in motion by movement of the atmosphere including such signs or devices as pennants, ribbons, streamers, spinners, propellers, or discs, must be removed within 90 days after adoption of the ordinance from which this division is derived.
- (3) Strings of light, except as permitted in section 130-1955(f), shall be removed within 90 days after adoption of the ordinance from which this division is derived.
- (4) Portable signs shall be removed within 90 days after adoption of the ordinance from which this division is derived.
- (5) Snipe signs or other signs attached, affixed, or otherwise located on poles, trees, shrubs or any living vegetative matter shall be removed within 30 days after adoption of the ordinance from which this division is derived.
- (6) Inflatable signs, except as permitted in section 130-1922, shall be removed within 30 days after adoption of the ordinance from which this division is derived.
- (7) Banners, except as permitted in section 130-1918, shall be removed within 30 days after adoption of the ordinance from which this division is derived.

(d) *Substituting panels in nonconforming multi-occupancy signs.* Any new tenant in a multi-occupancy building may substitute a panel in an existing nonconforming multi-occupancy sign without affecting the nonconforming status of the sign as long as the sign is not altered in any way which tends to make the sign less in compliance.

(e) *Maintenance and repair of legally nonconforming signs.* Nothing in this section shall relieve the owners or users of legally nonconforming signs or the owners of the property on which legally nonconforming signs are located from any provisions of this section regarding safety, maintenance and repair of signs; provided, however, that any repainting, cleaning or other normal maintenance or repair of the sign or sign structure does not materially alter or modify the sign.

(f) *Enlargement and alteration causing greater noncompliance.* No legally nonconforming sign may be enlarged or altered in a way which would increase its nonconformity with the provisions of this section.

(g) *Damage to legally nonconforming signs.* Should any legally nonconforming sign be damaged by any means to an extent of more than 30 percent of its replacement cost as determined by at least two independent bids from sign vendors at time of damage, it shall be removed and not reconstructed except in conformity with the provisions of this division.

(h) *Closed businesses.* Any business that has closed shall remove any on- or off-premises signs associated with the business within 60 days after the business is closed. The sign owner shall have the responsibility to remove such signs within the 60-day period.

(i) *Nonconforming signs do not prohibit other conforming signs.* The existence of a nonconforming sign on a single or multiple occupancy premises shall not prevent the erection or placement of another sign on such premises which meets the requirements of this division. (Code 1998, app. C, § 7.0215; Ord. No. 07-1548, § 7.0215, 5-3-2007)

Sec. 130-1924. Definitions for sign regulations.

The following definitions relate to the sign regulations contained in this division. These definitions are intended to also be set forth in section 130-5 simultaneously with the adoption of division or at a later date.

Abandoned off-premises sign means an off-premises sign which:

- (1) No longer correctly directs or exhorts any person;
- (2) Has fallen into disrepair or otherwise deteriorated as a result of a lack of maintenance, repair or upkeep; or
- (3) With regard to billboards, which carries no advertising message other than a message concerning its availability for lease or hire on its structure for any period of 180 consecutive days.

Abandoned on-premises sign means an on-premises sign which no longer correctly directs or exhorts any person, advertises a bona fide business, lessor, owner, entity, product, or actively conducted, or product available on the premises where such sign is displayed.

Activity means an economic unit designated in the classification system given in the 1987 Standard Industrial Classification (SIC) Manual published by the U.S. Department of Commerce, Office of Federal Statistical Policy and Standards.

Address sign means a sign which only conveys the numeric address of the premises on which it is located.

Architectural detail means any projection, relief, cornice, column, change of building material, window or door opening on any building.

Attached sign means any sign which is physically connected to and derives structural support from a building or building appurtenance.

Audible sign means any sign which is designed to or which does produce sound.

Awning means a cloth, plastic or nonstructural covering that either is permanently attached to a building or can be raised or retracted to a position against the building when not in use.

Banner means a sign composed of a logo or design on a lightweight material either enclosed or not enclosed in a rigid frame and secured or mounted to allow movement caused by the atmosphere.

Beacon means a strong or bright light focused or directed in one or more directions.

Bench sign means an advertising message on any portion of a bench or other nonmobile structure or device intended for public seating or convenience.

Changeable message sign means a sign on which the copy, message or sign panels may be, when specifically issued a permit as a changeable message sign, changed either electronically or manually in the field through the removal, replacement, or rearrangement of letters, symbols, blocks or panels designed for attachment to said sign.

Construction sign means a temporary sign erected and maintained by an architect, contractor, developer, financial institution, subcontractor or materials supplier upon premises for which said person or persons is presently furnishing labor, materials, services or capital financing.

Directory sign means an outdoor sign listing and identifying the occupants within shopping centers, industrial centers, retail centers, office centers, and other multi-use commercial or industrial sites.

Flags, banners and seals mean mottos, emblems, designs, shapes or symbols on cloth, plastic, canvas or devices of similar type and materials intended to convey any message or to identify any person, place, idea or thing other than duly adopted flags or seals of nations, states, parishes or municipalities.

Flashing lights means any light or light source or reflection of light source which is intermittent in duration, color or intensity or which creates or is designed to create an illusion of intermittency in duration, color or intensity.

Flashing sign means a light source which, in whole or in part, physically changes in light intensity or gives the appearance of such change at intervals of less than six seconds.

Freestanding sign means a sign supported by a sign structure secured in the ground and which is wholly independent of any guy wire, support wire, building, fence, vehicle or object other than the sign structure, for support.

Ground sign means a monument sign or a pole sign supported by a sign structure secured in the ground and which is wholly independent of any guy wire, support wire, building, fence, vehicle or object other than the sign structure, for support.

Home occupation sign means any on-premises sign advertising a home occupation.

Identification sign means a sign which is limited to the name, address, and/or number of a building or institution, person, or entity which is primary to the identification of the premises and to a general statement of the activity carried on in the building or institution.

Illuminated sign means any sign which has characters, letters, figures, designs or outlines illuminated by an interior or exterior light source which is primarily designed to illuminate such sign.

Individual letter sign means any sign made of self-contained letters that are mounted directly on the face of a building, a parapet, a roof edge of a building or on or below a marquee without being attached to a structure defined herein as a "sign face."

Inflatable sign means any sign dependent in whole or in part for its structural integrity on the infusion into said sign of compressed air or other fluids, and specifically including balloons larger than two feet in diameter or two feet square in area or other gas or liquid filled figures.

Laser means a device emitting a narrow, very intense beam of light waves that have been amplified and concentrated by stimulated atoms, or the light produced by such device.

Marquee sign means any sign attached to and made part of a marquee. The term "marquee" means a permanent roof-like structure projecting beyond a building wall at an entrance to a building or extending along and projecting beyond the building's wall and generally designed and constructed to provide protection against the weather. Signs painted or sewn onto awnings or canopies shall be considered marquee signs.

Monument sign means a freestanding ground sign:

- (1) Which is of monolithic construction in which the sign's base or support is of uniform composition with the material comprising the sign area of said sign and the base or support of said sign is directly affixed in or to the ground;
- (2) The sign face of which is encompassed on the top, sides and bottom by a border or column of the same or compatible material which border or column is not less than 12 inches wide and not more than 24 inches wide, and which border or column complements and enhances the aesthetic effect of the sign; and

A double-faced monument sign shall be made of back-to-back sides unless visibility of such sign is impeded in which case the two sides may form a V shape in which the interior angle does not exceed 45 degrees.

Moving message or changing image sign means any sign including public service signs designed to convey sign copy which changes in form or content with greater frequency than once an hour or which otherwise includes action or motion or the illusion of action or motion within its message or sign copy.

Multi-occupancy center means a single building or group of buildings situated in close proximity to each other that house more than one tenant or owner and whose parking facilities may be in common with other tenants, owner, or buildings, except those businesses which engage in the sale of automobile fuel products and other goods and services including, but not limited to, fast food restaurants and convenience stores.

Murals means a work of art painted or otherwise applied to an exterior wall surface.

Neon signs means any colored tubular lighting bent or formed into a design or lettering of which the primary source of light is gaseous. Anything within the boundary of the outline of the neon will be considered a part of the sign face.

Nonconforming sign means any sign structure or sign which was lawfully erected and maintained prior to such time as it came within the purview of this code or any amendments thereto and which fails to conform to all applicable regulations and restrictions of this code, or a nonconforming sign for which a special permit has been issued.

Off-premises sign means a sign that directs a person to a different premises or location than that on which the sign is located; which identifies advertised goods, products, or services not available on the premises on which the sign is located; or which conveys a nonadvertising idea or message; or identifies or advertises a business, person, firm or corporation not located on or occupying the premises where the sign is located; or which is not otherwise defined as an on-premises sign.

On-premises sign means a sign identifying or advertising a business, person, firm, corporation, activity, goal, product or service located or available on the premises where the sign is installed and maintained or which is displayed and maintained by the owner or occupant of the premises on which it is located.

Parapet sign means a sign extending above a roof line or which serves as a parapet.

Pole sign means a ground sign:

- (1) The structure of which consists of one or more vertical poles which are partially placed in the ground for stability, and which may have a horizontal pole at or near the top of a single vertical pole and which may be joined together by a horizontal pole;
- (2) The sign face or faces of which are attached to the vertical poles and/or horizontal pole and may be chained, cabled or attached to the vertical poles; and
- (3) The sign faces of which do not touch the ground and, therefore, leave an open space between the bottom of the sign face and the ground. A pole sign cannot be connected to or affixed to a building.

Political sign means any sign urging the election or defeat of any candidate seeking any political office, or urging the passage or defeat of any ballot measure, but not including any billboard owned or maintained by a commercial firm or advertising company when leased or used as a political sign.

Portable sign means any sign other than a trailer or vehicle sign that is not permanently affixed to a building, structure or the ground or a sign designed to be moved from place to place. These signs primarily include, but are not limited to: A frame or sandwich board signs, signs attached to wood or metal frames, and signs designed to be self-supporting and moveable.

Private directional signs means on-premises signs directing vehicular or pedestrian traffic movement into a premises or within premises.

Project sign means a temporary sign announcing a proposed land development or construction project.

Projected sign means a sign or visual image created by the projection of light onto a surface.

Projecting sign means any sign other than a wall sign affixed to any building or wall which sign has a leading edge extending 12 inches or more beyond such building or wall. Projecting signs are of two types:

- (1) *Fixed.* A sign, other than a wall sign, which extends outward 12 inches or more from the facade of any building and is rigidly affixed thereto.
- (2) *Swinging.* A sign projecting 12 inches or more from the outside wall or walls of any building which is supported by only one rigid support affixed thereto.

Public directional signs means signs which are either:

- (1) Signs permanently or temporarily erected in the public right-of-way or on public property with the approval of the parish council which denote the name or route to any educational institution, public building or facility, historic place, shrine, church, synagogue, hospital, library or similar facility or institution; or
- (2) Signs permanently or temporarily erected identifying a person or entity who has undertaken to plant or maintain landscaping of that portion of the right-of-way.

Public service sign means a sign the primary purpose of which is to provide information as a service to the general public such as time, temperature or the promotion or announcement of public events, or other events of a civic, philanthropic, charitable or religious purpose of general interest to the public.

Real estate sign means any temporary sign pertaining to the sale, lease or rental of land or buildings, which is erected or displayed on the lot or parcel to which it applies.

Resident identification sign means any on-premises sign limited in content to no more than the name of the premises, its municipal address and the names of the present occupant or occupants of the premises.

Revolving or rotating sign means any sign whose sign face is designed to move or turn on any axis.

Roof sign means any sign erected or painted upon, against or directly above a roof or on top of or above the parapet of a building.

Searchlight means strong or bright light with a reflector in a swivel so that its beam may be sent or directed in various directions.

Sign means a medium of communication, including its structure and component parts, which is used or intended to be used to attract attention to its subject matter or location usually for advertising purposes, including paint on the surface of a building. Each distinctive message painted or placed on a building or other structure shall be considered an individual sign.

Sign area means the square foot area enclosed within the perimeter of the sign face with each face contributing to the aggregate area of any sign. With respect to signs which are composed of individual symbols, letters, figures, illustrations, messages, forms, or panels, the sign area shall be defined as that area enclosed by one continuous line connecting the extreme points or edges of the advertising message. In cases where there is no definable simple geometric shape, the simplest geometric shape or rectangle enclosing the outer edges of the advertising message shall determine the sign area. In cases of backlighted awnings with advertising messages, the entire area of the awning shall be considered as the sign area.

Sign face means the part of the sign that is or can be used to identify, advertise, communicate, inform or convey a visual representation which attracts the attention of the public for any purpose. The term "sign face" includes any background material, panel, trim, frame, color and direct or self-illumination that differentiates the sign from the building, structure, backdrop surface or object upon which or against which it is placed. The sign structure shall not be included as a portion of the sign face provided that no message, symbol or any of the aforementioned sign face criteria are displayed on or designed as part of the sign structure, unless it is outlined in neon.

Sign height means the vertical distance from the finished grade to the highest point of either the sign or sign structure.

Sign message means the words or symbols on a sign face which convey a message to those viewing the sign.

Sign owner means that person who owns a sign and/or who is responsible for a sign. In those cases in which the sign owner cannot be determined; the owner of the premises upon which the sign is located shall be deemed the owner of the sign.

Sign premises means the contiguous land in the same ownership which is not divided by any highway, street, alley or right-of-way. For purposes of this division, a single premises:

- (1) May include more than one lot of record when such lots are devoted to a single unity of use; or
- (2) May consist of a separate structure on the same lot of record when, in the opinion of the department of planning and development, such separate structure appears to be a separate premises.

Sign structure means the supporting structure upon which a sign or sign face is fastened, attached or displayed or is intended to be fastened, attached or displayed; provided however, that the term "sign structure" does not include a building or fence.

Signable area means area which is free of architectural details on the facade of a building or part of a building in which an activity is located.

Snipe sign means a sign which is tacked, nailed, posted, pasted, glued or otherwise attached to poles, stakes, fences, or to other like objects.

Store front means the facade of a space in a building, regardless of the type use of the space, which space must have a direct entrance, by door, from the exterior of the building through the facade, and which facade must face a street or a parking lot for the building.

Street banner sign means any banner sign which is stretched across and hung over a public right-of-way.

String of lights means a string of electrical conductors containing two or more lights or light sockets.

Subdivision sign means a sign identifying the subdivision and denoting the entrance or exit to the subdivision.

Temporary sign means any sign, the display of which is limited by law, ordinance, or regulation and which advertises a situation or event that is designed, intended, or expected to occur and be completed within a reasonably short or definite period after the erection of such sign.

Trailer sign means any sign or sign structure attached to or composed in whole or in part of a trailer frame or chassis or skid or skid frame or body or of any materials which have ever previously constituted in whole or in part such a trailer, skid, frame, chassis or body.

Vehicle sign means any sign displayed on or from any mode of transportation, including but not limited to cars, buses, trucks/trailers, trains, boats or airplanes.

Wall sign means a sign other than a parapet sign which is painted on or which projects less than 12 inches from the wall of a building, and is painted on, attached to or erected against any exterior wall or window of a building or structure with the exposed face of the sign being in a plane parallel to the plane of said wall or window and not extending above the building.

Window sign means any sign which is painted on, applied to, attached to or projected upon the exterior or interior of a building glass area, including doors, or located within one foot of the interior of a building glass area, including doors, whose identification, message, symbol, insignia, visual representation, logo type or any other form which communicates information, can be perceived from any off-premises contiguous property or public right-of-way.
(Code 1998, app. C, § 7.0216; Ord. No. 07-1548, § 7.0216, 5-3-2007)

Secs. 130-1925—130-1946. Reserved.

DIVISION 4. OUTDOOR LIGHTING REGULATIONS

Sec. 130-1947. Statement of need and purpose.

Good outdoor lighting at night benefits everyone. It increases safety, enhances the parish's nighttime character, and helps provide security. New lighting technologies have produced lights that are extremely powerful, and these types of lights may be improperly installed so that they create problems of excessive glare, light trespass, and higher energy use. Excessive glare can be annoying and may cause safety problems. Light trespass reduces everyone's privacy, and higher energy use results in increased costs for everyone. Appropriately regulated, and properly installed, outdoor lighting will contribute to the safety and welfare of the residents of the parish. This division is intended to eliminate problems of glare, minimize light trespass, and help reduce the energy and financial costs of outdoor lighting, by establishing regulations which limit the area that certain kinds of outdoor lighting fixtures can illuminate, and by limiting the total allowable illumination of property located in the parish. Luminaires on all properties, in all zoning districts, shall be installed to keep unnecessary direct light from shining onto abutting properties or streets.

(Code 1998, app. C, § 7.0301; Ord. No. 07-1548, § 7.0301, 5-3-2007)

Sec. 130-1948. Applicability; permits; variances; waivers; appeals.

(a) *Applicability.* All public and private outdoor lighting installed in the parish shall be in conformance with the requirements set forth in this division.

(b) *Permit requirements.*

- (1) *Submission contents.* Application for outdoor lighting permits shall be made to the department of planning and development. The applicant for any electrical permit required by any provision of the laws of this jurisdiction in connection with proposed

work, other than single-family residential, involving outdoor lighting fixtures shall submit (as part of the application for permit) evidence that the proposed work will comply with this division. The submission shall contain but shall not necessarily be limited to the following, all or part of which may be part or in addition to the information required elsewhere in the laws of this jurisdiction upon application for the required permit:

- a. Plans indicating the location on the premises, and the type of illuminating devices, fixtures, lamps, supports, reflectors, and other devices.
 - b. Description of the illuminating devices, fixtures, lamps, supports, reflectors, and other devices and the description may include, but is not limited to, catalog cuts by manufacturers and drawings (including sections where required).
 - c. Photometric data, such as that furnished by manufacturers, or similar showing the angle of cut off or light emissions.
- (2) *Additional submission.* Should additional data be required by the planning and development department for issuance of a permit, it shall be incumbent upon the applicant to provide such material.
- (3) *Lamp or fixture substitution.* Should any outdoor light fixture, or the type of light source therein, be changed after the permit has been issued, a change request must be submitted to the building official for his approval, together with adequate information to ensure compliance with this division, which must be received prior to substitution.

(c) *Variances by board of zoning adjustments.* If the application for a lighting permit shows that all requirements of this division are complied with, the director of planning and development shall issue a permit without the necessity of any public hearing before the zoning commission or any other public body. If the application for the permit is denied, the applicant may, subject to the provisions of subsection (d) of this section, seek a variance from the board of zoning adjustments pursuant to the provisions of article II of these regulations. Appeals from the board of adjustments shall be made to the district court for the parish as provided in article II of these regulations.

(d) *Criteria for variances and waivers.* Pursuant to subsection (c) of this section, the board of zoning adjustments may grant variances from the lighting regulations of this division. Such variances and waivers may be granted to diminish lighting regulation requirements when one or more of the following exists: unusual design of building or structures, unusual effect of the lighting requirements on the structures to be placed on the lot, extraordinarily burdensome result if lighting regulations are not modified, and any other problem or matter that affects the development of the property or the buildings and structures thereon which the board of zoning adjustments determines to be in the public interest to consider; provided that variances and

waivers shall not be based solely on cost or economic consideration. Furthermore, the board of zoning adjustments may grant variances from the provisions of this division due to any hardships or other matters that are a proper basis for a variance.
(Code 1998, app. C, § 7.0302; Ord. No. 07-1548, § 7.0302, 5-3-2007)

Sec. 130-1949. Luminaire design requirements.

(a) *Applicability to uses other than single-family residential.* The provisions of this section shall apply to all uses except single-family residential. Single-family residential uses shall be governed by the provisions of section 130-1951.

(b) *Luminaire design.* Any luminaire with a lamp or lamps rated at an average of more than 3,000 lumens shall be either:

- (1) Full cut-off type fixture with a single plane lens; or
- (2) Fully-shielded fixture.

(c) *Luminaire height.*

- (1) Any luminaire with a lamp or lamps rated at an average of less than 3,000 lumens may be mounted at any height.
- (2) Any luminaire with a lamp or lamps rated an average of more than 3,000 lumens may be mounted up to a height of 35 feet in accordance with the following:

<i>Full Cutoffs with Height Fixture</i>	<i>Single-Plane Lens</i>	<i>Fully Shield</i>
0—25 feet	Acceptable	Shield even with LDLEP
>25—30 feet	Acceptable	Shield 1 inch below LDLEP
>30—35 feet	Acceptable	Shield 2 inches below LPLED

(d) *Luminaire foot-candles.* Total foot-candles measured from three feet above ground level with the measuring instrument held in the horizontal plane shall be in accordance with the following standards:

<i>Maximum Foot-Candle</i>	
<i>Entrances</i>	
Active (pedestrian and/or conveyance)	5
Inactive (normally locked, infrequently used)	1
<i>Building exteriors:</i>	
Vital locations or structures	5
Building surrounds	1
Floodlit buildings and monuments	10
Loading and unloading platforms	20
Automated teller machines	20

	<i>Maximum Foot-Candle</i>
<i>Service stations:</i>	
Approach	1.5
Driveway	1.5
Pump island	20
Service areas	3
<i>Storage yards:</i>	
Active	20
Inactive	1
Retail outdoor lighting	10

(Code 1998, app. C, § 7.0303; Ord. No. 07-1548, § 7.0303, 5-3-2007)

Sec. 130-1950. Lamps that emit 3,000 lumens.

The following rated lamp wattages shall be deemed to emit 3,000 lumens unless the department of planning and development determines, based upon information provided by a lamp manufacturer, that the rated wattage of a lamp emits either more or less than 3,000 lumens:

- (1) Incandescent lamp: 160 or more watts.
- (2) Quartz halogen lamp: 160 or more watts.
- (3) Florescent lamp: 35 or more watts.
- (4) Mercury vapor lamp: 75 or more watts.
- (5) Metal halide lamp: 40 or more watts.
- (6) High pressure sodium lamp: 45 or more watts.
- (7) Low pressure sodium lamp: 25 or more watts.

(Code 1998, app. C, § 7.0304; Ord. No. 07-1548, § 7.0304, 5-3-2007)

Sec. 130-1951. Single-family residential applications.

(a) *Less than 3,000 lumens.* Exterior lighting less than 3,000 lumens including spotlights and floodlights shall be set such that the centerline of the beam or lamp does not exceed 35 degrees from vertical.

(b) *Greater than 3,000 lumens.* All luminaires greater than 3,000 lumens shall conform to the provisions of section 130-1949(b) and (c).

(Code 1998, app. C, § 7.0305; Ord. No. 07-1548, § 7.0305, 5-3-2007)

Sec. 130-1952. Exceptions to luminaire design requirements.

(a) *Luminaire redirection.* Any luminaire with a lamp or lamps rated at 3,000 lumens or less may be used without restriction to light distribution or mounting height, except that no spot or flood luminaire rated 3,000 lumens or less may be aimed, directed, or focused such as to cause direct light from the luminaire to be directed toward residential buildings on adjacent or nearby land, or to create glare perceptible to persons operating motor vehicles on public ways.

(b) *Police or fire departments or other emergency services.* All temporary emergency lighting need by the police or fire departments or other emergency services, as well as all vehicular luminaires, shall be exempt from the requirements of this division.

(c) *Federal regulatory agencies.* All hazard warning luminaires required by federal regulatory agencies are exempt from the requirements of this division, except that all luminaires used must be red and must be shown to be as close as possible to the federally required minimum lumen output requirement for the specific task.

(d) *Flags.* Up-lighting for national, state or foreign nation flags located on poles independent of other structures are exempt from the requirements of this division.

(e) *Trees.* Up-lighting or down-lighting of trees is exempt from the requirements of this division except that the maximum amount of lumens for such lighting shall be 3,000 lumens per fixture.

(f) *Sensor security lighting.* Security lighting controlled by sensors which provides illumination for five minutes or less is exempt from the requirements of this division.

(g) *Street lighting.* Both public and private street lights are exempt from the requirements of this division if they were in existence at the time the ordinance from which this division is derived becomes effective or if a permit or other approval has been granted for these lights at the time the ordinance from which this division is derived becomes effective.

(h) *Church steeples.* Up-lighting of church steeples is permitted as long as said lighting is fully shielded.

(Code 1998, app. C, § 7.0306; Ord. No. 07-1548, § 7.0306, 5-3-2007)

Sec. 130-1953. Outdoor advertising signs.

(a) *Top-mounted fixtures.* Top-mounted fixtures are required. Lighting fixtures used to illuminate an outdoor advertising sign shall be mounted on the top of the sign structure. All such fixtures shall comply with the shielding requirements of this division with the exception of the portion of the luminaire parallel with the sign, provided this portion does not allow any light dispersion or direct glare to shine above a 90-degree horizontal plane.

(b) *Translucent outdoor advertising signs.* Outdoor advertising signs of the type constructed of translucent materials and wholly illuminated from within do not require shielding. Dark backgrounds with light lettering or symbols are required.

(c) *Prohibitions.* Electrical illumination of outdoor advertising off-site signs, other than those located adjacent to interstate highways, between the hours of 11:00 p.m. and sunrise is prohibited.

(d) *Compliance limit.* The lighting for existing outdoor advertising structures shall be brought into conformance with this section no later than January 1, 2006.

(Code 1998, app. C, § 7.0307; Ord. No. 07-1548, § 7.0307, 5-3-2007)

Sec. 130-1954. Recreational facilities (public and private).

Recreational field lighting, public or private, such as, football fields, soccer fields, baseball fields, and softball fields, shall be exempt from the height requirement of 35 feet and total lumen output provided all of the following conditions are met:

- (1) *Parking lots and areas surrounding facility.* Lighting for parking lots and other areas surrounding the playing field, court, or track shall comply with the lighting requirements as defined in this division.
- (2) *Shielding.* All fixtures used for event lighting shall be fully shielded or be designed or provided with sharp cut-off capability, so as to minimize up-light, spill-light, and glare.
- (3) *Time of holding events.* All events shall be scheduled so as to commence before 9:00 p.m., but under no circumstances shall any illumination of the playing field, court, or track be permitted after 11:00 p.m.

(Code 1998, app. C, § 7.0308; Ord. No. 07-1548, § 7.0308, 5-3-2007)

Sec. 130-1955. Prohibitions.

(a) *Laser source light.* The use of laser source light or any similar high intensity light for outdoor advertising or entertainment is prohibited.

(b) *Searchlights.* The operation of searchlights is prohibited except for grand openings and special events for a period not to exceed two days and no more than twice per calendar year. Such use shall not be located within 500 feet of a residential area and shall not be allowed between the hours of 11:00 p.m. and sunrise.

(c) *Outdoor advertising off-site signs.* Electrical illumination of outdoor advertising off-site signs, other than those located adjacent to Interstate Highways, is prohibited between the hours of 11:00 p.m. and sunrise.

(d) *Commercial landscape lighting.* Commercial landscape lighting may not be directed above the horizontal plane.

(e) *Neon lighting*. Neon lighting is prohibited except as provided for regarding signs in, division 3 of this article.

(f) *Strings of lights (nonresidential uses)*. Strings of lights are prohibited except from Thanksgiving Day until January 10. Strings of lights shall include, but not be limited to, lights strung around trees and lights that simulate icicles.

(Code 1998, app. C, § 7.0309; Ord. No. 07-1548, § 7.0309, 5-3-2007)

Sec. 130-1956. Temporary outdoor lighting.

Any temporary outdoor lighting that conforms to the requirements of this section shall be allowed. Nonconforming temporary outdoor lighting may be permitted by an administrative permit granted by the planning and development department after considering:

- (1) The public and/or private benefits that will result from the temporary lighting;
- (2) Any annoyance or safety problems that may result from the use of the temporary lighting; and
- (3) The duration of the temporary nonconforming lighting. The applicant shall submit a detailed description of the proposed temporary nonconforming lighting to the department of planning and development.

(Code 1998, app. C, § 7.0310; Ord. No. 07-1548, § 7.0310, 5-3-2007)

Sec. 130-1957. Regulation of nonconforming luminaires.

(a) *Definition of legally nonconforming luminaires*. The term "legally nonconforming luminaires" means:

- (1) Any luminaire located within the parish which does not conform with the provisions of this division at the time the ordinance from which this division is derived becomes effective; or
- (2) Any luminaire not yet constructed, but which has been granted a permit through the granting of a building permit or other approval, at the time the ordinance from which this division is derived becomes effective.

(b) *Continued existence of legally nonconforming luminaires*. Legally nonconforming luminaires may continue in existence or may be constructed as provided for in subsection (a)(2) of this section, but such luminaires shall lose their legally nonconforming status and shall be amortized and removed or brought into compliance as set forth in subsections (c) and (d) of this section.

(c) *Amortization of nonconforming luminaires.* The rules with respect to amortization of legally nonconforming luminaires are as follows:

- (1) Pole-mounted legally nonconforming luminaires for single-family residences must be brought into compliance when the fixture is changed or repaired or by January 1, 2020, whichever occurs sooner.
- (2) Pole-mounted legally nonconforming luminaires for agricultural uses must be brought into compliance when the fixture is changed or repaired or by January 1, 2020, whichever occurs sooner.
- (3) Except as provided in subsections (c)(1) and (2), and (d) of this section, any other legal nonconforming luminaires shall be brought into compliance as follows:
 - a. Any nonconforming luminaire which has a height of less than 35 feet shall be brought into compliance by January 1, 2006, which is hereby established as the amortization period for such nonconforming luminaires.
 - b. Any nonconforming luminaire which has a height of 35 feet or over shall be fully shielded three inches below LDLEP by January 1, 2006, which is hereby established as the amortization period for such nonconforming luminaires.

(d) *Nonconforming luminaires causing disability glare.* Nonconforming luminaires that direct light toward streets or parking lots that cause disability glare to motorists or cyclists should be either shielded or re-directed within 90 days of notification by the parish, so that the luminaires do not cause a potential hazard to motorists or cyclists.

(Code 1998, app. C, § 7.0311; Ord. No. 07-1548, § 7.0311, 5-3-2007)

Sec. 130-1958. Definitions for outdoor lighting regulations.

The following definitions relate to the outdoor lighting regulations contained in division 4 of this article. These definitions are intended to also be set forth in section 10 simultaneously with the adoption of division 4 of this article or at a later date.

Direct light means light emitted directly from the lamp, off of the reflector or reflector diffuser, or through the refractor or diffuser lens, of a luminaire.

Disability glare means glare resulting in reduced visual performance and visibility. It is often accompanied by discomfort.

Fixture means the assembly that houses the lamp or lamps and can include all or some of the following parts: a housing, a mounting bracket or pole socket, a lamp holder, a ballast, a reflector or mirror, and/or a refractor or lens.

Floodlight or *spotlight* means any light fixture or lamp that incorporates a reflector or a refractor to concentrate the light output into a directed beam in a particular direction.

Foot-candle means a unit of measure for illuminance; a unit of illuminance on a surface that is everywhere one foot from a uniform point source of light of one candle and equal to one lumen per square foot.

Full cut-off type fixture means a luminaire or light fixture that, by design of the housing, does not allow any light dispersion or direct glare to shine above a 90-degree, horizontal plane from the base of the fixture and that is installed in a vertical position to prevent disability glare.

Fully shielded fixture means a luminaire or fixture constructed in such a manner that an opaque shield extends, on the top and all sides, below the lowest direct-light-emitting part (LDLEP) of the luminaire. The lowest edge of such a shield shall surround the LDLEP and be level with the horizontal plane, regardless of the orientation of the luminaire or fixture.

Glare means light emitting from a luminaire with an intensity great enough to reduce a viewer's ability to see, and in extreme cases causing momentary blindness.

Height of luminaire means the height of a luminaire shall be the vertical distance from the normal finished grade directly below the centerline of the luminaire to the lowest direct-light-emitting part of the luminaire.

Horizontal illuminance means the measurement of brightness from a light source, usually measured in foot-candles or lumens, which is taken through a light meter's sensor at a horizontal position.

Indirect light means direct light that has been reflected or has scattered off of other surfaces.

Lamp means the component of a luminaire that produces the actual light.

Light trespass means the shining of light produced by a luminaire beyond the boundaries of the property on which it is located.

Lowest direct-light-emitting part (LDLEP) means the lowest part of either the lamp or lamps, the reflector or mirror, and/or refractor or lens.

Lumen means a unit of luminous flux. One foot-candle is one lumen per square foot. For the purposes of this section, the lumen-output values shall be the initial lumen output ratings of a lamp.

Luminaire means a complete lighting system, and includes a lamp or lamps and a fixture.

Neon lighting means any tubular lighting of which the primary source of light is gaseous.

Outdoor lighting means the night-time illumination of an outside area or object by any manmade device located outdoors that produces light by any means.

Single-plane lens means a refractor or lens, mounted in the horizontal plane, which by design, allows direct light to be emitted only through the horizontal plane.

Temporary outdoor lighting means the specific illumination of an outside area or object by any manmade device located outdoors that produces light by any means for a period of less than 45 days, with at least 180 days passing before being used again.

Uplighting means any light source that distributes illumination above a 90-degree horizontal plane.

(Code 1998, app. C, § 7.0312; Ord. No. 07-1548, § 7.0312, 5-3-2007)

Secs. 130-1959—130-1984. Reserved.

DIVISION 5. YARDS AND OPEN SPACE

Sec. 130-1985. General regulations.

- (a) Every part of a required yard area shall be open to the sky except as follows:
 - (1) Where accessory buildings are specifically permitted in a rear or side yard under these regulations.
 - (2) A roof, gutter, eave, fixed awning, marquee or canopy, attached to a building but having no other support, may project no more than five feet into a required front, side or rear yard, if a minimum distance of two feet remains open to the sky between the farthest projection and the lot lines.
 - (3) Notwithstanding the foregoing, a canopy or marquee shall be permitted to extend from the entrance door of any church, school, college, hospital, sanitarium, public building, or educational, religious, or philanthropic institution in any district, or from the entrance door of any main building in multiple-family residential, commercial, or industrial district. Where a sidewalk and curb exist, the canopy or marquee may extend to within 18 inches of the curb line. Such canopies or marquees shall not exceed 15 feet in width or 12 feet in height or be screened or enclosed in any manner and shall provide an unobstructed, clear space between the grade and the bottom of the valance of at least seven feet.
 - (4) Movable awnings may be placed over doors or windows in any required yard, but such awnings shall not project closer than two feet to any lot line or be vertically supported.

