

## ST. TAMMANY PARISH

MICHAEL B. COOPER  
PARISH PRESIDENT

**February 4, 2022**

Please find the following addendum to the below mentioned BID.

**Addendum No.: 1**

**Bid#: 22-2-2**

**Project Name: Fairgrounds Phase 3 – Horse Stalls**

**Bid Due Date: Thursday, February 10, 2022**

### **QUESTIONS & ANSWERS:**

---

Question #1 – I had a few questions regarding the bid for the stall bid for your Parish. I wanted to check with you as far as the specifications go regarding the stalls, and to see if you are willing to accept an alternate bid for these? Our Expo Stalls are not going to be lightweight like the ones you are requesting in your bid package as well as we do not have vinyl inserts, we have poly inserts in our Expo Stalls.

**Answer #1 – We will accept poly inserts. Polyethylene panel (minimum of ¼” thick). The walls are to be constructed with ¼” High Density Polyethylene panels inserts. The poly panels are to be installed to a solid flange. The HDPE poly sheet bolted in with 3/16” x 2” minimum bolt on strip sandwiching the poly sheets to the metal frame.**

Question #2 – We also have different spacing on our rails.

Question #2a – Our Stall fronts are going to weigh roughly 225 LBS.

**Answer #2a – These are portable stalls that will be set up and taken down several times a year. They must meet or weigh less than the specifications.**

## ST. TAMMANY PARISH

MICHAEL B. COOPER  
PARISH PRESIDENT

Question #2b - Our panels are going to weigh roughly 195 LBS.

**Answer #2b – This will NOT be accepted.**

Question #2c – The door Width will be 46” wide.

**Answer #2c – The 46” is approved.**

Question #2d – Our vertical Bar rail spacing is 2.25”

**Answer #2d – This will be accepted.**

Question #2e - And our Horizontal Rail spacing is 4.8” spacing. Please let me know if you will accept these specs I have given you and I will get to work on it. Let me know if you have any questions.

**Answer #2e – This will be accepted.**
