

This is only the scope of work for the project. For more information, please contact Procurement at [Purchasing@stp.gov.org](mailto:Purchasing@stp.gov).

The Parish owns and operates 185 lift stations located throughout St. Tammany Parish. Every quarter, the Parish will identify the lift stations in need of cleaning. The Contractor is expected to clean approximately 10 normal sized lift stations per day under normal circumstances. The cleaning shall consist of pressure washing the walls of each wet well, floats, rails, piping/tubing, etc., and removing the contents of the lift station (waste/washwater, grease, debris, etc.) via vacuum truck. The Contractor must transport the lift station contents to the Parish's Westwood Regional Wastewater Treatment Plant pit (Westwood Pit) for future disposal. Proposals shall be based upon an 8 hour day. The contract will allow a maximum of 10 cleaning days per quarter to clean all identified normal sized lift stations.

The Parish operates two (2) large lift stations (Faubourg and Castine) that may require cleaning once per month, with an option for up to four (4) additional cleanings throughout the year, as needed. The cleaning shall consist of pressure washing the walls of each wet well, floats, rails, piping/tubing, etc., and removing the contents of the lift station (waste/washwater, grease, debris, etc.) via vacuum truck. Because of quantity of material removed from these lift stations, the Contractor will be required to transport this material for immediate off-site disposal rather than temporarily dumping at the Westwood Pit, as is done with the normal sized lift stations. The contract will allow a maximum of sixteen (16) cleaning events per year for the Faubourg and Castine lift stations. Proposals shall be based on a per cleaning event basis for these two (2) lift stations.

The Westwood Pit may require cleaning up to once per quarter. The Contractor will be required to clean and remove the contents of the Westwood Pit for off-site disposal. The contract will allow a maximum of four (4) cleaning events per year but the actual number of cleaning events will be determined on an as needed basis. Pricing shall be based on a per cleaning event basis for the Westwood Pit.

All work is to be performed in compliance with all State, Federal, OSHA and Contractor's safety standards. Likewise, any spills occurring as a result of lift station cleaning activities shall be cleaned and reported by the Provider in accordance with state and federal standards. A Parish employee will be provided to guide and/or direct your operator/driver to all lift station locations. Additionally, the Parish will provide access to fire hydrants for wash water.