(b) Where these regulations refer to side streets for corner lots, the side street will normally be the street along which the corner lot has its largest dimensions, but the director of planning and development may be guided by the pattern of development in the vicinity of the lot in question in determining which of the two streets shall be considered the side street.

(c) More than one main building may be located upon a zoning lot or tract in the following instances:

- (1) Institutional buildings.

- (2) Public or semi-public buildings.
- (3) Multiple-family dwellings.
- (4) Commercial or industrial buildings.
- (5) Homes for the aged, nursing homes, convalescent homes, and orphans homes.

The provisions of this exception shall not be construed to allow the location or erection of any main building or portion of a main building outside of the buildable area of lot except as otherwise provided.

(d) In the event that a lot is to be occupied by a group of two or more related buildings to be used for residential purposes, there may be more than one main building on the lot when such buildings are arranged around a court; provided, that said court between buildings that are parallel or within 45 degrees of being parallel, shall have a minimum width of 30 feet for one-story buildings, 40 feet for two-story buildings, and 50 feet for buildings of three stories or more, and in no case, may such buildings be closer to each other than 15 feet.

(e) Where a court is more than 50 percent surrounded by a building, the minimum width of the court shall be at least 15 feet for one-story buildings, 40 feet for two-story buildings, and 50 feet for three story buildings. The width of such a court shall be increased by three feet for each additional story over three stories or each ten feet of height over 35 feet, whichever requires the greater width of court.

(Code 1998, app. C, § 7.0401; Ord. No. 07-1548, § 7.0401, 5-3-2007)

Sec. 130-1986. Front yards.

(a) Where a right-of-way has been established by the parish council for the future widening or opening of a street upon which a lot abuts, then the depth of a front or side yard shall be measured from such official line to the building line.

(b) Except as otherwise provided in these regulations, on through lots, the required front yard shall be provided on each street.

(c) Where a lot is located at the intersection of two or more streets, there shall be a yard of ten feet on the side street; provided however, that said front yard on the side street need not exceed the average front yard established by other buildings in the block which fronts on the side street.

(d) Open, unenclosed porches, raised platforms or raised paved terraces not covered by a roof or canopy, and which do not extend above the level of the first floor of a building, or a maximum of five feet above grade, may extend or project into the front or side yard not more than six feet.

(Code 1998, app. C, § 7.0402; Ord. No. 07-1548, § 7.0402, 5-3-2007)

Sec. 130-1987. Side yards.

(a) For the purpose of the side yard and lot frontage regulations, a two-family, three-family, or four-family dwelling, a group of townhouses, a multiple-family dwelling, electric substation, telephone exchanges, or telephone repeater structures for public utility purposes shall be considered as one building occupying one lot.

(b) Where a side yard is not required, but is provided, such yard shall not be less than three feet in width paralleling the side lot line.

(Code 1998, app. C, § 7.0403; Ord. No. 07-1548, § 7.0403, 5-3-2007)

Sec. 130-1988. Rear yards.

(a) Open or lattice-enclosed fire escapes, fireproof outside stairways, and balconies opening upon fire towers, and the ordinary projections of chimneys and flues into the rear yard are permitted for a distance of not more than five feet.

(b) Where a rear yard is not required, but is provided, such yard shall not be less than three feet in width paralleling the rear lot line.

(Code 1998, app. C, § 7.0404; Ord. No. 07-1548, § 7.0404, 5-3-2007)

Secs. 130-1989—130-2014. Reserved.

DIVISION 6. SIGHT DISTANCE LINES, FENCES, WALLS AND HEDGES

Sec. 130-2015. Sight triangle; obstructions; landscaping.

(a) *Sight triangle at intersections of two public streets.* A sight triangle is, on any corner lot, a triangle formed by measuring from the point of intersection of the front and exterior side lot lines a distance of 25 feet along said front and side lot lines and connecting the points so established to form a sight triangle on the area of the lot adjacent to the street intersections.

Sight Triangle

(b) *Sight triangle at the intersection of a public street and a private accessway.* Except for single-family residential accessways, the sight triangle shall have sides of 15 feet along the accessway and 25 feet along the public street.

Sight Triangles

Public Street

(c) *Sight obstructions.* No parking, wall, fence, sign, structure or any plant growth other than grasses shall be placed or maintained within the sight distance area so as not to impede vision between a height of 2½ feet and ten feet above the centerline grades of the intersecting streets and/or drives.

(d) *Landscape materials.* No plant materials except grass or ground cover shall not be located closer than three feet from the edge of any accessway pavement.
(Code 1998, app. C, § 7.0501; Ord. No. 07-1548, § 7.0501, 5-3-2007)

Sec. 130-2016. Fences, walls and hedges.

(a) Notwithstanding other provisions of these regulations, fences, walls or hedges may be located along property lines and within required yards, providing no fence, wall or hedge may be located around or in a required front and side yard within 20 feet of an intersection.

(b) Unless otherwise specifically provided for, fences must be constructed and maintained in accordance to the following regulations:

- (1) Barbed wire shall be prohibited in residential districts of less than five acres. In all cases barbed wire shall not project beyond the property line.
- (2) Fencing may consist of site obscuring materials such as masonry, wood, glass, metal, fabric and plastic. However, none of these materials shall be utilized in a fashion as to cause bodily harm and injury to the general public.

(Code 1998, app. C, § 7.0502; Ord. No. 07-1548, § 7.0502, 5-3-2007)

Secs. 130-2017—130-2040. Reserved.

DIVISION 7. ACCESSORY BUILDINGS AND STRUCTURES

Sec. 130-2041. Accessory building standards.

(a) Any accessory building may be built in a required rear yard. However, an accessory building must be located at least 40 feet from the front lot line, ten feet from an interior rear lot line, ten feet from the nearest interior side lot line and 15 feet from the nearest side street lot line. On through lots, an accessory building must be located at least 40 feet from the designated rear lot line.

(b) Accessory buildings placed on buildable lots of record, or any accessory building under 100 square feet in area, must be located at least 25 feet from the front lot line, five feet from an interior rear lot line, five feet from the nearest interior side lot line and ten feet from the nearest side street lot line. On through lots, an accessory building must be located at least 25 feet from the designated rear lot line.

(c) The size of any accessory buildings shall not exceed 7½ percent of the area of the lot on which the main building is situated.

(d) Accessory buildings or structures permitted in a required rear yard by these regulations shall not be higher than the peak of the roof of the principal building in residentially zoned districts. However, in any case, an accessory building or structure in a residentially zoned district cannot exceed 20 feet in height.

(e) No accessory building may be located in a required front yard. Fences, signs, lighting, paved driveways and other accessory structures may be located in required front yards, subject to meeting parish site triangle requirements, when applicable.

(f) In all single-family residential districts, no accessory buildings or structures, greater than 100 square feet in combined gross area, shall be constructed prior to construction of the primary structure.

(g) The combined length of an accessory structure shall not exceed 50 feet in all residential districts.

(h) The previous provisions notwithstanding, for property zoned A-4 and A-4A, accessory buildings with a size of less than five percent of the area of the lot on which the main building is situated may be located five feet from the nearest interior side lot line, provided the building length does not exceed 30 feet, the building height does not exceed 19 feet and the remaining requirements of this subsection are met.

(i) Agricultural buildings are permitted on lots with a minimum of one acre of land. There are no size limitations for an agricultural building, with the exception of the standard 7½ percent maximum building coverage for nonresidential structures.

(Code 1998, app. C, § 7.0601; Ord. No. 07-1548, § 7.0601, 5-3-2007)

Sec. 130-2042. Boat houses and boat slips.

The following regulations shall apply to accessory boat houses and boat slips in residential districts:

- (1) A boat house may not be used as a dwelling, guest house, or servants' quarters unless specifically permitted by other sections of this chapter.
- (2) The height of a boat house shall not exceed 20 feet as measured from the required lot elevation.
- (3) No boat house shall exceed 1,600 square feet, except that any boat house constructed on a state-designated scenic river shall not exceed a size of 800 square feet.
- (4) Boat houses and boat slips, together with other accessory buildings, may occupy no more than 50 percent of the required rear yard.
- (5) Bulkheads, pilings, breakwaters and other similar structures shall not be located beyond the established shoreline and shall conform to all standards established by applicable regulatory agencies.
- (6) Piers, docks, and other similar structures shall be located by and shall conform to all standards established by applicable regulatory agencies.
- (7) Prior to issuance of any building permit under this section, all applicants shall file a copy of all permits required by the state and the federal government for development of properties affecting natural and scenic rivers.

(Code 1998, app. C, § 7.0602; Ord. No. 07-1548, § 7.0602, 5-3-2007; Ord. No. 14-3204, 10-2-2014; Ord. No. 15-3297, 4-2-2015)

Secs. 130-2043—130-2062. Reserved.

DIVISION 8. OFF-STREET PARKING AND LOADING REGULATIONS

Sec. 130-2063. Purpose.

The purpose of this division is to properly regulate the number of required off-street parking spaces so as to provide for the needs of occupants, customers, visitors or others involved in use or occupancy of any building, structural improvement or place of assembly plus eliminating undue use of the surface street system for parking purposes; to promote and protect the public health, safety, comfort, convenience and general welfare of the people; and to define the powers and duties of the administrative officers responsible for the regulation of this section.

(Code 1998, app. C, § 7.0701; Ord. No. 07-1548, § 7.0701, 5-3-2007; Ord. No. 09-2171, 12-3-2009)

Sec. 130-2064. General requirements.

(a) Off-street parking and loading facilities required by these regulations for residential uses shall be provided on the same lot premises with such structure or land use. Off-street parking and loading spaces required for structures or land uses on two or more adjoining lots may be provided in a single common facility on one or more of said lots; if said lots are owned in common, or are subject to recorded covenants or easement agreements for parking.

(b) For nonresidential uses, all parking spaces required in these regulations may be located on the same lot with the building or use served or within 100 feet of the main building. Where the required parking is not located on the same lot with the building or use served, or where such spaces are collectively or jointly provided and used, such parking space shall be established by a recorded covenant or agreement as parking space to be used in conjunction with the principal use. Parking shall be reserved as such through an encumbrance on the title of the property to be designated as required parking space. This encumbrance is to be valid for the total period the use or uses for which the parking is needed exists. Such agreement or covenant shall be duly recorded in the office of the clerk of court and certificate furnished to the director of planning and development.

(c) Parking and loading facilities as required herein shall be provided for any increase in intensity of use when the intensity or use of any building, structure or premises is increased through an increase in any of the following measures:

- (1) Additional dwelling units;
- (2) Gross floor area;
- (3) Seating capacity; or
- (4) Other common units of measurements.

(d) Whenever the existing use of a building or structure is changed to a new use, parking or loading facilities shall be required as provided for such use. However, if the building or structure was erected prior to the effective date of the ordinance from which these regulations are derived, additional parking or loading facilities are mandatory only in the amount by which the requirements of the new use would exceed those for the existing use.

(e) The approval of the department of planning and development is required for all parking lots over ten spaces to ensure compliance with the parking section of these regulations. The arrangement, character, extent, width, grade and location of all parking areas shall be considered in relation to the following:

- (1) Existing and planned streets.
- (2) Reasonable circulation for traffic within and adjacent to parking areas.
- (3) Topographical conditions.
- (4) Runoff of stormwater.
- (5) Public convenience and safety in relation to the proposed uses to be served.
- (6) Any structures, uses or premises changed, converted or partially altered or enlarged shall conform to all current parking regulations.

(f) In no case shall dedicated public rights-of-way be used to provide facilities required by these regulations.

(g) At least one handicapped parking stall shall be provided in all off-street parking areas larger than 15 spaces. Additional handicapped parking shall be provided as required by the state fire marshal's office. If the state fire marshal does not require said handicapped stalls, the parish will require such stalls as follows: One handicapped stall per 100 standard stalls. Handicapped parking stalls shall be at least 12 feet by 20 feet for 90-degree parking and shall be proportionally larger at other angles. All stalls shall be appropriately marked and signed, be located in close proximity to the principal building and shall offer barrier-free access to the principal building. The designation of handicapped parking stalls shall constitute consent by the property owner to the enforcement of the restriction of such spaces to handicapped motorists by the parish.

(h) When determination of the number of off-street parking spaces required by these regulations results in a requirement of a fractional space, any fraction of one-half or less may be disregarded, while a fraction in excess of one-half shall be counted as one parking space.

(i) Off-street parking facilities for separate uses may be provided collectively. However, total number of spaces must not be less than the sum of the separate requirements for each such use and provided that all regulations governing location of accessory parking spaces in relation to the use served are adhered to.

(j) The use of any required parking space for storage of any motor vehicle for sale, or for any other purpose other than the parking of motor vehicles, is prohibited.

(k) All on-street parking is prohibited.
(Code 1998, app. C, § 7.0702; Ord. No. 07-1548, § 7.0702, 5-3-2007; Ord. No. 09-2171, 12-3-2009)

Sec. 130-2065. Design standards.

(a) The following minimum design standards shall be observed in laying out off-street parking facilities:

<i>a</i>	<i>b</i>	<i>c</i>	<i>d</i>	<i>e</i>	<i>f</i>	<i>g</i>
<i>Parking Angle</i>	<i>Stall Width</i>	<i>Isle to Curb</i>	<i>Aisle Width</i>	<i>Stall Length</i>	<i>Curb to Curb</i>	<i>Overlap to Curb</i>
0°—15°	9 ft.	9 ft.	12 ft.	23 ft.	30'/38'6"	0'/30'0"
16°—37°	9 ft.	16'9"	11 ft.	18 ft.	44'6"	36'8"
38°—57°	9 ft.	19'7"	13 ft.	18 ft.	52'2"	46'4"
58°—74°	9 ft.	20'0"	18 ft.	18 ft.	58'	55'0"
75°—90°	9 ft.	18'0"	22 ft.	18 ft.	58'	58'0"

(b) Off-street parking facilities shall be drained to eliminate standing water and prevent damage to abutting property and/or public streets and alleys. Off-street parking areas shall be maintained in a clean, orderly and dust-free condition at the expense of the owner or lessee and not used for the sale, repair, or dismantling or servicing of any vehicles, equipment, materials or supplies.

(c) Off-street parking spaces shall be separated from walkways, sidewalks, streets, or alleys by a wall, fence or curbing or other approved protective device, or by distance so that vehicles cannot protrude over publicly owned areas.

(d) Location and design of entrances and exits shall be in accordance with the requirements of applicable parish traffic regulations and standards. Landscaping, curbing or approved barriers shall be provided along lot boundaries to control entrance and exit of vehicles or pedestrians.

(e) Interior drives shall be of adequate width to serve a particular design arrangement of parking spaces.

(f) Parking spaces in lots of more than ten spaces shall be marked by painted lines or curbs or other means to indicate individual spaces. Signs or markers shall be used as necessary to ensure efficient traffic operation of the lot.

(g) Adequate lighting shall be provided if off-street parking spaces are to be used at night. The lighting shall be arranged to eliminate glare on residential property by location of light fixtures or use of fixtures designed to eliminate direct view of luminaries in fixtures from residential property in accordance with article VI, division 4 of these regulations.

(h) When surface off-street parking areas for ten or more automobiles are located closer than 50 feet to a lot in a residential district, or to any lot upon which there is a dwelling as a permitted use under these regulations, and where such parking areas are not entirely screened visually from such lot by an intervening building or structure, there shall be provided along the lot line a continuous visual screen with a minimum height of six feet. Such screen may consist of a compact evergreen hedge or foliage screening or a louvered wall or fence.

(Code 1998, app. C, § 7.0703; Ord. No. 07-1548, § 7.0703, 5-3-2007; Ord. No. 09-2171, 12-3-2009)

Sec. 130-2066. Minimum parking requirements.

The following table shall apply to minimum off-street parking space requirements:

<i>Zoning District Classification or Use</i>	<i>Minimum Off-Street Parking Space Requirement</i>
<i>Residential Single-Family:</i>	
Single- and two-family residential	2.0 per dwelling unit
Single-family attached	2.0 per dwelling unit
<i>Residential Multifamily:</i>	

<i>Zoning District Classification or Use</i>	<i>Minimum Off-Street Parking Space Requirement</i>
Multifamily, 1 bedroom	1.5 per dwelling unit
Multifamily, 2 bedrooms	1.75 per dwelling unit
Multifamily, 3+ bedrooms	2.0 per dwelling unit
Apartment complexes	2.0 per dwelling unit
<i>Other residential uses:</i>	
Apartment hotel	1 space per permanent dwelling unit and/or 1 space per each 2 nontransient sleeping rooms
Tourist homes	1 space per each unit or room plus 1 for the owner or manager
<i>Office/Professional Uses:</i>	
Office/professional office and/or groups of buildings of similar nature	1 space per each 350 square feet of gross floor area excluding storage areas, which shall not exceed 15% of the gross square footage For other permitted uses in such districts, parking space shall be provided on the basis of the appropriate category:
* Uses involving public assembly of groups of people for whatever reason	1 space per each 4 occupants at maximum occupancy as established by the state fire marshal
* Uses involving institutional functions	1 space per each 4 occupants at maximum occupancy as established by the state fire marshal
<i>Health and Medical Uses:</i>	
Institutional and commercial medical uses, clinics, medical office buildings	1 space per each 175 square feet of gross floor area plus 1 space per doctor on duty and 2 for every 3 employees on duty
Out-patient clinics, out-patient facilities a part of hospitals, medical centers, etc.	1 space per each 175 square feet of gross floor area plus 1 space per doctor on duty and 2 for every 3 employees on duty
Nursing homes, sanitariums, convalescent homes, institutions for care of aged, children, etc.	0.5 per bed plus 1 space per doctor on duty and 2 for every 3 employees on duty
Hospital, medical center, other treatment facility	1.75 per bed, plus the number required, based on square feet measurements for office, clinic, testing, research, administrative, teaching and similar activities associated with the principal use, at 1 space per each 175 square feet of gross floor area except for teaching facilities which shall be 1 space per each 4 seats

<i>Zoning District Classification or Use</i>	<i>Minimum Off-Street Parking Space Requirement</i>
Veterinary clinics and hospitals	1 space per 175 square feet of office area excluding area for boarding. A minimum of six spaces shall be provided
<i>Commercial Uses:</i>	
Specialty retail shops for the sale of books, educational and/or arts and craft supplies; floral items; gifts; antiques; and clothing and photographic studios	1 space per each 350 square feet of gross floor area excluding storage areas which shall not exceed 15% of the gross square footage
Dance and music studios	1 space for every 4 students based upon the maximum occupancy, plus 2 for every 3 employees at maximum shift
Retail uses such as barbershops, beauty shops, bakeries, drugstores, hobby shops, dry cleaning and/or laundries, food stores, garden supply stores, hardware stores, stationary stores, jewelers, shoe stores, sporting goods stores, toy stores and accessory uses incidental to such typical uses listed above.	1 space per each 350 square feet of gross floor area excluding storage areas which shall not exceed 15% of the gross square footage
Convenience stores	1 space per each 350 square feet of gross floor area excluding storage areas which shall not exceed 15% of the gross square footage with a minimum of 6 customer spaces
Drive-in banks, and similar uses	1 space per each 350 square feet of gross floor area excluding storage areas which shall not exceed 15% of the gross square footage plus reservoir space as determined by department of planning and development
Automobile service stations and garages for minor repair (excluding body shop, engine repair, painting)	1 space per each 350 square feet of area plus 2 spaces for every 3 employees with a minimum of 6 spaces for customer vehicles
Restaurants and restaurants with lounges	1 space per each 3 occupants at maximum occupancy based on maximum occupant load plus one space for each employees at maximum shift

<i>Zoning District Classification or Use</i>	<i>Minimum Off-Street Parking Space Requirement</i>
Retail and service uses such as banks, financial institutions, bicycle sales and repair, blueprinting and photo-copy establishments, business machine sales and service, carpet stores, interior decorating shops, building supply, paint and wallpaper stores, post offices, television and radio repair shops and accessory uses incidental to such typical uses listed above	1 space per each 400 square feet of gross floor area excluding storage areas which shall not exceed 15% of the gross square footage
Amusement establishments	1 space per each 4 occupants at maximum occupancy based on maximum occupant load plus 2 for each 3 employees at maximum shift
Auto body repair	6 spaces for customer vehicles
Automotive and mobile home sales	1 space per each 400 square feet of gross floor area plus 1 space per each 700 square feet of total outdoor sales area with a minimum of 6 spaces for customers
Car washes	1 space per each employee plus reservoir space for at least 6 times the bay capacity of the facility, with a minimum of 10
Bars and lounges	1 space per each 3 occupants at maximum occupancy based on maximum occupant load plus one spaces for each employees at maximum shift
Catering establishments	1 space per each 4 occupants at maximum occupancy based on maximum occupant load plus 2 spaces for every 3 employees at maximum shift
Hotels and motels	1 space per each room plus additional spaces as required for other functions such as bar, restaurant, etc.
Liquor stores	1 space per each 350 square feet of gross floor area excluding storage areas which shall not exceed 15% of the gross square footage with a minimum of 6 spaces for customer vehicles
Department stores	1 space per each 350 square feet of gross floor area
Motion picture theaters	1 space per each 4 occupants at maximum occupancy based on maximum occupant load
Funeral parlors	1 space per each 4 chapel seats
Mini-warehouses	A minimum of 6 spaces for customer parking. No parking shall block storage bays

<i>Zoning District Classification or Use</i>	<i>Minimum Off-Street Parking Space Requirement</i>
Storage, testing, repairing or similar service uses	1 space per each 700 square feet of storage area plus 1 space per each 400 square feet of office, sales or other space to be used by visitors, customers or salesmen
<i>Industrial Uses:</i>	
Battery and tire stations, building material sales, bus terminals, machinery sales, printing establishments, service establishments, trailer sales and rental and special uses as permitted	1 space per each 400 square feet of gross floor area excluding storage areas which shall not exceed 15% of the gross square footage
Storage, testing, repairing, warehousing or similar establishments	1 space per each 1,000 square feet of storage area plus 1 space per each 350 square feet of office, sales or other space to be used by visitors, customers or salesmen
Other light industrial uses	1 space per 1,000 square feet plus 1 space per each 350 square feet of office, sales or similar space
Assembly, manufacturing, processing, packaging and treatment plants	1 space per 1,250 square feet plus 1 space per each 350 square feet of office, sales or similar space
Canneries; paper, petroleum, rubber or wood product manufacturing; steel mills	1 space per 1,500 square feet plus 1 space per each 350 square feet of office, sales or similar space
Asphalt or concrete batching plants, bulk petroleum product storage uses and landfills	2 spaces for each 3 employees plus 1 space per each 350 square feet of office, sales or similar space
<i>Educational and Related Uses:</i>	
Day care centers	Minimum of 5 spaces plus 2 for every 3 employees, or as determined by department of planning and development
High schools	1 space per each employee plus 1 space for every 10 students
Elementary schools	1 space per each classroom and each other room used by students plus 1 for each 10 full time students
Colleges, junior colleges, technical schools, universities, etc.	As determined by the department of planning and development
Fraternities, sororities, dormitories and related buildings	0.5 per bed
School auditoriums*	1 space per each 4 occupants at maximum occupancy based on maximum occupant load

<i>Zoning District Classification or Use</i>	<i>Minimum Off-Street Parking Space Requirement</i>
School gymnasiums, stadiums, field houses, grandstands and related structures or facilities.*	1 space per each 4 occupants at maximum occupancy based on maximum occupant load *Credit for spaces available on the campus may be granted for up to 100% of the space requirement for these uses.
<i>Recreational Uses:</i>	
Parks, athletic fields, tennis and pool facilities, golf courses, etc.	As determined by department of planning and development
Recreational and community center buildings, recreation clubs, related uses	Spaces equal to 30% of total permitted occupancy or as determined by department of planning and development
Enclosed recreational buildings, specialized facilities and related uses	As determined by department of planning and development
Open recreational facilities including camps, youth facilities, training facilities, etc.	As determined by department of planning and development
Commercial recreation	As determined by department of planning and development
<i>Miscellaneous uses:</i>	
Planned unit development	As required for each individual use or as may be determined by department of planning and development based on the review of project plans and the determination of parking requirements
Public utility or public service uses	As determined by department of planning and development
Religious institutions, churches, temples, chapels, etc.	1 space per each 4 occupants at maximum occupancy based on maximum occupant load
Convents, seminaries, rectories, parish houses, other religious uses	As determined by department of planning and development
Clubs, lodges and fraternal organizations	1 space per each 4 occupants at maximum occupancy based on maximum occupant load plus 2 for each 3 employees at maximum shift
Public libraries, museums and other nonrecreational public facilities	1 space per each 600 square feet of floor area open to the public
Convention centers	1 space per each 4 occupants at maximum occupancy based on maximum occupant load plus 2 spaces for every 3 employees at maximum shift
Marinas	As determined by department of planning and development

<i>Zoning District Classification or Use</i>	<i>Minimum Off-Street Parking Space Requirement</i>
Farmer's markets and vegetable stands	1 space per each 350 square feet of area with a minimum of 6 spaces for customer vehicles.
Home occupations	As determined by department of planning and development

(Code 1998, app. C, § 7.0704; Ord. No. 07-1548, § 7.0704, 5-3-2007; Ord. No. 09-2131, 9-3-2009; Ord. No. 09-2171, 12-3-2009)

Sec. 130-2067. Minimum off-street loading requirements.

(a) Every hospital, institution, hotel, commercial or industrial building or use having a gross floor area in excess of 7,500 square feet of space and requiring delivery trucks shall have at least one permanently maintained off-street loading space for each 7,500 square feet of gross floor area or fraction thereof and so located as not to hinder the free movement of pedestrians and vehicles over sidewalks, streets, and alleys.

(b) Retail operations, wholesale operations and industrial operations with a gross floor area of less than 7,500 square feet shall provide sufficient off-street loading space (not necessarily full berth if shared by an adjacent establishment) so as not to hinder the free movement of pedestrians and vehicles over a sidewalk, street, or alley.

(c) Each required off-street loading and/or unloading space shall be designed with direct access via an approved access drive, to a deeded right-of-way which offers satisfactory ingress and egress for trucks. Access drives or aisles shall be laid out with a width of at least 12 feet for one-way circulation and at least 24 feet for two-way circulation.

(d) Off-street loading and/or unloading space shall be so designed and constructed so that all maneuvering for loading and/or unloading can take place entirely within the property lines of the premises. Such off-street loading and/or unloading space shall be so located as not to hinder the free movement of pedestrians and vehicles over sidewalks, streets, roads, highways or deeded rights-of-way.

(e) The off-street loading and/or unloading requirements, as listed in these regulations, shall apply at any time any building is enlarged or increased in capacity by adding floor area.

(f) Design and maintenance.

(1) *Lighting.* Any lighting used to illuminate off-street loading and/or unloading areas shall be directed away from property in any residential district as well as public roads in such a way as not to create a nuisance.

(2) *Spaces allocated to any off-street loading and/or unloading spaces.* These spaces shall not be used to satisfy the space requirements for any off-street parking facilities or portion thereof.

(Code 1998, app. C, § 7.0705; Ord. No. 07-1548, § 7.0705, 5-3-2007; Ord. No. 09-2171, 12-3-2009)

Sec. 130-2068. Reduction of required spaces.

(a) Joint-use up to 50 percent of required parking spaces may be permitted for two or more uses provided that:

- (1) The applicant for development approval can demonstrate that the uses will not substantially overlap in hours of operation; or
- (2) The proposed development is a bank, office, retail sales establishment, or manufacturing company and the applicant intends to share parking facilities with a church, theater or restaurant.

(b) Joint-use of up to 100 percent of the required parking spaces may be permitted for churches or schools if the parking will be provided off site, the total amount of required parking, provided in conjunction with a bank, office, retail sales establishment or manufacturing company.

(c) If an applicant for development approval can demonstrate that employee parking facilities will be provided off-site, the total amount of required parking, provided on site or within 500 feet of the site, may be reduced up to 15 percent.

(d) Compact car stalls will be allowed only for hotels and office parking. The maximum number of compact car stalls allowed is as follows:

<i>Number of Parking Spaces Provided for the Use</i>	<i>Percentage Compact Spaces Allowed</i>
0—99	0%
100—199	10%
200—299	15%
300—399	20%
400—499	25%

(Code 1998, app. C, § 7.0706; Ord. No. 07-1548, § 7.0706, 5-3-2007; Ord. No. 09-2171, 12-3-2009)

Sec. 130-2069. Sale of motorized vehicles, watercraft and trailers on private property and public rights-of-way.

(a) No person shall park any motor vehicle, watercraft or trailer upon any private property owned by another, at any given time, for the purpose of displaying such motor vehicle, watercraft or trailer for sale, hire or rental without the express written permission of the property owner prominently displayed on the motor vehicle, watercraft or trailer.

(b) No property owner shall give permission to any other person for display of a motor vehicle, watercraft or trailer for sale, hire or rental more frequently than three occasions per calendar year.

(c) The parking of any motor vehicle, watercraft or trailer upon any state or parish rights-of-way for purposes of advertising same for sale, hire or rental is expressly prohibited.

(d) Nothing in this section shall prohibit the display of vehicles upon the property of any duly zoned and permitted new or used car, trailer or watercraft dealership.

(e) Nothing in this section shall prohibit the owner of any motor vehicle, watercraft or trailer from displaying said vehicle for sale, hire or rental on his own private property.

(f) Penalties. Violations of this section by the owner of any private property or the owner of any motor vehicle, watercraft or trailer shall subject either or both parties to the penalties described in section 1-9 of the Parish Code of Ordinances.

(Code 1998, app. C, § 7.0707; Ord. No. 07-1548, § 7.0707, 5-3-2007; Ord. No. 09-2171, 12-3-2009)

Secs. 130-2070—130-2086. Reserved.

DIVISION 9. MODIFICATIONS AND EXCEPTIONS

Sec. 130-2087. Lot of record.

(a) *Minimum area setback requirements.* The minimum lot size requirement, as outlined in the applicable zoning classification, notwithstanding, a single-family dwelling and its accessory buildings may be erected on any lot of record or parcel of land in a residential district or a commercial/industrial structure may be erected on any lot of record in a commercial/industrial district which shall be documented as legally established and defined by deed or act of sale prior to adoption of these regulations. Where applicable, the contiguous lot of record regulations shall apply. (See chapter 125.) The following minimum area setback requirements shall be maintained for residential uses:

- (1) *Front yard setback.* Front yard setback of 25 feet.
- (2) *Rear yard setback.*
 - a. *Standard requirement.* Twenty percent of lot depth or 25 feet, whichever is the lesser.
 - b. *Special requirement.*
 1. Lakeview Drive, Slidell. Except as provided in subsection (a)(2)b.2 of this section, all properties fronting the south side of Lakeview Drive shall adhere to the standard rear yard requirements and, in addition, shall not extend the distance of the primary structure on the property more than 135 feet lakeward of the front property line adjacent to the Lakeview Drive right-of-way.

2. All properties with road frontage along Lakeview Drive where any portion of said frontage is within 700 feet of the eastern right-of-way of U.S. Highway 11 may have a primary structure located beyond the setback provided for immediately hereinabove, except that no primary structure shall be located more than 350 feet from the front property line.
3. Side yard setbacks. Except as otherwise provided in subsections (a)(2)a and b of this section, five feet on each side of lots with widths of 50 feet or less. Seven and one-half feet on each side of lots with widths greater than 50 feet, except that side yard setbacks of five feet may be authorized when the department of engineering has determined that drainage impacts have been adequately addressed, based on review and approval of a drainage plan for developments with lots of record that have widths greater than 50 feet, or the proposed installation of subsurface drainage, in lieu of drainage swales, on an individual lot that would otherwise be required to have 7½-foot setbacks. However, for corner lots, there shall be a side yard setback from the side street of not less than ten feet.
 - (i) Lots with a width of 50 feet located in a critical drainage area. In administering the provisions of section 115-3 of this Land Development Code, use of fill materials prohibited, in addition to meeting all of the requirements applicable to lots 90 feet or less in width, a lot that is 50 feet in width and located in a critical drainage area may be required to have side yard setbacks of 7½ feet on each side when the department of engineering determines, based upon review of the required development plan and application of best engineering practices, that drainage swales are required.
 - (ii) Lots with a width of 50 feet or less in areas of special concern. In the following areas of special concern, lots with widths of 50 feet or less shall have 7½-foot setbacks, except that the setbacks shall be five feet in those cases where a lot with a width less than 50 feet satisfies all of the requirements set forth in section 125-84(b)(4), governing a buildable substandard lot:

Part of Ward 4 and Ward 7: Commence at the corner of the section lines common to sections 2, 3, 10 and 11, T8S, R12E, the point of beginning. Thence proceed in a northerly direction along the section line between sections 2 and 3 to the southern boundary line of the I-12 right-of-way; thence proceed in a south-easterly direction along the southern boundary line of the I-12 right-of-way to the section line common to sections 21 and 22; thence proceed in a southerly direction along the common section line of

sections 21 and 22 to Lake Pontchartrain; thence proceed along the shoreline of Lake Pontchartrain in a westerly, thence in a north and north-westerly direction along the shoreline to Cane Bayou; thence proceed along Cane Bayou in a north, north-easterly direction to the section line common to sections 3 and 10; then proceed west to the point of beginning, all as more particularly depicted on the attached map identified as "St. Tammany Parish Council District 7 Set Backs".

