

## ST. TAMMANY PARISH

PATRICIA P. BRISTER  
PARISH PRESIDENT

**August 7, 2018**

Please find the following addendum to the below mentioned BID.

**Addendum No.:** 1

**Bid#:** 300-00-18-37-2

**Project Name:** Airport Rd Mill and Overlay

**Bid Due Date:** Wednesday, August 15, 2018

### **QUESTIONS & ANSWERS:**

---

**Question #1:** Note 4 under Striping on Sheet 2 of the plans states that Temporary Pavement Markers shall be paid under 713-01 Temporary Signs and Barricades. First of all, we believe you mean “Markings” and not “Markers”? Second, this is a major traffic area and it is our opinion that not everyone bidding this project will understand equally what temporary striping is required for this work. Please be specific as to what you are going to require for this work. Will we only be required to put down 4 foot temporary tape along the centerline or will we be required to put complete painted temporary striping including painted edge lines, painted 10 foot centerlines, painted turn lane makers, and painted stop bars? This makes a big difference in price and we would respectfully request clarification.

**Answer #1:** Temporary Pavement Markings will be required as per Table 713-1 of the LADOTD 2016 Standard Specifications for Roads and Bridges. Tape will be allowed but will have to be maintained at all times. If the tape does not stick, Contractor will be required to paint temporary lines. The need for edge lines depends on the amount of time pursuant to Table 713-1. North of I-12 is considered an Undivided Multilane Highway and South of I-12 is considered a Divided Multilane Highway.
