## ADMINISTRATIVE COMMENTS

The amendment would clarify that the excavation of materials associated with the provision of detention (i.e. 25% reduction of 100 year storm) as required in Section 125(e)(4) may be used in the calculation of fill mitigation as required in various sections of Section 115-3 of the St. Tammany Parish Code of Ordinances.

If the fill mitigation required exceed the fill removed from the floodplain during the construction of the detention ponds, the difference between the two volumes must be provided as additional storage capacity.