4. No driveway accessing a dwelling or accessory building may be located within any side yard setback.

(b) *Commercial and industrial setbacks.* Commercial and industrial setbacks shall be as provided in these regulations.

(Code 1998, app. C, § 7.0801; Ord. No. 07-1548, § 7.0801, 5-3-2007; Ord. No. 10-2307, 8-5-2010; Ord. No. 12-2714, 5-3-2012; Ord. No. 12-2714, 5-3-2012)

Sec. 130-2088. Exceptions to height requirements.

The following structures shall be limited to 50 feet in height, unless granted written permission from the director of planning and development to exceed that height.

- (1) Churches.
- (2) Schools.
- (3) Hospitals.
- (4) Public service buildings.
- (5) Institutions.
- (6) Barns, silos and other farm structures when located on farms.
- (7) Belfries, cupolas, domes, flagpoles, and monuments.
- (8) Water towers, transmission towers, windmills.
- (9) Chimneys and smoke stacks.
- (10) Fire towers.
- (11) Oil derricks.
- (12) Bulkheads; elevator penthouses; water tanks; cooling towers; scenery; lofts and similar structures, provided that such structures shall cover not more than 25 percent of the total roof area of the building of which such structure is located.

(Code 1998, app. C, § 7.0802; Ord. No. 07-1548, § 7.0802, 5-3-2007)

Sec. 130-2089. Existing railroads and mineral deposits.

Existing railroads may continue to operate and be maintained in dwelling and commercial districts. Mineral deposits may be mined but residential areas shall be protected as set forth under article IV of these regulations.

(Code 1998, app. C, § 7.0803; Ord. No. 07-1548, § 7.0803, 5-3-2007)

Secs. 130-2090—130-2111. Reserved.

ARTICLE VII. MINIMUM STANDARDS FOR SPECIFIC USES

DIVISION 1. GENERALLY

Sec. 130-2112. Minimum standards.

For certain uses in these regulations, the following minimum standards will apply:

(1) *Aluminum collection center.*

- a. This use may only be located on a parking lot in an enclosed vehicle.
- b. An aluminum collection center located on a parking lot may not occupy required off-street parking spaces. An aluminum collection center must be arranged so as to not impede free traffic flow.
- c. Receipt of and payment for aluminum at an aluminum collection center located on a parking lot may take place outside the collection center but at a point no more than 20 feet from the opening of the enclosed vehicle where the aluminum is stored.
- d. The owner of the property and the owner and operator of the aluminum collection center shall not process or flatten aluminum on the site.
- e. The owner of the property and the owner and operator of the aluminum collection center remove aluminum stored at the collection center at least once a week.
- f. The owner of the property and the owner and operator of the aluminum collection center shall keep the aluminum collection center in proper repair and the exterior must have a neat and clean appearance.
- g. The owner of the property and the owner and operator of the aluminum collection center shall keep the building site clean and in a neat appearance and shall dispose of aluminum cans and other litter from the building site where the aluminum collection center is located.

(2) *Ambulance services.*

- a. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 1. Location of all structures on site, including proposed structures.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 3. Location and coverage of lighting, signage and fencing.
 4. Adjacent land uses.
 5. Approved landscape plan.
 6. Additional information shall be submitted as determined by the department of planning and development.
- b. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.
- c. A minimum of 20 percent landscaped areas shall be required based on the gross square footage of the first story of all structures on site or as determined by the department of planning and development.
- d. Any fleet storage of vehicles not in operation shall be screened by a six-foot-high screen of either 100 percent opaque nonliving material or 70 percent opaque evergreen plants or as determined by the department of planning and development.

(3) *Animal-related uses.* In all residential districts, these standards apply to all animal-related uses, including animals raised for household agriculture, stables and kennels.

- a. A structure may be erected for a private stable, pen, barn, shed or silo for raising, treating and/or storing products raised on the premises. This structure may not include a dwelling unit.
- b. Standing under roofed stables must be made of a material that provides for proper drainage so as not to create offensive odors, fly breeding or other nuisance.
- c. Fences for pens or similar enclosures must be built with sufficient height and strength to retain the animals. No pen, fence or similar enclosure may be closer than 20 feet to an adjacent property line. The widths of alleys, street rights-of-way, or other public rights-of-way may be used to calculate the ten-foot requirement.
- d. The regulations under this use do not apply to government agencies, governmentally supported organizations, or educational agencies that keep and maintain animals health research or similar purposes, nor do these regulations apply to special events such as circuses and livestock exhibitions which are otherwise regulated.

(4) *Automobile service stations.*

- a. The following uses shall not be performed in conjunction with any automobile service station:
 1. Outdoor repairs, including changing of oil and lubrication of automobiles.
 2. Outdoor painting and body work on automobiles.
 3. The outdoor storage of wrecked or abandoned vehicles. If an operable or wrecked motor vehicles remain outside on the premises for more than 24 hours, the premises shall be considered an outside salvage or reclamation use. However, a premises is not an outside salvage or reclamation use if the premises stores inoperable or wrecked motor vehicles each of which having a valid state registration, current safety inspection certificate, and documentary record of pending repairs or other disposition. All vehicles shall be screened from public view by a 100 percent, six-foot nonliving or 70 percent living screen. Objects shall be stored at a minimum of five feet from this screen.
 4. Sale of two or more automobiles, trailers, trucks, tractors, boats, or any other similar commodity.
 5. Outdoor storage of automotive parts.
 6. Bulk plants.
- b. The minimum lot size for an automobile service station, or any facility with retail gasoline sales, shall be 20,000 square feet. Twenty percent of each site must be landscaped open space.
- c. A site plan must be approved by the zoning commission prior to issuance of a building permit. At a minimum, this plan must illustrate the following:
 1. Location of the main structure and secondary structures;
 2. Location of storage tanks;
 3. Proposed traffic movements and points of ingress and egress;
 4. Approved landscape plan;
 5. Location and coverage of lighting, location and design of signage, and finishes and colors to be used on all surfaces.
- d. If the service station provides minor repairs, a minimum of six parking spaces shall be provided.

(5) *Bars, lounges, and nightclubs.*

- a. Hours of operation should conform to established uses in the neighborhood and may be adjusted by the zoning commission and/or the parish council.

- b. Live entertainment will only be allowed when it does not adversely affect the surrounding neighborhood because of noise and other factors.
- c. The use of neon signs exposed to the exterior shall be limited to two sign units which both are directly related to the subject facility and are not corporate advertisements for products sold in the facility.
- d. The premises on which a bar, lounge or nightclub is located and the public rights-of-way within 100 feet of such facility must be maintained in a clean and orderly manner.

(6) *Camps within the Pearl River Basin.*

- a. Boundaries. The minimum standards in this subsection shall apply to that area of the Pearl River Basin south of Old Highway 11 and east of a line beginning at the intersection of Interstate 59 and Old Highway 11 and following the southerly course of Interstate 59, Military Road and Highway 190 to its intersection with Highway 90, and extended due south to the Rigolets.
- b. For purposes of this subsection, the term "camp" means a dwelling located on or near the banks of a waterway and accessible only by means of a boat or other water vessel.
- c. Any lot of ground on which a camp is to be constructed shall have a minimum water frontage width of 200 feet.
- d. Front building lines for all camps constructed pursuant to this subsection shall be set back a minimum of 50 feet from the natural tree line fronting the waterway on which the camp is located.
- e. No trees having a caliper greater than four inches shall be cut within 25 feet of the natural tree line on the waterway on which the camp is located.
- f. All camps shall have an on-site sewerage and wastewater treatment plant meeting all applicable parish, state and federal regulatory and permitting requirements.

(7) *Car washes.*

- a. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 - 1. Location of all structures on site, including proposed structures.
 - 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 - 3. Approved landscape plan.
 - 4. Location and coverage of lighting, signage and fencing, including materials, textures and colors to be used on all surfaces.
 - 5. Adjacent land uses.

6. Additional information shall be submitted as determined by the department of planning and development.
 - b. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.
 - c. The design of all structures and signage, including materials, textures and colors; shall be harmonious with the surrounding neighborhood.
- (8) *Cemeteries and mausoleums.* In addition to all federal and state laws, the following requirements must be met (excluding family-owned cemeteries, which are limited to the burial of family members):
- a. Graves shall be considered as structures for the purpose of determining setbacks from property lines and in no case located closer than 50 feet from the property line.
 - b. Each lot or group of lots forming a cemetery or mausoleum center shall be fenced to a height of four feet or more.
 - c. Graves containing in-ground burials must not be located within 850 feet of any water well as verified by the owner, operator or manager of the cemetery through the use of a survey.
 - d. Cemeteries located in designated critical drainage areas are required to maintain the bottom of all caskets a minimum of a one-foot clearance above the base flood elevation.
 - e. Twenty-five-foot no cut buffer zones must be maintained within the perimeters of cemeteries and comply with all landscape and tree regulations as specified in article VI, division 2 of these regulations.
- (9) *Churches and other religious institutional uses.*
- a. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 1. Location of all structures on site, including proposed structures.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 3. Approved landscape plan.
 4. Location and coverage of lighting, signage and fencing, including materials, textures and colors to be used on all surfaces.
 5. Adjacent land uses.
 6. Additional information shall be submitted as determined by the department of planning and development.

- b. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.

(10) *Commercial recreational uses.*

- a. For freestanding units, a minimum of 20 percent landscaping shall be required based on the gross square footage of the first story of all structures on site or as determined by the department of planning and development.
- b. If the use abuts a residential district, a transitional yard located outside the required screening shall be provided equal to the side or rear yard requirements of the residential district classification.
- c. A site plan shall be approved by the department of planning and development prior to issuance of a building permit. At a minimum, this plan shall include the following:
 - 1. Location of main structures and any secondary structures on the site.
 - 2. Proposed traffic movement and points of ingress and egress, including parking and site triangles.
 - 3. Landscaping.
 - 4. Location and coverage of lighting, signage and any outside facilities.
 - 5. Recreational activity.
 - 6. Additional information shall be provided as determined by the department of planning and development.

(11) *Outdoor contractors' storage yards.*

- a. This use shall be screened from public view along the front, sides and rear by a 100 percent opaque eight-foot tall screen consisting of wood, solid masonry, concrete or other material as approved by the department of planning and development.
- b. If an inoperable or wrecked motor vehicle remains outside on the premises for more than 24 hours, the premises shall be considered an outside salvage or reclamation use and subject to violation. However, a premises is not an outside salvage or reclamation use if the premises stores inoperable or wrecked vehicles each having a valid state registration, current safety inspection certificate and documentary records of pending repairs or other disposition.
- c. Objects shall not be stacked higher than eight feet high within 40 feet of the visual screen. Objects may be stacked one foot above the eight feet for each additional five feet of setback beyond the original 40 feet. However, stacking of portable storage containers is limited to three storage containers in height.
- d. Sales and rentals of portable storage containers shall be considered an allowed use only in the 1-1, 1-2, 1-3 and 1-4 zoning districts.

- e. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 - 1. Location of all structures on site, including proposed structures.
 - 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 - 3. Landscaping. All landscaping shall be in compliance with the provisions of article VI, division 2 of these regulations.
 - 4. Signage. All signage shall be in compliance with article VI, division 3 of these regulations.
 - 5. Lighting. All site lighting shall be in compliance with article VI, division 4 of these regulations.
 - 6. Parking/loading. All parking and loading will be in compliance with article VI, division 8 of these regulations.
 - 7. Additional information shall be submitted as determined by the department of planning and development.

(12) *Day care centers and day care home.*

- a. Prior to issuance of a building permit and/or an administrative permit, a site plan shall be submitted for approval to the department of planning and development indicating the following:
 - 1. Location of all structures on site, including signage.
 - 2. Minimum landscape requirements.
 - 3. Minimum parking requirements.
 - 4. Ingress and egress to the site.
 - 5. Adjacent land uses.
- b. In addition to all federal and state laws, the following requirements must be met:
 - 1. A minimum play area of 50 square feet for each child which is enclosed with an opaque fence of a minimum height of not less than six feet.
 - 2. An off-street loading area shall be provided to accommodate a minimum of five automobiles for day care centers. This loading area shall be provided in addition to the minimum parking requirements, or as determined by the department of planning and development.
 - 3. Where a day care center adjoins any residential zoning district, a buffer yard must be provided, which is a minimum of ten feet in depth and a six-foot tall 100 percent opaque screen is installed.
 - 4. An off-street loading area shall be provided to accommodate a minimum of three automobiles for day care homes.

5. Additional information shall be submitted as determined by department of planning and development.
- (13) *Drive-in banks.* Where drive-through windows are used, automobile stacking areas shall be set back a minimum of ten feet from the property line and five feet from on-site automobile parking areas. The stacking area shall be located so as not to cause patrons parking on-site to move through the stacking area to get from their cars to the entrance.
- (14) *Freestanding drive-through photo stores, banks and similar retail uses.*
- a. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 1. Location of all structures on site, including proposed structures.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 3. Adjacent land uses.
 4. Approved landscape plan.
 5. Location and coverage of lighting, signage and fencing, including materials, textures and colors to be used on all surfaces.
 6. Additional information shall be submitted as determined by the department of planning and development.
 - b. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.
- (15) *Heliports.*
- a. When a heliport is allowed, evidence must be submitted to the zoning commission in support of the following criteria:
 1. Location of all structures on site, including any proposed structures.
 2. Location of any storage.
 3. Location of all adjacent land uses.
 4. Location of all abutting streets and intersections.
 5. For all commercial heliports, evidence must be presented to the zoning commission that there is a public need for the facility based on location of existing facilities and market demand.
 6. Evidence must be presented that the heliport will not present a safety hazard or adversely affect existing or logical future development of adjacent properties and neighborhoods.
 7. Adequate transitional yards shall be provided and maintained to shield noncompatible adjacent uses.

- b. No use, object or structure may be erected that causes interference with radio communications or transmissions of electronic signals with the aircraft, impairs the visibility of the aircraft in relation to the lights of the runway, endangers landing, takeoff or maneuvering of the aircraft.
- c. Heliports shall be lighted to provide adequate visibility at night or in inclement weather.
- d. Heliports are limited to helicopters with a gross weight of less than 12,500 pounds.
- e. If fueling is provided on site all storage tanks must be located underground or as approved by the department of planning and development.
- f. Any service uses provided shall be for private use of the property owner or petitioner only.
- g. All heliports must be approved by the Federal Aviation Agency (FAA). Copy of such approval will be kept on file in the department of planning and development and the department of permits and regulatory.
- h. Additional information shall be submitted as determined by the department of planning and development.

(16) *Home occupation (limited).*

- a. Limited home occupation must be clearly incidental and secondary to the primary use of the property as a residence by the applicant.
- b. Limited home occupation is for those business activities which are associated or similar to providing services or products which are primarily a part of hobby oriented activities for services of music, art or dance instruction (similar types of activities) and/or retail products for arts and craft fairs/exhibitions or consignment purposes.
- c. The area allowed for a limited home occupation shall not exceed 15 percent of the primary residence up to a maximum of 600 square feet.
- d. Limited home occupation involving retail sales or product manufacturing. (Additional standards.)
 - 1. Retail sales shall not occur on site.
 - 2. Assembly is allowed as long as it is within an enclosed space such as in the residence, accessory structure or garage.
 - 3. No more than one vehicle trip (round trip) per month which utilizes a parcel delivery service is allowed.

4. Deliveries are not allowed which utilize a vehicle which is larger than a typically parcel service truck (two axles) in residential areas. The maximum amount of unloading time for deliveries made by a private service is 30 minutes.
5. No more than five vehicle trips (round trips) associated with the business are allowed. The temporary unloading of a delivery from a parcel service is not counted as one of the five vehicle trips. A vehicle trip standard for parcel delivery is enumerated above.
6. No more than two vehicles associated with the home office are allowed on the site at any one time.
7. Parking of any vehicle with the exception of temporary provision provided by a parcel service must occur along the driveway or in a garage, unless the provided parking spaces are properly screen. Parking of any vehicle associated with the limited home occupation in the designated road right-of-way is not allowed, including the residents vehicles when they are parked in the right-of-way to allow for parking for the limited home occupation.

(17) *Limited home occupation for educational instruction (additional standards).*

- a. Only one student is allowed per session of instruction, unless the customer is part of a family seeking the service, utilizing one vehicle to arrive at the site.
- b. Instruction to more than one individual, who are not related, is prohibited unless approved by a conditional uses.
- c. Student for instruction cannot arrive before 9:00 a.m. or after 7:00 p.m.
- d. Retail sales of products shall not occur on site.
- e. No assembly of products is allowed on the site.
- f. No more than five vehicle trips (round trips) associated with the business are allowed. The temporary unloading of a delivery from a parcel service is not counted as one of the five vehicle trips. A vehicle trip standard for parcel delivery is enumerated above.
- g. Deliveries by a parcel service or freight service is not allowed.
- h. No more than two vehicles associated with the home office are allowed on the site at any one time.
- i. Parking of any vehicle with the exception of temporary provision provided by a parcel service must occur along the driveway or in a garage, unless the provided parking spaces are properly screen. Parking of any vehicle associated with the limited home occupation in the designated road right-of-way is not allowed, including the residents vehicles when they are parked in the right-of-way to allow for parking for the limited home occupation.

(18) *Home occupation (general)*. Permitted only in any E Estate or the A-1 Suburban Districts.

- a. General home occupation must be clearly incidental and secondary to the primary use of the property as a residence.
- b. No more than one person who is not related to the resident family can be engaged in the operation of such a business.
- c. The area allowed for a home occupation shall not exceed 15 percent of the area of the primary residence.
- d. No retail services can be conducted on the premises.
- e. No construction, assembly or manufacturing of any kind.
- f. No outdoor storage unless the site is over one acre and properly screen and has a maximum area of 400 square feet.
- g. No more than seven vehicle trips (round trips) a day.
- h. No more than three vehicles associated to the home occupation on site at any one time.
- i. No more than one vehicle trip (round trip) per month which utilizes a parcel delivery service is allowed.
- j. Deliveries are not allowed which utilize a vehicle which is larger than a typically parcel service truck (two axles) in residential areas. The maximum amount of unloading time for deliveries made by a private service is 30 minutes.

(19) *Home offices*.

- a. Home office must be clearly incidental and secondary to the primary use of the property as a residence by the applicant.
- b. The area allowed for a home office shall not exceed 15 percent of the area of the primary residence up to a maximum of 400 square feet.
- c. The use of the designated area is to perform clerical functions, such as filing, billing, receiving or making phone call, appointment scheduling, etc., that are typically associated with a business operation.
- d. Retail sales or services, which are not provided at an off-site location or through the mail, phone, or similar activity, cannot be conducted on the premises.
- e. No more than one person who is not related to the resident family can be engaged in the operation of such a business.
- f. No construction, assembly or manufacturing can occur on the premises as part of this administrative permit.

- g. No more than five vehicle trips (round trips) associated with the business are allowed.
- h. No more than two vehicles associated to the home office are allowed on the site at any one time.
- i. Parking of any vehicle associated with the home office must occur along the driveway or in a garage, unless the provided parking spaces are properly screen. Parking of any vehicle associated with the home office in the designated road right-of-way is not allowed, including the residents vehicle when they are parked in the right-of-way to allow for vehicle parking for the home office in the driveway or garage.
- j. Goods, materials or supplies of any kind delivered to or from the site shall be delivered by the resident's passenger vehicle.
- k. This administrative permit for the home office is not transferable to a different applicant or location.
- l. Prohibited uses.
 - 1. No home professional office shall permit the use, sale or exchange of:
 - (i) Alcohol.
 - (ii) Flammable liquids or chemical agents.
 - (iii) Firearms.
 - (iv) Fireworks.
 - (v) Other similar uses.
 - 2. Massage parlors, tattoo parlors, fortune tellers, faith healers and other activities of like character.
 - 3. Engine repairs, including, but not limited to, auto and auto body repairs, boat repairs, equipment repairs.

(20) *Manufactured homes.*

- a. Manufactured homes shall be subject to the regulations in this section, unless elsewhere allowed as a permitted use in a zoning district.
- b. All applications for a manufactured home permit shall be filed with the department of planning and development.
- c. All applications for a manufactured home permit shall include but not limited to the following:
 - 1. Site plan showing the location of the manufactured home or mobile home. This shall include the setbacks of the structure from all property lines, existing structures on site, surrounding land uses, driveways and proposed parking.

2. Vicinity map.
3. Legal description.
4. Photo and/or specifications of the manufactured home or mobile home.
5. Any other information as determined by the department of planning and development.

(21) *Mini-warehouses.*

- a. A minimum of 20 percent landscaping shall be provided, based on gross square footage of a parking lot or gross square footage of the first floor of a multi-story structure or as determined by the department of planning and development. If this use abuts a residential district, a transitional yard shall be provided equal to the side or rear yard requirements of the residential district classification.
- b. A site plan of the use must be approved by the department of planning and development. At a minimum, this plan shall include the following information:
 1. Location of all structures on the site.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 3. Location and coverage of lighting, signage and fencing, including materials, textures and colors to be used on all surfaces.
 4. Pedestrian access to adjacent sites.
 5. Approved landscape plan.
 6. Any additional information as determined by the department of planning and development.
- c. A minimum of six parking spaces shall be provided in addition to any other applicable requirements.
- d. A minimum lot area of 20,000 square feet shall be required.
- e. Parking areas shall not block the entrances to storage areas.
- f. Any associated outdoor storage shall be screened with a six-foot-high, 100 percent nonliving screen or 70 percent living screen or as approved the department of planning and development.

(22) *Mobile food trucks.*

- a. An administrative permit shall be applied for, approved, and kept on the site at all times. A copy of the lease and/or written permission from the property owner or authorized agent, which would include the allowable days and hours of operation and duration of the contract, a legal description of the property, survey, copy of

occupational license and a site plan shall be provided. This site plan shall indicate setbacks and location of the mobile food truck on the site, parking, sight triangles, and property dimensions.

- b. The maximum duration of a mobile food truck administrative permit is limited to the allowable number of days and dates indicated on a lease or written permission submitted with the application form.
- c. The mobile food truck must be located entirely on private property and shall not be located in any required setback, sight distance triangle, buffer, or public right-of-way.
- d. The mobile food truck shall not locate in any minimum required parking spaces for the business located on the site. If enough parking cannot be provided for the existing business and the mobile food truck, the use may not be located on the site.
- e. The mobile food truck shall be removed from the location when not in operation.
- f. Trucks may not operate:
 - 1. Within 20 feet of any intersection, stop sign, flashing beacon, yield sign, or other traffic control signal located on the side of a roadway;
 - 2. Within three feet of any public or private driveway, wheelchair ramp or bicycle ramp;
 - 3. In any manner that impedes an exit or entrance of an operating building;
 - 4. In any manner that impedes traffic flow on a public street, private drive or parking aisles.
- g. Vendors must obey all applicable parking, traffic and vehicle safety laws, regulations, and restrictions.
- h. The mobile food truck must meet all applicable state codes.
- i. Trucks can remain on one property no longer than four hours.
- j. Trucks may only sell food; no other goods, wares, or other items may be sold.
- k. No vendor may sell alcoholic beverages unless properly permitted in accordance with all applicable regulations, including, but not limited to, chapter 6, pertaining to alcoholic beverages, and as amended as per law.
- l. No furniture or any other objects can be placed in the street, sidewalk, or any right-of-way, except a trash receptacle.
- m. All vendors shall provide a trash receptacle within three feet of the front or back of the truck.
- n. All vendors must keep a 50-foot radius around the truck clean during operation and upon ceasing operation.

- o. No horns, amplification systems, or other sound-producing devices or music systems which can be heard outside of the truck may be used.
- p. A maximum of one sign not exceeding 16 square feet per side, off the vehicle, will be allowed on the property where the food truck is licensed to operate. Off-premises signs are prohibited. No signs shall be located within public rights-of-way or in sight triangles.
- q. No third-party advertising may be displayed on any mobile food truck.

(23) *New and used car lots.*

- a. A site plan of the use must be approved by the department of planning and development. At a minimum, this plan shall include the following information:
 - 1. Location of all structures on the site.
 - 2. Proposed traffic movements and points of ingress and egress, including parking and sight triangles.
 - 3. Location and coverage of lighting, signage and fencing, including materials, textures and colors to be used on all surfaces.
 - 4. Pedestrian access to adjacent sites.
 - 5. Approved landscape plan.
 - 6. Approved layout of parking areas for vehicles for sale and/or lease.
 - 7. Any additional information as determined by the department of planning and development.
- b. A minimum of six parking spaces shall be provided, in addition to any other applicable requirements.
- c. A minimum lot area of 20,000 square feet shall be required.

(24) *Outdoor advertising (billboards).* In addition to all federal and state laws, the following standards must be met:

- a. *Number and location of off-premises signs.* The number and location of off-premises outdoor advertising signs will be limited as established in these regulations. Off-premises outdoor advertising signs will not be permitted unless in accordance with these and any other applicable regulations.
- b. *Prohibited signs and locations thereof.* No off-premises outdoor advertising signs shall be permitted along parish roads, unless said sign is parallel to and within 200 feet of any state or federal highway.
 - 1. No roof, piggy-back, stack signs, side-by-side and multiple panel signs shall be permitted.

2. No off-premises advertising sign or structure shall be located or situated in a manner as to obscure or otherwise physically interfere with the effectiveness of any official traffic sign, signal or device, or obstruct or physically interfere with the driver's view of approaching, merging or interstate traffic.
- c. *Location standards of off-premises signs.*
1. An off-premises sign must be located within 200 feet of the highway right-of-way. An off-premises sign must be set back at least 15 feet from the highway right-of-way.
 2. An off-premises sign is not allowed within or nearer than 500 feet of a residential zoned district abutting the same highway to which the sign is oriented.
 3. An off-premises sign may not be located within a triangular area formed by the highway rights-of-way lines and a line connecting them at points 50 feet from the rights-of-way intersection or 500 feet from an interstate entrance/exit ramp.
- d. *Size of off-premises signs.*
1. Billboard faces and supporting framework shall not exceed the following sign areas.
 - (i) New billboards shall be a maximum of 300 square feet in area.
 - (ii) Replacement billboards, existing billboards 400 square feet or larger in face area may be replaced at a size up to 400 square feet; billboards with face areas between 399 square feet and 245 square feet shall be replaced at a size up to 300 square feet. Existing billboards of less than 245 square feet shall be restricted to their current size in the event they are relocated.
 2. When two off-premises signs are placed back-to-back or V-type on the same structure with an angle between them of not more than 60 degrees, each sign facing shall conform to the maximum size limitations.
 3. The lowest point of any off-premises sign shall extend not less than ten feet and the highest point shall extend not more than 45 feet measured from either the ground level at its supports or the nearest edge of the main traveled way, whichever is higher in elevation.
- e. *Spacing of off-premises signs.*
1. No two off-premises outdoor advertising structures shall be spaced less than 1,000 feet apart. In determining the physical spacing of billboards, the parish will consider existing billboards and approved billboard locations.

2. V-type or back-to-back signs on the same structure with an angle between them of not more than 60 degrees shall be considered one sign.
- f. *Lighting.* Signs may be illuminated, subject to the following restrictions:
1. No revolving or rotating beam or beacon of light that simulates any emergency light or device shall be permitted as part of any sign. Flashing devices shall not be permitted upon a sign.
 2. External lighting, such as flood lights, thin line and goose neck reflectors are permitted provided the light source is directed on the face of the sign and is effectively shielded so as to prevent beams or rays of light from being directed into any portion of the main travel way of the highway system, or into a residential use area.
 3. No internal illumination or "diamond-vision" type technology may be utilized as part of any outdoor advertising sign.
- g. *Construction.*
1. All structural elements of off-premises signs shall be of metal construction.
 2. A freestanding off-premises sign having a size or area of 400 square feet shall have no more than one support.
 3. Every freestanding off-premises sign shall henceforward be so erected or construed in such a manner as to withstand a wind load factor of 30 pounds per square foot.
- h. *Erection and maintenance of signs.* The following signs shall not be allowed to remain or to be erected:
1. Signs which are obsolete, including outdoor advertising that has been blank for 12 months, out-of-date political advertising and advertising of defunct business, and signs or structures which have been erected without a building permit having been issued.
 2. Signs which are illegal under state laws or regulations.
 3. Signs which are not clean and in good repair.
 4. Signs that are not securely fixed on a substantial structure.
 5. Signs which attempt or appear to attempt to regulate, warn or direct the movement of traffic or which interfere with, imitate or resemble any official traffic sign, signal or device.
 6. Signs which are not consistent with the standards in this section.
 7. Signs located on public property, unless placed thereon under lease arrangements or otherwise permitted by legal authority.

- i. *Vegetation control.* No trees or other vegetation may be cleared, cut or removed on a state right-of-way without first obtaining a state vegetation control permit.
- j. *Permits and fees.* No off-premises outdoor advertising structure shall be erected, nor shall construction commence thereon, without first obtaining a permit from the department of permits and regulatory.
- k. *Billboard credit.* Permits to erect new billboards shall only be issued to those persons possessing a billboard credit.
 1. *Billboard credit.* Billboard credits shall be issued by the parish to those billboard owners who have removed a previously existing, lawfully erected billboard after the effective date of the ordinance from which this division is derived. It will be the responsibility of the permit applicant to show the ownership, location and date of removal of the billboard.
 2. *Expiration of billboard credit.* Billboard credits shall be utilized within five years from the date of removal of the billboard.
 3. *Credit basis.* Billboard credits shall be issued on a per face and per structure basis. One credit shall be issued for each billboard face removed and one credit for each structure removed. If a billboard is not located upon a separate supporting structure, the building or other structure to which the billboard is attached shall constitute a single structure for the purpose of receiving one credit.
 - (i) No credit shall be granted for the partial removal of faces.
 - (ii) No credit shall be granted for the removal of billboard faces which are less than 84 square feet.
 4. *Credit utilization.* A billboard credit may only be used in a location which meets all standards of these regulations.
 5. *Transfer of credits.* Credits may be transferred between parties through legal means.
 6. Credits will allow billboards to be reconstructed at the following sizes:
 - (i) A credit for a new 400 square foot billboard will be issued for billboards which are removed that are in excess of 399 square feet.
 - (ii) A credit for a new 300 square foot billboard will be issued for billboards which are removed that are between 245 square feet and 399 square feet.
 - (iii) A credit will be issued for a new billboard of equal size for billboards which are removed that are less than 245 square feet.
- l. *Cap on number of billboards.*
 1. *Restricted corridors.* There shall be a cap on the number of billboards within the restricted corridors. No new billboards shall be allowed with these areas

except with the removal of an existing billboard from the same corridor/area. Permits for new billboards within the restricted corridors will only be issued to those persons possessing a billboard credit indicating they have removed a billboard from the same corridor. All new billboards within restricted corridors shall comply with the design standards as set forth in this Code.

2. *Parish-wide cap.* There shall be a limit of 200 total billboard locations within unincorporated St. Tammany Parish. This limit shall be in place until December 31, 2005, at which time the limit on the number of billboard locations will be reviewed by parish council.

- m. *Exemptions.* This section shall not pertain to the following types of off-premises signs:

1. State approved signs within state highway rights-of-way.
2. Off-premises temporary signs which comply with the provisions of these regulations.

(25) *Outdoor salvage yards.*

- a. This use shall be screened from public view along the front, sides and rear by a 100 percent opaque eight-foot-tall screen consisting of wood, solid masonry, concrete or other material as approved by the department of planning and development.
- b. The owner of an outside salvage or reclamation use shall not stack objects higher than eight feet high within 40 feet of the visual screen. The owner of an outside salvage or reclamation use may stack objects one foot above the eight feet for each additional five feet of setback beyond the original 40 feet.
- c. If an inoperable or wrecked motor vehicle remains outside on the premises for more than 24 hours, the premises shall be considered an outside salvage or reclamation use and subject to violation. However, a premises is not an outside salvage or reclamation use if the premises stores inoperable or wrecked vehicles each having a valid state registration, current safety inspection certificate and documentary records of pending repairs or other disposition.
- d. A minimum distance of 200 feet is required between an outside salvage or reclamation use and a residential district subject to landscape requirements for industrial uses abutting residential districts.
- e. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 1. Location of all structures on site, including proposed structures.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.

3. Landscaping. All landscaping shall be in compliance with the provisions of article VI, division 2 of these regulations.
4. Signage. All signage shall be in compliance with article VI, division 3 of these regulations.
5. Lighting. All site lighting shall be in compliance with article VI, division 4 of these regulations.
6. Parking/loading. All parking and loading will be in compliance with article VI, division 8 of these regulations.
7. Hours of operation.
8. Additional information shall be submitted as determined by the department of planning and development.

(26) *Private landing strips.*

- a. Minimum of five acres is required for this site.
- b. No use, object or structure may be erected that causes interference with radio communications or transmissions of electronic signals with the aircraft, impairs the visibility of the aircraft in relation to the lights of the runway, endangers landing, takeoff or maneuvering of the aircraft.
- c. All commercial landing strips shall be lighted to provide adequate visibility at night or inclement weather.
- d. If fueling is provided on site, all storage tanks must be located underground or located 200 feet from an adjacent runway.
- e. Any service uses provided shall be for private use of the property owner of petitioner only.
- f. All landing strips shall be approved by the Federal Aviation Agency (FAA). Copy of such approval will be kept on file in the department of planning and development and department of permits and regulatory.
- g. A site plan shall be submitted to the department of planning and development indicating at a minimum:
 1. Location of all structures on site, including proposed structures.
 2. Location of fuel storage tanks.
 3. Location and coverage of landing strip, including lighting.
 4. Location of adjacent land uses in relation to the site and any possible signs and/or utility easements.
 5. Evidence shall be presented that the landing strip will not create a hazard or adversely affect existing or logical future development of adjacent properties.

6. Additional information shall be submitted as determined by the department of planning and development.

(27) *Private recreational uses issued as administrative permits.*

- a. For freestanding units, a minimum of 20 percent landscaping shall be required based on the gross square footage of the first story of all structures on site or as determined by the department of planning and development.
- b. If the use abuts a residential district, a transitional yard located outside the required screening shall be provided equal to the side or rear yard requirements of the residential district classification.
- c. A site plan shall be approved by the department of planning and development prior to issuance of a building permit. At a minimum, this plan shall include the following:
 1. Location of main structures and any secondary structures on the site.
 2. Proposed traffic movement and points of ingress and egress, including parking and site triangles.
 3. Approved landscape plan.
 4. Location and coverage of lighting, signage and any outside facilities.
 5. Parking lots and areas designated for open space shall not be used as part of the recreational activity.
 6. Additional information shall be provided as determined by the department of planning and development.

(28) *Public parking lots and garages.*

- a. A minimum of 20 percent landscaping shall be provided based on gross square footage of a parking lot or gross square footage of the first floor of a multi-story structure or as determined by the department of planning and development. If this use abuts a residential district, a transitional yard shall be provided equal to the side or rear yard requirements of the residential district classification.
- b. A site plan of the use must be approved by the department of planning and development. At a minimum, this plan shall include the following information:
 1. Location of all structures on the site.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 3. Location and coverage of lighting, signage and fencing, including materials, textures and colors to be used on all surfaces.
 4. Pedestrian access to adjacent sites.
 5. Approved landscape plan.

6. Any additional information as determined by the department of planning and development.

(29) *Public recreational uses, including recreational facilities and private tours (other than commercial recreation).*

- a. When a recreational use is allowed, evidence must be submitted to the zoning commission in support of the following criteria:
 1. Location of existing and proposed structures.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 3. Landscaping.
 4. Location and coverage of lighting and signage.
 5. Pedestrian access and movement.
 6. Additional information as determined by the department of planning and development.
- b. Off-street parking shall be provided. No parking shall be permitted on the rights-of-way. Parking shall be screened from view of adjacent residences by a 70 percent living screen or 100 percent nonliving screen.
- c. Signage is permitted with department of planning and development approval.
- d. In residential neighborhoods, no buses greater than 15 passenger occupancy shall be permitted. In all other cases buses greater than 15 passengers shall not be permitted on residential streets.
- e. Additional stipulations may be required as determined by the department of planning and development.

(30) *Recycling collection stations.*

- a. This use may only be located on a lot in enclosed bins.
- b. A transfer station located on a parking lot may not occupy required off-street parking spaces. A collection center must be arranged so as to not impede free traffic flow.
- c. The owner of the property and the owner and operator of the collection center remove stored materials at the collection center at least once a week.
- d. The owner of the property and the owner and operator of the collection center shall keep the aluminum center in proper repair and the exterior must have a neat and clean appearance.

- e. The owner of the property and the owner and operator of the collection center shall keep the building site clean and in a neat appearance and shall dispose of litter from the building site where the collection center is located.

(31) *Recycling transfer stations.*

- a. This use may only be located on a lot in enclosed buildings.
- b. The owner of the property and the owner and operator of the transfer center shall keep the center in proper repair and the exterior must have a neat and clean appearance.
- c. The owner of the property and the owner and operator of the collection center shall keep the building site clean and in a neat appearance and shall dispose of litter from the building site where the collection center is located.
- d. Any associated outdoor storage shall be screened from public view by a 70 percent living or 100 percent non-living screen.
- e. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 - 1. Location of all structures on site, including proposed structures.
 - 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 - 3. Approved landscape plan with a minimum of 20 percent open space shall be required for each site.
 - 4. Adjacent land uses.
 - 5. Additional information shall be submitted as determined by the department of planning and development.

(32) *Restaurants.*

- a. All refuse disposal areas shall be screened as provided for in these regulations.
- b. Where drive-through windows are used, automobile stacking areas shall be set back a minimum of ten feet from the property line and five feet from on-site automobile parking areas. The stacking area shall be so located as not to cause patrons parking on-site to move through the area to get from their cars to the restaurant entrance. Where a stacking area abuts a property line or on-site parking, landscaping shall be provided in the form of a landscaped berm, trees or dense plantings to a minimum height of three feet along the required setback.

(33) *Retail repair establishments; including automobiles, boats, trucks, trailers, tractors and mobile homes.*

- a. Outside body work and painting or other repairs are not permitted.

- b. The outdoor storage of junked, wrecked or abandoned vehicles stored on the premises solely for the purpose of using parts to repair other vehicles shall not be permitted.
 - c. All outdoor storage of vehicles awaiting repair shall be screened from public view by a 100 percent opaque six-foot tall, nonliving screen or a six-foot-tall, 70 percent opaque living screen. Objects shall be stored a minimum of five feet from this screen.
 - d. Sale of two or more vehicles or other similar commodities is prohibited.
 - e. Any fleet storage of vehicles utilized in connection with this use shall be screened by a six-foot-high screen of either 100 percent opaque nonliving material or 70 percent opaque evergreen plants or as determined by the department of planning and development.
 - f. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.
 - g. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 - 1. Location of all structures on site, including proposed structures.
 - 2. Location of fuel storage tanks.
 - 3. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 - 4. Approved landscape plan.
 - 5. Location and coverage of lighting, signage and fencing, including materials, textures and colors to be used on all surfaces.
 - 6. Additional information shall be submitted as determined by the department of planning and development.
 - h. If an inoperable or wrecked motor vehicle remains outside on the premises for more than 24 hours, the premises shall be considered an outside salvage or reclamation use and subject to violation. However, a premises is not an outside salvage or reclamation use if the premises stores inoperable or wrecked vehicles each having a valid state registration, current safety inspection certificate and documentary records of pending repairs or other disposition.
 - i. A minimum of six parking spaces for public use shall be provided.
- (34) *Outdoor retail sales and storage yards.*
- a. This use shall be screened from public view along the front, sides and rear by a 100 percent opaque eight-foot-tall screen consisting of wood, solid masonry, concrete or other material as approved by the department of planning and development.

- b. Objects shall not be stacked higher than eight feet high within 40 feet of the visual screen. Objects may be stacked one foot above the eight feet for each additional five feet of setback beyond the original 40 feet. However, stacking of portable storage containers is limited to two storage containers in height.
- c. Shall not exceed ten percent or less of the area of the developed site.
- d. The outdoor retail sales and storage yard shall be a secondary use to a home improvement center or department store.
- e. The outdoor retail sales and storage yard shall not be located within the required parking area.
- f. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 - 1. Location of all structures on site, including proposed structures.
 - 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 - 3. Landscaping. All landscaping shall be in compliance with the provisions of article VI, division 2 of these regulations.
 - 4. Signage. All signage shall be in compliance with article VI, division 3 of these regulations.
 - 5. Lighting. All site lighting shall be in compliance with article VI, division 4 of these regulations.
 - 6. Parking/loading. All parking and loading will be in compliance with article VI, division 8 of these regulations.
 - 7. Additional information shall be submitted as determined by the department of planning and development.

(35) *Recreational vehicle parks (RVPs).*

- a. *Purpose.* The purpose of these requirements is to provide for, on a temporary basis, recreational vehicle campers for recreation, camping or travel and accessory uses supporting such activities. A recreational vehicle shall be construed within these regulations as any vehicle or temporary dwelling mobile unit whether motorized or not used for occupancy during its stay in the park. The intent of these requirements is to also provide an assured compatibility with surrounding land uses, and to avoid health and safety hazards.
- b. *Locational standards.*
 - 1. Campgrounds shall not be located adjacent to developed or developing residential areas in such a way that the traffic or noise generated by campgrounds would interfere with the surrounding neighborhoods.

2. The design of campground ingress/egress points and the internal road circulation system shall be regulated so as to be compatible with the surrounding road system as well as safe and convenient for vehicular traffic and emergency traffic at all times.
 3. The location of RV campgrounds shall be located in areas where fragile environmental areas such as wetlands and wildlife domains will not be adversely affected. Also, campgrounds shall not be located near hazardous areas where rapid flooding or ground subsidence occur.
- c. *Permitted uses.*
1. Recreational vehicles.
 2. Offices (for the conducting of campground business).
 3. Boathouse.
 4. Public restrooms.
 5. Laundry room (to serve only those utilizing the campground facilities).
 6. Convenience store no larger than 1,500 square feet and providing a limited range of groceries, toiletries, souvenirs, and recreational equipment.
 7. Recreational facilities, such as, but not limited to, swimming pools, tennis courts, golf courses, trails and bike paths.
 8. Tents for camping purposes.
- d. *Prohibited uses.*
1. The occupancy of a recreational vehicle for a period exceeding three months in any 12-month period shall be deemed permanent occupancy and is prohibited.
 2. Any uses which are not specifically, provisionally or by reasonable implication permitted in this subsection.
- e. *Height regulations.* No building or structures shall exceed 45 feet in height above base flood elevation as set forth in chapter 115 of this Land Development Code.
- f. *Area requirements.*
1. *Campsite area.* Each RV campsite and incidental site shall be at least 1200 square feet in size with minimum dimensions of 30 feet by 40 feet. No campsite or structure shall be located closer than 150 feet from any adjacent residences.
 2. *Front yard.* All structures shall setback a distance of at least 15 feet from any roadway or front campsite line.
 3. *Side yard.* All structures shall setback a distance of at least ten feet from one another. RVs shall not be closer than five feet to a side campsite line.

4. *Rear yard.* All structures shall setback a distance of at least ten feet or 20 percent of the depth of the site, whichever is the less restrictive.
- g. *Parking.* Each campsite shall have at least one ten-foot by 19-foot off-street parking stall composed of shell, gravel or other suitable paving material. All other uses that are permitted in an RV park shall meet the off-street parking rules as set forth in article VI, division 8 of these regulations.
- h. *Development standards.*
 1. *Soil and ground cover.* Exposed ground surface in all parts of the recreational vehicle park shall be paved or covered with stone screenings, or other solid materials, or protected with a vegetative growth that is capable of preventing soil erosion and objectionable dust.
 2. *Drainage requirements.* Surface drainage plans for the entire park shall be submitted and reviewed by the parish council and permit division which shall determine if the plan is compatible with the existing drainage pattern of the area.
 3. *Park size and density.* Each RV park shall be at least five acres in size with a density no greater than 15 campsites per acre.
 4. *Roadways.* All internal roadways shall be paved with concrete or asphalt materials in accordance with parish construction standards if the park density exceeds eight campsites per acre. In all other cases shell or gravel type materials may be used. All roadways shall be at least 20 feet in width for two-way and 12 feet for one-way traffic. All internal roads shall be privately maintained by the developer unless otherwise specified by the parish council at the time of subdivision review.
 5. *Open space and recreational area.* At least 40 percent of the park's total land area shall remain as open space and/or recreational use.
 6. *Buffering and landscaping.* A minimum buffer area of 30 feet shall be imposed around the perimeter of the RV park and shall be landscaped in such a fashion as to achieve a 70 percent visual screen of living plant material at time of planting. Also, at least 50 percent of all the trees within the perimeter of the RV park shall remain intact.
 7. *Water system.* All RV parks shall have a portable water supply. A water station for filling RV water storage tanks shall be provided at a rate of one station per every 100 campsites.
 8. *Sewerage disposal.* Where a public sewer system is available within 300 feet, the RV park shall be required to tie in to the system. If a public sewer system

is not available, a private sewerage collection and disposal facility shall be installed which meets the requirements of the state department of public health and welfare.

9. *Sanitary facilities.* Central toilet and lavatory facilities shall be provided for every ten campsites. A central bathhouse shall also be provided containing at least one shower receptacles for every 15 campsites.
10. *Maintenance requirement.*
 - (i) Storage of vehicles is prohibited.
 - (ii) No pets shall be allowed to roam free within the RV park. Pets shall be confined in a fenced yard or on a leash.
 - (iii) Large trash receptacles shall be screened by a six-foot, sight obscuring fence. Small trash receptacles shall be aesthetically decorated and blend in with the environment of the RV park.
11. *Utilities.* Electrical and/or gas utilities shall be provided for each RV park. However, individual hookups are not required for all RV campsites.
12. *Lighting.* RV parks shall be lighted during the hours of darkness in a way as to ensure the safety of the occupants. Such lighting shall be the responsibility of the developer of the RV park.
- i. *Site plan approval.* All recreational vehicle parks must apply for rezoning as well as comply with the procedures established by chapter 125 for development of land. All applicants filing for zoning of a recreational vehicle park must submit a site development plan to the department of planning and development consisting of the following information.
 1. The title of the project and the names of the project planner and the developer.
 2. Scale, date, north arrow and general location map which indicates existing land use within 500 feet of the proposed RV park.
 3. Boundaries of the property involved; all existing streets, buildings, water-courses, easements, section lines, and other existing streets, buildings, water-courses, easements, section lines, and other existing important physical features in and adjoining the property.
 4. Master plan locations and the acreage of each component thereof of the different uses proposed (e.g., open space designation; campsites, recreational facilities, other uses incidental to the RV park).
 5. Master plan showing access and traffic flow and how vehicular traffic will be separated from pedestrian and other types of traffic.

6. Tabulations of total gross acreage in the development, and the percentage thereof proposed to be devoted to each use.
 - j. *Zoning commission findings and recommendations.* After a public hearing, the zoning commission may recommend approval subject to any stipulations made regarding the companion site development plan.
 - k. *Fire marshal approval.* A certificate attesting to the state fire marshal's approval of plans for all construction and improvements as per the state fire code must be provided to the department of permits and regulatory prior to the issuance of a building permit (chapter 115 of this Land Development Code).
 - l. *Application fee.* Applications with required supporting data should be filed with the department of planning and development. The filing fee shall be as follows: \$150.00 initial fee, \$50.00 per acre up to a maximum of \$1,500.00. An additional \$50.00 shall accompany the application to cover final advertising cost and can be refunded for failure of such zoning application to be adopted.
- (36) *Storage facilities associated with insurance offices and related facilities.*
- a. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 1. Location of all structures on site, including proposed structures.
 2. A minimum of 20 percent landscaped areas shall be required based on the gross square footage of the first story of all structures on site or as determined by the department of planning and development.
 3. Proposed traffic movements and points of ingress and egress.
 4. Location of adjacent land uses.
 5. Location and coverage of lighting, signage and parking lots.
 6. Approved landscape plan.
 7. Additional information shall be submitted as determined by the department of planning and development.
 - b. The proposed facility shall not create a traffic or safety hazard, or adversely affect the existing or logical future growth of the surrounding neighborhood.
 - c. Hours of operation shall conform to existing patterns established in the neighborhood.
 - d. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.
 - e. The design of all structures and signage, including materials, textures and colors; shall be harmonious with the surrounding neighborhood.
 - f. A maximum of 15,000 square feet of storage areas shall be permitted.

- g. Outside body work and painting or other repairs are not permitted.
- h. The outdoor storage of junked, wrecked or abandoned vehicles stored on the premises solely for the purpose of using parts to repair other vehicles shall not be permitted.
- i. All outdoor storage of vehicles awaiting repair shall be screened from public view by a 100 percent opaque six-foot-tall, nonliving screen or a six-foot-tall, 70 percent opaque living screen. Objects shall be stored a minimum of five feet from this screen.
- j. Sale of two or more vehicles or other similar commodities is prohibited.
- k. Any fleet storage of vehicles utilized in connection with this use shall be screened by a six-foot-high screen of either 100 percent opaque nonliving material or 70 percent opaque evergreen plants or as determined by the department of planning and development.
- l. If an inoperable or wrecked motor vehicle remains outside on the premises for more than 24 hours, the premises shall be considered an outside salvage or reclamation use and subject to violation. However, a premises is not an outside salvage or reclamation use if the premises stores inoperable or wrecked vehicles each having a valid state registration, current safety inspection certificate and documentary records of pending repairs or other disposition.

(37) *Swimming pools.*

- a. Swimming pools which are not located within an appropriate commercial zoning district shall not be operated as a business, however private swimming lessons are permitted.
- b. All swimming pools shall be completely enclosed within a permanent and solidly constructed fence or wall of not less than four feet in height.
- c. All gate or door openings through a fence or wall enclosure shall be equipped with a self-closing and self-latching device for keeping the gates or doors closed and locked at all times when not in actual use.
- d. Above ground swimming pools can only be located on the property in either a side or rear yard area. The inside edge, lip or structure of each swimming pool shall setback at least five feet from the side property line and ten feet from the rear property line. However, in no instance shall a swimming pool be located within any documented servitude or easement.
- e. In-ground swimming pools (less than 12 inches above grade) can only be located on the property in either a side or rear yard area. The inside edge, lip or structure

of each swimming pool shall setback at least five feet from the side property line and five feet from the rear property line. However, in no instance shall a swimming pool be located within any documented servitude or easement.

- f. All portable or accessory swimming pools that are less than 18 inches in water depth shall be exempt from any fencing or wall requirements.
- g. No pool may be maintained in such a way that it is attractive to rats, mice, mosquitoes, or other such vermin. No pool may be maintained in such a way as to be hazardous to adjacent property owners.

(38) *Temporary construction and sales offices.*

- a. A temporary construction and/or sales office must be located on a platted lot within the subdivision or site approved by the department of planning and development within an area with an approved preliminary plat.
- b. The department of permits and regulatory shall issue a temporary building permit for a period of one year for a temporary construction or sale office. The parish council may grant up to two extensions of one year each to the building permit for a construction office if the builder maintains active or continuous construction within the subdivision, or for a sales office or model home for display purposes provided a minimum of ten lots in the subdivision are unsold.
- c. A temporary construction or sales office may not be located in another subdivision or used for construction or sale in another subdivision.
- d. All landscaping and parking requirements shall apply.

(39) *Temporary seasonal uses.*

- a. Administrative permit must be secured and kept on the site at all times.
- b. The administrative permit is not transferable to other vendors.
- c. All signs must be professionally rendered and approved by the department of planning and development. Signs located in an MIO must adhere to the regulations of the adjacent municipality.
- d. A maximum of two signs may be permitted.
- e. Total sign area, including both signs for temporary uses, shall not exceed 150 square feet.
- f. No off-premises signs for temporary uses may be permitted.
- g. Signs shall not be located in the rights-of-way.
- h. A minimum of five off-street parking spaces must be provided excluding two spaces for employee parking.
- i. Maximum lot coverage for all uses on the lot shall not exceed 50 percent.

- j. State law mandates restroom facilities must be made available to employees. When an RV is located on the site, the petitioner must provide documentation that restroom facilities shall be provided by either of the following ways.
 - 1. Port-o-lets located on the site, RV facilities shall not be used.
 - 2. Contract between petitioner and a waste disposal company.
 - 3. Letter from adjacent property owners permitting use of restroom facilities and RV.
- k. No alcoholic beverages shall be permitted without prior approval of the parish council.
- l. All structures used in connection with the administrative permit shall be removed ten days after expiration of administrative permit.

(40) *Townhouses.*

- a. These regulations are for townhouses which are permitted in an A-6 district only.
- b. In no case will the density be greater than that allowed in the district where townhouses are to be constructed. However, substandard lots of record may be developed containing an area of not less than 2,000 square feet per unit.
- c. Building frontage, measured at a building line, for individual units of a townhouse may not be less than 15 feet. Lot width for end units shall be adequate to provide required front and side yard for the district in which the townhouses are located.
- d. For the purpose of the side yard regulation, a townhouse building shall be considered as one building on one lot with side yard required for end units only. Townhouses with three or more units, where the side yard is adjacent to a single family residential district, shall not be less than 15 feet.
- e. The yard required for townhouses shall be as required for the district in which they are being constructed.
- f. A detached garage, carport or other accessory building shall be permitted in the required rear yard on a lot occupied by a townhouse, but in no instance shall be permitted in any other required yard area on the lot.
- g. No more than eight dwelling units shall be included in any one townhouse building.
- h. The facades of dwelling units in a townhouse shall be varied by changed front yards of not less than three feet and variation in materials or design so that no more than two abutting units will have the same front yard depth and the same or essentially the same architectural treatment of facades and roof lines.

- i. Required off-street parking space of two spaces per dwelling unit must be provided on the lot or within 150 feet of the lot in any permitted area and cannot occur in the required front yard.

(41) *Truck stops, railroad terminals, bus terminals and other transportation-related uses.*

- a. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 - 1. Location of all structures on site, including proposed structures.
 - 2. A minimum of 20 percent landscaped areas shall be required based on the gross square footage of the first story of all structures on site or as determined by the department of planning and development.
 - 3. Proposed traffic movements and points of ingress and egress.
 - 4. Location of adjacent land uses.
 - 5. Location and coverage of lighting, signage and parking lots.
 - 6. Approved landscape plan.
 - 7. Additional information shall be submitted as determined by the department of planning and development.
- b. Applicant shall indicate present need for this use based upon the location of existing facilities and market demand.
- c. The proposed facility shall not create a traffic or safety hazard, or adversely affect the existing or logical future growth of the surrounding neighborhood.
- d. Hours of operation shall conform to existing patterns established in the neighborhood.
- e. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.
- f. The design of all structures and signage, including materials, textures and colors, shall be harmonious with the surrounding neighborhood.

(42) *Warehouses, distribution centers and similar storage facilities.*

- a. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.
- b. A minimum of 20 percent landscaped areas shall be required based on the gross square footage of the first story of all structures on site or as determined by the department of planning and development.
- c. Any fleet storage of vehicles utilized in connection with this use shall be screened by a six-foot high screen of either 100 percent opaque nonliving material or 70 percent opaque evergreen plants or as determined by the department of planning and development.

(43) *Towers.*

- a. *Permitted.* Towers may be permitted in the following, subject to the applicable minimum standards:
 1. On property owned by the parish, provided, however, that the parish shall authorize the application and use of parish property after the applicant executes a lease agreement acceptable to the parish. The parish shall have no obligation whatsoever to execute such lease even if the applicant can meet the criteria set forth herein.
 2. Towers may be allowed in the following zoning districts, subject to the applicable minimum standards: NC-5, NC-6, all PBC districts, HC districts, I districts, MD districts, PF districts, ED districts, AT districts and the RBG Riverboat Gaming District.
- b. *Minimum standards.* Every tower must meet the following minimum standards:
 1. Prior to the issuance of a building permit, a site development plan shall be presented for approval to the department of planning and development. Each application for a proposed tower shall include all requirements for site development plan approval. The director of planning and development may at the time of application waive all or some of these provisions for stealth towers which are designed to emulate existing structures already on the site, including, but not limited to, light standards or power poles; or for co-location sites with two or more carriers.
 2. A statement shall be submitted, prepared by a professional registered engineer licensed to practice in the state, which through rational engineering analysis certifies the tower's compliance with applicable standards as set forth in the building code and any associated regulations; and describes the tower's capacity, including an example of the number and type of antennas it can accommodate. No tower shall be permitted to exceed its loading capacity. For all towers attached to existing structures, the statement shall include certification that the structure can support the load superimposed from the tower. All towers shall have the capacity to permit multiple users; at a minimum, monopole towers shall be able to accommodate two users and at a minimum, self-support/lattice shall be able to accommodate three users.
 3. Height/setbacks and related location requirements shall be as follows:
 - (i) The height of a tower shall not exceed 250 feet. Tower height shall be measured from the crown of the nearest public street.
 - (ii) Towers, not located on parish owned property, shall be setback from the property line a distance equal to the height of the tower or shall conform with the setbacks established from the underlying zoning district, whichever is greater.

- (iii) Monopole or lattice towers shall not be located within 750 feet of any existing monopole, lattice or guyed tower.
 - (iv) All buildings and other structures to be located on the same property as a tower shall conform with the setbacks established for the underlying zoning district.
- c. *Buffering.*
 - 1. Where a tower site abuts a single family or duplex residentially zoned parcel, or an industrially zoned parcel abutting anything but industrial, the planting area shall be a minimum of 25 feet in depth. The planting area shall contain a minimum of one class C tree (see definition) for every ten feet of lot perimeter with a minimum height of four feet tall. Additionally, an eight-foot opaque fence with one vine per ten feet of fence or a six-foot fence with 70 percent opaque screen of evergreen shrubs shall be provided.
 - 2. Where a tower site abuts a nonresidentially zoned parcel, the planting area shall be a minimum of five feet in depth. The planting area shall contain a minimum of one class C tree (see definition) for every 30 feet of lot perimeter with a minimum height of four feet tall. Additionally, an eight-foot opaque fence or a six-foot fence with 70 percent opaque screen of evergreen shrubs shall be provided.
- d. *Equipment storage.* Mobile or immobile equipment not used in direct support of a tower facility shall not be stored or parked on the site of the tower, unless repairs to the tower are being made.
- e. *Removal of abandoned or unused facilities.* All abandoned or unused tower facilities shall be removed by the tower owner/operator within 180 days of the cessation of use, towers being utilized for other purposes, including, but not limited to, light standards and power poles, may be exempt from this provision. The director of planning and development may extend this time period or waive this requirement if it is shown that the facility has not been abandoned.
- f. *Right of parish.* The parish shall have the right to cause the removal of the facility, including BTS (base transceiver station) and all other items of property related to the tower and its function, in the event of discontinuation of use beyond 180 days. The property owner shall be responsible for and shall reimburse the parish for any and all direct and indirect costs associated with such action, including, but not limited to, attorneys' fees, demolition and disposal costs, overhead, and insurance.
- g. *Signs and advertising.* The use of any portion of a tower for signs or advertising purposes, including company name, banners, streamers, etc., shall be strictly prohibited. This does not apply to an installation where an outdoor advertising sign is used as the base foundation for an antenna installation.

- h. *Accessory buildings or structures.* All accessory buildings or structures shall meet all building design standards as listed in this Code, and be in accordance with the provisions of the Southern Building Code. All accessory buildings or structures shall require a building permit issued by the department of permits.
- i. *Colors.* Except where superseded by the requirements of other parish, state, or federal regulatory agencies possessing jurisdiction over towers, towers or monopoles shall be constructed of galvanized or painted metal. Painted metal shall be designed to blend in with pale blue sky or surrounding environment.
- j. *Application.* Each application to allow construction of a tower shall include a statement that the construction and placement of the tower:
 - 1. Is in compliance with Federal Aviation Administration (FAA) regulations;
 - 2. Is in compliance with the rules and regulations of other federal or state agencies that may regulate tower siting, design and construction;
 - 3. Is in compliance with current radio frequency emissions standards of the Federal Communications Commission (FCC); and
 - 4. Will not interfere with any public safety communications and the usual and customary transmission or reception of radio and television service enjoyed by adjacent residential and nonresidential properties.
- k. *Red obstruction lighting system.* A red obstruction lighting system will be utilized on all towers, and support structures more than 165 feet (46 m) AGL and less than 200 feet (61 m) in height, as follows:
 - 1. At least one red flashing beacon should be installed at the top of the structure in such a manner as to ensure an unobstructed view of one or more lights by a pilot;
 - 2. Two or more steady burning white lights should be installed on diagonally or diametrically opposite positions as a height equal to one-half of the total structure height;
 - 3. If a rod, antenna, or other appurtenance located on the tower, 20 feet or less in height, is incapable of supporting a red flashing beacon, then the beacon may be placed at the base of the appurtenance. If the mounting location does not allow unobstructed viewing of the beacon by a pilot, then additional beacons should be added;
 - 4. If a rod, antenna, or other appurtenance is located on the tower, and exceeding 20 feet in height, is incapable of supporting a red flashing beacon, a supporting mast with one or more beacons should be installed adjacent to the appurtenance. Adjacent installations shall not exceed the height of the appurtenance and shall be within 40 feet of the tip to allow the pilot an unobstructed view of at least one beacon.

- l. *Mosquito abatement district.* If a mosquito abatement district is established in an area with a tower that has been granted a waiver, the tower will have to comply with the lighting standards as established according to the parish lighting guidelines within six months of inclusion in the district.
- m. *Evidence of certified letter.* The applicant shall provide evidence that a certified letter has been sent to the applicable mosquito abatement district and the fixed base operator (FBO) for the Greater St. Tammany Airport and the Slidell Municipal Airport. The letter shall contain the exact location and height of the tower and shall be sent to be received prior to construction.
- n. *Guyed towers.* Guyed towers in excess of 50 feet in height are expressly prohibited.

(44) *Existing towers.*

- a. Notwithstanding the above provisions of this section, antennas shall be permitted uses if placed on existing towers with sufficient loading capacity after approval by the director of planning and development.
- b. Notwithstanding the above provisions of this section, towers in existence as of January 1, 1997, may be replaced with a tower of equal or less visual impact after approval by the director of planning and development. However, if the proposed new tower would not be consistent with the minimum standards under this section, replacement must be approved by the parish.

(45) *Antennas not located on towers.*

- a. *Permitted.* Antennas shall be permitted as follows: Stealth rooftop or building mounted antennas may be permitted as an accessory use in the following zoning districts: All NC districts, PBC districts, HC districts, I districts, MD districts, PF districts, ED districts, AT districts and the RBG district.
- b. *Minimum standards.* Building or rooftop antennas shall be subject to the following minimum standards:
 1. *Commercial advertising.* No commercial advertising shall be allowed on an antenna, unless such antenna is actually located on an existing, approved sign.
 2. *Signals, lights, illumination.* No signals, lights, or illumination shall be permitted on an antenna, unless required by the Federal Aviation Administration.
 3. *Unmanned equipment.* Any related unmanned equipment building shall not contain more than 750 square feet of gross floor area or be more than 14 feet in height.

4. *Roof area.* If the equipment building is located on the roof of the building, the area of the equipment building shall not occupy more than 25 percent of the roof area.
- c. *Application.* Each application shall contain a drawing and description of the antenna including, but not limited to, colors and screening devices. This shall be subject to administrative approval for consistency with the definition of stealth facility.

(46) *Co-location.*

- a. Notwithstanding any other provision of this article, to minimize adverse visual impacts associated with the proliferation and clustering of towers, co-location of facilities on existing or new towers shall be encouraged by:
 1. Issuing permits only to qualified shared facilities at locations where it appears there may be more demand for towers than the property can reasonably accommodate; or
 2. Giving preference to qualified shared facilities over other facilities in authorizing use at particular locations.
- b. For a facility to become a qualified shared facility, the facility owner must show that:
 1. The facility is appropriately designed for sharing; and
 2. The facility owner is prepared to offer adequate space on the facility to others on fair and reasonable, nondiscriminatory terms.
- c. Co-location of communications antennas by more than one provider on existing or new towers shall take precedence over the construction of new single-use telecommunications towers.
- d. For any tower approved for shared use, the owner of the tower shall provide notice of the location of the tower to the parish.
- e. When seeking approval of a new tower location, the applicant must provide the following information to the department of permits and regulatory:
 1. The location of all towers, buildings, or other structures which could serve as a platform for antennas within a two mile radius of the proposed tower site.
 2. A full explanation outlining the reasons that the proposed antennas cannot be placed on the towers, buildings, or structures listed. This explanation must be given on each structure individually.
 3. If the inability to secure a suitable lease arrangement prevents an antenna from being placed upon an otherwise suitable tower, building or structure, the points of disagreement, including, but not limited to, proposed lease payments, must be provided to the zoning commission.

4. Prior to the issuance of a permit for a new tower or co-location, each carrier must provide intermodulation studies by a licensed engineer analyzing the proposed transmission of the carriers and the existing transmissions of public agencies. This study must demonstrate and certify that the carriers signals will not interfere with the signals of the public agencies.

(47) *Transfer of use.*

- a. *Approved telecommunications towers or antennas.* Approved telecommunications towers or antennas may be transferred to successor and assigns of the approved party, subject to all of the conditions which apply to initial approval. Transfer of ownership of towers shall be reported to the department of permits within 30 days of transfer.
- b. *Annual inspections.*
 1. All towers shall be inspected for compliance with applicable parish regulations on an annual basis according to a schedule developed by the department of planning and development. An inspection fee will be charged in accordance with chapter 2, article XVII. The owner/agent shall provide a current structural evaluation of the tower, upon request of the director of planning and development.
 2. Failure to pay for inspection or the failure of any tower to comply with applicable parish regulations may result in fines of \$100.00 per day.

(48) *Community sewerage systems.*

- a. Whenever wastewater treatment facilities or public utility facilities are approved within a land use district established in and subject to the provisions of these regulations, the subject wastewater treatment facility or public utility facility may be approved for expanded use by an administrative permit, but only if all of the following conditions are fulfilled.
 1. The wastewater treatment facility exists and is functional at the time the application for an administrative permit is submitted to the zoning administrator, but that a public utility facility other than a wastewater treatment facility shall be eligible to receive an administrative permit irrespective if such exists or is proposed.
 2. As such relates to the design, construction, and operation of the wastewater treatment facility or public utility facility, all regulatory approvals and authorizations have been issued by appropriate and applicable state and parish regulatory agencies.
 3. The owner and/or operator of the wastewater treatment facility or public utility facility possesses a valid franchise agreement consistent and/or in conformance with the provisions of R.S. 33:4064.6(B).

4. The wastewater treatment facility or public utility facility, and any and all associated or adjunct elements of the subject sewerage system, have the actual and/or anticipated capacity which will be required to realize the peak sewage demand of its actual, anticipated, intended, and/or proposed use, and the operation and maintenance of which are likely to be in accordance and compliance with all regulatory requirements; all as determined and affirmed by the environmental services commission.
- b. Public utility facilities may include a limited wastewater treatment facility, but not a regional wastewater treatment facility, whenever public utility facilities are authorized within a zoning district.
- c. An administrative permit shall not be approved whenever the subject wastewater treatment facility is a regional wastewater treatment facility located within a district other than an industrial or institutional district.
- d. Public utility facilities may include a limited wastewater treatment facility or a regional wastewater treatment facility whenever public utility facilities are authorized as a permitted use within the subject district.
- e. As such relates to any administrative permit which is authorized for the purposes herein, whenever facts and circumstances exist that, in the opinion of the zoning administrator, would merit the imposition of other relevant and reasonable terms and conditions, the zoning administrator is hereby authorized to impose any such term or condition in the administrative permit and/or as a prerequisite to the issuance of the administrative permit.

(49) *Adult uses.*

- a. The distance between any adult use and any residential district or dwelling shall be a minimum of 1,000 feet measured in a straight line, without regard to intervening structures, from the nearest point of the property line of the residential district or dwelling to the nearest point of the property line of the adult use or the property on which it is situated, if it is one of several business establishments on the property, whichever is greater.
- b. The distance between any two adult uses shall be a minimum of 1,000 feet measured in a straight line, without regard to intervening structures, from the closest property lines of each adult use.
- c. The distance between any adult use and any existing school, child care center, church or place of worship, park or recreational area, public library, museum, or community center shall be a minimum of 1,000 feet measured in a straight line, without regard to intervening structures, from the nearest point of the property

line of the adult use to the nearest point of the property line of the school, child care center, church or place of worship, park or recreational area, public library, museum, or community center.

- d. The adult use shall comply with chapter 6 and chapter 28 of the Parish Code of Ordinances, and all necessary state and parish licenses and/or permits as required.
- e. Hours of operation shall conform to established uses in the neighborhood and may be adjusted by the zoning commission and/or the parish council.
- f. Live entertainment, when expressly authorized and permitted, will only be allowed when it does not adversely affect the surrounding neighborhood because of noise, crowd, and other factors.
- g. The use of neon or other similar lighting technology exposed to the exterior shall be limited to one sign unit which conforms to all other code signage requirements, is directly related to the subject facility, and is not advertisement for products or services provided or sold in the facility.
- h. The premises on which the adult use is located and the public rights-of-way within 100 feet of such facility must be maintained in a clean and orderly manner.
- i. The premises in which an adult theater establishment is located shall operate only as an adult theater and shall not contain or offer any items or services consistent with that of an adult cabaret, adult store, massage parlor, or escort agency. Any of the aforementioned businesses shall constitute a separate adult use and must independently conform with all of the requirements of this section.
- j. Adult theaters offering viewing of film, photograph material or live performances to audiences smaller in size than five persons per seating, are expressly prohibited.

(50) *Methadone centers and clinics.*

- a. The distance between any methadone centers and clinics and any residential district or dwelling shall be a minimum of 1,000 feet measured in a straight line, without regard to intervening structures, from the nearest point of the property line of the residential district or dwelling to the nearest point of the property line of the said use or the property on which it is situated, if it is one of several business establishments on the property, whichever is greater.
- b. The distance between any methadone center/clinics and any existing school, child care center, church or place of worship, park or recreational area, public library, museum, or community center shall be a minimum of 1,000 feet measured in a straight line, without regard to intervening structures, from the nearest point of the property line of the methadone center or clinic to the nearest point of the property line of the school, child care center, church or place of worship, park or recreational area, public library, museum, or community center.

- c. The distance between any methadone center or clinic and any other methadone center or clinic shall be a minimum of 1,000 feet measured in a straight line, without regard to intervening structures, from the nearest point of the property line of the methadone center or clinic to the nearest point of the property line of the second methadone center or clinic.
- d. Hours of operation shall conform to established uses in the neighborhood and may be adjusted by the zoning commission and/or the parish council.

(51) *Composting facilities.*

- a. The distance between any composting facility and any residential dwelling shall be a minimum of 1,000 feet measured in a straight line, without regard to intervening structures, from the nearest point of the property line of the residential district or dwelling to the nearest point of the property line of the said use or the property on which it is situated, if it is one of several business establishments on the property, whichever is greater.
- b. Hours of operation shall conform to established uses in the neighborhood and may be adjusted by the zoning commission and/or the parish council.
- c. Any and all additional conditions, as determined by the zoning commission, placed upon the specific operation to mitigate potential negative impacts of the operation.

(52) *Bed and breakfasts.*

- a. A site and landscape plan shall be submitted to the department of planning and development. The plan shall indicate, at a minimum:
 - 1. Location of all structures on site, including proposed structures.
 - 2. Drawing of residence interior and including the number of room and area to be used for the bed and breakfast.
 - 3. Proposed traffic movements and points of ingress and egress, including parking and site triangle.
 - 4. Drawing showing the location of proposed sign, setback from property line and dimensions.
- b. Where a bed and breakfast is allowed, the proposed use shall meet the following criteria:
 - 1. A bed and breakfast facility must be in a one-family dwelling.
 - 2. The exterior of the building shall maintain a residential appearance.
 - 3. The facility shall be the residence of the operator, who is the owner or lease holder of the building.

4. Rooms may not be rented for more than seven consecutive days, and no more than 15 days per person in any 30-day period.
5. A morning meal must be served on premises and included within the room charge for guests of the facility and shall be the only meal provided.
6. The facility must meet applicable parish and state health, safety (including, but not limited to, the uniform building code requirements concerning maximum occupancy) and liability requirements.
7. One off-street parking space will be required for each rented bedroom, in addition to the number of spaces required for each dwelling unit.

(53) *Agricultural and decorative ponds.*

- a. A site plan shall be submitted to the department of planning and development. The plan shall indicate, at a minimum:
 1. Purpose and use of the pond.
 2. Location, size, setbacks and general shape of the pond.
 3. Indicate whether or not dirt will be removed from the site.
 4. Proposed hours and days of operation of heavy equipment.
 5. Indicate time frame to complete the pond.
 6. Show where the dirt removed from the pond will be deposited on site and how it will be used.
 7. Section through the pond showing depth and slopes of pond and levee. Depth of the pond must show the depth measurements at different intervals around the pond.
 8. Indicate with arrows, the general drainage patterns onto and off the site.
- b. The size of the pond shall not exceed one acre on site of five acres or less.
- c. The pond shall be setback a minimum of 25 feet from the front, sides and rear property lines.
- d. The property shall be kept posted with warning signs set no further than 50 feet apart and clearly visible, indicating that the property is an excavation site.
- e. The perimeter of the land containing the excavation shall be fenced by a wire mesh fence or as determined by the department of planning and development of not less than four feet in height and all gates or entrances shall be locked when not in use.
- f. The final depth of the pond shall not exceed 15 feet maximum.
- g. Sloped sides for fishing and swimming at a 2:1 ratio.
- h. The pond shall be inspected and monitored six months after completion.

- i. Road bond must be secured prior to excavation, if required by the parish department of public works.
- j. Plot plan review and approval required from the department of engineering.

(54) *Garage sales.*

- a. *Definition.* The term "garage sale" means the occasional, nonbusiness, public sale of secondhand household goods and other secondhand goods incidental to household use. The term "garage sale" shall include any yard sale, home sale, patio sale or any other sale similarly conducted.
- b. *Frequency; duration.* Not more than one garage sale may be conducted by any person or upon any lot or parcel of land during any period of three consecutive months. Such garage sales shall not be conducted for longer than two consecutive days.
- c. *Other sales prohibited.* The sale of personal property to the general public by means of a garage sale on any residentially zoned real property is prohibited except as permitted by this section.
- d. *Exemptions.* The provisions of this section shall not apply to the following:
 - 1. Charitable or religious organization's occasional sales when the proceeds from such sales are used solely for charitable or religious purposes.
 - 2. Sales conducted pursuant to process or order of any court of competent jurisdiction.

(55) *Commercial excavation.* The following standards shall apply to all newly permitted commercial excavation sites and only those previously existing sites requiring a state or parish permit to expand beyond a currently permitted commercial excavation site or to reactivate a commercial excavation operation when the permit has expired or lapsed due to the cessation of operations (i.e., an abandoned site). A previously existing site shall not be considered a newly permitted commercial excavation site in those cases where the renewal of a permit for an ongoing operation of the site is required, such as an annual renewal, where the form of the permit is changed, which necessitates the issuance of a new permit, or where legislation is adopted requiring a state-wide mining permit, or additional permitting, for the ongoing operation.

- a. *Site plan.* A site plan shall be submitted to the department of planning and development. The plan shall indicate, at a minimum:
 - 1. Purpose and use of the excavation.
 - 2. Location, size, setbacks and general shape of the excavation. Permanent excavation boundary markers shall be placed and GPS coordinates of the markers provided.

3. Hours and days of operation of heavy equipment, subject to approval by the director of planning and development. The determination is to be made based on consideration of the potential adverse impacts of the operation (i.e., noise, dust and traffic) in relation to the proximity of surrounding land uses that could reasonably be expected to be adversely affected thereby.
 4. Indicate time frame to complete the excavation.
 5. Show where the excavated material removed the excavation process will be deposited on site and how it will be processed, if applicable.
 6. Section through the excavation showing depth and slopes of excavation and levee. Depth of the excavation must show the depth measurements at different intervals around the excavation.
 7. Indicate with arrows, the general drainage patterns onto and off the site.
 8. Submit a copy of all plans and documents that are required to be submitted by any state or federal agency or department prior to commencing the proposed commercial excavation activities.
- b. *Criteria.*
1. All commercial sand or gravel extraction operations shall be set back a minimum of 100 feet from the front, sides and rear property lines of the site.
 2. On sites where any property line abuts a state natural and scenic river, a wildlife management area, or the Tammany Trace, the commercial sand or gravel extraction operation shall be set back a minimum of 300 feet from the abutting property line.
 3. On sites which are traversed by a state natural and scenic river, the commercial sand or gravel extraction operation shall be set back 300 feet from the ordinary low water mark of a designated Natural and Scenic River. On sites traversed by the Tammany Trace, the commercial sand or gravel extraction operation shall also be set back a minimum of 300 feet from the centerline of the Tammany Trace.
 4. The property shall be kept posted at all access points and on road frontage with warning signs set no further than 100 feet apart and clearly visible, indicating that the property is an excavation site.
 5. Sloped sides at a 3:1 ratio.
 6. The excavation shall be inspected and monitored in six-month intervals during operations and after final completion.
 7. A road bond must be secured prior to excavation, if required by the parish department of public work.

8. A plot plan review and approval is required from the parish department of engineering.

c. *Variance.*

1. A variance of the 300-foot setback applicable to a wildlife management area may be granted by the director of parish development after consulting with the parish engineering director and the parish environmental services director in cases where it can be objectively demonstrated that the proposed activity will not adversely impact the wildlife management area.
2. Any application for such a variance shall include any supporting engineering, scientific, environmental, ecological, hydrological or other evidence the applicant deems sufficient to grant said variance.
3. Upon submission of an application for a variance, the applicant shall send written notifications of said application by certified mail to all abutting property owners, the directors of any adjoining wildlife management areas and to the parish council.
4. Under no circumstances shall any variance be granted that would reduce the setback applicable to a wildlife management area to less than a minimum of 100 feet.
5. Notice of the filing of the application for a variance shall be published once in the official journal of the parish and no decision by the director of parish development shall be rendered until 15 days have expired from the date of the publication.
6. Any person aggrieved by a decision of the director of parish development regarding a variance may appeal said decision by filing with the director of parish development and with the parish board of adjustments a notice of appeal specifying the grounds thereof within 30 days of said decision.
7. Any person aggrieved by a decision of the parish board of adjustments may appeal said decision by filing a petition with the 22nd Judicial District Court within 30 days of the filing of said decision in the office of the parish board of adjustments.

(56) *Temporary residences.*

- a. A site plan shall be submitted to the department of planning and development. The plan shall indicate the location and size of the permanent residence and the temporary residence and the setbacks.
- b. A building permit for the permanent residence to be constructed on the property must be applied for at the same time as the temporary residence.

- c. The permit for a temporary residence will be valid for a period of not more than 12 months from the date of issuance. However, the permit may be extended if circumstances warrant.
 - d. The sewerage and water facilities shall meet all applicable standards as per the environmental services commission (ESC) for both the temporary and permanent residences.
 - e. The temporary residence shall be disconnected from all utility services prior to obtaining a final occupancy permit for the permanent residence.
 - f. The temporary residence shall be removed from the site no later than 30 days after obtaining a final occupancy permit for the permanent residence.
 - g. The temporary residence permit is only valid for the applicant filing for said permit and is not transferable.
- (57) *Convenience stores (with gas)*. The sale of gas and other fuel shall be an accessory use permitted in the zoning district when the hereinbelow criteria of subsection (54)(a) are met:
- a. In the HC-2 Highway Commercial District, a minimum parcel size of 40,000 square feet is required for such use. On parcels that are a minimum of 40,000 square feet, but less than 60,000 square feet in size, the number of fuel pumping units shall be limited to a total of four units. For purposes of this provision, a fuel pumping unit, also commonly known as a gas pump, is defined as a unit that is capable of dispensing gas or other fuel to no more than two vehicles at the same time, and only when each vehicle to be fueled is positioned on opposite sides of the pump. On parcels that are a minimum of 60,000 square feet but less than 90,000 square feet in size, the number of fuel pumping units shall be limited to a total of six units. On parcels that are 90,000 square feet or greater in size, the number of fuel pumping units shall not exceed eight units.
 - b. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 - 1. The location of each pumping unit. On all parcels, the nearest pumping unit shall be set back a minimum distance of 50 feet, in addition to any street planting area requirement, from any highway, road or street right-of-way.
 - 2. Location of all structures on site, including proposed structures.
 - 3. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 - 4. Adjacent land uses.
 - 5. Approved landscape plan.

6. Location and coverage of lighting, signage and fencing, including materials, textures and colors to be used on all surfaces.
7. Additional information shall be submitted as determined by the department of planning and development.
- c. If this use abuts any residential district or use, a transitional yard shall be provided equal to the side or rear yard requirements of the residential zoning classification.

(58) *Portable storage containers used for storage.*

- a. Prior to the placement of a portable storage container the property owner must obtain a building permit.
- b. The combined number of containers on any one parcel shall be limited to two storage containers.
- c. The use of portable storage containers shall be a secondary use, requiring that a primary, permanent structure be located on the same parcel.
- d. The use of the portable storage container must be for the sole benefit of the business or primary, permanent structure located on the same parcel.
- e. A portable storage container, shall be used for storage purposes only. No occupancy or other use of the storage container shall be allowed.
- f. Sale or rental of containers. Sales and rentals of portable storage containers shall be considered an allowed use only in the I-1, I-2, I-3 and I-4 zoning districts.
- g. A portable storage container on any parcel may not occupy any parking spaces on that parcel that are required as parking.
- h. All portable storage containers must meet all minimum setback requirements.
- i. Stacking of portable storage containers is prohibited in all zones except an I-1, I-2, I-3 and I-4 zoning districts, industrial zone.
- j. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 1. Location of all structures on site, including proposed structures.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 3. Landscaping. All landscaping shall be in compliance with the provisions of article VI, division 2 of these regulations.
 4. Signage. All signage shall be in compliance with article VI, division 3 of these regulations.
 5. Lighting. All site lighting shall be in compliance with article VI, division 4 of these regulations.

6. Parking/loading. All parking and loading will be in compliance with article VI, division 8 of these regulations.
7. Additional information shall be submitted as determined by the department of planning and development.

(59) *Outside display area of pre-assembled accessory building, pool and playground equipment.*

- a. Display or storage of building, pool or playground equipment is prohibited within the required parking area and within the front or side landscaping buffers.
- b. Display of portable storage containers is not allowed on the site.
- c. A site plan shall be submitted to the department of planning and development prior to issuance of a building permit. This plan shall indicate, at a minimum:
 1. Location of all structures on site, including proposed structures.
 2. Proposed traffic movements and points of ingress and egress, including parking and site triangles.
 3. Landscaping. All landscaping shall be in compliance with the provisions of article VI, division 2 of these regulations.
 4. Signage. All signage shall be in compliance with article VI, division 3 of these regulations.
 5. Lighting. All site lighting shall be in compliance with article VI, division 4 of these regulations.
 6. Parking/loading. All parking and loading will be in compliance with article VI, division 8 of these regulations.
 7. Additional information shall be submitted as determined by the department of planning and development.

(Code 1998, app. C, § 8.01; Ord. No. 07-1548, § 8.01, 5-3-2007; Ord. No. 09-2169, 12-3-2009; Ord. No. 10-2219, 3-4-2010; Ord. No. 10-2290, 7-1-2010; Ord. No. 10-2366, 11-4-2010; Ord. No. 10-2407, 12-2-2010; Ord. No. 12-2682, 3-1-2012; Ord. No. 17-3659, exh. A(8.01), 1-5-2017)

Secs. 130-2113—130-2144. Reserved.

DIVISION 2. LAND-CLEARING PERMIT

Sec. 130-2145. General.

- (a) The purpose of this division is to:
 - (1) Promote the health, safety and general welfare of the public;
 - (2) Facilitate the creation of a convenient, attractive and harmonious community;

- (3) Conserve natural resources, including natural stream systems and wetlands which contribute to adequate air and water quality;
- (4) Prevent certain activities from resulting in adverse impacts to the surrounding community;
- (5) Conserve properties and their values;
- (6) Preserve the character of and area by preventing the harmful effects of prejudicial uses; and
- (7) Encourage the appropriate use of the land, including well-operated silviculture and forestry practices.

(b) Live oak and cypress trees six inches DBH (diameter breast height) and over shall not be removed or otherwise damaged by parties engaged in the operation of clearing land in the parish for any purpose whatsoever unless otherwise expressly permitted by the department of planning and development and/or in compliance with the provisions of article VI, division 2 of these regulations.

(c) A land-clearing permit shall be required by all parties engaged in land-clearing activities in the parish, as noted in subsection (d) of this section. This permit shall be issued by the department of planning and development.

(d) The fee for a land-clearing permit shall be \$150.00. All fees shall be paid at the time of application. Land-clearing permits shall be required for the following types of properties:

- (1) Properties fronting on arterials or collectors. All properties one acre in area or greater which are located within Wards 1, 3, 4, 7, 8, 9 or 10 and have frontage on roadway identified as an arterial or collector the adopted major corridor plan shall be required to file for and receive a land-clearing permit in accordance with this section.
- (2) Properties not located on arterials or collectors. All properties three acres in area or greater which are located within Wards 1, 3, 4, 7, 8, 9 or 10, but do not have frontage on roadway identified as an arterial or collector, as identified on the adopted major corridor plan, shall be required to file for and receive a land-clearing permit in accordance with this section.
- (3) Properties located inside of Wards 2, 5 or 6. All properties five acres in area or greater which are located inside of Wards 2, 5 or 6 shall be required to file for and receive a land-clearing permit in accordance with this section.
- (4) All properties zoned for commercial, industrial, multifamily or institutional uses shall be required to file for and receive a land-clearing permit in accordance with this section. This requirement shall apply to all parcels within commercial subdivisions. At no time

shall any permit other than an approved land-clearing permit from the department of planning and development constitute approval to clear a parcel within a commercial or industrial subdivision.

- (5) All commercial, institutional, industrial, or multifamily components of any PUD zoning designation shall be required to file for and receive a land-clearing permit in accordance with this section. At no time shall any permit other than an approved land-clearing permit from the department of planning and development constitute approval to clear a parcel within a PUD subdivision.
- (6) All properties that, regardless of zoning classification, approval for a commercial, institutional, industrial, or multifamily development shall be required to file for and receive a land-clearing permit in accordance with this section.

(e) As used in this section, land-clearing, timber harvesting, tree farming and agriculture, shall be defined as follows:

Agricultural clearing is the removal of trees from a parcel of land designated for agricultural purposes, including farming, dairying, pasturage, agriculture, horticulture, floriculture, viticulture and animal and poultry husbandry and the necessary accessory uses for packing, treating, or storing the produce; provided, however, that the operation of any such accessory uses shall be secondary to that of the normal agricultural activities.

Clear cut harvesting is the removal of all trees from a parcel or plot of land.

Land-clearing is the removal of trees, timber, or underbrush, from a tract of land so as to change the land from an agricultural or forestry use to development of any kind.

Timber harvesting is the removal of all or part of merchantable standing timber as part of an ongoing timber producing operation or business which is not part of any development.

Tree farming is an active agricultural production land use which involves the harvesting of timber as a crop to be replenished and in which clear cutting is prohibited unless immediate reforestation is implemented in accordance with recognized practices for active tree farm forest management. This provision includes timber thinning and selective harvesting where reforestation may not be required or desirable.

(Code 1998, app. C, § 8.02(A); Ord. No. 07-1548, § 8.02(A), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2146. Application information.

All applicants for land-clearing permits shall submit to the department of planning and development:

- (1) Name, address and phone number of contractor.
- (2) Name, address and phone number of property owner of the site.

- (3) Survey indicating scale, date and north arrow.
 - (4) Copy of recorded deed, title or cash sale and legal description.
 - (5) A statement from the property owner acknowledging his understanding of the applicable local regulatory standards and that liability for compliance with those standards applies to both the landowner and the contractor. This statement is not intended to create a solidity or joint liability between landowner and contractor, where such solidity or joint liability does not exist.
 - (6) Site plan of the property which shall include the following:
 - a. Property boundaries.
 - b. Buffer areas and stream-side management zones, when required. For all development clearing permits, buffer areas shall be documented by an official tree survey of all trees to be preserved within the required buffer areas. Such survey shall be prepared by a licensed arborist, landscape architect, or landscape contractor.
 - c. Access points to public roads. Additional access points required after commencement of logging activities shall be allowed upon notification to the department of planning and development, and additional warranty provisions shall be met, if required. Access points shall not be in excess of 150 feet in width, unless otherwise approved.
 - d. Surrounding land uses.
 - (7) Estimated starting date.
 - (8) Estimated completion date.
- (Code 1998, app. C, § 8.02(B); Ord. No. 07-1548, § 8.02(B), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2147. Preparation project implementation, and restoration of lands.

(a) All land-clearing operations, including skidding, yarding, trimming, loading and equipment operation or storage shall be on the site. No operation other than hauling shall take place on parish right-of-way. An entrance roadway to the site shall be constructed to facilitate on site operation. A culvert shall be placed in the parish roadside ditch under this entrance roadway, minimum length 40 feet, and a minimum diameter of 18 inches or greater if determined by the department of public works staff, of sufficient strength as not to bend or collapse while in use. The material used in the construction of this entrance roadway shall be of such quality as to prevent damage to the shoulder or surface of the parish road being entered. Any deviation from this procedure shall require prior approval of the department of public works.

(b) Three working days prior to beginning work and prior to obtaining a land-clearing permit, the contractor shall request a pre-condition inspection by department of planning and development staff. Preparation of the site for the pre-condition inspection shall include

demarcating the areas to be preserved as uncut buffers. At no time shall a land-clearing permit be issued without the completion of such inspection by department of planning and development staff. Within ten days of completion of the clearing operation, a post-condition inspection shall be requested.

(c) All parties conducting land-clearing activities shall exercise due and reasonable caution when traversing public rights-of-way and public lands and water bodies as to minimize disturbance to same. All public rights-of-way, public properties, existing and recognized natural drainage and engineered drainage shall be restored to pre-existing condition with the cessation of the land-clearing activity.

(d) All land-clearing and timber harvesting activities shall be carried out in accordance with any and all applicable best management practices as provided in the current version of "Recommended Forestry Best Management Practices for Louisiana," published by the state department of environmental quality.

(Code 1998, app. C, § 8.02(C); Ord. No. 07-1548, § 8.02(C), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2148. Warranty provisions.

(a) Any person who obtains a land-clearing permit shall post security with the department of public works in an amount determined by the department of public works for the repair of any parish roads, parish rights-of-way, parish lands or water bodies and/or drainage easements. This security shall not be released until all provisions of all aspects of the project are found to be in compliance with these regulations upon inspection by parish personnel.

(b) The security required by this section shall be either a funded letter of credit or a bond recognized by the federal register with the parish listed as obligee. An annual blanket security must be provided to ensure that the integrity of the road and/or drainage structure is retained, as per section 35-35, road and drainage security, of the St. Tammany Parish Code of Ordinances. In the event that the above security has to be called for any reason, a new security will be established.

- (1) The amount of security shall be determined by the public works director, public works engineer and public works right-of-way section. The amount of security shall be determined by the condition of the road both surface and sub-base, the age of the road, the amount cut and/or hauled off, the length of the roads, the weather, the location and any other factors that may arise. The amount shall not be less than \$10,000.00 and not greater than the previous year's cost of reconstruction of a road to ensure the integrity of the road and/or drainage structures.
- (2) All existing permits shall be forfeited and no new permits will be issued until new security is posted and prior damage claim has been resolved. Applicants shall be responsible only for damage to roads and/or bridges caused directly by their use thereof.

(c) The security required by this section may be posted by any interested party, including, but not limited to, the landowner, logging contractor, or timber purchaser.

(d) The security posted by the applicant shall remain in effect for one year. Each permit issued shall be applied to the security posted. Upon notification by the applicant that work is complete, the department of public works shall inspect the site and if acceptable, certificate of completion shall be issued and recorded accordingly on security.

(e) Enforcement. It shall be the responsibility of either the department of public works, department of engineering, or department of planning and development to review and inspect the site after completion. In the event that damage is caused to the right-of-way through activity of the logging operation or their agents, the department of public works shall notify the logging company in writing by certified letter. The cost of repairing the damage shall be the sole responsibility of the logging company. Approval shall be required from the department of public works of all specifications, as well as, of the contractor who will perform any corrective action. A reasonable time frame shall be agreed upon by the parish and the logging company for corrective work to be completed.

(f) Procedure for enforcement of security. In the event a logging operation causes damage to parish property resulting in the parish having to take corrective action, at the completion of all such corrective work, the parish will present the invoice for said corrective work to the responsible logging operation, and the logging operation shall have 30 days from its receipt to pay said invoice. In the event the logging operation fails to pay said invoice within the 30 days, the parish may, at its option, take any appropriate action to execute on the security required by subsection (d) of this section.

(Code 1998, app. C, § 8.02(D); Ord. No. 07-1548, § 8.02(D), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2149. Monitoring.

It shall be the responsibility of the department of planning and development or the department of engineering to review and inspect the site prior to the commencement of any land-clearing activity and upon the cessation of land-clearing activity and vacation of the site within a period of ten days of the project completion as noted on the application or notice of termination to ensure compliance with this chapter. The department of planning and development shall maintain a land-clearing permit file on each application inclusive of written field reports. Said files shall be made available to the public within 48 hours, upon prior written notice.

(Code 1998, app. C, § 8.02(E); Ord. No. 07-1548, § 8.02(E), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2150. Completion.

Upon completion of clearing and cleanup of parish roads, parish rights-of-way, parish lands, water bodies and/or drainage easements, the applicant shall notify the department of planning and development for the final inspection within ten working days.

(Code 1998, app. C, § 8.02(F); Ord. No. 07-1548, § 8.02(F), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2151. Expiration.

(a) Permits issued under this section shall be valid for a period of one year after which time the permit automatically expires. After this period of time all permitted activities must be complete and a compliance inspection made by the department of planning and development.

(b) Permits may be extended for one year if the applicant files a notice of continuation of the activity with the department of planning and development. Written notice of continuation of land-clearing or timber harvesting activities must be given by the applicant not less than 45 days of the termination of the original permit. Such notice shall extend the permit for a period of one year. An additional \$150.00 permit fee shall be required.

(Code 1998, app. C, § 8.02(G); Ord. No. 07-1548, § 8.02(G), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2152. Violations.

(a) Any person owning a legal interest in a property and/or any contractor involved in the removal of trees from a property, who is violating any of the provisions of this division shall be guilty of a misdemeanor and, upon first conviction, shall be punished by a maximum fine of \$1,500.00. The second offense shall consist of a maximum fine of \$3,000.00 and the revocation of all permits currently active. The third offense shall result in a maximum fine of \$5,000.00, the revocation of all permits currently active, and the applicant and landowner will for the period of two years be subject to a 100 percent increase in the above stated security requirements. The fourth offense shall result in a maximum fine of \$10,000.00 and/or the revocation of all permits currently active and a five-year moratorium on the issuance of future permits for activity within the parish by the applicant or the landowner. Nothing herein contained shall prevent the parish from taking such other lawful actions as necessary to prevent or remedy the violation.

(b) In addition any person removing trees within the required buffers and/or any live oak trees without approval from the department of planning and development shall be subject to imposition of a maximum fine of \$225.00 per one inch DBH of tree removed. In addition, all live oak trees illegally removed shall be replaced with an equal number of inches of live oaks at a minimum of 3.5-inch caliper each on the site. Therefore, a 35-inch live oak tree would be replaced by planting ten 3.5-inch caliper live oaks on the same site.

(c) Any person owning a legal interest in the property upon which the removed trees are located and the contractor who was issued either the land-clearing permit or building permit for construction thereon shall be individually and separately subject to the penalties as set forth herein. In addition, any person other than those enumerated above found to have illegally removed a tree in violation of this division shall be subject to the penalties as set forth herein. It shall not be a defense to this section that the person owning any legal interest in the property upon which the tree is located or the contractor who was issued the tree removal permit or building permit for construction thereon did not have actual knowledge of the tree removal when the violation occurred.

(Code 1998, app. C, § 8.02(H); Ord. No. 07-1548, § 8.02(H), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2153. Exemptions.

The following are exempt from the provisions of this division: Golf courses and recreational facilities, when trees to be removed are located within the boundaries of the facility proper. This is not to be perceived as permitting the removal of trees on properties owned by the facility, but not an active part of the facility's operation.

(Code 1998, app. C, § 8.02(I); Ord. No. 07-1548, § 8.02(I), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2154. Process.

(a) All fees, applications and warranty provisions shall apply, in addition applicant shall show all buffering requirements on the site plan as may be required in the minimum requirements below. The department of planning and development upon application for a clearing permit will submit the application to the following parish administrative offices for review and recommendations:

- (1) Department of planning and development.
- (2) Department of public works.
- (3) Department of engineering.
- (4) Drainage district engineer (if applicable).

(b) Within three working days of acceptance of the completed application, the director of the department of planning and development, or assigns will:

- (1) Grant the permit outright;
- (2) Grant the permit with conditions submitted as part of the comments supplied in writing through the agency review;
- (3) Delay the application for a period of up to 30 days with or without the concurrence of the applicant; or

- (4) Delay the application for any period necessary to obtain information relative to the compliance of the proposal to provisions of these regulations;
 - (5) Denial of the permit shall only be for one of the following:
 - a. Inability of the applicant to obtain physical access to the site.
 - b. The permitted action would have a negative public health or safety impact.
 - c. The applicant is a habitual offender as evidenced by three previous offenses over a three-year period.
 - d. Aspects of the project do not comply with requirements of these regulations.
- (Code 1998, app. C, § 8.02(J); Ord. No. 07-1548, § 8.02(J), 5-3-2007; Ord. No. 12-2664, 2-2-2012)

Sec. 130-2155. Types of permits.

(a) *Development clearing permit.*

(1) *Generally.*

- a. A development clearing permit shall be required whenever a parcel of land is to be cleared of trees for a development of any kind.
- b. Any property owner, or assign, who has received permission to and has cleared subject property shall be ineligible for a zoning change to a more intense zoning district for a period of three years from the date of the issuance of the development clearing permit.

(2) *Minimum requirements.* The following minimum requirements are mandatory. All buffers required shall be exclusive of all easements, servitudes and/or rights-of-way within the property.

a. *Roadway buffering.*

- 1. A natural uncut buffer of 25 feet in width along improved roadways, unless otherwise approved by the department of planning and development.
- 2. For development clearing permits, a wider buffer may be required by the department of planning and development in accordance with article VI, division 2 of these regulations. For development clearing permits, only trees over six inches diameter breast height must be preserved within the roadway buffer.
- 3. For all permits being sought along a planned corridor, a public hearing shall be required unless the applicant agrees to a 50-foot minimum buffer or more as specified under article V, division 6 of these regulations.

b. *Waterway buffering.* A minimum uncut buffer of 100 feet in depth unless a comprehensive stream-side management zone in accordance with the current

version of "Recommended Forestry Best Management Practices for Louisiana," published by the state department of environmental quality along both banks (mean low-water line) when applicable of all established natural stream beds, and riverbanks and 50 feet in depth along both banks of improved drainage canals, unless otherwise approved by the department of engineering. The establishment of a SMZ with specific mandatory standards approved by the department of engineering may supersede the 100-foot no-cut buffer in the case of natural streams, rivers and improved canals. For all permits being sought along a stream designated scenic by the state or the parish, the following shall apply: For all permits being sought which involve work within the protection areas of state scenic rivers or streams, evidence of compliance with state regulations must be provided.

- c. *Side and rear buffering.* For development clearing permits, the minimum required side and rear landscape buffers are established in accordance with article VI, division 2 of these regulations. For development clearing permits, only trees over six inches DBH diameter breast height must be preserved within this buffer. At the tentative stage of subdivision approval, the planning commission may also alter or realign the area of this buffer requirement.
- d. *Exception.* For development clearing permits, the department of planning and development may modify buffering requirements if the amount of fill to be placed on the site to accommodate the development, in accordance with chapter 115 of this Land Development Code, would preclude the survival of existing trees within the required buffer areas. Prior to obtaining department of planning and development approval for a modification of the buffering requirements, the applicants must provide a letter signed by a licensed arborist, landscape architect, or landscape contractor certifying that the amount of fill required by chapter 115 of this Land Development Code would necessitate the removal of existing trees within the required buffer areas.
- e. *Diseased trees.* If there are diseased trees or specific trees within the buffers that present a safety problem, the owner shall:
 - 1. Petition the department of planning and development to selectively cut and/or thin out the buffer. Prior to obtaining department of planning and development approval for the removal of trees within the buffer, the applicant shall provide a letter signed by a licensed arborist, landscape architect, or landscape contractor that the trees are diseased or present a safety problem.
 - 2. The department of planning and development shall approved this action and specify a replanting schedule with a mixture of class A and class B

vegetation as spelled out in article VI, division 2 of these regulations and schedule a performance inspection of the buffer area within six months of this administrative permit.

- f. *Replanting.* No later than six months from the expiration of the development clearing permit, a building permit or preliminary subdivision approval must be granted for the same site. Should, however, this building permit or subdivision authorization expire without the intended developmental activity being realized, a replanting program would immediately become necessary as follows: The landowner shall be required to implement a replanting schedule of all cleared areas as approved by the department of planning and development. Said replanting schedule must be filed with the department of planning and development within 30 days of expiration of the building permit or subdivision authorization time period (18 months maximum from issuance of the development clearing permit). This replanting schedule shall include a time frame for implementation and shall be site specific for the location of both hardwood and softwood species, including a variation in heights so as to achieve a re-vegetation of the cleared area.
- g. *Open burning of waste.* Open burning of waste resulting from land-clearing activities within 500 linear feet of occupied dwellings and within 500 linear feet of occupied subdivisions, or within any recorded subdivision is prohibited, unless otherwise approved by the department of public works.

(b) *Agricultural clearing permit.*

(1) *Generally.*

- a. An agricultural clearing permit shall be required for all agricultural uses. Agriculture is the use of land for agricultural purposes, including farming, dairying, pasturage, agriculture, horticulture, floriculture, viticulture and animal and poultry husbandry and the necessary accessory uses for packing, treating, or storing the produce; provided, however, that the operation of any such accessory uses shall be secondary to that of the normal agricultural activities.
- b. Any property owner, or assign, who has received permission to and has cleared subject property shall be ineligible for a zoning change to a more intense zoning district for a period of three years from the date of the issuance of the agricultural clearing permit.

(2) *General farming and pasture requirements.* All fees, applications and warranty provisions shall apply. In addition the applicant shall provide buffers. A minimum uncut buffer of 25 feet in depth along all roadways and a minimum uncut buffer of 50 feet in depth shall be required if the site is adjacent to A-1, A-1A, A-2, A-3, A-4, A-5, A-6, A-7, A-8, PF-1, PF-2, CB-1, ED-1 and ED-2 zoning districts. If however, at least 75 percent of the cleared land is not maintained in active agricultural uses, then the cleared

areas shall be reforested according to a reforestation schedule approved by the department of planning and development. The reforestation plan shall be implemented no later than six months from the expiration of the land-clearing permit. The schedule shall provide details as to the time frame for tree planting. The plan shall address the areas to be replanted, the density or spacing of trees in that area, the types of trees being replanted, quantities and the sizes of the trees. The minimum size of these trees shall be no less than 12 inches high and shall be required to be no greater than 36 inches high at the time of planting. No more than 50 percent of these trees shall be between 12 inches and 18 inches high, the remainder shall range from 18 inches to 36 inches high. This size provision shall not be applicable to Southern Yellow Pine.

- (3) *Timber harvesting requirements.* All fees, applications and warranty provisions shall apply. In addition the applicant shall provide buffers. A minimum uncut buffer of 25 feet in depth along all roadways and a minimum uncut buffer of 50 feet in depth shall be required if the site is adjacent to A-1, A-1A, A-2, A-3, A-4, A-5, A-6, A-7, A-8, PF-1, PF-2, CB-1, ED-1 and ED-2 zoning districts.
- (4) *Replanting requirements.* Replanting requirements shall vary depending upon the type of cut being made.
- a. Choice-cut harvesting is the removal of trees no less than 24 inches diameter breast height from the site. Choice-cut harvesting shall not require replanting.
 - b. Select-cut harvesting is the removal of selected trees from a parcel or plot of land. Removal of all trees except for the trees in the buffer zones shall not constitute a select-cut. For the purposes of these regulations, a select-cut shall require replanting of the site if more than 60 percent of the trees are being removed from the site and one of the following conditions is not met:
 1. No trees under 12-inches DBH are being removed.
 2. No hardwoods are being removed.
 - c. The replanting plan shall be implemented no later than six months from the expiration of the land-clearing permit. This type of cut does not include trees in the buffer zones. However, no replanting plan shall be required for select cut harvesting inside Wards 2, 5 and 6.
 - d. Clear-cut harvesting is the removal of all trees from a parcel or a plot of land. This type of cut does not allow the removal of trees in the buffers. No replanting plan shall be required for clear cut harvesting inside Wards 2, 5, and 6.
 - e. Select-cut harvesting not meeting all the criteria as set forth in the select cut definition and clear cut harvesting shall require replanting as follows: The replanting plan and schedule shall be submitted as part of the permit application. The schedule shall provide details as to the time frame for tree planting. The plan shall address the areas to be replanted, the density or spacing of trees in that area, the

types of trees being replanted, quantities and the sizes of the trees. The minimum size of these trees shall be no less than 12 inches high and shall be required to be no greater than 36 inches high at the time of planting. No more than 50 percent of these trees shall be between 12 inches and 18 inches high, the remainder shall range from 18 to 36 inches high. This size provision shall not be applicable to southern yellow pines.

(5) *Tree farming requirements.*

- a. Tree farming is an active agricultural production land use which involves the harvesting of timber as a crop to be replenished and in which clear cutting is prohibited unless immediate reforestation is implemented in accordance with recognized practices for active tree farm forest management. This provision includes timber thinning and selective harvesting where reforestation may not be required or desirable.
- b. All fees, applications and warranty provisions shall apply. In addition the applicant shall provide buffers. A minimum uncut buffer of 25 feet in depth along all roadways and a minimum uncut buffer of 50 feet in depth shall be required if the site is adjacent to A-1, A-1A, A-2, A-3, A-4, A-5, A-6, A-7, A-8, PF-1, PF-2, CB-1, ED-1 and ED-2 zoning districts.
- c. The applicant shall be exempt from the replanting provisions of these regulations, if the property owner:
 1. Is a certified member of the American Tree Farm System, participates in the forest stewardship program or provides written proof from the state office of forestry that the site is a recognized tree farm.
 2. Submits a reforestation schedule which includes a time frame for reforestation and a reforestation plan showing numbers, types and sizes of trees used and the locations on the site where the trees will be planted.
 3. Is a landowner with an ongoing forest management plan or is participant in a federal or state cost-sharing forestry program.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

ST. TAMMANY PARISH PERSONNEL POLICIES

GENERAL PROVISIONS

Policies and Procedures

Purpose. The St. Tammany Parish Personnel Policies (hereinafter referred to as "these Policies") is enacted by St. Tammany Parish (hereinafter referred to as the "Parish") to further the following goals:

1. To provide a uniform system of personnel administration;
2. To ensure that the recruitment, selection, placement, promotion, retention, and separation of employees are based upon the employee's qualifications and fitness and meet Federal and state requirements;
3. To assist the Parish President, CAO and Department Heads in the development of sound management practices and procedures, and to make effective use of human resources;
4. To promote communication between management and staff;
5. To ensure, protect, and clarify the rights and responsibilities of employees; and
6. To reinforce employee values which relate to a constant sense of public service, the pursuit of excellence, a positive response to change, and respect for all individuals.

Scope. To the extent provided herein, these Policies shall apply to the employees of St. Tammany Parish and participating agencies. In the event of conflict between these Policies and a professional services contract, ordinance, or state or federal law, the terms and conditions of such contract, ordinance or law shall prevail. In all other cases, these Policies shall apply. In the event of the amendment of any ordinance, policy or law incorporated in this document or upon which these provisions rely, these Policies shall be deemed amended in conformance with those changes.

Familiarity with these policies. It shall be the responsibility of every employee to know and be familiar with the provisions of these Policies.

Disclaimer. The Parish specifically reserves the right to repeal, modify or amend these Policies at any time, as may be set forth by law, or ordinance. None of these provisions shall be deemed to create a vested contractual right of any employee nor to limit the power of the Parish or the Parish President to interpret or apply these Policies. These Policies are not to be interpreted as promises of specific individual treatment.

Contingency policy. Whenever facts and circumstances exist which would require an immediate addition, deletion, or revision to these Policies, the Parish President is authorized to establish

ST. TAMMANY PARISH CODE

such addition, deletion, or revision, the effective date of which shall occur upon the promulgation of such to all affected employees and the term of which shall be for no more than sixty (60) days from said effective date.

(Ord. No. 00-0174, att. A, 7-6-2000)

Definitions, applications, and guidelines.

The terms defined in this section shall have the following meanings and applications unless the context or use thereof clearly indicates otherwise or more explicit definitions are referenced.

1. "Anniversary date" shall mean the annual recurrence of the date on which an employee receives benefits. An anniversary date is not necessarily an employee's date-of-hire, which is the actual date on which an employee is hired.
2. "Benefits" shall mean any or all of the customary emoluments, perquisites, supplements, and advantages which are provided to an employee by virtue of, or as a condition of his/her employment, all subject to applicable eligibility requirements, provisions, and time periods. It is the policy of the Parish that only a permanent employee shall be entitled to receive benefits, and in no event shall an employee whose classification or position is characterized as part-time or any contract employee be entitled to receive benefits.
3. "Classified" shall mean at all times and in any manner subject to a strict and uncompromising application of the provisions of these Policies. Employee positions are categorized as classified, contractual, or unclassified.
4. "Compensation" shall mean the monetary consideration or remuneration, or other consideration mutually agreed upon by the Parish and the employee, which is stated in terms of monthly salary or hourly wage, or other settlement, and provided to an employee in accordance with the schedule for such which is approved by the Parish.
5. "Good standing" shall mean absent any pending or effected disciplinary action which could result or has resulted in the discharge of an employee.
6. "Immediate family member" shall mean an employee's spouse, child, parent, brother, sister, grandparents, parent-in-law, daughter-in-law, son-in-law, or grandchildren, or any person related by blood or marriage who resides with the employee.
7. "Permanent employee" shall mean a regular full-time employee who has completed his/her probationary period to the satisfaction of the CAO, or an unclassified employee. It is the policy of the Parish that only permanent employees and certain other employees who may be serving a probationary period shall be entitled to receive benefits.
8. "Probationary" shall mean subject to a period of testing and trial to ascertain an employee's fitness for the position to which he or she is assigned. Except as provided

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

hereafter, whenever the Parish CAO determines during the probationary period that an employee is not capable, competent, or qualified to perform in the position to which he or she is assigned, said employee shall be discharged.

9. "Probationary period" shall mean the period a classified employee serves in a probationary status. Except as otherwise provided herein, a probationary period shall be mandatory and be for ninety (90) days commencing on the date of hire, but may be extended whenever the CAO determines that facts and circumstances exist which warrant a defined extension of the probationary period. As such relates to an employee whose classification or position is characterized as temporary, his/her term of employment shall be considered a probationary period. It is the policy of the Parish that during the probationary period an employee is not entitled to receive benefits unless the employee is receiving benefits prior to the probationary period.
 10. "Department Head" shall mean the director of a department of Parish government, and as applicable and appropriate, a Department Head shall mean any of the unclassified employees as defined elsewhere in these Policies, or an employee who has been designated by a Department Head to exercise a certain supervisory function(s) as set forth on the organizational table for the Parish.
 11. "Personal Time" shall mean the time allotted to an employee, during a regular scheduled work day, to be used as the employee deems necessary.
 12. "Continuous Service" an employee's uninterrupted classified and permanent unclassified service from the most recent date of employment, except that service shall not be interrupted by an approved leave of absence without pay in excess of thirty (30) days.
 13. "Demotion" shall mean a change of a regular employee in the classified service from a position of one class to a position of another class for which a lower pay range is prescribed.
 14. "Dismissal or Removal" the termination of employment for cause.
 15. "Merit Increase" a merit increase is a percentage increase awarded to eligible employees.
 16. "Promotion" shall mean a change of a regular employee in the classified service from a position of one class to a position of another class for which a higher pay range is prescribed.
 17. "Reinstatement" the re-appointment of a permanent employee who had been separated from his position for reasons other than fault or delinquency on his part, to a position of the same class.
 18. "Suspension" the enforced leave of absence without pay of an employee as a result of disciplinary purpose; or during an investigation of alleged misconduct by the employee.
- (Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-1049, 2-3-2005)

ST. TAMMANY PARISH CODE

Types of employment

1. Regular Full-Time Employee: A classified employee who is assigned to a position which is expected to continue for an indefinite duration, and who works a schedule which totals no less than 28 hours per week.

2. Regular Part-Time Employee: A classified employee who is assigned to a position which is expected to continue for an indefinite duration, and who works a schedule of 5 hours or more, but less than 28 hours per week.

3. Temporary Full-Time Employee: A classified employee whose work assignment is limited in duration to four months or less, and who works a schedule which totals no less than 28 hours per week.

4. Temporary Part-Time Employee: A classified employee whose work assignment is limited in duration to four months or less, and who works a schedule of 5 hours or more, but less than 28 hours per week.

5. Contract Agent: An individual who is assigned to a position which is expected to continue for an indefinite duration, and who works a regular schedule which is less than 28 hours per week, or which may vary from week to week.

6. Student Intern Employee: A classified employee who is regularly enrolled as a student in a recognized educational institution and is assigned to a temporary or part-time position which, in the case of post-secondary students, is related to the student's course of study, and which continues for no longer than the current semester or term at the student's school; provided, however, that subsequent work assignments may be made for the same student for periods which correspond to the student's subsequent semester or term.

7. Summer Student Intern Employee: A classified employee who would otherwise be considered a student intern employee, but that the term of employment occurs during a recognized semester break which may include the summer break.

8. Unclassified Employee: An unclassified employee who would otherwise be considered a regular full-time employee but is appointed by the Parish President or Parish Council, or participating governing authority, for a specific supervisory or management function. This individual is subject to all aspects of these Policies except for applicable provisions which are appropriately administered by the Parish President or Parish Council, such to be hours of work, annual leave, and compensation/benefits. An unclassified employee is appointed for a specific term and as an executive is deemed to have responsibilities, benefits and authority greater than a classified employee. Although provisions are provided for the direct supervision of all unclassified employees, any such employee may be demoted or discharged only by the respective appointing authority. The employees deemed to be unclassified are those positions shown in Section 2 of St. Tammany Parish Code of Ordinances.

(Ord. No. 00-0174, att. A, 7-6-2000)

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

Americans With Disabilities Act

It is the policy of the Parish that it shall provide a bias-free environment for disabled employees or for disabled persons who seek employment with the Parish. Recruitment and selection processes shall grant equal opportunity for employment to qualified applicants and shall not discriminate on the basis of disability. Reasonable accommodation shall be provided upon request during an application/interview process.

The Parish shall ensure equal opportunities for disabled employees. Every reasonable effort shall be made to provide an accessible work environment and additional accommodations, including auxiliary aids and services. Employment practices (e.g., hiring, training, testing, reassignment, promotion, compensation, benefits, termination, etc.) shall be administered in such a manner as to abate any discrimination of disabled employees.

Employees shall be trained to ensure that disabled persons may participate in and benefit from Parish programs, services, and activities.
(Ord. No. 00-0174, att. A, 7-6-2000)

Equal Employment Opportunity

It is the policy of the Parish to ensure equal employment opportunity for all employees and appointed representatives. This commitment includes a mandate to promote and afford equal treatment and services to all citizens and employees, and to assure equal employment opportunity based on ability and fitness to all persons regardless of race, religion, color, creed, national origin, sex, marital status, age, or the presence of any sensory, mental, or physical disability unless such disability effectively prevents the performance of the essential duties required of the position and which are bona fide occupational qualifications which cannot be accommodated without undue hardship.

The goals and objectives of the Equal Employment Opportunity policy are to:

1. Ensure fair treatment and non-discrimination in hiring and employment.
2. Provide compliance with State and Federal equal opportunity requirements and regulations.
3. Provide a basis for encouraging those who do business with the Parish to practice equal employment opportunity.

Program responsibility. Unless otherwise designated by the Parish, the CAA Director shall serve as the Equal Employment Opportunity Officer to carry out the Equal Employment Opportunity policy and program. The Officer shall be the focal point for the Parish's equal opportunity efforts and shall advise and assist staff and management personnel in all matters regarding implementation of and compliance with the Equal Employment Opportunity policy, and be responsible for the successful execution of the program, utilizing the assistance of appropriate State and community agencies.

ST. TAMMANY PARISH CODE

Equal employment opportunity practices. The Equal Employment Opportunity Officer shall perform the following actions to assure equal employment opportunities:

1. Reviews all position qualifications and job descriptions to insure requirements are relevant to the tasks to be performed. Make recommendations as needed to delete requirements not reasonably related to the tasks to be performed.
 2. Assures that pay and fringe benefits depend upon job responsibility and, along with overtime work, are administered on a non-discriminatory basis.
 3. Informs and provides guidance to staff and management personnel who make hiring decisions so that all applications for selection or promotion, including those of minorities and women, are considered without discrimination and all applicants be given equal opportunity regardless of race, creed, color, national origin, gender, marital status, age, or the presence of a sensory, mental, or physical disability unless such disability effectively prevents the performance of essential duties and functions required by the position and which are bona fide occupational qualifications which cannot be accommodated without undue hardship.
 4. Reviews procedures and actions to ensure equal employment opportunity in hiring.
 5. Provides information to existing and new employees which emphasizes how the Parish assures equal opportunity.
- (Ord. No. 00-0174, att. A, 7-6-2000)

EMPLOYMENT

Hours of Work.

Except for unclassified employees, the working hours for an employee under Pay Plan A are seven and one-half (7.5) hours, from 8:00 a.m. to 4:30 p.m., with a one-hour unpaid lunch period. Under Pay Plan B, the working hours for an employee are eight (8) hours, from 7:00 a.m. to 3:30 p.m. with 0.5-hour unpaid lunch period. An employee is expected to be at his/her work location and ready to begin work at the beginning of their work schedule. The lunch period shall be scheduled by the Department Head to allow for continuous staffing of all offices with at least one person.

Occasions may arise when service to the public can be improved through the adjustment of an employee's work hours. The Department Head shall obtain approval of the CAO for any adjustment in work hours. Individual requests for adjustment of working hours for personal reasons shall require approval by the Department Head, with concurrence of the CAO.

Hours for part-time and certain employees may vary from the normal office hours noted above due to the nature of their duties and shall be determined by the Department Head, with concurrence of the CAO.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

An employee is expected to provide his/her Department Head with a notice of anticipated and/or unavoidable tardiness as early as possible. Failure to do so shall be construed as an unexcused absence, and the time missed shall not be paid. If approved by the Department Head, tardiness may be made up during the Payroll Period in which it occurs. Notification by another employee or other person is not considered proper procedure except in an emergency situation whereby the employee is physically unable to make the notification.

The following action shall be taken if employee's explanation for being tardy is unacceptable to the Department Head:

1. The employee shall receive counseling or a warning and a reduction in pay in [8]-hour intervals based upon the time of arrival.
2. If an employee is tardy on two (2) occasions within a Payroll Period, a reprimand shall be issued.
3. On the occasion of a third reprimand, the employee shall receive a three-day suspension, after which the employee may be subject to further disciplinary action if tardiness continues.
4. Consideration shall be given as "justifiable" tardiness for reasons determined by the Department Head to be unavoidable, which may include, but are not limited to, the following: unanticipated automobile trouble, unforeseen traffic, severely inclement weather, illness. However, excessive use of "justifiable" excuses for tardiness, as determined by the Department Head, shall not be allowed and shall result in disciplinary action.

Daily attendance records shall be maintained by each department, including date and time absent and reason for absence. Attendance shall be a consideration in determining promotions, reassignment, satisfactory completion of a probationary period and continued employment. Frequent tardiness or other attendance irregularities shall be cause for disciplinary action. (Ord. No. 00-0174, att. A, 7-6-2000)

Flexible Schedules, Telecommuting.

The Parish recognizes that in the modern workplace there are positions in which face-to face contact with co-workers or customers is not necessary. A telecommuting arrangement that is suitable to both employee and his/her supervisor, and authorized by the CAO, and meets the following requirements, may be entered into:

1. A position and/or project that can be handled by one person, with limited input from others (and with that input working efficiently by telephone or electronically).
2. The nature of the work and/or project should be clearly defined and easily measured so that the supervisor will be able to assess if performance is adequate.

ST. TAMMANY PARISH CODE

3. The potential telecommuter is comfortable working essentially alone, without office social contacts; being able to schedule tasks and hold to a schedule; being able to complete said tasks whatever the demands of family; and having exemplified the discipline to perform without a supervisor.
4. Any employee being considered for such a position is an employee who, during their years of service, has consistently attained either a "commendable" or "meritorious" rating on annual personnel performance evaluations.
5. The supervisor of said employee is able to enter into such an arrangement without creating more work for those employees still working the affected department.
6. Ensure that said employee takes care to safeguard electronic devices and information. Telecommuting employees are required to back up data frequently, to have an uninterruptible power source to allow them to save work before the computer goes down, and keep back-up disks and other media in a safe location, if necessary.
7. Ensure that telecommuting employee has homeowner's insurance that covers the computer equipment against theft and damage if said equipment is supplied by the Parish.

A formal agreement between the Parish and the telecommuting employee will be necessary that specifies the following: how often they will be expected to appear at the office; how much notice they need to be called to the office at other times; how many hours they will work; what their schedules will be; whether telecommuting is expected to be temporary or permanent; who the employee reports to; what the promotion possibilities are; the rate of pay; whether or not they will receive benefits, (i.e., health/retirement, holiday/overtime pay, sick/annual leave accrual).

This formal agreement may be terminated either by the employee or employer, at any time, with or without cause.

(Ord. No. 00-0174, att. A, 7-6-2000)

Parish Assigned Vehicles.

Parish owned vehicles shall be assigned based upon the job duties of each position by the Parish President. An employee's position and out of office responsibilities shall determine if the vehicle can be taken home or if it is to be retrieved from a designated lot. Parish vehicles are to be used for official business only and the employee is responsible to insure that the vehicle is locked and parked in a safe place when not in use.

(Ord. No. 01-0353, 8-2-2001)

Personal Time.

A Regular Full-Time Employee in an administrative position may receive one ten-minute break during each four hour work session (8:00 a.m.-12:00 noon being the "morning session"

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

and 1:00 p.m.-4:30 p.m. being the "afternoon session"). All Regular Part-Time employees may receive one five minute break during each four hour work session. Temporary Full-Time and Temporary Part-Time employees in administrative positions may receive personal time, but said time will only be given at the discretion of their supervisor. In some departments these breaks are scheduled by the supervisor; in other areas they may be taken at the employee's discretion. Breaks may not be combined into one 20 minute period, added to the lunch break, saved up from day to day, or used to offset arriving at work late or leaving early.
(Ord. No. 00-0174, att. A, 7-6-2000)

Position Descriptions/Class.

Position descriptions and specifications shall be maintained by the Personnel Office for all regular full-time and regular part-time positions. An employee's position description shall be maintained as part of his/her personnel file. The position description shall include: Classification Number, Position Title, Pay Plan Designation, Labor Grade, Position Description, Qualifications, Example of Duties, Special Requirements, Revision Date, and any other relevant information which may be required.

The position description does not constitute an employment agreement between the Parish and the employee and is subject to change as the needs of the Parish and the requirements of the job change. Examples of duties listed in the position description are intended only as illustrations of the various types of work to be performed. The omission of specific examples of duties does not exclude other duties from the position if the work is similarly related or is a reasonable assignment for the position, all as determined by the Department Head.

(Ord. No. 00-0174, att. A, 7-6-2000)

Hiring Process.

The Personnel Office shall administer and coordinate the hiring process for all position vacancies. All hiring efforts shall be conducted in the spirit of equal opportunity. The following procedures shall be adhered to by all departments in the filling regular full-time position vacancies.

Employee new-hire processing and orientation. A new regular full-time or regular part-time employee shall be scheduled to meet with the Personnel Office for general orientation. Upon arrival, the Personnel Office shall distribute and explain the various enrollments forms, etc., that must be prepared. The new employee shall be provided with information on benefits, these Policies, and other orientation subjects. The Personnel Office shall also provide information to the new employee as such relates to their employment, and shall also perform the following:

1. Drug and Alcohol policy.
2. Duties of the position.
3. Hours of work, time cards or reports, leave requests.

ST. TAMMANY PARISH CODE

4. Schedule for lunch and breaks.
5. When and to whom to report absence from work.
6. Who is responsible for performance planning and review.
7. Work standards and regulations.
8. Safety rules and procedures, location of safety or protective equipment.
9. Tour of the work area, including location of equipment, supplies, etc.
10. Introduction to co-workers.

Applicant/candidate expenses. Unless approved by the CAO, the Parish shall not reimburse any applicant/candidate for travel costs in conjunction with the hiring process: Relocation costs shall be paid in full by the employee unless otherwise approved by the CAO. The applicant/candidate shall be advised of these provisions prior to reporting for the interview.

Temporary help. Steps 1-8 listed under Recruitment Section of this policy are not required in the recruitment of temporary or part time help. The affected department shall maintain responsibility for screening applications, testing, interviews, reference checks, applicant notification, appointments, and preparation of any necessary Personnel Action Forms. These steps shall be accomplished in accordance with the guidelines listed above.

Reemployment. A former regular full-time employee who has at least five years of service with the Parish and is separated from employment with the Parish in good standing is eligible for reemployment within two years of such separation. Such employee interested in reemployment shall file an application with the Personnel Office and shall be subject to the regular hiring process with other applicants as described in the Hiring Process policy. An individual reemployed in his/her former position may be paid at his/her former pay grade and level. The compensation of an employee rehired to a position other than the former position shall be subject to provisions for new hires. Annual leave accrual shall be based on previous service with the Parish. Reinstatement in the retirement system shall be made in accordance with the rules and regulations set by the State Retirement system.

Nepotism. It is the policy of the Parish that an "immediate family member" shall not be employed in regular full-time or regular part-time positions whenever:

1. One immediate family member would have the authority to supervise, appoint, remove, discipline, or evaluate the performance of the other.
2. One immediate family member would be responsible for auditing or inspecting the work of the other.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

3. Other circumstances exist which would place the immediate family members in a situation in which there is an actual or reasonably foreseeable conflict between the interest of the Parish and their own.

(Ord. No. 00-0174, att. A, 7-6-2000)

Special Employment Programs.

The Personnel Office is responsible for the coordination of all special employment programs funded by an external agency (e.g. Youth Training Program, Job Training Partnership Program, University Internships, Work Training Programs, etc.).

The Department Head shall forward all requests for participation in special employment programs to the Personnel Office for coordination with the appropriate agency. The Personnel Office, in cooperation with the requesting department, shall develop a scope of work and qualifications statement to be used in the recruitment and selection of an employee and in the definition of tasks to be performed during the period of employment. The provider agency shall review scope of work, qualifications, training, level of supervision, and safety for appropriateness.

The Personnel Office shall maintain records on program participants including the contractual agreement between the Parish and provider agency, scope of work and qualifications statement, and personal emergency data. The Department Head shall be responsible for performance evaluations on program participants as required.

(Ord. No. 00-0174, att. A, 7-6-2000)

Special Licenses and Membership Fees.

The Parish shall reimburse an employee who is required by ordinance, or state or federal law to be a member of a professional organization, or who must maintain current a particular certification or license as a condition of employment. Payment shall be made upon approval by the CAO. An employee who belongs to a professional organization that promotes individual professional growth, competence, and effectiveness in functioning as an employee shall be allowed time off with pay to attend local, state, and national meetings, all subject to the approval by the CAO. Membership in any such organizations shall be in the name of the Parish whenever possible.

(Ord. No. 00-0174, att. A, 7-6-2000)

Personnel Records.

The Personnel Office shall be responsible for establishing and maintaining an official personnel file for each employee. Department Heads shall be responsible for the forwarding of documents for inclusion in the Personnel files of those employees assigned to their respective department. Each employee shall be responsible for the verification of information contained in the personnel file. A representative of the Personnel Office shall be present whenever an employee

ST. TAMMANY PARISH CODE

reviews his/her file. Only the Personnel Office may remove an item from a personnel file with notification to the respective Department Head. Any review of an employee's file shall be scheduled by the subject employee with the Personnel Office. The purpose of any such review shall be to examine the contents of the file for accuracy and completeness. Identification of information to be included in the employee's personnel file shall be:

1. Permanent Documents - Documents retained in an employee's file throughout his/her employment:
 - A. Employee application.
 - B. Position description and specification information.
 - C. Job performance ratings and evaluations.
 - D. Education/training information.
 - E. Personnel data card.
 - F. Personnel action forms.
2. Temporary Documents - Documents which have limited retention of three (3) calendar years or less, such as:
 - A. Administrative correspondence relating to leave/vacation requests.
 - B. All other administrative documents of limited informational life span.
 - C. Letters of appreciation, commendation, or disciplinary action.

The Personnel office shall treat as confidential all employee information except when requested to verify information relating to position title and status (e.g. regular full-time, etc.), current salary, and date or period of employment. Otherwise, information contained in the personnel file shall not be released without the written permission of the subject employee. Employee records shall be maintained during the tenure of the employee and for five years thereafter. (Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-0149, 2-3-2005)

Promotion.

Following a policy of upward mobility whenever possible, the Parish shall attempt to fill an available position with a qualified employee before advertising the vacancy to the general public. Every employee is encouraged to apply for any vacancy for which he/she may qualify in accordance with these Policies, all as set forth in the section entitled **HIRING PROCESS**. Selection of an employee for a promotion shall be based upon his/her record of performance, qualifications, academic standing, and the knowledge, skill, and abilities specific to the advanced position.

In a situation where only one employee applies for a position and his/her qualifications are known to the Department Head, the formal selection process may be dispensed with upon concurrence by the CAO.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

A temporary appointment may be made by the Department Head as necessary. Such an appointment is made on an "acting" basis and the employee shall return to his/her prior position upon completion of the assignment. The actual salary for an "acting" appointment shall be set by the CAO.

An employee promoted to an advanced position shall be subject to a probationary period, unless such is specifically waived by the CAO. An employee who is promoted shall maintain his/her initial anniversary date.

(Ord. No. 00-0174, att. A, 7-6-2000)

Demotion.

An employee demoted to a position in a lower classification due to disciplinary action, departmental reorganization, or in lieu of a layoff may receive a reduction in pay commensurate with the nature of the demotion as determined by the CAO. An employee shall not be demoted to a position for which he or she does not possess the minimum qualifications.

A demotion in lieu of a layoff may be rescinded by the CAO if the employee's prior position is reopened within a six-month period.

An employee who is demoted shall be subject to a probationary period in the new position, unless such is specifically waived by the CAO. An employee who is demoted shall maintain his/her existing anniversary date.

(Ord. No. 00-0174, att. A, 7-6-2000 Ord. No. 05-0149, 2-3-2005)

Reassignment.

A reassignment of duties, voluntary or otherwise, shall occur only when the best interest of the Parish and the employee is served, all as determined by the CAO. If such is an interdepartmental reassignment, the terms and conditions for such shall be agreed upon by the affected Department Heads and the CAO. An employee who wishes to be reassigned shall request such in writing to the appropriate Department Head. If an interdepartmental reassignment is contemplated, the employee shall provide a copy of the request to his/her Department Head upon or before the submittal of said request.

To be eligible for reassignment, the current salary of the subject employee must be consistent with the salary of the intended position. Whenever an employee's qualifications meet only the minimum requirements for the intended position, the employee's salary shall be at the entry level grade for the intended position irrespective of the employee's current salary. Whenever an employee's qualifications exceed the minimum requirements for the intended position, the employee's salary may be set at a salary consistent with the employee's knowledge, skill, and abilities.

ST. TAMMANY PARISH CODE

An employee who is reassigned to a position shall serve a probationary period, unless such is specifically waived by the CAO. A reassignment does not change an employee's anniversary date.

(Ord. No. 00-0174, att. A, 7-6-2000)

Layoffs.

1. When a layoff is necessary it shall be accomplished in accordance with the following procedure:

- A. The appointing authority must target the department and the class or classes for a reduction in positions.
- B. The employee or employees to be displaced from the targeted class in the affected department shall be identified on the basis of class service. The employee with the least class service is laid off first. In the event two (2) or more employees have like seniority, the department head shall have the discretion to select layoff order.
- C. An individual may avoid layoff, at his option, by choosing to retain employment in a position on the grouping and is occupied by the employee having the least class service. To exercise this option the individual must also currently occupy a position requiring the same or greater necessary knowledge, abilities, and skills as the lower listed position. If this option is exercised then the employee with the least class service shall be laid off.

2. The Director shall formulate and amend as required, due to changes in the Classification Plan, a listing of Class groupings and Independent Classes. These lists shall be kept in the Personnel Office.

3. With any proposed layoff, the names and job titles of any regular employees scheduled for layoff shall be submitted to the CAO for approval.

(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-0149, 2-3-2005)

Position Reclassification.

The revision of a position description within the classification plan shall be made as often as is necessary to provide current information on the positions and classifications. When the duties of an existing position substantially change, the Department Head shall submit a written request to the CAO to reclassify the position, which shall include a full explanation and justification for the reclassification. Said request shall be reviewed by the CAO and Personnel Office. The CAO shall then decide if the position is to be reclassified.

An employee who considers his/her position improperly classified shall first submit a request in writing for reclassification to his/her Department Head who shall review the request and transmit it with written comment and/or recommendations to the CAO.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

In the event that the salary for a position which is reclassified results in an increased salary grade for the position, the affected employee shall remain at his/her current salary at the appropriate step within the advanced grade, or the employee shall assume the entry level step of the advanced grade, whichever is greater.

In the event that the salary for a position which is reclassified results in a decreased salary grade for the position, the affected employee shall remain at his/her current salary at the appropriate step within the decreased grade, or the employee shall assume the maximum level step of the decreased grade, whichever is less.

(Ord. No. 00-0174, att. A, 7-6-2000)

Employee Separation and Out-Processing.

The terms defined in this section shall have the following meanings and applications unless the context or use thereof clearly indicates otherwise or more explicit definitions are referenced:

"Service Retirement" or "Disability Retirement" shall mean the voluntary termination of employment under terms and conditions set forth by and satisfactory to the state retirement system.

"Resignation" shall mean voluntary termination for any reason other than retirement. An employee who wishes to resign in good standing shall provide a written resignation to his/her Department Head no less than ten (10) working days prior to the effective date of resignation. The resignation letter shall include the reason for leaving as well as the proposed effective date. Such notice is understood to mean that the resigning employee shall be available for work during this time so as to aid in the training of a replacement. An exception to the time limit requirement may be granted by the CAO.

"Discharge" shall mean the involuntary termination of employment.

The Parish shall provide an employee with no less than two weeks advance notification of the layoff or, in lieu thereof, compensation of two-weeks' salary. An employee on layoff interested in reemployment, shall keep the Parish informed of the address and telephone number where he/she can be contacted for a period of one year. If the Parish is unable to contact the employee within seven calendar days, consideration to recall the employee shall cease.

An employee shall receive pay for work performed through the last hour worked and for unused benefits as stipulated by policy and laws governing such payments.

The employee's final pay check shall be reduced by any authorized legal deductions; authorized pension plan; credit union, tax sheltered annuity; United Way; and any other amounts specifically agreed upon by the employee and the Parish. Before the final paycheck is issued to the employee, the employee shall be required to complete the clearance process.

Special questions may also be developed by the Personnel Office and/or Department Head for the Exit Interview. Copies of the completed Exit Interview shall be distributed to the appro-

ST. TAMMANY PARISH CODE

priate Department Head and the CAO. The Department Head may respond in writing to statements made in the Exit Interview. The response shall be reviewed by the Personnel Office and filed together with the Exit Interview report. The Exit Interview shall be maintained separately from the employee's official personnel file
(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-0149, 2-3-2005)

Performance Evaluations.

Employee evaluation is a positive process with emphasis on the further development of the individual, the potential for assuming additional responsibility, and an organized program to increase productivity. It is a healthy and on-going process of relating performance to realistic standards, recognizing individual achievements, measuring degrees of improvements, and providing guidance for self-improvement. Ideally, the program will motivate the truly outstanding performers, and inspire those requiring further individual development.

All performance evaluations shall be done in accordance with Employee Performance Evaluation Manual.
(Ord. No. 00-0174, att. A, 7-6-2000)

COMPENSATION

Employee Compensation.

It is the policy of the Parish to establish a compensation plan which allows the Parish to effectively compete for qualified personnel and which ensures that salaries are equitable and commensurate with the duties performed by each employee.

Classification plan. Jobs with similar duties and responsibilities are assigned to the same salary grade. The CAO shall conduct a review of a position whenever there is an indication that an employee is working above or below the established responsibilities for the position. This review shall be initiated at the request of a Department Head and shall be conducted in accordance with the policy on position reclassification.

Salary grades and steps. The schedules of salary grades and steps (Plan A and Plan B) adopted by the Parish shall apply to all employees not covered by a professional contract.

Incremental step increase. In order to retain quality personnel by implementing a competitive salary schedule, a procedure for the granting of incremental pay increases is hereby established. Accordingly, it is the policy of the Parish that an employee's rate of pay shall increase in direct relation to his/her professional growth and achievement through evaluation of performance, all in conformance the schedule of salary grade and steps.

It is the responsibility of the Department Head to monitor the job performance of each employee under his/her supervision or control. Whenever an employee over a defined and

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

extended period of time (generally one year) consistently demonstrates his/her competence and effectiveness, the employee's Department Head shall report such in writing to the CAO by means of the Management Report Form. Attached thereto shall be a copy of the employee's most recent Personnel Performance Evaluation Form (the "Evaluation").

It is the responsibility of the CAO to review and consider said Management Report Form and Evaluation. (It should be noted that an Evaluation, regardless of how commendable it reports the employee's job performance to be, shall not by itself initiate or support a pay increase for the employee. Rather, an outstanding Evaluation may be used to sustain the findings and recommendation of the Department Head.) The CAO may determine that the employee warrants an increase in his/her rate of pay, and may order a one-step pay increase: This determination shall be conclusive and not subject the grievance procedure.

Cost-of-living adjustment. A cost-of-living adjustment may be granted by the Parish, but shall apply only to the employees of the St. Tammany Parish Government (other parochial agencies are excluded). If granted, such increases are generally effective beginning on the first full Payroll Period of the following year.

Maintenance of the compensation plan. The Personnel Office shall be responsible for the continuous maintenance and administration of the compensation plan. The review shall include an analysis of prevailing rates of pay for similar positions in comparable labor markets and organizations, cost-of-living factors, budgetary considerations, and other related factors. On the basis of this information, the CAO shall recommend changes to the Parish President in the salary plan which would result in a more uniform and equitable compensation plan.

(Ord. No. 00-0174, att. A, 7-6-2000)

Overtime.

Fair Labor Standards Act (FLSA). This policy shall not contravene the provisions of the FLSA pertaining to the minimum rate of compensation for work performed by an employee beyond the hours in a standard work week (Sunday through Saturday).

The terms defined in this section shall have the following meanings and applications, unless the context or use thereof clearly indicates otherwise or more explicit definitions are referenced:

1. "Overtime" shall mean all work which is authorized by the Department Head and which is performed beyond an employee's regularly scheduled hours.
2. "Overtime rate" shall mean the rate of pay an employee receives for working overtime, such to be calculated at one and one-half times the hourly rate of the employee. It shall be noted, however, that the overtime rate shall be paid only when the overtime hours an employee actually works (compensatory leave and holiday pay included) exceed forty (40) or thirty-seven point five (37.5) hours in a standard work week. Otherwise, the rate of pay an employee receives for working overtime shall be at the regular rate.

ST. TAMMANY PARISH CODE

3. "Compensatory leave" shall mean the unpaid compensation provided salaried employees for working overtime (see the section regarding compensatory time)
4. "Employee" shall mean any regular full-time employee or regular part-time employee who is not a salaried employee.
5. "Salaried employee" shall mean any employee whose classification or position is characterized as full-time and who is not normally eligible to earn overtime pay unless said employee performs duties above and beyond the normal scope of their job description during a declared emergency or in order to complete an important project in a timely manner (as approved by either a Department Head or CAO).

Responsibilities.

1. It shall be the responsibility of the Department Head to administer the provisions of this policy.
2. Only the Department Head/CAO is authorized to approve overtime.
3. The Department Head who authorizes overtime shall ensure that the overtime is recorded promptly on the employee's time sheet.
4. The Department Head shall exercise extreme discretion in the utilization of overtime. Temporary adjustments in working hours or realignment of duties within the department shall be considered as alternatives to overtime. Overtime shall be considered necessary only when additional effort is needed to complete a critical task in a timely manner.

(Ord. No. 00-0174, att. A, 7-6-2000)

Compensatory Leave.

Compensatory time is that time which is earned and accrued by an employee in lieu of immediate cash payment for employment in excess of normal work hours and/or employment above an employee's position description.

Compensatory time will be earned at a rate of one and one-half hours for each hour of work completed in excess of normal work hours.

Request for approval of compensatory time accrual will be handled by the CAO or designee; once approval for accrual is granted the time is to be logged with the Personnel office and the department's payroll clerk; request to use compensatory time requires approval by CAO or designee.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

No employee shall be allowed to accumulate compensatory time in excess of the limit imposed by the Fair Labor Standards Act (FLSA).

Conditions for use. An employee shall be permitted to use compensatory time if such requested use does not unduly disrupt the customary work practices of the department in which said employee works. Such work practices include but are not limited to:

- (a) The normal schedule of work;
- (b) Anticipated peak workloads on past experience;
- (c) Emergency requirements for staff and services; and
- ([d]) The availability of qualified substitute staff.

Termination of Employment. An employee shall receive payment of all unused accumulated comp time or opt to rollover into Post Employment Health Plan.
(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-1049, 2-3-2005; Ord. No. 08-1853, § 1, 7-3-2008)

On-Call Policy.

The following rates are established as "On-Call" pay for those persons within the Department of Public Works in supervisory positions, as designated through separate schedule, within the guidelines reflected below:

Weekend "On Call"	-	\$50.00 per weekend (3:30 p.m. Friday through 7:00 a.m. Monday)
Holiday "On Call"	-	\$25.00 per day
Trace Ranger "On Call"	-	\$ 5.00 per day—Closes at 6:00 pm \$8.00 per day—Closes at 8:00 p.m. (for hours of operation that Trace is open over the normal workday, including pre-work hour from 6:00 am to 7:00 am)

Each Maintenance Area shall designate one (1) employee to be "On Call" for each weekend and holiday. These employees shall be required to be available by beeper to review and appraise emergencies within his or her respective area. These employees shall be paid the "On Call" pay regardless of whether they are called out or not, and shall either receive overtime, or compensatory time (if allowed), for all time that they are required to work over and above their normal work week. These employees shall be responsible and will be authorized to call out parish

ST. TAMMANY PARISH CODE

crews, as needed, to address emergency situations within their respective area. Employee "On Call" is to make sure that his or her beeper is operating at all times during the "On Call" period. (Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 01-0353, 8-2-2001)

Uniform policy—Public Works Field Personnel.

The Parish will provide shirts, jackets and safety equipment to all permanent field employees of the Department of Public Works. Employees shall be required to provide and wear their own steel toe boots and pants, as follows:

Pants—Blue or Black pants or jeans. Pants should be in an acceptable condition and free of large holes or tears.

Steel Toe Boot—Black or Brown in accordance with ANSI Z41-1991.

Each permanent Public Works Field Employee will be eligible to receive a uniform allowance, in the amount of \$25.00 gross pay (\$300.00 gross pay per year), on the last check of each month, as follows:

On the last payroll of each month all permanent Public Works Field Employees, who in the determination of the supervisor have been in complete uniform for the previous month will receive a gross pay add-on of \$25.00 on the last paycheck of each month. If in the determination of the immediate supervisor an employee has not met his/her obligation to report to work and perform his/her duties on a daily basis in complete uniform, same shall be so noted on the time sheet and through written reprimand and the uniform allowance shall be suspended for that month.

Complete uniform shall mean boots, pants and Parish issued shirt, as well as safety equipment issued by the Parish (Field Clerks are exempt from wearing steel toe boots).

Any employee who terminates employment for any reason, prior to the 20th of each month shall not be eligible for the uniform allowance.

Temporary Public Works Field Employees shall be responsible to furnish their own attire, which shall include long pants, shirt and steel toe boots that meet the above guidelines. Safety equipment will be provided by the parish to temporary employees.

For the purpose of this policy, Public Works Field Employees shall include the following: All employees within GMRR (including Field Clerks), Maintenance Barns, Drainage (except pump operator), Tammany Trace Maintenance and Vehicle Maintenance.

It shall be the responsibility of any terminated employee to return all parish issued uniforms and safety equipment to the supervisor on the last date of their employment. (Ord. No. 00-0174, att. A, 7-6-2000)

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

Time Sheets/Preparation of Payroll.

The Department Head shall be responsible for preparing the time sheet which is provided by the Personnel Office. The time sheet shall include a complete listing of all employees assigned to the subject work group. The Personnel Office shall be responsible for the computation of all earnings, deductions, etc. Payroll records (time sheet data) shall be maintained by the Personnel Office for seven years. Falsification of time records by any employee shall be cause for disciplinary action.

(Ord. No. 00-0174, att. A, 7-6-2000)

Payroll Periods and Paychecks.

1. There shall be approximately 26 Payroll Periods in a calendar year.
 2. Paychecks shall be issued on the first Wednesday after the close of a Payroll Period. If such day falls on a holiday, paychecks shall be issued on the last working day preceding said Wednesday.
 3. Paychecks shall be distributed by the Personnel Office only to the appropriate Department Head by noon on the subject Wednesday.
 4. An employee's paycheck may be released only by the Department Head to an employee's spouse, family member, or any other person, but only if authorized in writing by the employee.
 5. With each paycheck, an employee shall receive a statement of earnings and any deductions made, as well as appropriate cumulative totals of all leave.
 6. An employee shall cash and/or deposit his/her paycheck on personal time.
- (Ord. No. 00-0174, att. A, 7-6-2000)

Payroll Deductions.

The following items are required to be deducted from each paycheck:

1. Federal Income Tax withholding.
2. Social Security (eligible employees only).
3. Medicare
4. Retirement contributions (eligible employees only).
5. Certain health insurance premiums.
6. Deductions specifically required by a court order, e.g. garnishment.

Additional deductions, which are optional, include:

1. United Way contributions.
2. Payment to a Parish-approved credit union.

ST. TAMMANY PARISH CODE

3. Deferred compensation.
4. Payment of supplemental health/life insurance premium (if applicable).
5. Savings Bonds.

It is the responsibility of each employee to maintain current payroll deduction information with the Personnel Office.

(Ord. No. 00-0174, att. A, 7-6-2000)

Garnishment.

"Garnishment" shall mean a deduction from an employee's pay, the purpose of which is to satisfy a debt. The Parish may deduct all funds associated with the garnishment disbursement per a judgement, all as required by a court order, together with all employer fees permitted by law.

The Personnel Office shall be immediately notified of any subject court order and shall effect the deduction from the employee's wages. The amount of said deduction shall be forwarded as directed in the court order.

(Ord. No. 00-0174, att. A, 7-6-2000)

BENEFITS

Leave—General.

The terms defined in this section shall have the following meanings and applications, unless the context or use thereof clearly indicates otherwise or more explicit definitions are referenced:

1. "Leave" shall mean that period of time, used in no less than one-half hour increments, that an employee is absent from his/her work place or assignment, but shall not mean that period of time when an employee is off-duty (which shall include regular day off, holiday, etc.) or is on his/her assigned lunch break. Unless otherwise provided for in this Section, it shall be the responsibility of the Department Head to approve any request for the use of any leave by an employee.
2. "Employee" shall mean at all times and in all circumstances a permanent employee (or permanent employee serving a probationary period) or any other employee for which it is determined by the CAO that the provisions of this Section shall apply.
3. "Work Day" shall mean the period or amount of time (usually expressed in hours) in which the employee is required to work according to his/her salary plan (e.g. 7.5 hours per Work Day, 8 hours per Work Day) Hence, an employee's Payroll Period is the cumulative number of hours the employee is required to work according to his/her Pay Plan (e.g. 75 hours, 80 hours).

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

4. "Duty" shall mean all of the responsibilities, obligations, and requirements of an employee's position.
5. "Years of Service" shall mean the number of years of service as a permanent employee with St. Tammany Parish.

Exception: "Years of Service" for an employee who transfers from another governmental agency and transfers their eligible service to the Parochial Retirement System shall be calculated based upon their most recent continuous starting service date in the Parochial Retirement System.

(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 01-0353, 8-2-2001)

Annual Leave.

"Annual leave" shall mean that paid leave which is earned by an employee and used typically as vacation leave. The use of annual leave for rest and recreation is encouraged. It shall be the responsibility of the employee to request the use of annual leave at least five days prior to the requested leave period. Annual leave shall be approved prior to use by the Department Head. When authorized and applicable, annual leave shall be utilized in lieu of sick leave whenever the employee no longer has unused accumulated sick leave.

Annual leave (AL) shall be earned in accordance with the accrual rate schedule as follows:

<i>Years of Service</i>	<i>Annual Leave Earned</i>	<i>Annual Leave hours earned each pay period 75 hours worked</i>	<i>Annual Leave hours earned each pay period 80 hours worked</i>	<i>Total Annual Days Earned Per Year</i>
Less than 2	0.0269230 per hour	2.0192250	2.153840	7
2 through 6	0.0423076 per hour	3.1730700	3.384608	11
7 through 12	0.0576923 per hour	4.3269225	4.615384	15
13 through 18	0.0730769 per hour	5.4807675	5.846152	19
19 or more	0.0884615 per hour	6.6346125	7.076920	23

The accrual of annual leave shall begin on the first day the employee is eligible to receive benefits. Unused annual leave may be accumulated from year to year without limitation. The amount of annual leave to be used may be rounded up to the next whole hour increment.

Each Department Head is authorized to develop and implement additional procedures and policies which relate to the use of annual leave which are not inconsistent with the guidelines set

ST. TAMMANY PARISH CODE

forth herein. It is the policy of the Parish that each employee with three or more years of service be on leave from the his/her work place or assignment for five consecutive Work Days (Holidays may be included).

Termination of employment. An employee shall receive payment of all unused accumulated annual leave or opt to rollover into the Post Employment Health Plan. Employees with ten (10) or more years of service may choose to transfer all or part of their balance of unused accumulated annual leave to sick leave for transfer to the Post Employment Health Plan only. (Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-1049, 2-3-2005; Ord. No. 05-1199, § 1, 10-6-2005)

Sick Leave.

"Sick leave" shall mean that paid leave which is earned by an employee and used typically when an employee is unable to perform his or her duties due to any of the following:

- (1) Personal illness, injury, or any other type of physical disability except injuries incurred on the job (job related injuries are covered under those provisions which relate to workmen's compensation).
- (2) Serious illness in the employee's immediate family, such as defined elsewhere in these Policies.

It shall be the responsibility of the employee to request the use of sick leave as soon as the employee determines that he/she will be absent from his/her work place or assignment, and in no event shall such request be made after the first hour of a subject absence.

Sick leave (SL) shall be earned in accordance with the accrual rate as follows:

<i>Sick Leave Earned each pay pe- riod</i>	<i>Sick Leave Earned each pay period</i>	<i>Total Annual Days Earned Per Year</i>
75 hours worked	80 hours worked	
3.4615384	3.6923076	12

The accrual of sick leave shall begin on the first day the employee is eligible to receive benefits. Unused sick leave may be accumulated from year to year without limitation. The amount of sick leave to be used may be rounded up to the next whole hour increment.

Unless specifically waived by the CAO, an employee who has requested sick leave for a period in excess of three (3) Work Days, prior to being compensated therefor, shall provide, no later than his/her return to duty, his/her Department Head with a report from a qualified doctor which shall contain said doctor's authorization for the employee to return to duty. "Qualified doctor" shall mean a licensed doctor of medicine.

Further, an employee who has requested sick leave for the Work Day immediately prior to or subsequent to a holiday, prior to being compensated therefor, shall provide, no later than his/her return to duty, his/her Department Head with a report from a qualified doctor which

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

shall contain said doctor's authorization for the employee to return to duty. Failure to do so on the part of the employee shall result in loss of pay for the holiday and the day(s) for which sick leave was requested.

Each Department Head is authorized to develop and implement additional procedures and policies which relate to the use of sick leave which are not inconsistent with the guidelines set forth herein.

(Ord. No. 00-0174, att. A, 7-6-2000)

Termination of Employment.

An employee with three or more years of continuous service and whose employment is terminated in good standing may request and shall receive payment of unused accumulated sick leave, the amount of which shall be payment for one Work Day for each three Work Days of unused accumulated sick leave. The remaining two-thirds of sick leave not paid for, provided employee is vested with ten (10) or more years of service, will be deposited into The Post Employment Health Plan (as defined under Section: Post Employment Health Plan) to be used solely for the purpose of payment of post-employment medical premiums.

An eligible employee who desires to receive payment for accumulated unused sick leave shall request such no less than two weeks prior to the effective date of the employee's termination of employment. Otherwise, it shall be the policy of the Parish that any unused accumulated sick leave for which the employee does not receive payment shall be converted into the PEHP for employees who qualify for such benefit.

(Ord. No. 00-0174, att. A, 7-6-2000)

Sick Leave Sharing.

A regular full-time employee with five years of service shall be entitled to receive sick leave which is voluntarily donated by another employee, as set forth in the terms and conditions hereinafter cited,

The CAO may permit a regular full-time employee to receive a donation of unused sick leave accrued by and donated from other qualified employees under this subsection if all of the following facts and circumstances exist:

- (1) The employee suffers from an illness, injury, impairment, or physical or mental condition which is of an extraordinary or severe nature and which has caused, or is likely to cause, the employee to:
 - (a) Assume leave without pay status, or
 - (b) Terminate employment;
- (2) The employee's absence and the use of shared sick leave are justified;
- (3) The employee has depleted or shortly will deplete his/her annual and sick leave reserves;

ST. TAMMANY PARISH CODE

- (4) The employee has abided by these Policies relating to the use of sick leave.

The CAO shall determine the amount of sick leave, if any, which an employee may receive under this section. However, an employee shall not receive in donations an amount which equals more than 90 days of donated sick leave.

Donated sick leave shall be utilized in the order in which it is received by the CAO. Such leave shall be donated in one-day increments as is required by the Pay Plan of the recipient employee. However, no employee may donate more than five days of sick leave in a calendar year or donate any amount of sick leave if the balance of his/her sick leave is, or would result in, less than thirty days of sick leave.

The amount of unused accumulated sick leave which is donated under this provision shall be returned to the donor employee(s) whenever the CAO determines that the leave is no longer needed or will not be needed at a future time in connection with the illness or injury for which the leave was donated.

(Ord. No. 00-0174, att. A, 7-6-2000)

Civil Leave.

"Civil Leave" shall be when an employee is being granted time off without loss of pay when:

1. Performing jury duty.
2. Summoned to appear before court, grand jury, or other public body of commission, except as a plaintiff or defendant.
3. Department head determines employee(s) is prevented from performing duty by an act of God (i.e., flood, hurricane).
4. The employee is a member of reserve component of the Armed Forces of the United States or the National Guard and is ordered to active duty because of a national, state, or local emergency, act of God, civil or criminal insurrection or disobedience, or similar occurrences which threaten or affect the peace or property of the public.

(Ord. No. 00-0174, att. A, 7-6-2000)

Military Leave.

"Military Leave" - Employees who are members of a reserve component of the Armed Forces of the United States or the National Guard shall be granted a leave of absence without loss of pay, time, accumulated leave, or service rating when ordered to annual training by official written military orders for a period not to exceed ten (10) days in any calendar year. Military Leave Pay will not be granted for weekend drill or make-up drills. Time off for such sessions shall be granted but shall be charged to leave without pay or annual leave at the option of the employee.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

Employees who are inducted or ordered to active duty with the Armed Forces of the United States or National Guard for indefinite periods in excess of their annual training shall be placed on military leave without pay for the period of active military pay plus no more than 30 days.

Upon return from military leave without pay as granted above, employees shall be reinstated in the same or similar position vacated provided they were discharged under honorable conditions, are physically and mentally qualified to perform the essential functions of their job, with or without reasonable accommodation, and apply for reinstatement within 30 days of separation.

An employee requesting military leave shall submit with his/her written request for military leave his/her orders as soon as said orders are available. Upon his/her return to duty with the Parish, the employee shall provide pay stubs or other valid documentation from the respective service agency which show all amounts earned during his/her period of military leave. The employee then shall be paid the difference, if any, by the Parish based upon his/her hourly rate to compensate for earnings which were diminished due to his/her service. An employee shall not use annual leave or sick leave in lieu of military leave. An employee who exceeds the ten days of military leave shall be coded "Military Time w/o Pay."
(Ord. No. 00-0174, att. A, 7-6-2000)

Family Medical Leave.

"Family and medical leave" shall mean that leave which is allotted to an employee under terms and conditions which are consistent for such leave as set forth in the Family Medical Leave Act (FMLA), a copy of which shall be available for review in the Personnel Office. In addition thereto, those Parish policies, standards, and guidelines which relate to the administration of such leave shall be established in a supplement to these Policies, a copy of which shall likewise be provided to each employee.
(Ord. No. 00-0174, att. A, 7-6-2000)

Bereavement Leave.

"Bereavement Leave" shall mean that leave which is allotted to an employee whenever an immediate family member (as defined elsewhere in these Policies) of the employee is taken by death. An employee shall request as early as possible the use of bereavement leave. The amount of such leave with pay shall not exceed two (2) Work Days in a calendar year and is used typically to arrange and/or attend funeral activities. Bereavement leave in excess of two (2) Work Days shall be charged to the employee's annual leave balance; and if such is not available, charged to the employee's sick leave balance; and if not available be coded, as "Leave w/o Pay". The employee shall request bereavement leave from his/her Department Head. An employee who fails to return to work on the date and time set by the Department Head without receiving an appropriate extension shall be subject to disciplinary action.
(Ord. No. 00-0174, att. A, 7-6-2000)

ST. TAMMANY PARISH CODE

Unpaid Leave.

1. "Unauthorized Leave Without Pay" shall mean that leave which is allotted to an employee whenever the employee is without the benefit of some other leave and/or cannot provide a valid reason to the satisfaction of the Department Head for his/her (the employee's) absence. The use by an employee of any amount of Unauthorized Leave Without Pay shall result in disciplinary action.

2. "Leave without pay" shall mean that leave which is allotted to an employee whenever the employee is without the benefit of some other leave, but has provided a valid reason to the satisfaction of the Department Head for his/her (the employee's) absence.

3. "Administrative leave" shall mean that unpaid leave which is allotted to an employee whenever facts and circumstances exist whereby it is in the best interest of the Parish as determined by the Department Head that the employee be removed or absents himself/herself from the work place or assignment. Use of administrative leave is rare and shall be reserved for an extraordinary situation, instance, or incident (e.g. disciplinary investigation, criminal investigation, leave of absence, other extraordinary or emergency situation, instance, or incident; immediate removal of an employee from his/her work place or assignment shall be warranted in instances involving serious insubordination, theft, destructive or serious illegal acts while on the job, or other substantial reason for immediate removal deemed appropriate by the Department Head). It is the policy of the Parish that administrative leave be unpaid, however, the CAO may authorize the payment for said leave whenever facts and circumstances justify such. (Ord. No. 00-0174, att. A, 7-6-2000)

Holidays.

The Holidays observed by the Parish are:

New Year's Day*

Martin Luther King's Birthday*

President's Day*

Mardi Gras*

Good Friday

Memorial Day*

Independence Day*

Labor Day*

Columbus Day*

Veteran's Day*

Thanksgiving Day* and the Friday thereafter

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

Christmas Eve

Christmas Day*

New Year's Eve

Any other Holiday which may be declared from time to time by the Parish.

(*denotes locally observed Federal, Bank, and Postal Holiday)

Whenever a Holiday occurs on a Sunday, the first Work Day thereafter shall be the day on which the Holiday is observed; and whenever a Holiday occurs on a Saturday, the Work Day immediately preceding such shall be the day the Holiday is observed.

The Parish President shall have the right to establish "reduced work force days". A "Reduced Work Force Day" may be designated when a holiday of event occurs such that reduced work force can adequately handle the daily operation and response of parish services. Each Department Head with concurrence of the CAO shall establish in advance a schedule of employees' work schedules within their respective department for the days designated. At no time shall the said departments operate at a staff level less than half normal operations. Employees scheduled to work on a reduced work force day will not be allowed to use annual leave on that day.

Only regular full-time, affected regular part-time employees, and affected probationary employees in such positions shall be entitled to receive payment for a Holiday, all subject to the terms and conditions set forth in these Policies. A Holiday shall not be counted for purposes of determining the use of paid leave.

(Ord. No. 00-0174, att. A, 7-6-2000)

Credit Union.

Employees are eligible to participate in the ASI Federal Credit Union. The credit unions offer a number of services to members, including savings programs, share draft checking, money market accounts, certificates of deposit, individual retirement accounts, loans, check cashing, loan protection insurance, and member account insurance. All contributions are financed 100% by the employee. Employees may arrange to have payroll deductions from their paycheck or they may make a direct deposit or payment to their credit union account.

(Ord. No. 00-0174, att. A, 7-6-2000)

Group Medical Plan.

Health Insurance Coverage—Active Employees Who Are Eligible For Participation In the Parochial Retirement System. Employees who are actively employed and their qualified dependents are eligible for health insurance coverage on the first day of the month following the date of permanent, full time employment status. Full time employment is defined as a minimum of 30 hours per week. The Parish shall pay 100% of the premium for health insurance coverage on those employees electing single coverage. The Parish shall subsidize the cost of family coverage

ST. TAMMANY PARISH CODE

for those employees electing family coverage who were hired prior to October 19, 1990. The subsidy amount shall be 76% of the total premium. There is no Parish subsidy for family coverage for employees hired after October 18, 1990.

Health Insurance Coverage—Employees with Less Than Ten Years' Service with the Parish Who Terminate Employment. An employee with less than ten years' service with the Parish who terminates employment, and who qualifies for continuation of coverage under COBRA, may elect COBRA coverage. Full cost of COBRA coverage is paid by said employee.

Health Insurance Coverage—Vested Employees With at Least 5 Years of Parish Service Who Terminated Employment Prior to January 1, 1998. Upon termination from service with the Parish prior to January 1, 1998, an employee with at least 5 years of service with the Parish and vested in the Parochial Retirement System may continue uninterrupted coverage under the Health Plan. Said coverage may continue until terminated employee becomes Medicare or Medicaid eligible. Full cost of coverage shall be paid by terminated employee. Said terminated employee is not eligible for COBRA at time of termination.

Health Insurance Coverage—Employees Who Retired From the Parish Prior to January 1, 1998. The Parish shall pay 75% of the cost of insurance coverage for employees who retired prior to January 1, 1998 who elect to continue coverage under the Parish Health Plan. Retirees electing family coverage shall pay 100% of the additional cost for family coverage.

Health Insurance Coverage—Employees Hired Prior To January 1, 1998 With At Least Ten Years of Service With The Parish Who Retire After December 31, 1997 And Do Not Qualify For Immediate Retirement Under The Parochial Retirement System (Normal Date of Retirement Is Later Than Date of Separation From The Parish). Employees hired prior to January 1, 1998, who have at least 10 years of service with the Parish, are vested in the Parochial Retirement System and do not qualify for immediate retirement under the Parochial Retirement System may continue coverage under the Health Insurance Plan upon separation from the Parish. The separated employee electing to continue coverage under the St. Tammany Parish Health Insurance Plan shall pay 100% of the cost of health insurance coverage until the first full month following the date that the employee would normally qualify for retirement benefits based on age and years of service. If there has been no lapse in insurance coverage between the date of separation from the Parish and the date that the employee would normally qualify for retirement benefits based on age and years of service, the retiree shall be entitled to a reduction in the cost of the health insurance premium in the first full month following said date. The retiree shall pay the following percentage of the cost of the health insurance premium based on years of service with the Parish:

At least 10 and less than 15 years of service with STPG, retiree pays 75% of the retiree's premium.

At least 15 and less than 20 years of service with the STPG, retiree pay 50% of the retiree's premium.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

20 years or more of service with the STPG, retiree pays 25% of the retiree's premium.

Retiree's electing family coverage shall pay 100% of the additional cost for family coverage.

Health Insurance Coverage—Employees Hired Prior To January 1, 1998 Who Retire From The Parish. Employees hired prior to January 1, 1998, who have at least 10 years of service with the Parish, are vested in the Parochial Retirement System and qualify for immediate retirement under the Parochial Retirement System may continue coverage under the Health Insurance Plan upon separation from the Parish. The retiree shall pay the following percentage of the health insurance premium in the first full month following the date the employee would normally qualify for retirement benefits based on age and years of service:

At least 10 and less than 15 years of service with St. Tammany Parish, retiree pays 75% of the premium.

At least 15 and less than 20 years of service with St. Tammany Parish, retiree pays 50% of the premium.

20 years or more of service with the St. Tammany Parish, retiree pays 25% of the premium.

Retiree electing family coverage shall pay 100% of the additional cost for family coverage.

Health Insurance Coverage—Retirees Hired Prior to January 1, 1998, Who, Due To Their Age At The Time Of Employment With The Parish, Were Not Eligible For Participation In The Parochial Retirement System. The Parish shall pay 100% of the cost of a Medicare supplement policy for those retirees hired prior to January 1, 1998 with at least ten years of service with the Parish who, due to their age at the time of employment were not eligible to join the Parochial Retirement System and therefore, are not eligible for continued coverage under the Parish Health Plan.

Health Insurance Coverage—Employees Hired After December 31, 1997 With At Least Ten Years of Service At Date of Termination. Employees hired after December 31, 1997 with at least ten years of service may continue coverage under the Parish Health Plan. Said employee shall pay 100% of the cost of the health insurance premium. Said terminated employee is not eligible for COBRA at time of termination.

Health Insurance Coverage—Continuation of Coverage by Dependents of Deceased Retiree or Employee. Effective July 1, 1998 the dependents of a deceased retiree or employee may continue coverage under the St. Tammany Parish Health Plan if both of the following criteria are met:

1. The retiree or employee had at least twenty years of service with the Parish at the date of death.
2. Dependent coverage was in effect at the time of the employee or retiree's death.

Only those dependents covered under the Health Plan at the date of the employee's or retiree's deaths may continue coverage under the policy. The only exception will be that a spouse who is pregnant at the date of death of the employee or retiree may add the child to the Parish Health

ST. TAMMANY PARISH CODE

Plan. The Parish must be notified within 30 days of the birth of the child in order for the child to be added under the Parish Health Plan. Dependents of said deceased employee or retiree may continue coverage by payment of 100% of premium for the applicable single or family rate.

General. A retiree or former employee who cancels coverage may not reinstate said coverage at a late date. All coverages and benefits available and payable under the Health Insurance Plan are further defined in the Plan Document.

Definition.

Retiree is defined as a former Parish employee who, at the date of termination of service from the Parish is vested in the Parochial Retirement System and has met the qualifications to receive immediate or delayed retirement benefits under the Parochial Retirement System and whose employment is terminated in good standing. It is not the desire of the St. Tammany Parish to preclude any Retiree of the Parish, as defined herein, from making the election to withdraw his/her contribution from the Parochial Retirement System upon termination of employment. Therefore, it shall not be required that the former employee/retiree actually receive the monthly retirement benefits from the Parochial Retirement System. Coverages allowed for Retirees, as defined herein, are based upon service to the Parish and not upon the receipt of monthly retirement benefits from the Parochial Retirement System.

Retiree is also defined as a person under the employment of the District Attorney's Office, hired prior to 1/1/98, who at the date of termination of service from the Parish is vested in the District Attorney's Retirement System and has met the qualifications to receive immediate or delayed retirement (when the normal date of retirement is later than the date of separation). Any retiree who chooses to retain health insurance coverage under this definition shall be responsible to pay the full cost of the health insurance premium and no subsidy by the Parish shall be provided.

(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-1199, § 1, 10-6-2005)

Post-Employment Health Plan.

A Post Employment Health Plan is hereby established for the benefit of public employees who have separated from service. The purpose of the Plan is to provide reimbursement of qualified post-employment expenses for medical premium payments incurred during the Post Employment Period. The following shall comprise the Post Employment Health Plan for employees hired under the Police Jury.

All full time employees employed with St. Tammany Parish Government and Council (District Attorney, 22nd Judicial District Court excluded) with three (3) or more years of service are eligible to participate. Starting on the employees' 3rd Anniversary of employment, the Parish will begin funding a percentage of the employee's annual salary into the PEHP with the employee directing the funds into optional investments that are available. Every quarter and

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

upon resignation or retirement, the employee will be notified of their account balance. The money in the employee's account can be used solely for payment of medical premiums incurred after employment ceases.

In addition, the following shall apply to all eligible full time employees with ten (10) or more years of service with St. Tammany Parish upon termination of employment:

1. Remaining²/₃ of sick leave not paid out, will be deposited into PEHP account.*
2. Remaining annual/comp leave over 300 hrs. not paid out, will be deposited into PEHP account.* 1/01/98-1/01/2002, employees have the option to roll over balances into retirement time in lieu of depositing into PEHP account. After this period, hours will be automatically deposited into PEHP accounts.

Employees hired prior to 01/01/98, who retire with the following years of service, will be subject to the below scale:

At least 10 and less than 15 yrs. of service with STPG, retiree pays 75% of the premium.

At least 15 and less than 20 yrs. of service with St. Tammany Parish, retiree pays 50% of the premium.

20 yrs. or more of service with the St. Tammany Parish, retiree pays 25% of the premium.

Permanent employees hired after 01/01/98, will not be subject to the retiree scale, and will rely solely on the money that is funded into their accounts over a period of time, along with any benefit time rolled into accounts at the time of their retirement.

(Ord. No. 00-0174, att. A, 7-6-2000)

Deferred Compensation.

The Parish provides an option to an eligible employee to invest a portion of his/her present earnings in a deferred compensation plan. Enrollment by an eligible employee can be arranged through the Personnel Office.

(Ord. No. 00-0174, att. A, 7-6-2000)

Retirement System.

All regular full-time employees shall participate in the Parochial Employees' Retirement System, all as set forth in those policies, standards, and guidelines which relate to such as promulgated in a supplement to these Policies, a copy of which shall be provided to each employee.

Retirement benefits accrue from both employee and employer contributions. Contributions to the retirement system are mandatory and are deducted from the employee's salary each Payroll Period. Said retirement system provides for retirement benefits and disability protection when the employee meets the plan requirements.

ST. TAMMANY PARISH CODE

Upon termination of employment without retiring, the accumulated contributions of the employee are refunded upon his/her request. Employer contributions, however, are not refunded under any circumstances.

Enrollment and benefit forms are available through the Personnel Office and it is the responsibility of the employee to maintain information on file up-to-date as such relates to his/her retirement account (e.g. name, address, beneficiary, etc.).

(Ord. No. 00-0174, att. A, 7-6-2000)

Social Security.

Any employee who is not subject to the retirement system policy set forth herein shall pay Social Security (FICA) tax.

(Ord. No. 00-0174, att. A, 7-6-2000)

Comprehensive Budget Reconciliation Act.

Those policies, standards, and guidelines which relate to COBRA benefits for employees shall be established in a supplement to these Policies, a copy of which shall be provided to each employee.

(Ord. No. 00-0174, att. A, 7-6-2000)

CONDUCT

Employee Conduct.

It shall be the duty of every employee to maintain high standards of cooperation, efficiency, and integrity in his/her work, and to effect his/her conduct in accordance with these Policies. In particular, but not exclusive of any other prohibited or proscribed conduct, an employee shall not:

1. Report to work under the influence of intoxicants or unprescribed/illegal drugs, or use or possess such substances while on Parish property or while on duty.
2. Fail to follow the orders of a supervisor, or fail to comply with any requirement which may be set forth in these Policies or other policies, standards, or guidelines set forth by the Department Head, CAO and Parish President.
3. Be absent from work without permission or fail to report such to the Department Head as set forth elsewhere in these Policies.
4. Be habitually absent or tardy.
5. Fail to perform his/her duties and responsibilities in an efficient and/or effective manner.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

6. Act wasteful or abuse, misuse, misapply, or misappropriate material, property, or working time.
7. Fail to work along or be contrary with fellow employees, the result of which is work performed in an inefficient and/or ineffective manner.
8. Fail to observe proper security procedures.
9. Engage in fighting or provoking or instigating a fight, or engage in any other conduct on the job which violates standards of common decency or morality.
10. Commit any unlawful act, or fail to comply with any law, ordinance, or rules and regulations which may be required in the performance of an employee's duties.
11. Violate any safety rule and regulation, procedure, process, or guideline.
12. Express in any way critical or derogatory remarks towards any person or make false or unfounded accusations, the result of which would likely discredit another employee, or a supervisor, Department Head, or any other public employee or official.
13. Remove without permission, misappropriate or misapply any money, merchandise, or property, which may include any property in the custody of the Parish and any property of the Parish.
14. Lie to a supervisor as such relates to the duties or responsibilities of the employee.
15. Act dishonestly, which shall include intentionally giving false information, falsifying records, or making other false statements.
16. Be on the premises of any Parish property during non-working hours without permission of the Department Head.
17. Divulge or misuse confidential information, which shall include the removal from Parish premises without proper authorization of any employee list or record, or design, drawing, computer record or program, or other confidential information of any kind.
18. Accept a fee, payment, gift, or any other item of value, privilege, or benefit for the performance of the employee's official duties.
19. Act unwilling or reluctant to perform a task which is assigned by a supervisor.
20. Falsify a time record or any other record or account of the Parish.
21. Abuse any leave benefit (e.g. reporting sick when not sick).
22. Use profane or abusive language towards or in the presence of another employee or member of the public.
23. Lobby before the legislature or other governmental agency or organization, or represent the interest of the Parish to any person or entity, without specific authorization from the Parish President and as such relates to the mission or operations of the Parish

ST. TAMMANY PARISH CODE

24. Without specific authorization from the respective Department Head, use during the Work Day a television, radio, headset-type radio or recorder, or any other similar electronic amusement device. More specifically, an employee shall not use any such device in the presence of the public or whenever it is foreseeable that such use could occur in the presence of the public.
25. Without specific authorization from the respective Department Head, use any computer program, software, electronic file, peripheral device, etc. More specifically, an employee shall not use or engage in the use of any computer game of any nature whatsoever during the Work Day and whenever in the presence of the public or whenever it is foreseeable that such use could occur in the presence of the public.
26. Without specific authorization from the respective Department Head, peddle or solicit a donation or sale of an item, service, or contribution of any kind whatsoever while on duty or in the work place or in the presence of the public.
27. While on duty engage in, conduct, effect or attempt to engage in, any campaign activity or effort whatsoever for any candidate who has qualified as a candidate for an elected public office.
28. Intentionally participate with any other employee or private person in any act listed above.
29. Order from a company or catalog (i.e. ABC, LTC etc) any personal item which will result in an invoice being issued under the parish's name.
30. Unwillingness or failure to perform the duties of his/her position in a satisfactory manner.
31. The deliberate omission of any act that it was the employee's duty to perform.
32. The commission of any act or acts detrimental to the departmental service, or contrary to public interest.
33. Insubordination.
34. Conduct of a discourteous or offensive nature toward the public. Any parish official or employee; including any dishonest, disgraceful, immoral, or prejudicial behavior.
35. Drinking alcoholic beverages while on duty or reporting for duty while under the influence of these.
36. Using, or promising to use, his/her influence or official authority to secure appointment to, or eligibility for, a position within the classified service for any reason other than qualified merit.
37. Soliciting or receiving any money, goods, or service from any person or group of persons, for any political party or political purpose.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

38. Any act or failure to act that sufficiently indicates that the offender is unsuitable or unfit to be employed in the respective service.
(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-1049, 2-3-2005)

Disciplinary Action.

It shall be the policy of the Parish to effect disciplinary action in a fair, reasonable, and impartial-manner, all for the purpose of assuring and promoting efficient and effective service to the public. Consequently, the primary purpose of disciplinary action is not punitive in application, but rather is effected to maintain the competency and integrity of Parish service. Disciplinary action shall include counseling, warning, reprimand, suspension, demotion, and discharge.

Whenever the conduct of an employee falls below acceptable standards or is not in accordance with these Policies, he/she shall be subject to disciplinary action which shall be effected only when there is cause for such. It is the responsibility of the Department Head to thoroughly and objectively evaluate the facts and circumstances which relate to the cause for disciplinary action when initiating such. The nature and severity of the infraction and the employee's record shall be considered in the assignment of disciplinary action.

The disciplinary action effected for an employee's conduct and the pertinent information which relates to such disciplinary action shall be reviewed in private with the employee and shall include the following: the cause for the disciplinary action, the facts and circumstances which relate to the cause, the disciplinary action to be imposed, the effective date of such action, and the right of the employee to air a grievance on the matter if such is authorized in these Policies (see Grievance Procedure).

Note: Immediate removal of an employee from his/her work place or assignment shall be warranted and effected in instances involving serious insubordination, theft, destructive or serious illegal acts while on the job, or other substantial reason for immediate removal deemed appropriate by the Department Head.

In every case of disciplinary action an employee in the classified service, the department head shall, within three working days, furnish the employee and Personnel Administrator a written statement giving the complete reasons therefor. The Personnel Administrator shall notify the employee in writing at his last known address informing the employee of the action, grounds for the action, and his/her right to make an appeal in writing. Upon receipt of an appeal the Personnel Administrator shall make an investigation and thereafter process the appeal.

Disciplinary action shall include the following:

Counseling. This type of disciplinary action shall be applied to infractions of a fairly minor degree. The Department Head shall verbally counsel an errant employee 1) as to the subject infraction, 2) as to the proper conduct which is required, and 3) if the condition is not

ST. TAMMANY PARISH CODE

corrected, the employee shall be subject to more severe disciplinary action. At the option of the Department Head, a letter of instruction to the employee may accompany or follow the counseling meeting.

Warning. This type of disciplinary action shall be applied to infractions of a relatively minor degree. The Department Head shall verbally inform the employee that the Department Head is issuing a warning, that the employee is being given an opportunity to correct the condition, and if the condition is not corrected, the employee shall be subject to more severe disciplinary action. The Department Head who issues a warning shall report such in a brief summary or in a letter of instruction to the employee and cause such to be placed in the employee's personnel file.

Reprimand. This disciplinary action shall be effected in the event the employee continues to disregard a warning or warnings, or if the infraction is severe enough to warrant a reprimand. Upon learning of the infraction, the Department Head shall issue a written reprimand within three Work Days. The reprimand shall state the nature of the infraction in detail and what corrective action which must be taken by the employee to avoid further disciplinary action as set forth below.

Suspension. This disciplinary action shall be effected in the event the employee's conduct continues to warrant the issuance of a subsequent reprimand, or if the infraction is severe enough to warrant a suspension of the employee from his/her duties and responsibilities. While on suspension for five or less Work Days, the employee shall not be entitled to paid compensation, but shall retain his/her benefits or the accrual thereof. While on suspension for more than five Work Days, the employee shall not be entitled to paid compensation nor the use or accrual of benefits. Any period of suspension may be effected in a "part work/part suspension" arrangement (e.g. the suspension is effected for part of the Work Day(s), or on certain days the suspension is in effect).

Demotion. Demotion may be used in those instances in which an employee's conduct is of such degree that his/her removal from the duties and responsibilities associated with the position is warranted, but discharge is unwarranted. (See policy on Demotion)

Discharge. This disciplinary action shall be effected in the event the employee commits an infraction severe enough to warrant that his/her employment with the Parish be terminated, or in the event that the employee's conduct, after the issuance of lesser disciplinary action(s), continues to be not in compliance with or in violation of any provision of these Policies. An employee may be discharged after repeated infractions of a less serious nature if the infractions have been documented by supervisory staff and an appropriate behavioral change has not resulted from previous progressive disciplinary actions.

With the exception of counseling and a warning, whenever a disciplinary action has been instituted, the employee shall be provided with a copy of the report of disciplinary action at the time the Department Head (supervisor) reviews such with the employee. The employee shall

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

sign said report to acknowledge receipt thereof and the original shall be placed in the employee's personnel file. If the employee refuses to sign the acknowledgment, the supervisor shall note on said report that the employee received a copy thereof, but refused to sign such. The superior of the supervisor shall then be made aware of such so that a proper and timely disposition of the matter can be made, which may include increased or escalated disciplinary action.

Although counseling or the issuance of a warning or reprimand cannot be appealed by an employee, a suspension, as a result of disciplinary action may be appealed within five (5) days of the subject disciplinary action by the employee in writing to the CAO for his/her review and consideration. A suspension, as a result of disciplinary action, (or a termination), may be appealed.

(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-1049, 2-3-2005)

Grievance Procedure.

Every employee is not only permitted, but is encouraged, to air grievances that they may have with regard to their treatment or conditions on the job over which the Parish might be expected to have some control, all as set forth in these Policies. Punitive action shall not be taken against any employee for submitting a grievance in good faith. Any attempt by an employee to bypass a level of supervision in the grievance process shall be considered grounds for disciplinary action. Grievances may be filed for the following reasons:

1. Demotion or Reassignment that involves a decrease in salary.
2. Suspension
3. Discharge as a result of disciplinary action.

An employee who wishes to air a grievance (hereinafter referred to as the "grievant") shall first submit a written grievance outlining the specific and detailed facts to his/her immediate supervisor within five working days after learning of the incident at issue. It shall be the responsibility of the immediate supervisor to study the grievance and attempt to resolve it within five working days. If the grievant feels the immediate supervisor's actions are unsatisfactory or inadequate, there shall be a meeting between the grievant, the immediate supervisor, and the Department Head. The CAO shall also attend this meeting whenever possible. If the decision reached in this meeting is unsatisfactory to the grievant, the grievant may appeal to the Personal Board for the reasons previously noted. The Personal Office shall notify the Board, of time and date of meeting. Admittance to the meeting shall be limited. Notice of such meeting shall be given to the grievant at least ten work days prior to the meeting by certified mail. A grievant shall have the right, but shall not be required, to be represented by counsel.

ST. TAMMANY PARISH CODE

The Personal Board shall consist of 5 members in accordance of the provision of the St. Tammany Parish Home Rule Charter.

1. The Board shall decide appeals promptly, but in any event within 30 days after completion of a hearing(s).
2. The Board shall make its decision on hearings on the facts presented by the appellants/ parties concerned.
3. No hearing or meeting to investigate shall be held unless both the employee and appointing authority/department head shall have been advised at least ten days in advance of the date, time and place thereof. If either of the parties fails to appear at the place on the day and the hour fixed for such hearing, the Board may, at its discretion, decide the issue involved on the basis of the evidence presented.
4. The Board shall not be required to have the testimony taken at the hearing transcribed, but either the employee or the appointing authority may, at its own expense, make the necessary arrangements therefor.
5. The decision of the Board, together with its written finding of fact, if required, shall be certified in writing to the appointing authority and shall be forthwith enforced by appointing authority.
6. Any classified employee and any appointing authority shall have the right to appeal from any decision of the Board. This appeal shall lie direct to the court of original and unlimited jurisdiction in the civil suits for the parish of St. Tammany. Such appeal shall be taken by serving the Board, within thirty (30) days after entry of its decision, a written notice of appeal, stating the grounds thereof and demanding that a certified transcript of the record, and/or written findings of facts, and all papers on file in the office of the Board affecting or relating to such decision, be filed with the designated court. The Board shall, within thirty (30) days after filing such notice of appeal, make, certify and file such complete transcript or written findings of facts with designated court.
7. Refusal to testify: Any employee in the classified service who shall willfully refuse or fail to appear before any court or board properly authorized to conduct any hearing or inquiry, or if such employee having appeared, shall refuse to testify or answer any relevant question, except upon the grounds that their testimony or answers would incriminate them, shall, in addition to other penalties to which they may be subjected, forfeit their position and shall not be eligible for appointment to any position in the classified service for a period of six years.
8. Oaths, Subpoenas, Production of Records: The Board, each member of the Board, and the Personnel Administrator shall have the same power to administer oaths, subpoena witnesses, and compel the production of records and papers pertinent to any investi-

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

gation or hearing. All applications for the issuance of subpoenas must be in the hands of the Board at least five business days prior to the date established for the hearing and said application shall contain the full name and address of all persons to be subpoenaed.

(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 05-1049, 2-3-2005)

Personal Appearance and Hygiene.

It shall be the responsibility of each employee that his/her personal appearance and hygiene best represents a favorable image of the Parish. Whenever possible, an employee shall be well-groomed and dressed in a manner suitable for the public service environment. It likewise shall be the responsibility of the employee to maintain a clean, orderly, and neat work place. Whenever necessary, the Department Head shall discuss in private any of the provisions of this subject with an employee.

(Ord. No. 00-0174, att. A, 7-6-2000)

Dress Code.

All personnel are required to report to work in appropriate attire based on their job class and duties. Administrative policies for specific dress code requirements shall be developed to insure that all staff present to the general public an appropriate and professional appearance.

(Ord. No. 00-0174, att. A, 7-6-2000)

Telephone Calls.

A Parish telephone shall be used only for conducting the business of the Parish, but may be used for personal business on a restricted basis, as set forth herein. Personal telephone calls placed or received during business hours shall be held to both a minimum number and time limit and shall not interfere with the employee's work. Whenever a personal long distance call is to be placed by an employee, the call shall be billed to the employee's home number or personal calling card, or placed collect. It is the employee's responsibility to ensure that no cost to the Parish results from their personal telephone calls. Violation of this policy shall minimally result in cost reimbursement to the Parish and shall subject the employee to disciplinary action.

(Ord. No. 00-0174, att. A, 7-6-2000)

Computer Use.

A Parish computer shall be used only for conducting the business of the Parish, but may be used for personal business on a restricted basis, as set forth herein. Personal computer use during business hours shall be held to a minimum and shall not interfere with the employee's

ST. TAMMANY PARISH CODE

work. It is the employee's responsibility to ensure that no cost to the Parish results from his/her personal computer use. Violation of this policy shall minimally result in cost reimbursement to the Parish and shall subject the employee to disciplinary action.

(Ord. No. 01-0285, att. A, 4-5-2001)

Internet.

The Parish provides access to the Internet for business purposes only. The Internet represents a useful tool for the Parish in conducting its business, but like any other tool, it must be used properly.

Any improper use of any internet tools; including the world wide web, FTP, telnet and other communications programs; is strictly prohibited.

The Parish does not permit the downloading or installation on Parish computers of application software from the Internet without authorization of Department of Information Services.

(Ord. No. 01-0285, att. A, 4-5-2001)

Email.

Employees are reminded that computers, computer networks, E-mail, telephone systems (including voice mail), and other electronic communication systems (and all communicates created, received, stored on or transmitted through those systems) are Parish property. The Parish reserves the right to inspect, examine, and monitor the use of its computers, computer networks, E-mail, telephone systems (including voice mail), and all other electronic communication systems at any time and without any notice. Accordingly, employees should have no expectation of privacy regarding any communications made through such systems.

Users often use E-mail for less formal correspondence. Because the E-mail system often feels like a less formal method of communication than paper, and it is not a face-to-face mode of communication, users may feel free to be less cautious or more candid in the contents of messages. Please remember, however, that the E-mail system is not a private mode of communication, and defamatory or inappropriate material or messages distributed through the E-mail system could expose the user to liability as well as disciplinary action.

(Ord. No. 01-0285, att. A, 4-5-2001)

Political Activities.

While on duty, in the work place or on official assignment, employees of the classified service are prohibited from engaging in political activities as follows:

- a. Participate or engage in political activity ("Political activity" means an effort to support or oppose the election of a candidate for political office or to support a particular political party in an election.)
- b. Make or solicit contributions for any political party, faction or candidate.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

- c. Take an active part in the management of the affairs of a political party, faction, candidate, or any political campaign, except to exercise his/her right as a citizen to express his opinion privately, to serve as a commissioner or official watcher at the polls, and to cast his/her vote as desired.
- d. No person shall solicit contributions for political purposes from a classified employee or use or attempt to use their position in the parish to service to punish or coerce the political action of a classified employee.

Any classified employee who qualifies with the Clerk of Court for any of the following elected positions shall be placed on administrative leave.

Parish President, Parish Council Member, State or Federal Office

In lieu thereof and if approved by the Department Head and CAO, an employee may use any accumulated annual leave.

Any employee who qualifies for and/or is elected to any other local elected position is prohibited from engaging in the following activities:

- a. Campaigning during work hours.
- b. Campaigning in parish vehicle.
- c. Use of parish property and supplies for campaign related activities.
- d. Use of parish position to influence a vote.
- e. Conducting any business related to the elected position on parish time.

Violations. It shall be the duty of any employee or parish official to report promptly any violation of this provision to the Personnel Administrator, whose duty it shall be to make a preliminary investigation concerning the alleged violations and report findings to the CAO. (Ord. No. 00-0174, att. A, 7-6-2000)

Employee Ethics.

The purpose of this policy is to establish guidelines for ethical standards of conduct which shall govern employees in the performance of business of the Parish and the duties of their respective jobs. This policy is intended to provide positive direction to employees in order to prevent potential conflicts of interest.

This policy is not intended to be all-encompassing in its application or its definition of conflict of interest. A "reasonable person" theory, as follows, shall apply: Any action or failure to act which may be deemed inappropriate by a reasonable person, whether or not such action or failure to act is specifically cited in this policy, shall be subject to inquiry.

ST. TAMMANY PARISH CODE

An employee shall not act or fail to act, the result of which conflicts, or which creates an appearance of conflict, with the performance of the employee's official duties. An employee shall be deemed to have a conflict of interest whenever any of the following facts and circumstances is apparent:

1. The employee directly or indirectly solicits any gift or accepts or receives any gift - whether it be money, services, loan, travel, promise, or any other form - under the following circumstances: (1) it could be reasonably inferred or expected that the gift was intended to influence them in the performance his/her official duties; or (2) the gift was intended to serve as a reward for any official action on his/her part.
2. The employee invests or holds any investment, directly or indirectly, in any financial business, commercial, or other private transaction that creates a conflict with his/her official duties.
3. The employee engages in, solicits, negotiates for, or promises to accept private employment or renders services for private interests or conducts a private business when such employment, service, or business creates a conflict with or impairs the proper discharge of his/her official duties.
4. The employee represents any outside interest before any agency, whether public or private, except with the authorization of, or at the direction of, the Parish President.
5. The employee, acting in his/her role as an employee of the Parish, endorses a commercial product or service by agreeing to use his/her photograph, endorsement, or quotation in paid or other commercial advertisements, whether or not for compensation.
6. Except as may be specifically authorized by the Parish President, the employee requests, uses, or permits the use of Parish-owned vehicles, clothing, equipment, materials, or other property for unauthorized personal convenience, for profit, for private use, or as part of any secondary employment.
7. The employee uses Parish property or his/her on-duty time in any manner to promote any political issue or candidate, or to solicit funds for any political purpose or to influence the outcome of any election.
8. Subject to the opinion of the Louisiana Attorney General, the employee holds an elective office or appointed position in which the holding of such office or position would be incompatible or would substantially interfere with the discharge of the employee's official duties.

A request for an interpretation of any provision of this subject shall be directed in writing to the CAO.

(Ord. No. 00-0174, att. A, 7-6-2000)

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

Work Place Safety From Substance Abuse.

It is the policy of the Parish that the consumption of alcohol or other prohibited substances (e.g. drugs, etc.) by an employee shall not be tolerated. The Department Head shall assure that the work place is free of any employee who is under the influence of alcohol or other prohibited substance while on duty, in the work place, or in the presence of the public, or whose job performance may be impaired by the use of alcohol or other prohibited substance while not on duty.

Policies, standards, and guidelines which relate to drug and/or alcohol screening for employees shall be established in a supplement(s) to these Policies, a copy of which shall be provided to each employee.

(Ord. No. 00-0174, att. A, 7-6-2000)

HARASSMENT

Unlawful Harassment.

This policy is intended to ensure an environment which respects the dignity and worth of each individual and is free from all forms of unlawful discrimination, including sexual harassment and harassment because of race, color, religion, gender, national origin, age, ancestry, disability, political affiliation or belief or activity, or any other characteristic prohibited by law. Discriminatory harassment, including sexual harassment will not be tolerated. This policy applies to all harassment occurring in the work environment whether in our offices or elsewhere. The policy covers all employees of the parish.

(Ord. No. 00-0174, att. A, 7-6-2000)

Sexual Harassment.

For purposes of this policy, sexual harassment is defined as unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when:

1. Submission to such conduct is either explicitly or implicitly made a term or condition of an individual's employment; or
2. Submission to or rejection of such conduct is used as a basis for employment decisions affecting the individual; or
3. Such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or creating an intimidating, hostile or offensive work environment.

Some examples of what may constitute sexual harassment are: threatening or taking adverse employment actions if sexual favors are not granted; demands for sexual favors in exchange for favorable or preferential treatment; unwelcome and reported flirtations, propositions or advances; unwelcome physical conduct; whistling, leering, improper gestures or offensive re-

ST. TAMMANY PARISH CODE

marks, including unwelcome comments about appearance; sexual jokes or inappropriate use of sexually explicit or offensive language; and the display in the workplace of sexually suggestive objects or pictures. The above list is not intended to be all-inclusive.

(Ord. No. 00-0174, att. A, 7-6-2000)

Other Prohibited Harassment.

For purposes of this policy, other prohibited harassment is defined as either verbal or physical conduct that denigrates or shows hostility or aversion toward an individual because of his/her race, color, religion, gender, national origin, age, ancestry, disability, or any other characteristic protected by law and that:

1. Has the purpose or effect of creating an intimidating, hostile or offensive work environment; or
2. Has the purpose or effect of unreasonably interfering with an individual's work performance.

Some examples of such harassment include but are not limited to: using epithets or slurs; threatening, intimidating or engaging in hostile acts that focus on a protected characteristic, including jokes or pranks; or circulating in the workplace written or graphic material that denigrates or shows hostility or aversion to a person or group because of a protected characteristic.

(Ord. No. 00-0174, att. A, 7-6-2000)

Reporting Harassment.

The Parish requires the prompt reporting of all incidents or discriminatory harassment. If you believe you are being harassed or have observed harassment, you should promptly notify any Department Head, the CAO or the Personnel Administrator.

When a report of harassment is made, the parish will undertake a prompt and thorough investigation as may be appropriate under the circumstances. The steps to be taken during the investigation will vary depending upon the nature of the allegations. Confidentiality will be maintained throughout the investigatory process to the extent practical and consistent with the organization's needs. Upon completion of the investigation, the outcome will be communicated to the aggrieved party and the person(s) accused and remedial action will be taken, if appropriate.

Individuals who report harassment or are involved in the investigation of a harassment complaint will not be subject to reprisal or retaliation. Retaliation is regarded as a very serious violation of this policy and should be reported immediately.

The managers and supervisors of the parish will be held accountable for adhering to this policy, for reporting promptly any incident of harassment and for maintaining a positive and produc-

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

tive work environment. If any manager or supervisor receives a report of harassment or believes he or she has observed harassment, the manager or supervisor is required to promptly notify one of the individuals listed above. Failure to make the required notification may subject the manager or supervisor to discipline, up to and including discharge.
(Ord. No. 00-0174, att. A, 7-6-2000)

Whistle Blower Policy.

The Parish strives to conduct its business with the utmost integrity and in strict accordance with all applicable federal, state and local law. Accordingly, employees are encouraged to bring to the attention of the Parish any improper actions of its officials and employees. The Parish shall not retaliate against any employee who makes such a disclosure in good faith.

An employee is encouraged to utilize the administrative "chain of command" in reporting these actions. Should the employee feel intimidated or otherwise uncomfortable with such an approach, he/she should request a personal meeting with either the CAO, Parish President or the Administrative Attorney before proceeding with such an issue to any agency or entity outside the Parish government system.

Improper actions are actions undertaken by an officer or employee in the performance of his or her official duties which (a) are in violation of any federal, state or local law, (b) constitute an abuse of authority, (c) create a substantial and specific danger to public health or safety, or (d) grossly waste public funds. Improper actions do not include common personnel actions, such as the processing of grievances, decisions regarding hiring, promotion, firing and other disciplinary action.

(Ord. No. 00-0174, att. A, 7-6-2000)

TRAINING AND TRAVEL

Training Programs.

It is the policy of the Parish to encourage and coordinate training opportunities for employees and supervisors in order that services rendered by employees shall be more efficient and effective. "Training" shall mean any work related program, seminar, conference, convention, course or workshop attended by an employee whose tuition and/or expenses are funded in whole or in part by the Parish or while the employee is in a paid status with the Parish.

Academic training. Employees are encouraged to continue training for their respective position through participation in off-duty/non-working hours educational programs. Educational expenses incurred by such participation may be granted for job related courses with prior approval of the CAO, provided funds have been budgeted for. Successful completion shall be defined as receipt of a certificate of satisfactory completion or a grade of "B" (3.0 grade point) or better in the case of academically rated courses (or attainment of pass in a

ST. TAMMANY PARISH CODE

pass/fail grading system.) An employee who completes such course/program with less than a grade "B" (3.0 grade point, will be required to reimburse the Parish for the total cost of the tuition. Tuition expenses are for the course only; no expenses shall be allowed for books, lab fees, travel or material costs. Approval for tuition expenses shall only be allowed for courses offered by accredited colleges, universities or vocational training institutes. Training expenses are generally available to an employee who has successfully completed their designated probation period. Consideration of an employee's request for tuition is dependent upon budgetary constraints and the recommendation of the employee's Department Head. Time spent in attendance at these courses shall be considered the employee's personal time and is not counted as time worked.

Other training. Parish-sponsored and required training should be arranged during regularly scheduled work hours. A Department Head may change the standard work hours to accommodate or require attendance at such training activities. Such required training shall be recorded as time worked within the meaning of this policy. An employee who acquires training on his/her own time and expense is encouraged to notify the Personnel Office so the information can be noted in the employee's personnel file.

(Ord. No. 00-0174, att. A, 7-6-2000)

Travel.

Travel expenses while on parish business. It is the policy of the Parish to reimburse employees for reasonable and necessary expenditures made by employees while on official and authorized business. Mileage shall be reimbursed at a rate per mile equal to the allowable IRS rate and all other allowable expenses on an actual cost basis. Claims for reimbursement of travel expenses, other than mileage, shall be accompanied by original invoices and/or receipts showing proof of payment of such claims.

1. All expense reimbursements presented are to be approved by signature of the Department Head prior to submittal for payment.
2. All expense reimbursements of Department Heads are to be approved by signature of the CAO prior to submittal for payment.
3. Requests for travel advances must be submitted seven days in advance of the travel date, and must be approved by signature of the Department Head (or CAO for Department Heads) prior to submittal.
4. All expense account reports detailing travel expenses must be submitted within 30 days of the return to duty by the subject employee. Failure of the employee to submit proper documentation for the amount advanced within said 30-day period shall result in a garnishment of the employee's paycheck.

APPENDIX B—PARISH PERSONNEL POLICIES ORDINANCE

5. Special Meals which are not a part of an employee's travel, but rather are incurred by the employee while performing Parish duties shall be reimbursed in full. When such an expense is incurred, the employee must include the following information on the receipt: date, purpose of meal, all persons present for which the meal was incurred.
(Ord. No. 00-0174, att. A, 7-6-2000; Ord. No. 01-0353, 8-2-2001)

Travel Practices.

1. The Department Head and the CAO shall approve in advance any request for out-of-state or overnight travel.
2. The employee, to the extent which is reasonable and practical, shall obtain lodging which is most economical (e.g., single room at a regular or discount rate)
3. If the employee elects to be accompanied by his or her spouse and/or children, the receipts for lodging and meal expenses shall be noted with the additional cost to be paid by the employee.
4. The cost of alcoholic beverages and bar tabs are not reimbursable expenses.
5. The employee is allowed a flat \$10.00 per day based on a 24-hour period for non-verified, miscellaneous expenses (e.g., parking meter charges, pay telephone calls, bellman tips, soft drink machine use, etc.).
6. Mileage shall not be paid for commuting from an employee's residence to the work place. Mileage reimbursements for assignments within the Parish shall be subject to the CAO approval. The maximum mileage reimbursements to an employee who chooses to drive in lieu of air travel shall not exceed the lowest reasonable cost of an airline ticket to the same destination.
7. Reimbursement for meals shall be allowed only when the employee is attending a seminar or conference as a representative of the Parish, or when the employee's attendance at the event is attendant to the duties and responsibilities of the employee. Reimbursement shall not be allowed for meetings which are of a social nature.
8. Parking fees shall be reimbursed for actual cost and receipts shall be presented whenever possible.

Nonreimbursed expenses:

1. Laundry, cleaning, or valet services (except whenever the period of travel exceeds seven days).
2. Tobacco.
3. Alcoholic beverages.
4. Entertainment.

ST. TAMMANY PARISH CODE

5. Personal telephone calls to home (limited to one per day).
 6. First class travel accommodations whenever economy or coach class accommodations are available.
 7. Meals and lodging in lieu of other meals and/or lodging which are included in a conference registration fee.
 8. Fines, forfeitures or penalties.
 9. Rental vehicles, if previously approved by the CAO.
 10. Expenses of a spouse, child, and/or other non-employee.
 11. Loss or damage to personal property.
 12. Barber, beauty parlor, shoe shine, or toiletries.
 13. Personal postage.
